VITAL FACTS Your Sales Force Should Know

In O-Cedar Polish, the housewife has found an article which may be used with perfect confidence, for cleaning and brightening her finest furniture.

Pour a few drops of O-Cedar Polish on any surface, and leave it for hours at a time—it will leave no mark. You dare not do that with an ordinary polish. One reason for the success of O-Cedar is its purity—no injurious quick-dryers, acids or greases are used in its manufacture. O-Cedar Polish has no substitute—it's **the** polish—a standard staple article that women must have in order to keep their homes clean, shining and inviting.

The fundamental and inherent virtues of O-Cedar constitute a logical reason for its big sale—its merits are so evident that women invariably use it steadily after once trying it. They will never be satisfied with any other polish, either for furniture or floors. They may not know the scientific reasons for its outstanding quality—they may not understand **why** it gives satisfaction where other polishes fail—but they do know it's a **safe** polish, to be depended on for results and to be relied on never to injure the finest woods.

The sales force of every store in which O-Cedar Polish and the O-Cedar Polish Mop are sold, should be fully posted on the truly exceptional merit of these articles—they should be able to explain that O-Cedar is no ordinary polish. They should follow our newspaper and magazine advertising, so that in making sales they may make the same statements about O-Cedar that we, its manufacturers, make. They are accurate statements, every one of them, never tinged with exaggeration, always to be substantiated by experience.

CHANNELL CHEMICAL COMPANY, Limited, Toronto

CLEANS AS IT POLISHES

O-Cedar Polish

HARDWARE AND METAL, May 1, 1920. Volume XXXII., No. 18. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

ROOFING

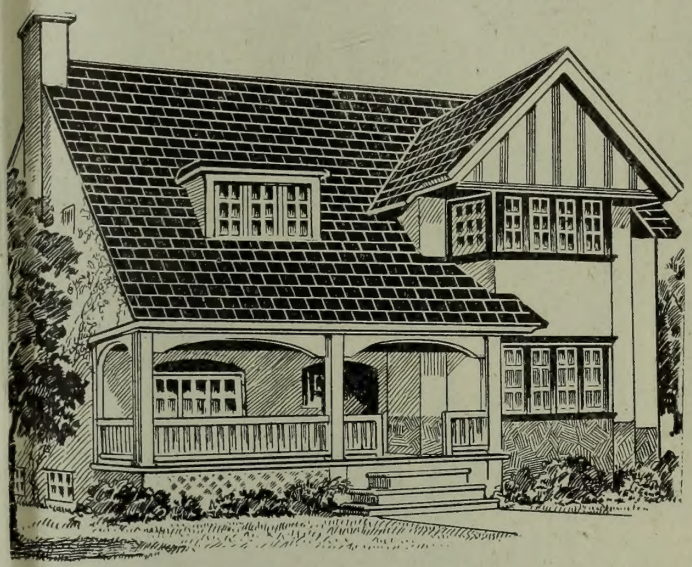
and Roofing Materials of all kinds

Asbestos Sheathing

With fire prevention uppermost in the minds of everybody from the school-boy up there is no doubt a growing tendency to fireproof buildings. Asbestos Sheathing is a recognized fire-prevention material. Recommend it to builders.

Jewel Roofing.

Comes in 1, 2 and 3-ply, guaranteed respectively for 3, 5 and 8 years. We think it is the best value on the market for this quality of roofing.



Asbestos Fibre (Liquid) Cement

—a rubberlike adhesive and tough preparation made from finest asbestos fibre, creosote and durable oils. Makes any roof, no matter in what condition, absolutely proof against climatic conditions. Easily applied over any kind of roof, metal, gravel, paper or composition.

Excello Roofing

—a better grade roofing with a longer guarantee. Comes in 1, 2 and 3-ply, guaranteed for 5, 10 and 15 years respectively. Place your orders early.

Brantford Asphalt Slates

Made of the same material as Brantford Crystal Roofing, but in individual size shingles. Crystal Roofing has a crushed slate surface of red or green, 80 lbs. per square. Brantford Asphalt Slates are in great demand.

THIS will be a big year in roofing and roofing materials of all kinds. The need for houses is more insistent than ever before in the history of Canada, and *is being met* as evidenced by the great increase in building permits being taken out and the tremendous amount of building actually going on despite the high cost of materials and labor.

We carry a most complete line of roofing and roofing material of all kinds, and can give prompt delivery in nearly every case.

We carry a full stock of regular lines of plain and tarred felt in 10, 12 and 16-oz. weights. Ask the " Rice Lewis " man for prices, or write direct for full information on any of the above mentioned lines.

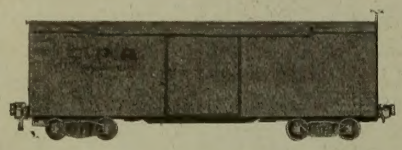
As a business proposition

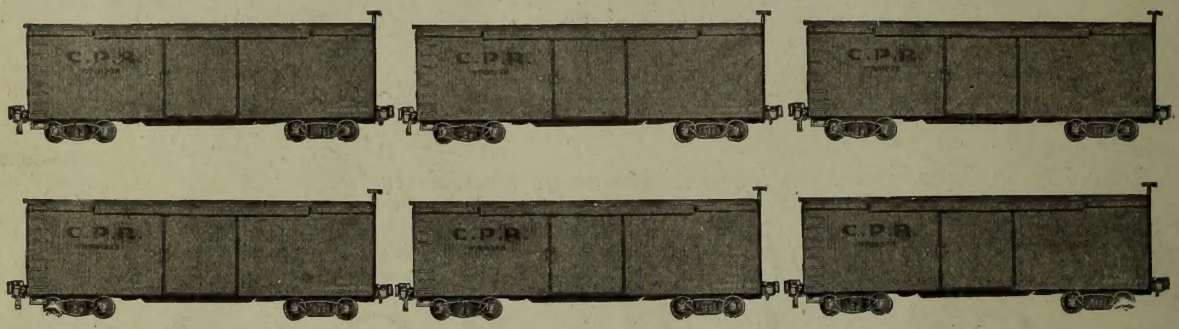
—Would You Rather Sell



Frost Fence has enabled many a dealer to do this. You can do it, too.

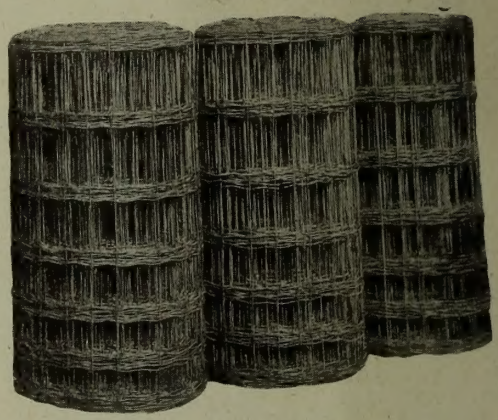
or

Put your fence business on a firmer foundation.



Your hardware business must grow, and if it is to grow every article must be a sales-builder.

Take fence. Fence, at first glance, and unless two rolls are compared side by side, looks more or less the same. The fence that is one or two cents per rod lower in price wins out among those who have not learned through experience. But those who have learned through experience decide differently.



FROST FENCE is made up to a quality regardless of a trifling fluctuation in price. Dependable materials are put into it and dependability has made

Do You Want This New, Bright Spring Colored Display for Your Window?

It's Free With Bissell Sweepers

Bissell's "Bluebird" Display

This new Spring Display is as pretty, as cheery and as attractive as our "Peerless" Display of last fall was imposing. It will surely make a bright, attention-compelling spot of a merchandise window, after the grayness of winter. It will arouse visions of Spring, with thoughts of home refitting and renovating. It will handsomely tone up a window of home furnishings, home labor saving utilities, paints, etc.

The Display consists of a three panel background piece, 26 inches high by 42 inches wide; a top panel, 15 by 26 inches, to attach to a sweeper handle, and suspended from this top panel by cords is a cutout of a little girl in a swing. The element of motion so valuable in a window display can be secured by concealing an electric fan behind a piece of merchandise a little distance in front of the display, so as to keep the girl aswing. The display is beautifully lithographed in eight colors on ten ply cardboard.

The "Bluebird" Display is offered during the Spring Season with factory shipments of one dozen or more Bissell carpet sweepers, vacuum sweepers or assorted.

Write for a Copy of Bissell's Spring Offer Announcement

Bissell's Vacuum Sweepers

(With Greater Cleaning Suction Than the Average Electric)

We know our Vacuum Sweepers are superlatively efficient. We know there are thousands of homes not electrically wired or with a limit to their purse who would want one if they knew it, too. So we are telling about them to the readers of the popular magazines. And we will repeat the telling through 1920. Why don't you tell the people of your town that you have them?

Hitch Your Wagon To The

RED ★ STAR

Detroit Vapor Oil Stove

SWING your energies to the line of least resistance—a line with a waiting demand, where business comes naturally.
These are the conditions that surround the sale of the Red Star — the advanced, type, all-the-year-'round oil stove. The Red Star surmounts the drawbacks and disadvantages that have hitherto attended the oil stove business.

Economical---Efficient

The Red Star is the first stove to burn the cheaper grades of kerosene, gasoline or distillate without wicks or asbestos rings. The heavy, patented cast-iron burner generates its own gas from the cheaper grades of oil—vaporizes and uses the heat units that have hitherto escaped in fumes and smoke. It gives 19 hours of intense cooking heat on one gallon of fuel. Produces a heat far more intense at a great saving in fuel.
This is the reason the Red Star has met with an instantaneous demand wherever it has been introduced.
Great, national advertising and exhaustive sales co-operation are paving the way to a greater, more profitable stove business for the dealer who hitches his wagon to the Red Star. Details of Exclusive Dealer Proposition will be mailed on request.

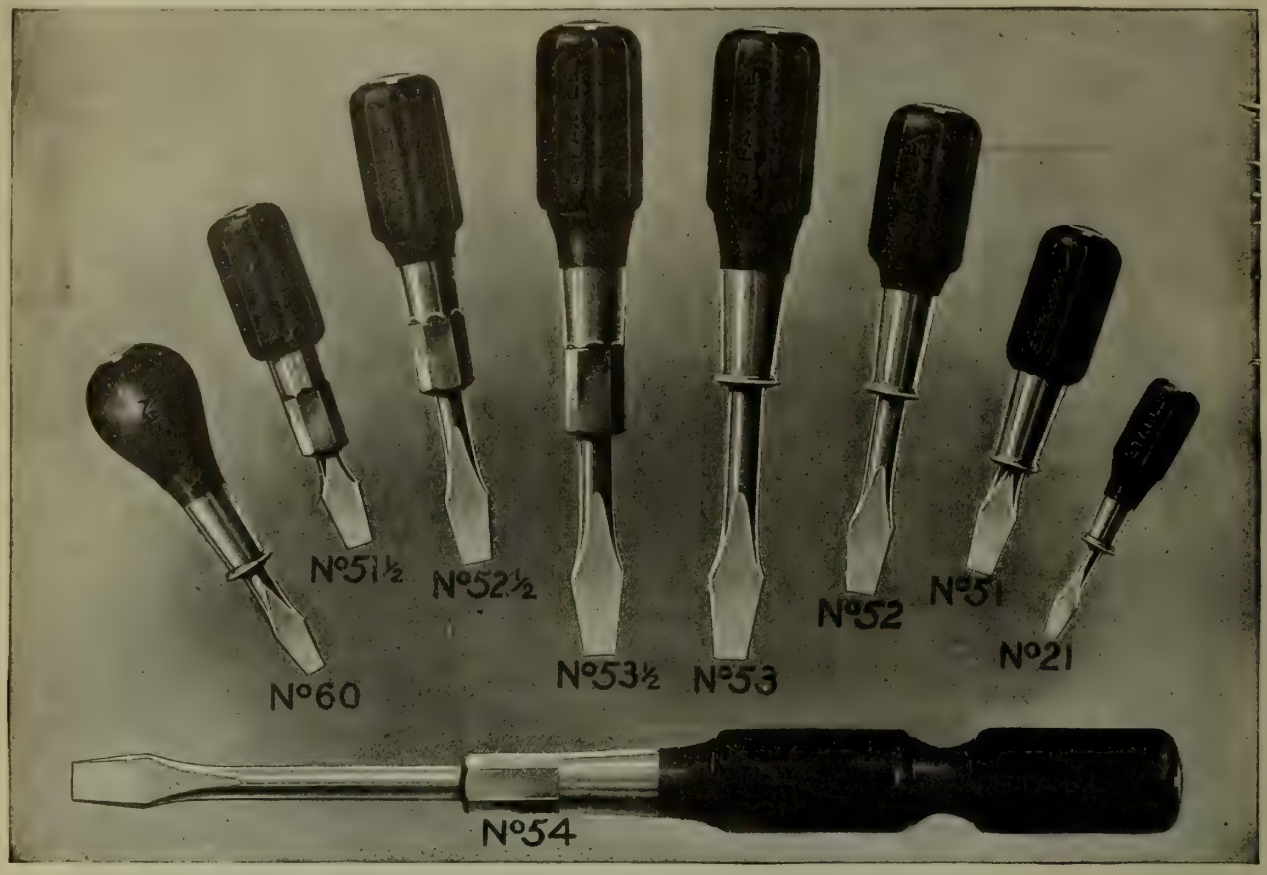
Brown & Sharpe Machinists Tools

Brown & Sharpe Mfg. Co.
Providence R.I.U.S.A.



Stanley Tools

Made in Canada

The illustration above shows a line of Screw Drivers which should be in the store of every dealer who prides himself upon carrying a complete stock of tools.

It is an assortment of SPECIALS that will appeal to many of your customers.

For instance—No. 21, shown at the extreme right of the picture—blade only 1½ inches long, just fits the vest pocket, a strong little Driver and very handy.

Also No. 60—shown at the left—only 1⅝-inch blade, but with a big sure grip handle. For heavy work into close corners it cannot be beaten. Used by Plumbers, Machinists, Millwrights, etc.

Nos. 51, 52 and 53—Called MACHINISTS' DRIVERS—Big, broad tips for large screws and extra large shanks for heavy work.

Nos. 51½, 52½ and 53½—also Machinists' Drivers, have hexagon nut on shank for use with a wrench.

No. 54—Note the DOUBLE GRIP, also the hexagon feature for wrench. With this latter Driver one can turn anything.

We make other drivers. See Catalogue

A Straightforward Talk on Buying Babbitts

"Blind Buyers" is a term which we believe it is permissible to use to emphasize the lack of insight of some buyers when purchasing Babbitt metals. No buyer knows all about EVERY product used in his plant, and he cannot be expected to know all about Babbitt metals.. For this reason, although he may order most of his requirements efficiently, he may be actually "blind" in connection with his Babbitt purchases, and will be thankful to us for pointing it out to him.

"SCRAP or virgin metals"—that is the question. Whether to buy the cheap-priced so-called Babbitt metals—mixed from remelted scrap; *or*

To buy a Babbitt, *alloyed from prime virgin metals,* at a bit more per pound, which has honesty in back of it—in the very fact that it *is* what it purports to be.

This is the manner in which a buyer *should* argue with himself when about to buy Babbitt. However, few buyers consider what is put into a Babbitt. The average buyer figures that "metal is metal" and, to him, the only distinction is that of price per pound. He might be surprised or even skeptical when we tell him that most of the metal makers use all the scrap they can in manufacturing Babbitt Metal Alloys.

Buyers usually argue that the Babbitt they are using is doing the work required of it. This is not sound argument. *Low Grade mœterial cannot produce a high-grade product.* It will not have equal wearing ability. You cannot afford to pass by the better Babbitts which do not have to be replaced so often.

A cent or two or three added to the cost per pound of your bearings makes little difference in the buying cost, but will save you that slight additional cost many times over on the increased production of your machinery due to the lesser number of shut-downs for re-babbitting, besides saving the labor expense.

Longer Wear per Bearing Means Lower Cost per Year

A trial case will convince you that you can economise best by using the world-renowned

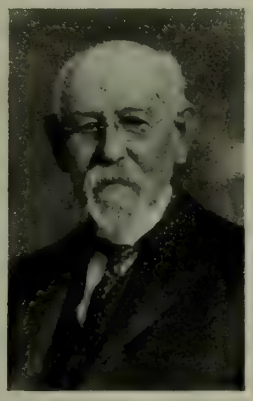
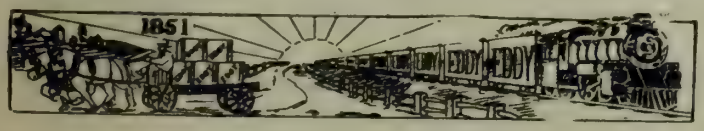
Starrett Hack Saws

Story for Week Dated May 1, 1920. **Being No. 3 in the Series**



GEORGE H. MILLEN,
President of the E. B. Eddy Company, the Man on Whom E. B. Eddy's Mantle Fell.

ABOVE is a portrait of Mr. George Millen, Business Executive and Inventor, to whose foresight and ability are traceable an immense proportion of the successes of the E. B. Eddy Co. in the past fifty years. He was Mr. Eddy's Chief Adviser and Executive when the founder of the plant was alive. To-day he carries on the great undertaking though well up in years, and though as he says "There are no easy spots in managing a plant of this size." Mr. Millen has twice come within an inch of death, once when he was swept into the "Devil's Hole" and once when as a youth he fought at the battle of Cedar Creek in the American Civil War. In that fight a bullet grazed his skull, but he seemed to bear a charmed life, and to-day, hale and hearty as many a man years his junior, he attends to the business of the great company, and every morning visits the principal factories of the plant, seeing to it personally that everything is in order to turn out products up to Eddy standards for the retail trade.



Eddy's "Onliwon"

Towel and Toilet Paper Fixtures

are popular and widely sold. Handsome in appearance, reliable and efficient in use, they are much in demand and constitute a very desirable, quick-selling line for the hardware store.

Among other Wood-Pulp Products, the Eddy Company produces a remarkably high grade of paper towels, toilet paper and serviettes.

Towels

The handsome "Onliwon" fixtures are familiar sights in many large hotels and business establishments. They are needed in every home and the dealer finds a practically unlimited and profitable field of sales.

Toilet Papers

Eddy advertising is creating consumer acceptance all over the Dominion and right in your neighborhood.

The "Seafoam"

Engine Drive Washing and Wringing Machine

FOR THE FARM

Wrings while it washes, washes while it wrings

The SEAFOAM can be driven by gas engine, windmill or electric motor. Both washing and wringing are done by power. The machine is simple, durable and trouble-proof, so that anyone in the home can operate it with absolute safety—all gears are covered.

The washer is of the dolly type, has tub of selected Cypress lumber and the reversible wringer is fitted with highest grade rubber rolls.

Dealers will find the Seafoam an unusually satisfactory seller, because of its established reputation and reasonable price. Descriptive folders on request.

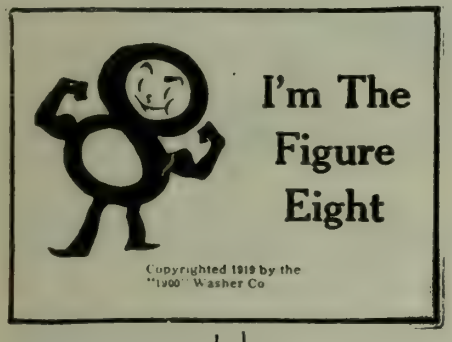
Sells As Well As It Operates

Morrison

High Pressure Injectors operate successfully on 20 lbs. low to 220 lbs. high steam pressure from 4 to 300 horsepower, and are made in sizes from ⅜ inch to 2 inch. These injectors can be depended upon, and are backed with a splendid reputation for efficiency. They offer a powerful argument to the dealer who wishes to increase his profits and customers, with a line of products that are supreme in the mechanical field. Watch for the name Morrison, a guarantee of quality.

The James Morrison Brass Mfg. Co., Limited

93-97 Adelaide Street West, Toronto, Ontario



The water swirls through the clothes in a figure 8 movement four times as often as in the ordinary washer.

This Little Chap Brings Business to Dealers

You find him attracting folks' attention to the 1900 Cataract Electric Washing Machine advertisements in every worth-while publication in Canada.

In a clever and direct way he explains the figure 8 motions which is the exclusive and dominating feature of the "1900 Cataract Washer."

He tells how and why the "figure eight" movement makes the 1900 Cataract Washer superior to all other washing machines, by washing clothes faster and cleaner without rubbing.

The swinging reversible wringer, that swings from washer to rinse water — to blueing water — and then to clothes basket is another among many good selling points that won for the 1900 Cataract Washer the title of "The Perfect Washer."

The splendid selling points, plus the extensive advertising of 1900 Cataract Washers, need but little effort on the dealers part to make quick sales at a goodly profit.

We have an attractive proposition to offer dealers who wish to cash in on the steadily increasing demand for electric washers.

Write to-day and investigate the famous line of Electric Washing Machines.

Our line is complete — Electric Motor, Engine Power and Hand Washers.

Nineteen Hundred Washer Company

357 Yonge Street, Toronto

They Mean "Eddy's"

When a customer asks for "a box of matches" without specifying any particular brand, it is always safe to fill the order with Eddy's.

Ten chances to one such a customer has Eddy's in mind. To think of matches is to think of Eddy's—69 years match-making success have made the name Eddy the symbol of better matches to the Canadian public.

Always have Eddy's in stock for the sake of better sales and satisfied customers.

INDURATED FIBREWARE

is another popular Eddy line worth featuring. Light, durable and sanitary utensils for the Home—the Farm—anywhere. Try a display in your store and watch them sell.

TINOL SOLDER

Hess & Sons TINOL SOLDER
in a handy Tube.

TINOL Solder packed in a handy tube, assembled on a display card is an article which finds a ready sale in the Electrical, Hardware and Automobile trade as it is a complete solder in paste form, eliminating the necessity of previous skill and as it contains its own active, yet non-corrosive flux it enables anyone to make a perfect soldered joint on all metals, with the exception of aluminum. All that is required is the heat of a torch, soldering iron, or even the heat of a match will make a perfect soldered point, if the metal is light, as for instance thin copper wire.

If interested and you cannot purchase from your Jobber, Write:

E. G. GOODERHAM, 24 King St. West, Toronto

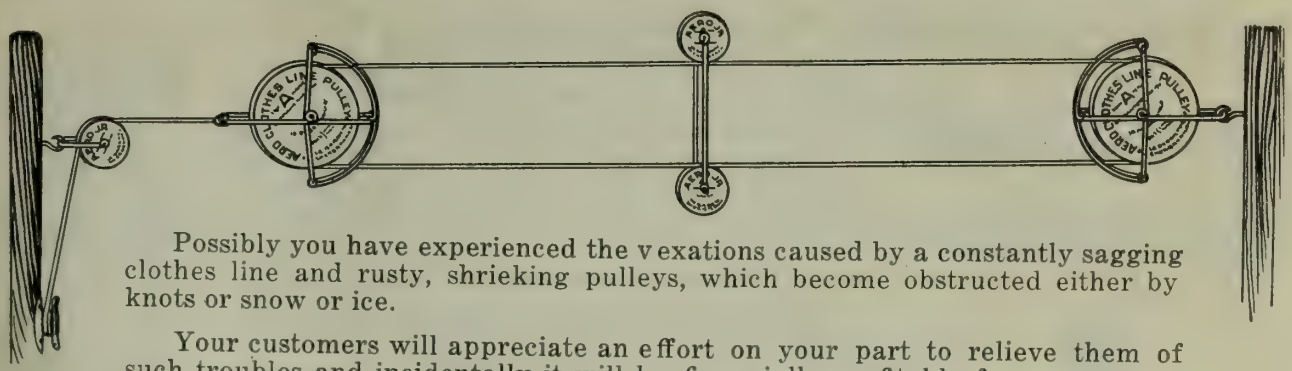
The Gendron Mfg. Co., Limited, 137 Duchess Street, Toronto, Canada



Possibly you have experienced the vexations caused by a constantly sagging clothes line and rusty, shrieking pulleys, which become obstructed either by knots or snow or ice.

Your customers will appreciate an effort on your part to relieve them of such troubles and incidentally it will be financially profitable for you.

AERO Clothes Line Pulleys manufactured of waterproofed hardwood are 6 inches diameter, with deep V-shaped groove, giving perfect friction to varying diameters of line, are self-lubricating, rustless, knot-passing and will run noiselessly under all weather conditions, and are guaranteed for ten years, if oiled annually.

The **Aero** method of installation as per above cut is a departure from common practice, but a glance at it will convince you of its practicability in securing a taut clothes line at all times without splicing the line itself. If desired, the line and pulleys may be taken in after use.

The Aero Line Support prevents sagging in the center when carrying heavy loads.

Your jobber probably has these in stock. If not, communicate with us direct or with our Western Agents—H. L. Perry Co., Ltd., Winnipeg, Man.

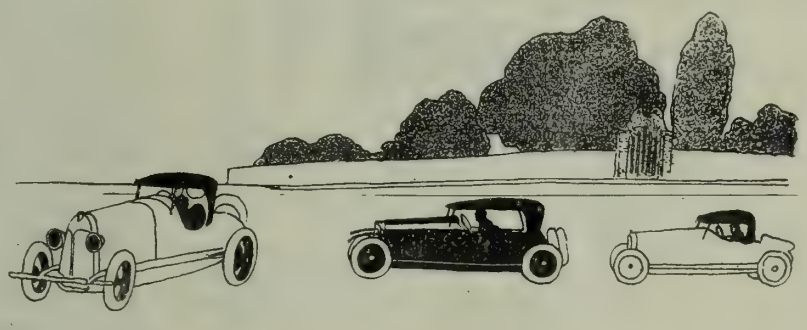
To Enforce Anti-Glare Headlight Law

Middle of July Will See Much-Discussed Regulation in Effect in Ontario—Drastic Action by New Farmer Government—Will Issue Certificates to Manufacturers of Devices Which Qualify



THE much-discussed anti-glare headlight law for the regulation of headlights on motor vehicles in the Province of Ontario is about to be enforced. The date when the regulation will become law is likely to be the middle of July, according to the statement made to HARDWARE AND METAL by officials of the Department of Highways. The law will become effective sixty days from the date of signing by the Lieutenant-Governor, which will be at prorogation of the present session. While it is impossible to make any definite statement as to when the session will prorogue, Government members have indicated that the session will not likely extend past the middle of May.

First reading was given an act to amend the Motor Vehicles Act in the present Legislature on March 23rd, making the following changes: Subsection (4) of Section 9 of the Act is amended by inserting the word "parallel" before the word "beam," making the section read as follow: "It shall be unlawful to carry on a motor vehicle any lighting device of over four candle power, equipped with a reflector unless the same shall be so designed, deflected or arranged that no portion of the parallel beam of reflected light when measured seventy-five feet or more ahead of lamp shall rise above 42 inches from the level surface on which the vehicle stands."

A further amendment included in the Act to amend the Motor Vehicles Act, as now before the Legislature, adds the following subsection:

"Any device for the elimination of glare, approved by the Minister of Public Works and Highways, when in proper adjustment, and having a lamp of candle power not in excess of that authorized by the Minister for such device, shall be held to be in conformity with the next preceding subsection."

Department Will Issue Certificates

It was explained to HARDWARE AND METAL by an official of the department that the Government will issue certificates to manufacturers of headlight lenses and any other device having for its effect the compliance with the Anti-Glare Law. It is not likely that they will be compelled to pass tests and secure the certificates, but automobile owners will be advised to see that the lenses or devices they purchase have passed the test, otherwise they will not be sure of complying with the law in using such lenses or other devices. The standard set in the Act as outlined will be that used by the Government in deciding the legality of such devices.

In taking action to enforce the anti-glare headlight law the new Provincial Government is taking the first definite step in a matter which has been before the legislatures of the province for a long time. The late Government passed a headlight anti-glare law several years ago, but never put it into effect, because, it is alleged, it feared that by so doing it would jeopardize its position in the rural districts. It is therefore significant that a Farmer Government is the first to take definite action in passing this, its first law respecting motor vehicles.

Ontario Motor League Prepares for Anticipated Rush of U.S. Motor Tourists

Expect 100,000 Cars Will Visit Canada From United States This Summer With Average of Four Persons to Each Car—Big Boom for the Accessory Trade

BEARING out the information contained in an article in the last motor accessory issue of HARDWARE AND METAL, with respect to the probability of large numbers of automobile tourists visiting Canada during the coming summer, and pointing out the trade possibilities involved, the Ontario Motor League has received numerous requests from automobile clubs in the United States for information and road maps. Officials of the league state that this will probably be the heaviest season of motor touring which has been seen since the automobile first came into use. All the war time restrictions are lifted and the quarantine is no longer effective, and these factors combined with the complete automobile license exchange which has been effected will give a great impetus to touring in Canada this summer.

It is approximately estimated that at least 100,000 tourists will cross into Canada from the United States during the motoring season. Averaging four persons to a car it is evident that our transient population will be very large during the warm weather. The outlay of money involved will mean much to Canadian accessory dealers, and to trade in general.

So great is the rush anticipated that the Ontario Motor League are extending their offices in order to expand their touring department.

Demand Prepayment of Freight in United States Currency

United States Railways Impose Drastic Regulations — No Transhipment to be Allowed at Border Points

ON announcement which may have far-reaching effect on prices of commodities imported, either in the raw or finished state, from the United States, is that just made by United States railways, to the effect that on all freight shipments coming into Canada it will be required that freight be prepaid through to the destination in United States currency. This regulation has been hinted at for some time but definite action is now to be taken and the new arrangement will be in effect on and after May 1. No provision is made on the basis of comparative mileages which the freight is carried in Canada or the United States.

Some U. S. railways have also given notice that they will not only demand this prepayment but will also refuse any transhipment at border points. Canadian importers are therefore prevented from securing freight at the border by prepayment to border points and then paying the Canadian haul in Canadian currency.

On the basis of the present value of Canadian currency in New York, it is evident that the impost will be heavy on certain lines. On first glance it appears to mean an increase of $11.50 to $12 for each hundred dollars of freight charges.

Coal is one commodity which will be seriously affected by this action, and this being a basic requirement the effect will probably be felt through many other channels, apart from the direct increase in freight charges on other commodities themselves. Thus the effect of the new regulation will be reflected in many ways and increase either directly or indirectly costs of production.

GUELPH BRANCH OF R. M. A. HAS BANQUET

The branch of the Retail Merchants' Association at Guelph, Ont., was recently tendered a banquet by the executive. President R. E. Nelson presided, and Secretary George E. B. Grinyer read a report showing that the membership had nearly reached 100, and the finances were in good condition.

W. B. Miller, of Toronto, Provincial Secretary of the Association, spoke on matters connected with the recent legislation affecting local merchants, and answered a number of questions. Addresses were also given by President Hahn, of the Preston Association; P. Kelly, of Stratford; R. M. Millar, B. W. Zieman, of Preston.

RAIL RATES TO CANADA BASED UPON STATED VALUES

Washington, D.C.—The Interstate Commerce Commission has issued an order allowing railroads to establish rates on glass, sheet or lump; lead, red or white; litharge, etc., between points in the United States and Canada, dependent upon the value declared in writing by the shipper or agreed upon in writing as the released value of the property.

SASKATCHEWAN DEALERS PROTEST LEGISLATION

REGINA.—Retail dealers are up in arms against an act passed at the last session of the Legislature whereby it is provided that at least one point in the Province shall obtain a stock of repairs and parts for automobiles sold in the Province and for a period of five years after the date in which an automobile of any make may cease to be sold. The dealers claim that this obliges them to either jointly put in a large stock at one point of repairs or else each dealer must carry repairs. In either event they claim it means tying up a large sum in spare parts and they claim that as they hold their agencies subject to cancellation on short notice they cannot afford to risk their money in this way.

Dealers also allege that the act will have the tendency to give three or four manufacturers who are already well established in this Province a monopoly of the business as agents will refuse to accept the agency for the sale of new makes of cars. The Government has replied that it is powerless to interfere as the act has been passed and pending the Legislature re-convening next winter nothing can be done in the meantime.

SHEFFIELD MANUFACTURER SAYS HIGH TOOLS STILL

That there will continue to be fully maintained prices for fine and even regular grades of tools seems to be shared by some manufacturers; in fact by many of them.

A Sheffield manufacturer, communicating with his representative in Canada, pointed out that tools, while now high in price, would rule high for some time to come, "probably for a long time," as he said. This will be explained by the continued high prices of labor, and also by the continued high prices asked by producers for high-grade tool steel. There is nothing to indicate that there will be a change of a radical nature, thinks this authority, in either the cost of labor or of raw material. Change there may be, he admits, but if this should come it will be in the nature of higher prices.

More Autos on Canadian Roads This Summer; Boom in Demand for Second-Hand Variety Offers Increased Scope for Accessory Sales

Lack of Production of New Cars Creates Sensational Demand for "Used" Cars—Many Accessories Being Purchased to Brighten Up Old Cars—Mail Order Houses Active for Accessory Business, But Hardware Dealers Have Big Advantage

IT is not many months ago that second-hand automobile dealers were much perturbed over the used-car problem as result of the congestion of a super-abundance of used cars, which condition was hampering business. Almost in the twinkling of an eye the situation has reversed, and to-day the used car is an article much in demand, is bringing big prices and is being eagerly snapped up even for speculative purposes.

Automobile dealers report that the demand for second-hand cars is so great that it cannot be filled, that many old models which ordinarily would have now been on the scrap heap are being fitted up and sold at good prices. The result is that the junk yards are being kept very clean and the second-hand car dealers' shops are hives of industry. It has even been discovered that some cars are bringing more as second-hand varieties than they did when sold new. This indicates that there will be a big increase in the number of automobiles used in Canada during the coming summer. Perhaps it is suggested by some that owing to curtailed production the increase will be small. While this may be the case yet it must be borne in mind that ordinarily, when the production of new cars is normal, that there are a great many second-hand cars standing idle in dealers' shops. The condition resembles a street car strike in any large city, at which time, owing to the tying up of the normal means of transportation, every vehicle capable of carrying passengers is pressed into service, and anything on wheels is welcomed, no matter what its appearance may be.

Will Be More Autos on Roads This Summer Than Ever Before

When a greater premium is placed on an article it is desired more than ever. It may, therefore, be safely predicted that there will be a great many more automobiles on Canadian roads this summer than ever before. The natural increase in the number of cars will bring an increase in business to the automobile accessory dealer, but what is perhaps a more important field for business in accessories is the greater use of second-hand cars. There will undoubtedly be a tendency on the part of those purchasing used cars, to surmount the difficulty by spending money on paints and other accessories in order that the car will look as up-to-date as possible. In addition to paints and varnishes, the demand created by trade of this kind would be for such lines as top dressings, polishing wax, bumpers, engine and tire tools, spare tires and tubes, oil cans, pumps, tire repair outfits, etc. These are lines which are generally missing when a car is purchased from a second-hand dealer, they being either retained by the original owner or appropriated by the dealer for use elsewhere.

Automobile Accessories

We have added to our already Complete Stock of Hardware a line of Automobile Accessories, which we know will be appreciated by all Car Owners.

THE SUN RAY LENS
Every Car must now be equipped with a Non-Glare Headlight Lens. The SUN-RAY complies with the motor act. Let us supply you at once. Per Pair ---------- $2.75

AUTO POLISHES
Brighten All
Liquid Veneer
Cedar Polish
V-Ava-Spray

TIRE CHAINS
Do not be without chains. They save many an accident. Size 30x3½. Per pr. $2.65
Other sizes in stock.

TIRES AND INNER TUBES
In the usual sizes always in stock ask us to show you the tire that is guaranteed for 7,000 miles. Before buying elsewhere be sure you see this tire

EFFECTO AUTO ENAMEL
Brighten up the old car with "Effecto" auto enamel. We have it in the clear as well as colors. Also Top dressing for cars

BLOW OUT PATCHES
Just the thing to keep an old tire in shape. Have one on hand as you never know when you want one.

Oils and Greases
Polarine and
National Carbonless.
Transmission Grease
Cup Grease

ALSO A LARGE ASSORTMENT OF:
Patches, Tire-doh, Bulbs, Pumps and Tubing Vulcanizers vulcanizing Rubber and Cement, Mud Hooks, Hydrometers and many more useful articles.

Agents for White Rose Gasoline

THE MANITOBA HARDWARE AND LUMBER CO., LTD.

Automobile Industry Not Yet Back to Normal

Factors which have helped to bring about the present shortage of new cars are the lull in production during the war and the unusual demand for cars by those who have recently become prosperous. During the last months of the war production of motor cars sank very low. Factories were busy with war orders and they were handicapped by labor shortage. So great was the upheaval in the industry that even yet the majority of automobile plants are not back on a normal production basis. To cap it all many people who profited financially during the war period and since the armistice, are now actively buying up new automobile models so soon as they are produced. However the condition now exists and the accessory dealer can take advantage of the situation to increase his sales.

The accessory field offers great opportunities for building up a large and successful business, but it is necessary for the hardware dealer to be active in fol-

lowing up all opportunities for business in order to hold down competition and make the most of this class of trade. To this end the problem is not so much one of having on hand the articles for which the customer may ask, but of putting up a strong appeal for the business.

Mail Order Houses After Accessory Business

Mail order houses are going after the accessory trade with great energy. Within the past few months two of the largest mail order houses in the country sent out several million copies of catalogues listing some fifty pages of automobile accessories. A third mail order house distributed a catalogue with sixty pages of accessories. This is a class of competition which the hardware dealer must watch closely.

Dealing with means of combatting mail order competition, Frank Stockdale, retail merchandising expert, representing the Associated Advertising Clubs of the World, made the statement at a Western R. M. A. convention that display was one of the strongest sales facturers available in present day merchandising. This being the case, the retail merchant has a big advantage over the mail order house in the sale of auto-accessories. This is perhaps more the case with accessories than with many other lines handled in the hardware trade, for it is noteworthy that most accessories are sold through the appeal they make on sight. There are so many devices on the market that an automobile owner generally does not bother about such additions to his car equipment unless the article itself explains its use and advantages and the prospect is allowed to handle it. A good window display or showcase of accessories will therefore be far more effective in proportion than all the mail order catalogues sent out, providing other considerations are equal.

Dealer Has Big Advantage Over Mail Order

If a dealer finds local business in accessories is going to mail order houses he can emphasize the consideration of transportation expenses; the interest on money paid in advance; the delay to customers in receiving mail ordered goods. By keeping down his cost of doing business the retailer will be enabled to compete favorably as to prices on accessories, with the mail order houses. A plan of sending out personal letters touching on these points, to local people who are known to be mail order customers, has been used with good effect.

Next to having a good display of accessories always on view, it is important to have a complete stock of all lines, and particularly of those lines which are peculiar to the trade of the local community. Every accessory store will stock the general lines, but there are particular lines, having to do with the make of car, which constitutes the majority of local automobiles, which the live dealer will take into consideration. On this basis, of course, the city dealer would be required to stock a greater variety of accessories than the town merchant.

It is interesting to note that the whole automotive industry in Canada is fast approaching a premier position. This includes both the manufacture of automobiles and accessories. During 1919 the industry passed through a period of readjustment and expansion, while the demand far outran the supply. As has been outlined, this condition still exists. The feature of last year's operations was a marked tendency toward the all-Canadian car. New plants are being erected and planned to be equipped for the manufacture of parts hitherto obtainable only in the United States.

CALGARY PETROLEUM PRODUCTS CO. TO CONTINUE OPERATIONS

Calgary, Alta.—The Calgary Petroleum Products Company's gasoline extraction plant will continue operating, according to a statement made by A. W. Dingman, managing director of the company. Recently an order was issued by the Federal Government ordering the plant to be closed down if arrangements could not be made to conserve the residual gas from the plant which was going to waste.

Mr. Dingman stated that the volume of high-grade gasoline being produced offset this waste.

Tax Returns Make No Provision for Stock Depreciation

Tax Officials Say There is No Loss Until Transaction is Made—Otherwise a Capital Charge

AN enquiry has been received by HARDWARE AND METAL from a large Western wholesale and retail hardware company, asking whether any allowance is made for depreciation on stock, in connection with income tax statements. The firm making the enquiry writes that if no depreciation is allowed they consider it most unfair, as there are in all stocks goods which are unsaleable. The instance was cited of old sliding parlor door locks, which today in many districts cannot be sold at all. In this case these were taken in stock and a fair depreciation made, which however was disallowed.

Officials of the Taxation Office advise HARDWARE AND METAL that no allowance for depreciation is made because there is really no depreciation until a sale is made. In the event of a transaction taking place the loss then figures in the usual profit and loss account. If it is impossible to sell the articles in question there is no selling transaction on the part of the retailer and the charge then becomes one against capital. The merchant is taxed only on profits of goods sold and profits actually made in trading. Income tax officials say that experience shows that inventory reserves for declines in prices or values are arbitrary and suppository. It is contended that the more reserves are built in this way a greater amount of taxation will fall on the merchants later on in subsequent periods and returns; in other words, the department, it says, is really protecting the taxpayer in refusing to allow an inventory reserve.

Canada's Growing Export Trade

General Hardware Lines Undergo Substantial Increases in Export Business—Wire Nails and Cutlery Are Noteworthy Lines—Thousandfold Increase in Nail Exports to United States

INTERESTING figures indicative of Canada's growing export business are contained in the last monthly report of the Department of Trade and Commerce dealing with Canada's imports for consumption and exports.

Cutlery is one of the most interesting commodities listed, insofar as the statistics are concerned. For the month of January of this year our exports of cutlery to the United Kingdom were valued at $21,204, whereas no exports are listed for the corresponding month in 1919. For the ten month period ending with January, exports of cutlery to the United Kingdom totalled $1,710,247, whereas no exports were made during the same period in the previous year. Cutlery exports to other countries totalled $32,995 for the month of January and $368,929 for the ten month period as compared with a nil report for the same periods one year ago.

CANADA'S IMPORTATION OF AUTOMOBILES

The Department of Trade and Commerce figures that passenger cars imported into Canada during 1919 totalled 9,367 and trucks 2,113. The cars cost $9,304,235 and trucks $3,437,464.

These figures give some idea of the growing dimensions of the automobile business in Canada.

Thousand-fold Increase in Wire Nail Exports

One of the outstanding features of the report is the big increase in export of wire nails to the United States. For the month of January 1920 exports of wire nails valued at $297,202 were made to the United States compared with exports of $292 for the same month in 1919. For the ten months ending with January exports valued at $622,217 were made to the United States as compared with $203,266 for the same period in the previous year.

Exports of wire nails to the United Kingdom for January showed a slight decline from $147,468 for January 1919 to $126,525 for the same month this year. Totals for ten months showed quite a substantial falling off from $1,358,885 for ten months ending January 1919 to $853,027 for the same period ending January 1920.

Spades and Shovels

Spades and shovels have also figured in an increased trade for export. It is interesting to note that exports of these lines valued at $16,942 were made to British South Africa during January

1920. Exports to the United States of these lines for ten months ending January totalled $44,737; to British South Africa $171,763 and to other countries $23,296. No exports of spades and shovels were listed to any of these countries for the corresponding period one year ago.

Cream Separators

Exports of cream separators from Canada to the United States also show an increase. Figures indicate that exports valued at $91,635 were made during ten months ending in January as compared with $25,900 for the same period one year ago. Exports of cream separators to France have also increased from $41,984 in ten months ending January 1919 to $80,229 for the same period this year.

Bolts and Nuts

Bolts and nuts to the value of $50,357 have been exported to the United Kingdom during the ten months while no exports were listed for the corresponding period one year ago. Exports to other countries for which no figures are listed for the same ten month period one year ago are as follows: To United States $10,995; British South Africa $15,693, and to other countries $14,348.

Nails, Brads, Spikes, Tacks

Exports of nails, brads, spikes and tacks of all kinds also figure largely in the quotations. No exports were listed during the ten month period ending January 1919 and in comparison the following figures are shown for the same period ending January, 1920: Exports to United Kingdom, $373,302; to United States, $72,043; British South Africa, $102,028; other countries $269,177.

Total figures showing comparisons of exports for the month of January and for the ten month period, insofar as Cutlery and Hardware are concerned, are as follows:

Exports to United States for the month of January increased from $16,400 in 1919 to $330,717 in 1920. Exports to the United Kingdom for the month show a slight decrease but for the ten month period there is an increase of from $1,976,606 for ten months ending January 1919, to $3,486,045 for the same period ending January 1920. Exports to other countries for that period showed a considerable falling off.

Guns, Rifles and Firearms

Exports of guns, rifles and firearms to the United States showed an increase from $980,988 for ten months ending January 1919 to $1,865,108 for the same period ending January 1920. For the same period exports to the United Kingdom fell off from $100,225 in 1919 to $2,283 in 1920.

CANADA'S EXPORTS OF WIRE NAILS TO U.S. INCREASED A THOUSAND-FOLD

Statistics of exports from Canada for the month of January last, indicate that this country exported to the United States, during that month, wire nails to the value of $297,202 as compared with exports valued at $292 for the same month in 1919. This thousand-fold increase in one year is very significant, but has undoubtedly been largely influenced by conditions prevailing in the U.S. industry as result of labor and railway difficulties during last year.

Lamps and Lanterns

Lamps and lanterns showed a substantial increase in export from $9,264 for the 1919 ten month period to $78,164 for the same period 1920. Exports to the United States for the same period 1920 were about one-half of the value shown for the 1919 period.

Scales and weighing beams showed the following export value for the ten months ending January 1920 in comparison with no exports for the same

period in 1919; to United Kingdom $19,723; to United States $17,985; to other countries $45,507.

Scrap Iron and Steel Increases

Large increases in exports of scrap iron and steel are recorded in the statistics. The monthly figures for January in comparison do not show much change but for the ten month period substantial increases are noted as follows: To United Kingdom $751,831 for 1920 period, no exports in 1919 period; to United States $2,733,693 for 1920 period compared with $913,345 for 1919 period. Exports for the month of January to United States were $332,502 in 1920 compared with $235,495 in 1919.

Stoves

During the month of January stoves were exported to the United Kingdom to the value of $5,212 while no exports are listed for the same month in 1919. Increased exportations to the United States are also noted for the same month. For the ten month period the figures are as follows: Exports to United Kingdom, $5,894 in 1919; $12,113 for period ending January 1920; to United States $20,318 for 1919, compared with $35,179 for 1920; to Newfoundland $31,869 for 1919 and $66,110 for 1920.

Tinware

Tinware exports to United Kingdom for the ten months show an increase of from $3,381 to $11,933, comparing figures for the 1919 and 1920 periods. No exports were made to Australia during the period ending January 1920, while figures for that period in 1919 indicate that exports valued at $11,666 were made. Exports of tinware to British South Africa have dropped from $85,288 in 1919 to $7,396 in 1920 period. Total tinware exports show a decrease from $176,882 in 1919 to $35,476 for 1920 period.

Brass Valves

Substantial increases in exports of brass valves are noted in the report. Exports to the United Kingdom valued at $64,915 were made during the ten month period ending January 1920; exports to United States of $88,151 and to other countries $106,277. These figures compare with no export listed for the same period in 1919.

Paint and Varnish Export

Much interest is also attached to the statistics concerning paint and varnish exports. Exports to the United Kingdom showed a substantial increase. Figures indicate that exports of paints valued at $520,323 were made during the ten month period ending January 1920 compared with $168,535 for paint and varnishes of all kinds for the 1919 period. No comparison can be given, as figures for 1919 include paints and varnishes of all kinds, while 1920 figures include paints only. It is interesting to note however that the total value of all exports of paints for the ten month period was $1,180,583 compared with exports of $1,131,693 of paints and varnishes of all kinds during the same period 1919.

Canadian Firms Are Practising Standardization

Orders May be Filled and Stocks Turned Over More Rapidly—Facilitates Manufacture and Delivery

THE scarcity of all forms of materials, together with the consequent high prices, are factors in influencing manufacturers to reduce the variety of their products to the utmost degree in order to increase the production of the articles which are in the greatest demand and at the same time reduce the costs of manufacture.

The Canadian Wm. A. Rogers is engaged in the manufacture of silverware and cutlery, and the enormous demand which has developed recently for this company's products has forced the management to adopt the policy of reducing the number of lines. M. R. Woods, the general manager of the firm, states that the practice has resulted in a distinct advantage not only to the firm but to the public as well. He points out that the firm is engaged in the manufacture of two distinct lines of silverware, flatware, as knives, forks, and spoons; and hollowware, including tea sets, entree dishes, etc. A communication on the subject is as follows:

"We have cut the number of designs in both flatware and hollowware by probably 75 per cent., with the definite result that we can produce far more economically, and our customers have benefited to an equal if not greater extent, because they get their orders filled in much less time and are able to turn over their stock much more rapidly. It is difficult in our particular line of business to co-operate with our competitors, because our products and theirs are produced largely by die work, and each company has its own particular designs, but we understand that all the manufacturers of silverware in Canada have adopted the same policy as ourselves. As a matter of fact, we cannot see how any manufacturer can avoid reducing and standardizing his lines under present-day conditions, unless he is able to secure an unlimited number of operatives, which in the skilled trades is practically impossible."

In Steel Products

C. W. Sherman, president of Dominion Foundries & Steel, Ltd., touches on a different phase of Canadian industry, but the underlying conditions are practically the same. He points out that the reduction of the variety of products in Canada would be most desirable, due to the fact that the volume of business in this country is less than 10 per cent. of the American volume and the variety of demands just about as great as in the States. He proceeds as follows:

"Up to the present time we have only written and suggested various lines to our customers, and I mention the following: Take the one item of frame steel for automobiles—three thicknesses, light, medium and heavy, should cover the entire requirements of all the companies in Canada. On the other hand, we receive orders for at least twenty different thicknesses, varying in gauge from 100 to 200 thousandths of an inch. This greatly upsets our operation of rolling, shearing and shipping. This same condition also applies to other thin shaped flat steel for miscellaneous plate work, agricultural work and deep drawing work.

"For Canadian consumption we would recommend that sheets be limited to four gauges—14, 18, 22 and 28, and that light plate steel up to quarter-inch be limited to six gauges—.095, .125, .150, .200 and .225. It can readily be seen that this would greatly facilitate manufacturing, carrying in stock and delivering flat steels."

WARNING TO OIL BUYERS

Members of a U. S. paint, oil and varnish club are making the following appeal to buyers:—

"Do not get caught by an adroitly worded circular offering bargains in linseed oil and turpentine sent out from Eastern cities by a firm changing its name and address constantly.

"The man who wishes to get the value of his money will not bite at so-called bargains and will drop into the waste basket any circulars offering linseed oil and turpentine at large discounts and containing a clause 'Guaranteed to Give Satisfaction or Returnable at Seller's Expense,' or 'Subject to Your Inspection and Approval.'

"When you buy adulterated or 'Comp' linseed oil and turpentine at any price the other fellow 'puts one over' on you, for he adds dope to make an extra profit, even though the stuff is sold much below the market price for pure goods.

"Buy the well-established brands located in Minneapolis and St. Paul, and beware of the low-priced, special terms, impure article offered from Eastern cities. The best is the cheapest."

Toronto Adopts Daylight Saving

Effective May 2 to September 25, Kitchener Also Adopts Measure

Toronto, Ont.—Despite the fact that there was considerable opposition to the adoption of daylight saving in the city this summer and a deputation of ladies appeared to protest against it, as creating an unnecessary hardship upon hundreds of helpless mothers and children, the City Council yesterday by a vote of 17 to 7 directed the Mayor to issue a proclamation calling upon all citizens to observe summer time from May 2 to September 25 inclusive.

Kitchener, Ont.—Daylight saving will come into effect here on May 2 at midnight, according to a resolution passed by the City Council early in the year.

"IT SHOWS THE REASON WHY"

THE above display used by The Green Furnishing Co., Hamilton, Ont., in connection with a recent sale of oil ranges, had a number of novel features which made it effective in drawing attention and interest.

In the centre of the display was shown a pile of anthracite coal, upon which a card was placed reading: "250 lbs. of coal costing $1.70—one week's supply for the average family's home cooking."

To the right of the coal was a can of ashes bearing a card which read: "150 lbs. of ashes—the average amount that has to be handled every week when using coal."

To the left was a 3 gallon oil can bearing a card which read: "3 gallons of coal oil, 90c—one week's supply for the average family using the —— oil range."

In the rear were shown the various models of stoves.

Due to the unique nature and direct appeal of the display the management advises that "the window attracted large and interested crowds, and the number of sales produced were most gratifying."

Mr. Clement Keiffer, Buffalo, president of the Display Association of America, complimented the company on their window display, stating that the arrangement "showed the reason why," and adding that any window which has an appeal as strong as that carried in this one, would be bound to make people look.

Extend Booking Dates on White Lead and Putty

Dating Arrangements Extended From May 15 to September 1—Dealers Urged to Take Delivery

EXTENSION of the booking dates on both white lead in oil and putty is announced by the various paint companies. The last dating arrangements were to expire on May 15, that is, wher prices were last arranged the forward shipping date was fixed for May 15th. It is this date that is now extended, the same to apply on putty and lead shipped out between now and September 1st. This rule is subject, however, to any unforeseen changes that may take place in raw materials.

Orders Must be Cleaned Up

Many orders were placed months ago for lead and putty to be shipper later, and at prices that were ruling on given dates. On white lead in oil, for instance, the base price on 5-ton quantities was $16.50 per 100 pounds from November 18 to January 7. Many dealers booked between these dates but have not, as yet, taken delivery, as the privilege of taking these requirements was extended to those who desired shipment made later. Such shipping date expires definitely on the 15th of May, and specified orders, the paint men state, will have to go forward by that date.

Then again, from January 7 to March 5 a price of $17.50 per 100 pounds applied on white lead in oil, and bookings were made for forward shipment. These placed orders will have to be filled and shipment made by May 15 if these prices are to be taken advantage of.

Urged to Take Delivery

Paint manufacturers have been urging their customers to accept delivery of their booked orders with as little unnecessary delay as is possible. The raw material situation, as pointed out in HARDWARE AND METAL frequently, of late, has given but little assurance of uninterrupted delivery of finished products being made. On white lead in oil, particularly, export orders have absorbed much lead, and there is still some export being undertaken. Some have pointed out that there will be no advantage gained in deferring shipment of their necessary requirements, and dealers will have, of course, to specify shipment soon if they have booked at the prices above outlined.

More Activity in Building

Building Construction During 1920 Will be Much Greater Than Last Year

WITH the return of weather conditions favorable to outside construction work building throughout the Dominion has opened up on a scale which far exceeds the corresponding period a year ago. New totals for building permits have been piled up, and last year's record to date is far surpassed. This in spite of the fact that the ascending prices for building materials and labor continue. The higher costs must be considered, however, as a factor in this year's higher total.

The total value of building permits issued during the month of March was $7,850,460 as against $3,303,440 for the corresponding period a year ago. The returns for the first three months of the year reveal a very large increase over last year and indicate a revival of building activity in Canada on a scale not experienced since the years before the war. For the first three months building permits totalled $16,138,556 as against $6,383,973 a year ago, or an increase of $9,754,583. Practically all important municipalities have contributed to this increase. The twenty-four cities of the Eastern Provinces record a total of $5,588,644 in building permits and the fourteen cities of the West, $2,261,816.

Building has been resumed on an extensive scale in Toronto, and the total for the month of $2,062,747 is far in excess of the records of her nearest rival and constitutes a record for building in Toronto this year. Montreal shows a revival also with permits issued to the value of $945,496 as against $228,208 for March a year ago. Other Eastern cities which have piled up substantial totals are Halifax with $226,435; Quebec, $392,524; Hamilton, $311,225; Kitchener, $319,690; and Windsor, $288,395. In the West Edmonton displays a marked recovery. In March, 1919, building in that city was practically at a standstill, the value of the permits issued being $2,200. This year the total is $600,650. Values for Winnipeg for March of the present year are $559,900 as against $42,700 a year ago. eRgina's total is $263,750, an increase of $223,050 over March, 1919. For the most part, however, the Western cities are feeling the pinch of the market for materials and are curtailing construction accordingly. The result is apparent in the returns.

SEND PAINT ORDERS BY AEROPLANE

An innovation as far as the paint trade is concerned was established by a large U.S. paint and varnish company which recently made a shipment of paint from its factory to a branch office by air. The airplane was painted with the company's product and bore the name of the paint on each fusilage.

The shipment contained about 200 pounds of paint. As a special advertising feature of the trip $500 worth of credit checks, entitling the holder to $1 worth of paints were dropped from the plane as it passed over cities.

Pleads For Better Co-operation in East

National Development Possible Only by Co-operation

MONTREAL.— M. A. Brown, mayor of Medicine Hat, Alta., made an interesting address before the Canadian Manufacturers' Association at a luncheon held in Montreal this week. Mr. Brown contended that it was only through co-operation of business men in all parts of Canada that the national development of Canada's resources could become united. This was particularly the case as between the East and the West.

Mayor Brown is taking an interest in matters of this kind and he is at present the president of the Alberta Industrial Development Association. This is a non-political association and its function is that of co-operatng with the Government of various Western provinces regarding the natural resources of the country.

"One of the greatest problems Canada has is your East and West problem," said Mr. Brown. "Failing the national development of our resources by the united efforts of the West and East it will become a real menace to our national developments."

Gathering Was Representative

Many local manufacturers and business men were present at the luncheon at which the above address was given and other interesting addresses were delivered by a number of men accompanying a delegation which came from the Western Provinces. Among these were Brig.-General H. J. McDonald, Col. W. J. Sadler, and others.

Among the important things pointed out by members of the delegation was the advantage of more frequent conferences between Eastern and Western interests. As a result of these addresses local business men have already agreed to give the Association above mentioned and the Industrial Congress, which is to be held in the West this year, their undivided and cordial support.

For More Effective Retail Advertising

Important Recommendations by Better Business Bureaus of the Associated Advertising Clubs of the World, to Encourage Cleaner and More Effective Advertising

The decidedly constructive character of the work of the Better Business Bureaus (local vigilance committees) of the Associated Advertising Clubs of the World is strikingly illustrated by some recommendations to advertisers issued by the Better Business Commission of Cleveland, which is affiliated with the Associated Advertising Clubs.

This matter has been prepared out of the experience of the best stores in that city, it is announced, and on the title page is the following: "Recommendations offered as a guide to advertisers to assist them in avoiding advertising statements and practices that have a tendency to reduce consumers' confidence in all advertising."

The text of the "recommendations" is as follows:

1. It is recommended that care be taken to substantiate definitely any fact or assertion made in an advertisement prior to the time the advertisement comes before the public.

Unintentional misrepresentations cause just as much criticism as intentional ones and the reader does not stop to consider that it may have been unintentional, the result being that the advertiser is criticized to an unjust extent and ensuing advertisements do not inspire the confidence they might deserve.

The wrong impression can be derived from an advertisement in which there is statement of one fact which is not well grounded.

2. It is recommended that the use of superlative statements be refrained from unless the advertiser can, and will, submit proof of such statements to the Better Business Commission if requested.

The force of superlatives in advertising has been considerably weakened through misuse. The public has a right to take superlative statements literally. The advertiser has a right to expect them to be taken literally when he has proof to substantiate them.

The repeated use of superlative statements which can not be substantiated, whether made by the same or different advertisers, destroys the confidence of the public in superlative statements which may be 100% truthful.

3. It is recommended that where comparative prices are being quoted, values be based on the average quotations for the same class of merchandise in other stores in the city.

The public determines value in this way and a statement of value means to the reader the average value as found in other stores.

4. It is recommended where comparative prices are being quoted that a definite distinction be made between "early season" values and "current" values based on the average quotation for the same class of merchandise in other stores in the city.

The wrong impression is created in the mind of the public when former or "early season" values are referred to and the reader interprets the statement to mean "current" values.

5. It is recommended where comparative prices are being quoted that when merchandise of different values has been grouped for sale at one price, the advertisement state the minimum value in the group as well as the maximum value.

The reader generally gets the wrong impression of the entire lot of merchandise when the highest values in the group are quoted and the advertisement does not state the lowest values. Where the lowest as well as the highest values are quoted the reader gets a better impression of the group and will not be subject to disappointment.

Greater confidence in the advertiser is inspired when the complete price range is clearly stated.

6. It is recommended where comparative prices are being quoted and merchandise of different values has been grouped together for sale at one price that each article bear a ticket indicating to which of the advertised values that article belongs.

The public should have no difficulty in ascertaining which articles of merchandise are of the various values stated in the advertisement.

7. It is recommended that extreme care be taken in advertising to avoid making statements which might be misconstrued.

Statements which can be misconstrued cause criticism of the advertiser to an extent which may be unjust.

Equivocal statements destroy confidence and invite suspicion.

8. It is recommended that when merchandise is being advertised which is soiled, of second quality, or for any reason whatever not perfect in every respect from the standpoint of the manufacturer, the advertisement state clearly and explicitly the facts as they are.

Unless such facts are clearly stated customers are disappointed when they come to the store in response to the advertisement, and confidence in advertising is lessened.

Not to state such facts clearly is judged by the Federal Trade Commission to be a violation of Special Provisions to Regulate Interstate Commerce.

9. It is recommended that when merchandise is being advertised which is an imitation of merchandise of higher quality or value, great care be taken that the advertisement does not convey the impression that the merchandise is the genuine quality.

There is danger of misrepresentation to the extent of fraud.

Even if from the sale price quoted it is obvious that the merchandise is not genuine, or even if the advertiser is under the impression that the public is informed generally that such merchandise is imitation, greater confidence is inspired in the advertising if care is taken to point out the facts clearly.

Auto-Accessories

It has always been our policy to keep a full line of only the highest brands in hardware—to give honest advice and service—and to maintain fair prices.

We handle a selected line of auto-accessories on the same principle—and we maintain the same completeness from repairs to lubricants.

We recommend Imperial Polarine for your motor cars lubrication and sell by the Imperial Polarine Chart of Recommendations which shows the grade recommended for each car. Call and see us

[DEALER'S NAME AND ADDRESS HERE]

IMPERIAL Polarine

T-1613

2 columns x 6½ inches.

General appeal to sell accessories and oil.

IMPERIAL Polarine

Careful Inspection Correct Lubrication

TWO things are essential to the efficient operation and long life of your car.

One is periodical inspection, the other is correct lubrication.

We are specialists in both. We know the mechanism of a car thoroughly. We can detect every flaw in the operation of your motor. We have saved hundreds of dollars for motorists. We can save you costly repairs—our service charges are reasonable.

For correct lubrication we have three grades of Imperial Polarine. There's a special grade for your car. Let us drain your crank-case and fill it up with the correct grade of Imperial Polarine.

We sell Imperial Premier Gasoline—the gasoline which gives "more miles per gallon." If you use these two Imperial products exclusively you'll get the utmost service from your car. Drop in and see us.

IMPERIAL Polarine
MAKES A GOOD CAR BETTER
Cut No. 41

IT WILL be worth your while to read the text matter of every advertisement shown on these pages. Under each advertisement, the character, size and number is shown *in red*.

If you wish to advertise your lubricating oil business in general, Nos. T1613, T-1615, T-1619, T-1620, T-1616, T-1612 and T-1618 would be very effective copy to use. If you cater specially to Ford owners, Nos. T-1616 and T-1611 should prove very successful. If you are in a rural district where tractors are in use, Nos. T-1621 and T-1622 are specially suitable. They offer real lubricating information to tractor owners.

When you order a car load of Imperial Polarine, No. T-1617 should be used at least two or three times. The trade-mark and barrel cuts prove effective on stationery, larger advertisements, price-lists and billheads.

We will gladly send these advertisements, free of charge, to any dealer *who will use them. Order by number* through the Imperial Salesman who calls on you, or direct to the General Sales Department, Imperial Oil Building, Toronto, Ont.

IMPERIAL Polarine

Motor Car Service

IF it's a spark plug—tube—oil—repairs of any kind—or if it's a new car, come to us

EDITORIAL COMMENT

FARMER GOVERNMENT ENFORCES ANTI-GLARE HEADLIGHT LAW

CREDIT is due the new Farmer Government in Ontario for their quick and definite action in enforcing such a drastic measure as the Anti-Glare Headlight Law, regulating the use of lenses and other devices for eliminating the dangerous glare of headlights on motor vehicles within the province. The old Government passed a similar law some years ago, but failed to enforce it. It is alleged that the reason for its non-enforcement was the fear of losing votes in the rural municipalities. If this was the case it is indeed significant that a Government largely representative of the farm and rural districts put the law into effect as its first piece of motor vehicle legislation.

The Ontario Motor League and other organizations have been working vigorously for the enforcement of this regulation, as it was felt to be in the best interests of motorists on the roads of Ontario. Certificates will be issued by the Minister of Public Works and Highways as to the status of the various devices being marketed through the trade.

PREPAY FREIGHT IN U. S. CURRENCY

RAILWAY officials of the United States have intimated that they intend to proceed with regulations which provide that after May 1 all freight shipments to points in Canada must be prepaid at the point of shipment, right through to the point of destination in Canada, in United States currency, irrespective of the mileage on United States lines or the mileage on Canadian lines.

Emphasizing the point notice has been given by one United States railway that they would not only demand this prepayment, but would refuse any transhipment to Canadian points at the border. Thus Canadian importers will not be enabled to secure merchandise by prepaying their goods for the United States haul in United States currency and then pay the haul in Canada in Canadian currency.

At time of writing Canadian currency is worth 88 to 88½ cents on the dollar in New York funds. It is therefore evident that the impost on Canadian importers is likely to be heavy.

IRON AND STEEL INDUSTRY PLANNED FOR BRITISH COLUMBIA

A GOVERNMENT iron and steel industry is being planned for British Columbia by the Department of Mines. The province is said to have magnetite and hematite ore in large quantities, also plenty of coal and water-power. Hon. Mr. Sloan recently made the following statement in addressing the Legislature of British Columbia:

> "Members of the House may be interested to know that the Government has taken a direct hand in assisting in experiments with our magnetite ores, and that much of the time of William M. Brewer, one of the district mining engineers, is being devoted to the supervision of this working, and the obtaining of further information regarding the extent and character of the iron ore deposits of British Columbia. In this connection it is interesting to note that there is now an application before the Department from Mr. Agnew, of Los Angeles, who has a furnace designed along the lines of that recommended by Dr. Alfred Stansfield, with whose report on the feasibility of the electro-thermic treatment of the magnetite iron ores of British Columbia the members are familiar. By his process the ore is reduced to the metallic in an outside or fuel-fired furnace and afterward precipitated in the electric furnace."

Magnetite ore of British Columbia, tested in blast furnaces, is said to have assayed 52½ per cent. The establishment of a steel industry in British Columbia will undoubtedly do much to encourage manufacturing on a large scale, and that is the end much desired by the Pacific coast province.

At the present time legislation is in effect in British Columbia providing for a bonus of $3 per ton from local ore and $1.50 a ton from imported ore. This legislation is effective until 1925.

WHAT HAS THE FEDERAL BUDGET IN STORE?

THERE is much apprehension among those engaged in all branches of the trade as to what the Federal budget has in store. Manufacturers, wholesalers and retailers are very much incensed over the continued delay in presenting the budget statement in the House of Commons owing to the fact that while they are kept in the dark as to what the Government has in mind they are unable to proceed with their business plans. It is felt that it would have been much more in the business interests of the country to have speeded up the presentation of the statement in order that the trade could provide early for their responsibilities and get down to business with a good start. The session of the Federal Government has been dragging along and the budget left to the last minute. It is expected to be brought down during the week of May 2, according to latest reports.

The trade has even more than usual interest in the budget this year on account of the indefiniteness which has surrounded the proposals in mind for raising increased revenue over last year. The Minister of Finance admittedly has a difficult situation to face, as ordinary expenditures for the coming fiscal year are estimated at $440,000,000, which with other expenditures, brings the total to $540,000,000. When compared to the figure of $380,000,000 as the total amount of revenue collected last year, it is evident that a deficit of $160,000,000 will be faced unless more sources of revenue are found or higher taxation imposed.

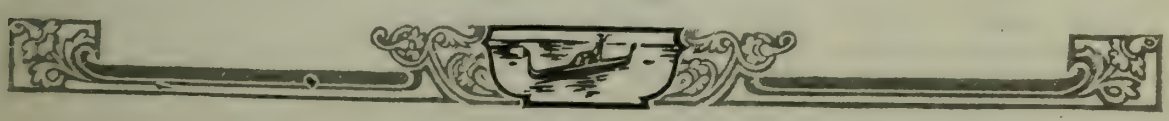
To raise the additional revenue suggestions have been made for a tax on turnover, an excise tax or a modification of the present business profits tax to render it more productive. The feeling of the trade is that the obligations of the country must be met and that payment should be expedited. Everyone is therefore in an expectant mood as to what the Government has found it necessary to do to raise the revenue.

INCREASE IN BUILDING REFLECTS CONFIDENCE

MANY predictions were made from time to time during the slump in building operations as to what change was likely to take place in the near future. Despite continued high costs, it is shown by statistics that building construction during 1920 promises to be substantially greater in volume than during last year. This applies to practically all parts of Canada. February figures of permits issued in fifty-four Canadian cities for 1920 show an increase of 124.32 per cent. over the record for that month last year. Figures from each of the larger centres in Canada indicate that this percentage of increase is being made in each community. The condition is therefore a healthy one and reflects confidence in business conditions for some time ahead. Actual figures from the various parts of Canada are reproduced elsewhere in this issue.

WINDOW DISPLAYS STEADY WORKERS

TO thousands of people, especially those who have to do the buying, the windows of a store are like the index of a book, they tell what is within. If the windows are always neatly dressed and care is taken to show seasonable goods and stock that is well cared for and in good condition, the impression created for the store is a favorable one. The prospective buyer is reasonably justified in deciding that a "live" window display indicates a "live" store and one where he may expect good service and good goods. No store could have a better advertisement. Thousands of people before deciding just what they want to buy and where they want to buy it "look in the windows." Especially is this the case with that large buying class who do not have time to do their shopping by daylight but see the windows only at night. A well-dressed window works every minute, twenty-four hours a day and as many days as it stays in. Good window displays are essential the year round, but with the exception of Christmas season there is probably no period in the year when windows are watched more closely than in the next six weeks. Scores of fall fairs will be held in that period and thousands and thousands of farmers, all prospective buyers of the very best class, will be looking in the windows of all merchants. This is especially the case in the larger centres where fairs are held for several days. Dealers have an opportunity that will not come again for a whole year of placing right before the eyes of thousands of prospective buyers, not a picture, but the real goods. It is well to keep in mind that in the window displays of the most progressive merchants, prices of everything shown are invariably given.



EVENTS IN THE TRADE

Business Changes

Cargill, Ont.—M. J. Weber has purchased A. P. Reuber, hardware business here and at Elmwood, Ont. W. C. Reuber is managing the Cargill store. A. P. Reuber is in charge of W. F. Lawrence hardware, Maple Creek, Sask.

Maple Creek, Sask.—W. F. Lawrence, Ltd., have commenced work on their new building, which will bring all departments of the store under one roof, whereas formerly two stores were occupied.

Granton, Ont.—W. W. Baker, hardware, has sold out to Newton Gunning.

Business Notes

Goderich, Ont.—Hardware stores have decided to do business in future on a strictly cash basis, conforming with the plan previously followed by other local trades.

Kingston, Ont.—The City Council will submit a by-law to the electors approving an agreement for the establishment of a cutlery factory in this city.

Montreal, Que. — Northern Electric Company, Ltd., has established a plan for an employees' pension and benefit fund, the whole cost of which will be borne by the company. A committee of the management will administer the fund. Employees who were away on military service are receiving credit for the total period of service as if they had been continually in the employ of the company.

Personals

A. D. Anderson, sales manager of the Leslie Tinware Co., Ltd., Ottawa, Ont., has returned from a successful trip down East and pronounced business very good. He is leaving immediately for Toronto and Western points.

F. A. Leslie, president of the Leslie Tinware Co., Ltd., Ottawa, Ont., is leaving for New York this week. The company are going into the metal toy business very extensively and Mr. Leslie is after the latest in toy making machinery, etc. He also intends visiting a number of the toy factories at the same time.

NEW OFFICE OPENS TO AID SPORTSMEN

Montreal, Que.—In preparation for the fishing season and the influx of tourists, the Provincial Government has opened an office on Notre Dame Street, in which will be housed game wardens and inspectors, who will be available to the inquiring public, grant fishing licenses to outsiders and otherwise look after the fishing season, and tourists generally.

S. C. JOHNSON & SON, LTD. TO LOCATE IN BRANTFORD

Definite announcement has been made that S. C. Johnson & Son, Ltd., of Racine, Wis., will locate a factory in Brantford, Ont. Reference was made in HARDWARE AND METAL in a previous issue, to the probability of Brantford being chosen. The manufacture of automobile products and artistic wood finishes for cars will be carried on.

ACQUIRE CANADIAN PULPWOOD

Ottawa.—A million and a half acres of pulpwood forests in Southern Labrador immediately north of Cape St. Charles, in Newfoundland territory, are being acquired by a United States securities firm to supply the British trade.

DEATH OF E. C. SIMMONS

The death of E. C. Simmons, founder of the Simmons Hardware Company, St. Louis, is announced. Mr. Simmons died at the age of eighty years, having been identified with the hardware trade for sixty-four years.

Incorporations

Beattie, McIntyre, Ltd., has been incorporated with head office in Toronto to manufacture and deal in electrical appliances.

Key-Bolts and Rail-Anchors, Ltd., has been incorporated with head office in Toronto to carry on business as iron and brass founders, manufacurers and dealers in metals.

Auto Indicator Co. of Canada, Ltd., has been incorporated to manufacture and deal in auto indicators and all kinds of auto accessories.

Western News

E. T. Grobb, sales manager of the Dominion Chain Co., Ltd., is making a business trip to the Western coast. Mr. Grobb stopped over at Winnipeg for the week end.

James A. Hossack, sales maanger of the Lufkin Rule Co. of Canada, Ltd., spent the week end in Winnipeg. Mr. Hossack is making a business trip to the Western coast, and stopped over en route.

M. J. Gillard, who has for several years been manager of Campbell & Ferguson's hardware store, Deloraine, Man., has severed his connection with the firm and gone to Winnipeg.

Wakytur Manufacturing Co., Ltd., 185 Pacific Avenue, Winnipeg, Man., are moving from their present location to the McRae Building, corner of King and James Streets, where they will have double the floor space previously occupied.

Marshall-Wells, Ltd. Open in Vancouver

Vancouver, B.C.—Marshall Wells, B.C., Ltd., has been incorporated with a capital of $1,000,000, and in the near future will open a wholesale hardware business in this city. Negotiations for a site are expected to be completed very soon. J. T. Elson, formerly of Aberdeen, Wash., will be the manager of this branch of the Marshall Wells Company. Other branches of the company in Canada are located in Winnipeg and Edmonton.

Mr. Elson states that the reason for opening a branch in Vancouver is to supply the increasing demand for tools and other hardware in British Columbia and to establish an exporting centre for Canadian-manufactured goods for Australia and the Orient.

The company, he said, had largely increased its business in Australia, New Zealand, China and Japan, and the American branches were being taxed to keep up with the demand. Realizing that the demand for British and Canadian tools was always great across the Pacific and that Vancouver was bound to become a large exporting centre, the move had been taken to establish a third Canadian branch here.

Mr. Elson stated that his company had no plans, as yet, to do any manufacturing here, although he realized that raw products were easily accessible. He was confident, however, that this line would be undertaken here some time in the future when business warranted it.

Montreal News

Colonel Robert Starke, of the wholesale hardware firm of Starke-Seybold, Ltd., returned on Wednesday from a business visit to Toronto.

F. W. Smith, manager of the Ontario division Brandram-Henderson, Ltd., Toronto, was a week-end visitor this week to Montreal.

James Davidson, president of The Thos. Davidson Mfg. Co., Ltd., Montreal, returned this week, via Toronto, from a trip to California.

George C. Fletcher, of the purchasing department of the Sherwin-Williams Co. of Canada, Ltd., was this week in New York.

E. W. Scott, representing Wire Goods Co., Worcester, Mass., Cassady-Fairbank Mfg. Co., Chicago, and Andrews Wire and Iron Works, Watford, Ont., was this week in Montreal.

H. C. Hunter, of the wholesale harware firm of Bannatyne and Hunter, Wellington, New Zealand, was this week a visitor to Montreal, where Mr. Hunter bought various lines to be shipped to the Southern Commonwealth.

W. George Helliar, manager of the Maritime division of Brandram-Henderson Ltd., Halifax, and C. G. Fraser, St. John, N.B., manager, attended this week the convention of "Save the Surface" manufacturers and salesmen held in the Windsor Hotel.

Visiting Montreal in the interests of a closer development of the East and the West, Mayor M. A. Brown, of Medicine Hat; A. E. McKenzie, of the Brandon Board of Trade; Brigadier-General H. F. McDonald, general manager Alberta Industrial Development Association; Major F. J. James, president Regina Board of Trade, and Lieut.-Col. J. Y. Reid, Winnipeg Board of Trade, were guests at a luncheon in the Metropolis this week, given by members of the Canadian Manufacturers' Association.

PURCHASING AGENTS CHOOSE OFFICERS

The annual meeting and dinner of the Purchasing Agents' Association of Montreal and District was held last week. At that time, among other matters, officers for the year were nominated, and the election resulted in the following choice: President, E. G. Donegani, Simmons, Ltd.; vice-president, T. P. Webster, Dominion Textile Co., Ltd.; secretary, Thompson Robertson, Thos. Robertson Co., Ltd.; treasurer, S. E. Webster, Dominion Textile Co., Ltd.; and the following as executive committee: L. C. Haskell, Southern Canada Power Co, Ltd.; C. G. Jones, United Shoe Machinery Co. of Canada, Ltd.; M. A. Hoey, Canada Cement Co., Ltd.

CUTLERY AND HARDWARE EXPORTS ON THE INCREASE

The total value of Canadian exports of cutlery and hardware for ten months ending with January, 1920, was $5,974,220, as compared with $5,387,075 for the same period 1919, and $866,244 in 1918. For the month of January total exports of these lines were valued at $736,411 as compared with $620,942 for the same month in 1919.

CRANE COMPANY IS EXPANDING

Crane Limited are extending their operations throughout Canada with the erection of several warehouses and the establishment of branches at various points. HARDWARE AND METAL is informed that among the important developments which are about to be carried out are the erection at Calgary and Halifax of warehouses and the establishing of branches at Regina and Ottawa. The new buildings will ge of mill construction and with warehouse established at these various points it will give Crane Limited a chain of branch warehouses from coast to coast. A sales office is being opened at Quebec.

EARN $150 A WEEK AND WANT MORE

London, England.—Tinplate steel workers, who are already earning as high as $150 a week, have presented new wage increase demands. One wage increase has been granted this year.

MONTREAL PLANS A CLEAN-UP WEEK

Through the Health Department of the City of Montreal some 50,000 copies of a circular have been printed for public contribution, calling the attention of householders and others to the importance of the annual spring clean-up of their premises.

With this important matter brought so clearly before the average householder, hardware dealers will undoubtedly take advantage of the opportunity to publish broadcast the fact that paint and varnishes, wall finishes and other specialties sold by them are to be had on application. To this end the time is opportune and will, without question, be improved through, windaw display and timely advertising. It is one of those times when the hardware dealer can cash in, in selling such products as must be used by the householder at this season of the year. With publicity given to the use of paint, varnishes, and specialties by Save the Surface Campaign, all this can be linked to the retail store effectively. It would seem that that dealer who is alive to his opportunity will be able to cash in well on this proposition.

Catalogues and Booklets

E. EDELMANN & CO.

E. Edelmann & Co., Chicago, have recently issued the fifth catalogue of automobile accessories. Fifty pages of illustrations, descriptive data and prices comprise the booklet, and each line manufactured by the company is listed. A special feature is the reproduction on the first four pages of views of different departments of the Edelmann plant. The first page shows an exterior view of the factory and main office. Other views are of the offices, assembly room, machine shop, shipping and screw machine departments. An index to the contents completes the catalogue.

STANLEY WORKS

The Stanley Works, New Britain, Conn., have issued a very interesting new catalogue containing twenty-four pages and showing a line of special hardware for garage building. The catalogue covers such lines as garage door holders, numerous styles and kinds of hinges, cremone bolts, casement bolts, chain and foot bolts, door latches, and pulls of various kinds, hasps and staples, etc., and is very well illustrated. The catalogue also contains some very good suggestions for the proper combination of hardware for the different openings and shows a number of the different kinds and styles of garages. Any reader of HARDWARE AND METAL that is interested may have a copy from the above-named firm.

A most complete and attractively-arranged catalogue of automobile accessories for 1920 trade has been recently issued by Starke-Seybold Ltd., 14 St. Peter Street, Montreal. Care has been exercised in illustrating and reproducing descriptive matter, prices, etc., so as to minimize errors in filling mail orders. Articles of accessories and garage equipment are treated very fully and the illustrations being printed on heavy coated paper bring out every detail. A three-page index in alphabetical order at the end of the catalogue gives a complete guide to the contents.

Beatty Bros., Ltd., Fergus, Ont., have issued a new barn book dealing with the subject of planning, designing and equipping barns and other farm buildings. The barn book contains much information along these lines and is well illustrated. It is bound in such a way as to make it a permanent work of reference and is very clearly indexed to facilitate use. The book is sent free of charge to any farmer contemplating new farm buildings or remodelling present buildings. The barn plan service of the company is outlined in a section from page 63 to page 80. The information in this section is of interest to farmers in every district throughout the Spring, Summer and Fall seasons.

To be No Deluge of Cheap German Goods on Canadian Market

German Iron and Steel Industry Threatened With Extinction—Germany No Longer a Force in International Commerce

"Germany's iron and steel industry is threatened with temporary extinction," according to a special dispatch from Berlin to The Iron Trade Review. "The recent tremendous political upheavals in Germany, with bolshevism for the moment rampant in Westphalia, Germany's Pittsburgh district, can have no good results, but they may serve at least to paint in clear outlines an important fact which has been known to close students of European industrial affairs for a year but which the average business man in Canada or the United States does not seem to have grasped—namely, that central Europe, including the once mighty Prussian empire, is a spent force in international commerce. As an iron and steel producer, in the international sense, Germany no longer counts.

"Those who have looked for a deluge of cheap German goods in American and British markets may safely lay aside their fears.

"The airtight blockade of the British navy during the war inflicted incalculable damage in the industrial sphere and forced the country to exhaust its supplies of finished and raw materials; the existing economic blockade resulting from the virtual extinction of the purchasing power of the mark is almost equally disastrous. Except vitally necessary food, much of which is sent by relief organizations, very few imports are coming into the country. The trade of the great port of Hamburg has dwindled to a tenth of its pre-war volume.

"German iron and steel production has been reduced to less than a third of its pre-war output. Pig iron production has diminished more or less steadily during the past seven years from 19,300,000 metric tons in 1913 to 6,290,000 metric tons in 1919. The output of steel

ingots likewise fell from 18,940,000 tons in 1913 to 7,770,000 tons in the year recently closed. Dutch shipbuilders at Rotterdam are obliged to import American plates at high prices despite the fact that the centre of the once great German iron and steel industry is only 120 miles away, with a water haul down the Rhine thrown in. As a result of the war, Germany has been reduced from second to third place among the iron producing nations of the world, being supplanted in second position by Great Britain, the United States being first."

INQUIRY DEPARTMENT

Paints, brushes, earthenware, etc.—An Amsterdam company are buyers of dry paints (earthpaint, chemical paint, zinc white), paint brushes, paint mills, enamelled kitchen utensils, galvanized pails, window glass, plate glass, glass ware, earthenware and porcelain.

Tin bars. — Greek manufacturer inquires for first quality tin bars, and prices of same.

Lawn mowers.—A Yorkshire firm wish to hear from Canadian manufacturers of lawn mowers who can fill orders.

Electrical accessories.—An Edinburgh firm ask to be placed in touch with exporters of the above.

687. Dry Carbonate White Lead.—A Glasgow firm ask to be placed in touch with exporters of the above.

689. Formaldehyde.—An Edinburgh firm ask to be placed in touch with exporters of the above.

692. Asbestos Waste Fibre.—A Glasgow firm ask to be placed in touch with exporters of the above.

694. Painters' Brushes.—An Edinburgh firm are open to buy the above as soon as exchange conditions permit.

695. Lubricating Oils.—An Edinburgh firm are open to buy the above as soon as exchange conditions permit.

706. Emery Cloth and Paper.—A Bolton firm, who state they have large connection among consumers of the above, ask to be placed in touch with exporters. for business on a buying or agency basis.

709. Enamelware.—A Liverpool firm of West African merchants wish to purchase cheap grades of the above from Canadian exporters for direct export to West Africa.

710. Galvanized Corrugated Sheets.—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

711. Asbestos Roofing and Building Material.—A Liverpool firm of West African merchants wish to purchase the above from Canada for direct export to West Africa.

712. Iron Bars.—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

713. Wire Nails.—A Liverpool firm of West African merchants wish to purchase the above from Canada, for direct export to West Africa.

714. Locks, Hinges, Furniture Fittings, Etc.—A Liverpool firm of West African merchants wish to purchase the above from Canada for direct export to West Africa.

718. Shovels and Tools for Use in Tin Mines.—A Liverpool firm of West African merchants wish to purchase the above from Canada for direct export to West Africa.

721. Galvanized Buckets.—A Liverpool firm of West African merchants wish to purchase the above from Canadian exporters for direct export to West Africa.

722. Galvanized Wire Fencing.—A Liverpool firm of West African merchants wish to purchase the above from Canadian exporters for direct export to West Africa.

726. Miscellaneous Manufactures. — Established Japanese firm seek immediate Canadian purchases of automobile accessories, tires, car varnishes, etc.

860. Pipes, boilers and Radiators.—A firm in Tientsin, China, dealing in engineer's supplies would like to get in touch with Canadian firms producing galvanized and black iron pipes, and boilers and radiators for heating installations.

861. Hand tools.—A large importing firm of hardware are anxious to buy Canadian hand tools. Catalogues and prices required. References.

862. **Iron and steel merchant bars, flat, round and half-round.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

863. **Angle iron, all dimensions L-U-T-4.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

864. **Sheet iron, all gauges.**—A Buenos Aires firm manufacturers' representative with an established clientele are desirous of handling these articles on a commission basis.

865. **Galvanized mild and crucible steel wire, all gauges.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

866. **Black wire for tying purposes, all gauges.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

867. **Special wires for making rivets and nails, all gauges.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

Saskatchewan R.M.A. Will Convene in Sectional Meetings

Plans for Annual Convention on June 8, 9 and 10 Are Now Complete—Former Procedure of General Discussions Will Not be Followed

SASKATOON, Sask. (Special).—The Executive of the Saskatchewan branch of the Retail Merchants' Association have now completed their arrangements for the Annual General Convention, which is to be held in the First Baptist Church, Moose Jaw, Sask., on Tuesday, Wednesday and Thursday, June 8th, 9th and 10th.

Ths convention, especially in view of the many important events that have taken place during the past year, having an important bearing upon retail merchandising, promises to be one of the most interesting conventions that has yet been held.

The convention will open at 9 o'clock on the morning of June 8th, with the registration of delegates and the distribution of badges. At 10 o'clock addresses of welcome will, it is anticipated, be given by the Mayor of Moose Jaw and the president of the Board of Trade and other public officials, followed by the president's address and the treasurer's and secretary's report.

Change From Former Years

This year will see a distinct change and a new departure in connection with the programme of the convention as compared with previous conventions in connection with the arrangements. Previous conventions have been taken up entirely by general discussions at which the whole of the merchants were present.

This year it was considered that much time would be saved on the part of the delegates if sectional meetings were held, dealing with each particular branch of the retail trade, and with this idea in mind, the first afternoon of the convention and the morning of the second day will be take up with sectional meetings of implement men, grocers, boot and shoe dealers, druggists, jewellers, automobile dealers, clothiers, music dealers, hardware, furniture, etc., each section of which will deal with matters of the most importance to their particular section.

At the meeting of the implement men, on the afternoon of June 8th, it is expected that H. Davidson Pickett of Moose Jaw, barrister, will explain various measures of legislation having direct bearing upon the retail implement trade. On the same afternoon a general meeting of grocers and wholesalers will take place at which an official connected with the Board of Agriculture will discuss the recently enacted Egg Law and explain his position as affecting the retail grocers.

In the evening of the same day, a general meeting will be held, when it is expected that Dr. J. G. Robertson of the Department of Trade and Commerce, Ottawa, an authority on business conditions and the markets of the world, will give an address.

Another interesting feature is also being introduced to the convention of this year in the way of moving pictures, and it is possible that at the meeting of the first day, the McClary Manufacturing Company will show their moving pictures, illustrating the manufacture of enamelware, tinware, galvanized-ware and most of the sheet metal lines sold by the average hardware store.

On the afternoon of the second day, the annual meeting of the Retail Merchants' Mutual Fire Insurance Company will be held, and W. P. Ball of Assiniboia, will give the report of the Annual Dominion Convention at Ottawa, followed by resolutions and the election of officers for the ensuing year.

Retailer From Dakota to Speak

In the evening of June 9th, another general meeting will be held, and it is anticipated that an address will be given by Fred P. Mann, the president of the North Dakota Retail Merchants' Association of Devils Lake, N. D. Mr. Mann is a successful merchant on the other side of the line and is known throughout the States as an excellent speaker upon any matters affecting retail merchandising and his address will undoubtedly be of great benefit and service to the delegates attending the convention.

The morning of the third day will again take the form of the general convention, when resolutions from various branches of the association and important matters respecting the interests of retail merchants will be brought forward, and it is anticipated that T. B. Patton, Income Tax Inspector of Regina will give an address on the making out of income tax returns, and other phases of this important question to retail merchants.

A Banquet Too

In the afternoon J. A. Banfield, president of the Retail Merchants' Association, (Dominion Board), who is always a welcome visitor to these conventions, will give an address which undoubtedly wil be full of interest, especially in view of the events that have taken place during the past year, and the discussions that have arisen in connection with the orders of the Board of Commerce affecting the retail trade. The election of officers will subsequently take place and it is announced that in the evening, the delegates of the convention will be given a banquet by the merchants of Moose Jaw, who may be relied upon to make this social side of the convention a great success.

The members of the Association throughout Saskatchewan are urged to set aside these dates in order that they may be able to attend this convention, and, by their presence and every possible means, make it one of the greatest and most successful conventions that has yet been held for them.

THE REASON HE'S SO HARD TO CAPTURE.

THE CLERKS DEPARTMENT

The "Art of Listening"

It is Wisdom to Keep One's Own Counsel and Weigh Well the Expressions We Voice—Few Employees Dismissed for Quietness

THE importance of practising the art of listening is emphasized in an interesting article by the editor, appearing in "Forbes Magazine." It points out the wisdom of keeping one's own counsel and weighing well the expressions which we voice. The article continues:

"James Stillman, one of the shrewdest bankers America ever produced, anxious to size up a young man whom he had thoughts of selecting as vice-president of his institution, invited him to dinner, and, throughout the entire meal never uttered a word, but left the embarrassed young man to get through the meal as best he could, trying to maintain conversation with the banker's daughter. It was a cruel, gruelling test, but the young man acquitted himself so creditably that he was given the position. That young man was Frank A. Vanderlip.

"I once had a somewhat similar experience. Negotiations had been opened with me which promised to lead to a job carrying better than $10,000 a year in salary. After everything had been tentatively arranged I was asked to step into the supreme chief's office to have a talk with him. Greeting me cordially, he asked: 'What are your ideas about conducting this work?' Then he sat back and left me to talk and talk and talk. Several invitations to have him express his opinions were politely but effectively ignored. He kept absolutely silent for, I imagine, half an hour. When I had finished he simply remarked, 'I think that's all right. Only spend more money and do things on a larger scale.'

"Many of us, unfortunately, haven't learned, as most leaders have learned, the wisdom of the oft-quoted epigram of Epictetus: 'Nature has given to man one tongue, but two ears, that we may hear from others twice as much as we speak.'

"I have frequently found when interviewing men of notable achievement that they persist in doing quite a little bit of interviewing themselves, showing as great readiness to ask questions as to answer them.

"Have you not noticed that among ill-mannered families everyone insists upon talking at once

"In families of better birth and breeding each person is allowed to have his or her say uninterrupted.

"The three principal ways to gather information and imbibe wisdom are: Reading, observation, listening.

"Have you not observed that the person who is a keen reader and observer usually is more willing to listen than to talk.

"Such a person has learned to act on the motto: 'Speech is silver, silence is golden.'

"Theodore Roosevelt assimilated more knowledge of a multitude of subjects than almost any other American—his range of information astounded both his intimates in America and the eminent people he met in Europe. Roosevelt learned so much, not only because he was an extraordinarily rapid and insatiable reader and an accurate observer, but because he possessed in supreme degree the faculty of extracting desired information from everyone he encountered. He was sometimes accused of being an incessant talker, but he knew also how to listen and how to encourage people to give him the best that was in them by intelligently questioning them.

"It has been noted that men who have attained great eminence were veritable interrogation marks when youngsters. They wanted to know the why and the wherefore of everything. They wanted to listen.

"There is a difference between listening and silence. The best listener is not the person who never says a word: there is an art of listening.

"The expert listener guides the talker into the desired paths not only by asking the right questions but by evincing intelligent, sympathetic interest and making appropriate comments.

"It is my experience that very few men who have accomplished big things can talk freely about themselves or their activities. They have to be coaxed, they have to be steered, they have to be stimulated. They must have the right kind of listening.

"Adolph Ochs, publisher of the New York 'Times,' was once approached by an interviewer who wanted Mr. Ochs to give an account of his career. The famous publisher politely but emphatically declined. By and by, however, he discovered that the interviewer was surprisingly familiar with his life's work, and, under the influence of the right kind of listening Mr. Ochs, almost before he realized it, was talking more intimately about himself than he had ever talked before.

"One of my associates, knowing that I was to write this little piece on 'Listening,' promptly sat down and produced the following helpful thoughts:

"The man who listens usually knows how to take orders. He does not jump to conclusions after he catches the first words of his superior, occupying himself with his own thoughts while important instructions pour into one ear and out of the other. He doesn't run off in haste to perform the mission assigned to him only to find that he must return for instructions he did not hear when they were first given.

"The good listener listens with both ears. He makes careful mental notes of instructions so that when he starts out to do a thing he usually goes straight

FEW EMPLOYEES ARE DISMISSED FOR QUIETNESS

One can learn more from listening than from talking.

A great many young men, both well educated and poorly educated, spoil their chances of advancement by being too voluble.

Very few employees are ever dismissed for being too quiet, but how many are dismissed because of their undue weakness for gabbing?

Wise men usually are like sponges: they seek to absorb all they can.

Shallow minds are inclined to let words drip from their tongue like a never-ceasing pitter-patter of rainwater.

All wisdom is a matter of absorption.

Before we can give out, we must take in.

One of the best ways to drink in knowledge is to remain silent, to listen, to extract all the useful knowledge possible from others.

The well-bred person usually is a good listener; the ill-bred person too frequently is a poor listener and a perpetual talker.

"Empty vessels make the most noise," is an adage not barren of truth.

through with the 'Message to Garcia.' The boss doesn't have to give a repeat order.

"When you telephone your voice goes into the transmitter. It's the 'receiver' that you put up to your ear. When you listen you receive, you get something. To listen properly to orders, to instructive conversation, to lectures, to sermons, one must cultivate a receptive frame of mind. There must be something to record the message or it will be of no value to you. Your mind must be more than a receiver. It must be a retainer. Like the phonograph record, it must present a sensitive surface for the retention of impressions.

"In order to listen properly you must hold your tongue in leash. You must talk less. The following old rhyme contains wisdom:

'A wise old owl sat in an oak,
The more he learned the less he spoke,
The less he spoke the more he heard.
Why can't we ape that wise old bird?'

"The growth of the 'American Magazine' from a circulation of less than half a million to a million and a half within a few years has been one of the outstanding achievements in modern publishing. The success of this publication has been chiefly due to one man, its editor, John M. Siddall. He is about the most astute listener ever born. He can wring a fascinatingly interesting story from almost any human being, be he policeman on the beat, the Pullman porter, the keeper of a storage warehouse, a pawnbroker or a celebrity.

"Listening pays. Listening broadens. Listening educates. It is human to prefer a listener to a talker.

"The person who does not want to listen does not appreciate the importance of acquiring knowledge and culture.

"It has been remarked that one of the reasons phonographs and mechanical piano players are so popular is that it is considered all right to keep on talking while they are playing!

"We all try to shun gabbers—maybe because we want to do most of the gabbing ourselves!

"To grow, to advance, to gain friends, learn how to listen. It has been said that even a fool can pass for a wise man if he will but hold his tongue.

"It was Disraeli (who knew how to talk) who once remarked: 'There are some silent people who are more interesting than the best talkers.' He also said: 'Silence is the mother of truth.'

"Carlyle, who wrote more about silence than he practised, nevertheless enunciated a worth-while truth when he said: 'Under all speech that is good for anything there lies a silence that is better. Silence is deep as Eternity; speech is shallow as Time.'

"Silence is essential to contemplation and reflection. And only through contemplation and reflection can we come to know wisdom.

"Even if your ambition be to become a good talker, an important preparation is to be a good listener.

"Salesmanship used to be regarded as the art of talking. The ablest salesmen to-day listen quite as much as they talk.

"You will never make enemies and rarely will make mistakes by listening. You are in danger of making both by careless talking.

"Learn to listen."

Is the Board of Commerce to Disband?

More Support From the Government is Essential to the Well-Being of the Board — Can't Continue With Only Two Commissioners

OTTAWA, April 27.—It is becoming amply apparent that the Board of Commerce cannot struggle along much longer with only two commissioners and without a far more vigorous support by the Government than hitherto has been given. It is believed that W. F. O'Connor's reported intention to resign is due not alone to the opportunities being offered him by the private practice of his profession, but in a feeling that the board's pathway has not been made as smooth as it might have been had it been backed up by other departments. It is common knowledge that the board is dissatisfied with the treatment it has received from the Civil Service Commission, the Commerce Commissioners claiming that the regulations of the Civil Service Commissioners were inapplicable to the needs of the Commerce body, and are hampering to its work.

For some time there was a feeling in Ottawa that the Board of Commerce was getting shaky on its legs and was not long for this world. The reply of Sir George Foster in the House to a direct question, that the Government did not intend to end the board, set those rumors more or less at rest.

Think Position Stronger

The Commerce Commissioners themselves think that their case for existence has been strengthened by the late Supreme Court decision with regard to the board's orders forbidding Price Bros. to export paper until the Montreal papers had received their requirements at a fixed price.

The ruling of the court was that the board had no jurisdiction on this matter, because, in the opinion of the judges, a newspaper was not "a necessary of life."

The Board of Commerce takes this to be a tacit admission of its jurisdiction to regulate the profits made in connection with all "necessaries of life."

Sir George Foster in answer to a question in the House as to whether W. F. O'Connor, K.C., had resigned from the Board of Commerce, replied in the negative.

THE CARORUNDUM COMPANY PLANS NEW EXTENSIONS

The Carborundum Company of Niagara Falls, N.Y., plans to spend approximately a half a million dollars in extending and improving its plant at Niagara Falls and its two furnace plants, one at Niagara Falls, Ont., and the other at Shawinigan Falls, Quebec. The building plan includes a three-storey addition to the paper and cloth plant at Niagara Falls which will provide greater facilities for storing and curing. Another addition, just completed, will extend one of the wheel making and kiln departments. Other big extensions and improvements have been planned and work will be started immediately. These plans call for additions to the crushing departments and other improvements at the furnace plant at Niagara Falls, Ont., and at Shawinigan Falls, Quebec. Besides these building operations the program calls for the extension of at least fourteen different departments at the Niagara Falls, N.Y., plant.

MANUFACTURERS MUST MAKE RETURNS ON THEIR PLANT VALUES

Contending that many manufacturers have, for years, greatly undervalued their various manufacturing plants, Alderman Lamarre of Montreal City Council had made application to the Administrative Commission that a return be cabled regarding the valuation of plants. His intention is that, owing to the increased value of property the various plants should be revalued. This, it is claimed, would give to the city of Montreal some $200,000 additional revenue.

SCALE STAMPING CHARGES MUCH HIGHER

Montreal.—Through a new classification issued by the Department of Weights and Measures at Ottawa, the old rates for stamping scales had been dropped, a new schedule of definite prices is made to apply on various types of scales. Ordinary platform and similar scales are now subject to the following inspection charges: Ten pounds and under, 25 cents; eleven to thirty pounds, 50 cents; thirty-one to two hundred and fifty, 75 cents; 251 to 1,000, $1; 1,001 to 2,000, $1.50; 2,001 to 4,000, $2; 4,001 to 6,000, $2.50; 6,001 to 10,000, $3; 10,001 to 15,000, $3.50; 15,001 to 20,000, $5; 20,001 to 40,000, $6; 40,001 to 60,000, $8; 60,001 to 80,000, $10; 80,001 to $120,000, $12.

For each additional ten tons an added charge of $1 is made. Extra fees for weights are charged to the above prices on equal arm scales.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

AERO CARD

The Aero Manufacturing Co., Ltd., Sherbrooke, Que., are offering the trade their new clothes line cord which have the trade name of Aero Cord.

The manufacturers describe their new cord and also make the following claims:

A solid braided cord or a twisted rope alone will always stretch to a considerable extent, but proper combination of

Clothes Line Cord

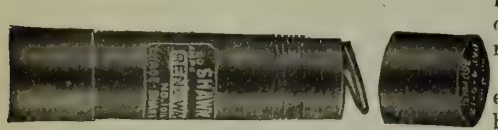
the two reduces this trouble to a minimum.

The construction of the Aero Cord is based on the following principle: The more twist given to a fabric or rope, the greater the strength for a given diameter, but when a tension is exerted on this article the tendency is to unwind and straighten out, the unwinding process is directly proportionate to the degree of tension exerted; this not only weakens the fabric but allows of a considerable degree of stretching.

The Aero Cord is composed of a special twisted fibre cord covered by braiding multiple plies of cotton under high tension, around it, confining it closely, so that it will neither unwind, weaken nor stretch, and in case of water-proofing, is subject to a solution which permanently maintains the fibres of the whole in its original state and strength, eliminating wet or dry rot or stretching and rendering it almost indestructible. The water-proofing solution is neutral and will not spot or discolor fabric when used as a clothes line.

RENEWABLE FUSE

The Northern Electric Co., Ltd., 121 Shearer Street, Montreal, Que., are placing on the market their new fuse,



RENEWABLE FUSE

which goes under the trade name of Shawmut Renewable Fuse, and which they state has been approved at the underwriters' laboratories.

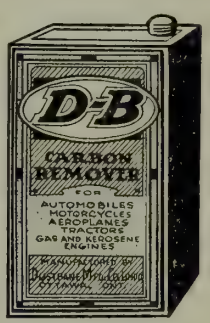
In describing their new fuse the manufacturers make the following claims: In the design of these fuses the number of parts has been reduced to a minimum in order to make the work of refilling as simple as possible. No mechanical or technical experience is necessary, the one tool needed is a screwdriver, and this for the larger sizes only. Particular attention is directed to the construction of the ferrule style of fuses. By a special form of snap washer the fusible element is firmly held at both ends between two flat metal faces, and when the ferrules are screwed on, each assembly is jammed to a positive mechanical contact. This contact, it should be noted, is made between the washer and an inner metal end cap. All threads are metal to metal.

The design of the knife blade type is such that accurate centering and positive end locking are assured. In the design of these fuses care has been taken to provide more than ample strength to withstand the forces released at the instant of blowing.

A NEW CARBON REMOVER

The Dustbane Mfg. Co., Ottawa, is putting on the market a new carbon remover. This, it is claimed, is a scientific compound which works through chemical action, without damaging the metal.

The manufacturer describe D. B. Carbon Remover, as it is called, as follows: It is applied to the cylinder, while



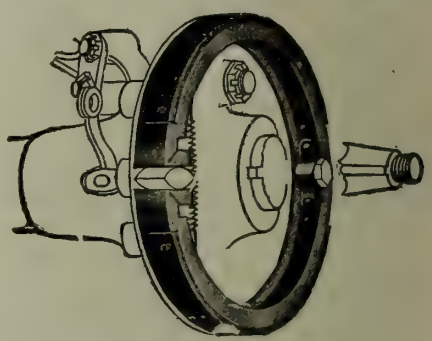
warm, through the spark plug holes. It forms a gas which penetrates the crust of carbon and separates it from the metal.

When the engine is started, the first explosion pulverizes the loosened carbon and drives it out through the exhaust, leaving spark plugs, cylinders, valve seats, etc., perfectly clean. The whole operation requires only half an hour.

They claim that D. B. Carbon Remover will not mingle with oil; that it does not cut compression and that it has been subjected to severe tests before being put on the market.

BRAKE SHOE

The Republic Auto Parts Co., Long Island, N. Y., U.S.A., are offering to the trade their new Bulldog Brand Pressed Steel Brake Shoe for use on Ford cars. They claim that it is a great improvement in brake shoe construction and that owing to its construction, combining strength and durability, it practi-



Pressed Steel Brake Shoe

cally eliminates any disadvantages those made with the cast iron process may have.

The manufacturers make the following claims: That these brake shoes will not break, slip or warp, and lining can be replaced in few minutes when worn. Will last 10,000 to 25,000 miles on the original set of lining. Fits all Fords (1909 to 1920). Made of U-shaped channel steel, rolled and formed into accurate circle; creates even friction to every part of the lining; insures perfect contact. Positive and safe in action. Packed in cartons of 25 sets ready for shipment (each set packed in individual boxes). Weight per set, 4 lbs.

THE LETTER BOX

Wire Fencing

H. A. West, Esq., Annapolis, Royal, N. S.—Can you advise us the names of manufacturers of wire fencink with an overhang at the top to prevent anyone climbing over?

Wire feneing can be procured from the following : Banwell Hoxie Fence Co. Hamilton, Ont.; The Frost Steel & Wire Co., Ltd., Hamilton, Ont.; Dominion Iron & Steel Company, Sydney, N.S.; B. Greening Wire Co., Hamilton, Ont.; C. H. Johnson & Sons, Montreal, Que.; Steel Company of Canada, Hamilton, Ont.; Laidlaw Bale Tire Co., Hamilton, Ont.! Standard Tube and Fence Co., Ltd., Hamilton, Ont.—Ed.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ADVANCES in hardware prices continue to be made. It is interesting to note, however, that fewer price changes have been made this week than for some time past, although according to present indications the peak has as yet not been reached and the tendency in nearly all cases is upward.

Pipe fitting prices are among the list of advances this week, which also includes stepladders, electrical goods, files, wrought washers, saws, halter chains, paint brushes, wrenches, hammock chains, blasting powder, ready roofing, inside lock sets of the cheap variety, wood handles, steel try squares, door checks and springs, weather strip, cow bells, lumbering tools, butter spades and moulds, metal polish, expansion bits and scythe snaths. A new higher charge is also effective for stamping scales.

The shortage of hardware commodities of nearly all kinds is a source of considerable anxiety, especially to the jobber who has to concern himself with so many manufacturers. The recent tie-up of the United States railroads is proving an additional setback and is said to have greatly magnified the already acute shortage.

Collections are coming very satisfactory and manufacturers and jobbers are advising that merchants take advantage of the free movement of money to straighten up their outstanding accounts while all are prosperous.

MONTREAL MARKETS

MONTREAL, April 29—Market changes are still numerous and there appears to be no indication but that, on special goods at least, there will be many changes still. Expansive bits are higher this week, as are also cutters for the same. Scythe snaths are marked higher. An increased basis is effective for sash weights, both sectional and solid. Fittings are revised upward with discounts reduced. Various handles are advanced through a reduction of discount. Fence staples are higher, both galvanized and bright. One line of chisels is revised to higher levels. Crescent pattern wrenches are higher. The charge for stamping scales has sharply advanced.

As far as the sheet and plate market is concerned there is still much scarcity, with the result that quotations are decidedly nominal. Old lead is weaker, as is also copper, while heavy cast iron, in an active market, is weakening. Ingot tin is firmer locally, it being somewhat scarcer. Lead is unchanged, some stating that it has, apparently, reached its low level. Trade is active, and the opening of navigation has stimulated business with the lower St. Lawrence ports.

Expansive Bits Revised Upward

Montreal.

EXPANSIVE BITS.—Higher prices are effective for Clark's Expansive Bits. No. 1 are quoted at ..27 per dozen, and No, 2 at ..39. Extra cutters are selling at: No. 1, per dozen, $4.50; 2, $6; 3, $8; 4, $9, and 5, $13.50.

Snath Prices Are Somewhat Higher Now

Montreal.

SNATHS.—Revised prices to higher levels are now announced for snaths. The following prices are being quoted: No. 2-0, per dozen, ..15.50; No. 1 Loop, $14.90; 2-loop, $14.30; 3-loop, ..13.10; No. 1 ring, $13.70; 2, $13.10; 3, $11.90; and bush snaths, $16.10.

Fittings Cost More; Discounts Altered

Montreal.

FITTINGS.—Revised discounts make some kinds of fittings higher. Bushings are being quoted at 12½ per cent. off list, plugs 10 per cent. union plus 5 per cent. Pound goods are selling here as follows: "A" black, 70c; galvanized, 85c, "B" 28c and 39c, and "C," 18c and 28c.

Advanced Prices For Sash Weights

Montreal.

SASH WEIGHTS.—Higher prices are effective for sash weights and the solid are now selling at $5.25 per 100 lbs. and the sectional at $6.25.

Handles Are On New High Basis

Montreal.

HANDLES.—Higher prices are effective for handles of various kinds. The discount on hickory handles is now list plus 35 per cent., while that on ash, maple and oak is now plus 20 per cent. This applies to fork, rake, hoe, axe, shovel, and other kindred kinds of handles.

Fence Staples Are on a Higher Basis

Montreal.

FENCE STAPLES.—Higher prices now apply on fence staples. The bright staples are selling at $6.10 per keg of 100 lbs., and the galvanized at $7.10. In 25 and 50 lb. boxes the prices, respectively, are $6.60 and $7.60 per 100 lbs.

Not Enough Wares To Meet the Demand

Montreal.

STOVES AND WARES.—The demand for wares is steadily heavy, manufacturers stating that they cannot begin to meet the trade for various lines. Summer goods such as stoves, refrigerators, water coolers, watering pots, etc., are going out rapidly, and if this movement continues it will be very difficult to pro-

vide for repeat orders later. Raw materials are very hard to obtain from the mills.

Stove movement is fairly active, and the undertone on stoves and ranges is, as has been frequently pointed out, strong. Advances may have to be made if raw material and labor conditions do not improve, but there is no immediate suggestion of this. The manufacturer is engaged in a day-to-day proposition both as regards price and delivery.

Chisel Prices Are Revised Upward

Montreal.

CHISELS.—Prices are marked higher on chisels of Spear and Jackson make. These changes apply to both socket and firmer, as well as to other types, and the new discounnt is 55 per cent.

Wrenches Are Marked Considerably Higher

Montreal.

WRENCHES.—Crescent pattern wrenches are marked higher, and some of the prices to the trade are now as follows: six inch, per dozen, $9; 8 inch, $11; 10 inch, $13.80.

Rope Basis Holds; Better Movement

Montreal.

ROPE AND CORDAGE.—A steadily good movement of rope is reported, and this has been somewhat better during the past week or two. The undertone is steady and unchanged, the basis for pure manila being 35½c per lb., British and Beaver manila, 28c and sisal 22½c per lb.

Brisk Selling of Gasoline and Oil

Montreal.

GASOLINE AND OILS.—The refiners state that there is a particularly heavy demand for gasoline and coal oil. Prices on both lines are held without change, motor grade gasoline selling at 38c per gallon and coal oil at 27c to 30c.

The lubricating list is somewhat firm, and advances again are, some think, probable. There is considerable activity on these lines, too.

Many Require Nails But Very Hard to Get

Montreal.

NAILS, WIRE.—While there is still an insistent demand for nails, and even greater than heretofore, the demands cannot be met, say the jobbers. Manufacturers are making some delivery all the while, but not in the volume which jobbers can make use of to satisfy the retailer. With building increasing, there is every reason to expect that demands will be greater than ever. Prices have held unchanged, with $5.85 per keg being charged for standard wire, and $6.35 for cut, base. There is a steady sale for wire products, and these hold unchanged.

Steady Prices Now on Lead Products

Montreal.

LEAD PRODUCTS.—With prices steady on lead products there is a steady though only fair amount of business for various manufactured lines. The uncertain building conditions somewhat hamper the sale of these goods on a large scale and the outlook is rather undefined. With pig lead eased off somewhat, there is not much promise of higher prices, unless increased production cost on account of labor, should develop.

Steady Movement of Steel and Iron Bars

Montreal.

STEEL AND IRON.—Little of a new nature has developed on iron or steel bars. The jobbers are reporting a steadily active demand for this product, and the mills are working full time on turning out bars, particularly of the standard points, and considerable stock is going forward now by water to river points.

IRON AND STEEL

Iron finish machinery steel		$4 95
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		4 90
Tire steel		5 10
Toe calk steel, per 100 lbs.		5 80
Band steel		5 80
Harrow tooth steel		5 05
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 55
Refined iron, per 100 lbs.		5 55
Mild steel		4 90

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Sheet Market Lags as For New Supplies

Montreal.

SHEETS AND PLATES.—Prices have been decidedly nominal all along on various black and galvanized sheets. Jobbers who have, until the present, had a fair stock of some of the popular gauges, are now sold up, and those wanting sheets have to pay, very often, a premium to obtain what they require, if, indeed they can obtain stock at all.

BLACK SHEETS—		
10 gauge	....	9 00

22 gauge	....	11 30
18 and 20 gauge	....	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Lead is Weaker; Copper; Cast Scrap

Montreal.

OLD MATERIAL.—Cast scrap is somewhat lower in price, this being due to the embargoes against shipment of certain commodities to the United States, and where this old material might be disposed of. From $40 to $42 per ton is being quoted.

Scrap lead, too, in sympathy with the recent decline for the virgin pig, has lowered in price, present quotations being 7¾c for heavy scrap, and 3½c for tea lead. With navigation opening, there will probably be an increased receipt of old material from the country, and this may have a lowering effect on some of the commodities.

Quiet Ingot Markets With Slight Changes

Montreal.

INGOTS.—The markets are still on the quiet side, and there is not a great deal new. Some improvement in the condition of trade may be manifest a little latter jobbers think.

COPPER.—No change of price, with electrolytic selling still at 24c and casting at 23½c. There is, if anything, a slight improvement in the movement.

TIN.—Scarce locally. The London market is unchanged, but, due to the dearth of supplies here there is a slight advance of price to 72½c per lg.

ANTIMONY.—Just slightly weaker, with a fair demand, and prices on English reduced to 13½c and Chinese still quoted at 13c.

ALUMINUM.—Very little new to report, it is understood, at 35c to 40c per lb., according to the tonnage.

SPELTER.—Steadiness rules on this, and there is just a fair outturn. A price of 11½c per lb. is still being quoted.

LEAD.—Some feel that this, at the ruling quotation of 11c has reached bottom. There is but a fair supply, with demand steady.

TORONTO MARKETS

TORONTO, April 29—Advances in hardware prices are still being made and the peak, according to present indications, has not as yet been reached. Pipe fittings have been revised upwards and the wrought pipe situation is very unsatisfactory. Step ladders have again been marked up. Electrical appliances are also higher in price. Black Diamond files and cocoa mats have also advanced.

The wire nail situation, if not soon relieved, may be serious. Prices on some lines of screen doors have been withdrawn, owing to the wood and lumber situation. Stoves and wares are firm. Wires of nearly all kinds are very hard to procure. Wood screws are very firm. Scrap and waste materials of almost all kinds show a weak sagging tendency with the exception of stove scrap and cast iron, which are selling at firm figures.

Regardless of the cold snap which has been quite general, business has been very satisfactory, and nearly all in the trade are very well satisfied with the business offered.

The shortage of nearly all hardware commodities is not readily being overcome and the tie-up of the railroads in the U.S.A. is proving a serious set-back and according to manufacturers and jobbers is magnifying the already serious shortages. Collections continue to come in very satisfactorily.

Pipe Fitting Prices Have Been Marked Up

Toronto.

PIPE FITTINGS.—Higher prices have again been made on pipe fittings. This is said to be due to the shortage of raw material, labor, also to transportation difficulties and other factors. Cast iron fittings are now being quoted at 10 per cent. added to the list; Plugs 7½% discount off the list; Bushings 10 per cent. discount; Unions ¼ to 2 inch 30 per cent. discount. Malleable fittings, Class A black 70 cents, galvanized 85 cents; Class B black 30 cents, galvanized 40 cents; Class C black 20 cents, galvanized 30 cents.

Faultless Step Ladders Have Again Advanced

Toronto.

STEP LADDERS.—New and higher prices have again been made on some lines of step ladders. This is credited to the situation which has developed in wood, and the manufacture of this line. The new price is 2 cents higher than formerly, making the quotation on Faultless 40 cents now instead of a former 38 cents per foot.

Stoves and Wares Firm; Raw Material Scarce

Toronto.

STOVES AND WARES.—Manufacturers state that present business is very good and the demand still exceeds the supply. They also state that they have great difficulty in securing sufficient supplies to carry on their work and in some cases they have not been able to do any new or experimental work but rather have had difficulty in securing sufficient supplies to manufacture their regular standard product

WARES are having a very good demand and while manufacturers state they have received some shipments of raw material to make up they can get no sufficient quantity to carry on the extensive manufacture that the present demand calls for. The present prices are as current quotation pages.

Black Diamond Files Up; Nicholson Also Higher

Toronto

FILES.—In line with other commodities whose basic material is iron or steel, some makes of files have been revised to higher price levels. The Black Diamond are now quoted at 25 per cent discount. Nicholson are also quoted at a discount of 25 per cent. in place of a former 30 per cent.

Electric Majestic Heaters Have New Higher Prices

Toronto.

MAJESTIC HEATERS.—Many lines of electrical goods have recently been advanced and in some cases others are very firm or are expected to go to higher levels if they have not already done so. Majestic heaters have new prices, the No. 7 now being quoted at $11.50, while the No. 8 is being quoted at $17.00 less a discount of 27½ per cent.

Prices Withdrawn on Some Lines of Screen Doors

Toronto.

SCREEN DOORS.—Owing to the lumber situation both as regards to price and scarcity of supplies manufacturers say that their production has been very much retarded, and while they have large supplies of lumber en route, they state their cars are tied up in the hands of the railroad companies and can see no immediate chance of getting them through. This also applies to the Kasement Skrene Dore, and the manufacturers of this product state that on account of having to refuse further orders at present owing to the above mentioned conditions, they have withdrawn their prices temporarily.

Cocoa Mat Prices Have Been Revised Upwards

Toronto.

COCOA DOOR MATS.—Higher prices have been made on this commodity. It is stated that difficulties are many in the manufacturing circles and the greatest among these is getting supplies of raw materials. The new increase this week makes cocoa door mats to sell at the following prices:

COCOA MATS

14 x 24 inch	$1.25	each
16 x 27 inch	1.65	each
18 x 30 inch	2.10	each

Wrought Iron and Steel Pipe is Getting Scarce

Toronto.

WROUGHT PIPE.—The present outlook for wrought pipe, both iron and steel, does not look very promising at present, according to the opinions of manufacturers and jobbers locally. Manfacturers state that they have been practically tied up in the manufacture since the tie-up of the American railroad. It is stated that one manufacturer was practically closed down for several days and that others are working on broken time as a result of the coal shortage, and in other instances some mills have sufficient steel and no coal, while others have sufficient coal and no steel or iron as the case may be, and owing to the tie-up are unable to remedy the situation. Jobbers say they have great difficulty in securing the larger sizes. The present price is holding very firm and although the price is not changed it is hard to say just what the future will show owing to the disrupted conditions of the markets generally. The present quotations are as per current quotation pages.

Rope Sales Increasing; Prices Remain Firm

Toronto.

ROPE.—Manufacturers state that they are very well satisfied with the present business offered in rope and state the demand continues to be a heavy one. Notwithstanding the firm position of the raw material on the primary markets no change has been made and none are immediately expected, although one manufacturer stated it is impossible to see very far ahead these days owing to the unsettled condition of nearly all other markets. The present prices are as per current quotation pages.

Wire of Many Kinds is Hard to Procure

Toronto.

FENCE WIRES.—Practically all kinds of fence wires are enjoying a very good demand and supplies are moving very

freely, although jobbers state they have great difficulty in securing sufficient supplies from the manufacturers to satisfy the present demand. Especially is this true of the barb wire, and coil spring and other galvanized wires. The quotation on barb wire two point or four point is now $6.50 per hundred pounds. The No. 9 soft galvanized wire is quoted at $6.15 per hundred pounds.

Wood Screws Firm; May be Advanced

Toronto.

WOOD SCREWS.—Under the present situation of wire, iron and steel, etc., wood screws are holding very firm, and it is the opinion of some that higher prices may be made if the situation is not soon relieved. The present quotations are as per current quotation pages.

Wire Nail Situation Remains Unchanged

Toronto

WIRE NAILS.—Jobbers state they have considerable difficulty in securing wire nails in any size or kind and the demand continues to be very heavy, which is gradually depleting their stocks. It seems that merchants almost everywhere are looking forward to very heavy building activities, and have been preparing for the rush, although some state they believe that the merchants generally are not booking much farther ahead than their present requirements will call for.

Many are wondering just what the situation will be in the near future, especially when the building season opens up in full swing. Some have it that nails are being exported from Canada and that none are coming in from other sources to fill the vacancy. This is accounted for by some by the condition of the world's markets, it being the belief that a great shortage is noticed throughout the world.

The present disruption caused by the recent tie-up on the United States railroad is not without its effects on products of Canadian manufacture, as in many cases manufacturers, especially of steel, have been unable to get sufficient coal or coke to continue operation. It is reported that some manufacturers have been running on broken time on account of this shortage. The present quotation on wire nails is $5.75 per hundred lbs. base, while the cut nails are quoted at $6.85 base.

Scrap and Waste Material All Show Little Demand

Toronto

SCRAP AND WASTE MATERIALS.—The prices on nearly all lines of scrap and waste products remain practically unchanged, although the present situation is a peculiar one, and dealers state there is not the demand that they had expected at this season of the year. This may be due to the recent tie-up of the American railroads, which has caused a number of the mills to either shut down or else slacken up in their operation for want of raw materials, etc., which could not be moved owing to the freight embargo. The present position of metals composed of iron or steel is very firm while those of the copper and brass, etc., show a tendency for weaker prices. Stove scrap and cast iron are still very hard to procure and price quotations are generally nominal. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½
Heavy copper	0 17
No. 1 machinery cast	38 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas, lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 04

Strike on Railway Affects Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—The difficulty in securing flat sheets continues to be the chief worry of the manufacture at present, and now a few are wondering what the future outcome will be if sheets do not come along in better and larger quantities. One manufacturer stated that we may be commencing to feel the results of the clogged up machinery caused by the United States railroad strike, and stated that many mills in the States were clogged up with the raw materials and others with the finished product, and yet no one was able to ship any commodities that were turned out and manufactured. It is now necessary to store them in the yards and around the buildings, whereas they should be put directly on the cars and ready for market.

It may be that sheet will come better after the strike is settled, but the majority seem to doubt it as they believe that the mills are seriously held up with their production and it will be hard for them to catch up with their orders. The following are the present quotations on corrugated sheets:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	9 25	7 75
No. 26 gauge	10 00	8 75
No. 24 gauge	15 00	11 00
No. 22 gauge	17 50	13 75
No. 20 gauge	21 00	17 50
No. 18 gauge	26 50	21 50

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

An additional charge of 10% of the list price is added to cover exchange.

Discount, 7½%.

Some Iron and Steel Materials Hard to Get

Toronto.

IRON AND STEEL BARS.—The situation in regard to iron and steel bar prices remains unchanged, although jobbers state they have considerable difficulty to get material. Especially is this true of the imported materials.

Local conditions are also in very poor shape and HARDWARE AND METAL understands that some of the mills are now working on broken time as result of the shortage of coal, coke and other necessities of manufacture that are being held up at the border owing to the United States railroad strike. The present quotations on iron and steel bars are as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....

Lead Pipe, Etc., Has Brisk Movement; Solder Firm

Toronto.

LEAD AND ZINC PRODUCTS.—The demand for this commodity continues to be heavy and a good volume of business is being handled. Solder is holding at a very firm figure and although no immediate change is being expected it is believed that no lower prices will be made for sometime.

SHOULD GET COLLECTIONS

People of nearly all classes and in nearly all communities seem to have plenty of money to spend, and in many cases even for luxuries these days, and jobbers and some manufacturers point out that this is the ideal time for a merchant to keep in touch with his accounts, especially the outstanding ones and see that he gets all his returns while the money is moving freely, and as one jobber put it, it may be that prosperity will remain with us for many years, but in any case it would be better business to secure the cash and be assured that preparation had been made for any possible tightening up of the money market.

While this is generally believed to be the policy that merchants generally have adopted some are of the opinion that there are merchants who have been somewhat slack over their collections and in many cases have been carrying their customers for necessities; the customer in turn has invested the money the merchant should have had into luxuries, and should a tightening up process happen to the money market it may be that this class of customer might turn out to be poor pay.

Lead pipe and lead waste pipe are beginning to move very freely and the demand is continually growing heavier. This also includes lead traps and bends, lead roll, lead sheets, etc. The following are the present quotations:

Lead pipe, list, per lb.	0 17½
Lead waste pipe, list, per lb.	0 18½
Do., over 8 inches, list, per lb.	0 19½
Above subject to discount of 10%.	
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lbs.	0 14
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 45¾
Solder, strictly, lb.	0 40½
Solder, commercial, lb.	0 38
Zinc sheets, per lb.	0 19
Solder, guaranteed, lb.	0 43¾
Solder, wiping, lb.	0 37¼

Boiler Tube Prices Firm; Fair Stocks Available

Toronto.

BOILER TUBES.—A fairly heavy demand has been noted for boiler tubes, although the season is a little off and is approaching a seasonable slackness. Jobbers state they are fairly well caught up with their orders and have fair stocks in their warehouses and are preparing for heavy business which usually starts in around the season of the year when fires are let out.

The tying up of the United States railroads, it is stated, has not caused any shortage or famine in this line. Jobbers state they have been fortunate enough to receive fairly heavy shipments just previous to when the strike took effect. It may be, however, that certain few sizes are short, mostly pertaining to the most popular sizes.

Some are of the opinion that boiler tubes may be scarce when the heavy demand starts in, as the present situation of skelp is not at all satisfactory, and is very hard to procure. The mills are said to be rushed to capacity and still the demand is greater than the supply. However, some state that the skelp mills have in some cases been forced to shut down owing to the tie-up of raw material and other commodities used in the manufacture of skelp. The following are the present quotations on boiler tubes:

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	30 00	.....
1½ inch	31 50	.....
1¾ inch	33 00	30 00
2 inch	32 00	29 00
2¼ inch	37 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	49 00
3½ inch	70 00	39 00
4 inch	96 00	63 00

Sheets and Plates Scarce; Stocks Still Depleted

Toronto

SHEETS AND PLATES. — Local stocks of sheets and plates continue to be very low and although the situation is said to have improved somewhat jobbers state there are not sufficient sheets to anyway near supply the present demand, which is becoming daily more heavy and persistent. With the approach of warmer weather many projects are beginning to open out and building is rapidly extending in nearly all branches.

Some jobbers stated that they expected that their stocks would be in much better condition at this season of the year had it not been for the strike on the United States railroads. They state this tied up shipments in transit and incidentally kept them back several weeks although they stated they had received some shipments, but the demand is so great that most of the stock came direct from the car without ever entering the warehouse.

Many are looking forward to the announcement by the mills of their second period business.

The following quotations are being quoted by some, although they are more or less nominal owing to the great scarcity. It is believed that very few have complete list of sizes in stock at present.

BLACK SHEETS—	
14 gauge	7 45
16 gauge	7 55
18-20 gauge	7 95
22-24 gauge	8 00
26 gauge	8 05
28 gauge	8 15
3-16 inch plate	....
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—	Premier		Apollo	
10¾ oz.	$10 00	$11 50	$10 75	$12 00
U.S. 28	10 20	11 70	10 35	11 45
U.S. 26	9 90	11 40	10 05	11 15
22 and 24	9 75	11 25	9 90	11 00
18 and 20	9 60	11 10	9 75	10 85
16	9 45	10 95	9 60	10 70
12 and 14	8 70	10 20	9 45	10 55

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Ingot Metals Erratic; No Price Changes

Toronto.

INGOT METALS.—Although there has been considerable fluctuations on nearly all metals listed here, the price this week show no change. Buying is said to be very light as the markets seem to be in an erratic condition, losing one day and recovering the next. Stocks are still very light and a fair demand continues.

LEAD has fluctuated considerably but continues to quote at unchanged prices, the present price being 11½ cents per pound.

SPELTER has also fluctuated to some extent but remains at unchanged price of 12 cents per pound.

ANTIMONY.—The market conditions on this metal are unchanged and stocks are considered rather light. The selling price continues around 15 cents per pound.

COPPER. Little change has been made in the price of copper, the present demand being rather light, the present quotation is 24 cents a pound.

ALUMINUM prices remain unchanged with little demand showing. The present quotations are from 36 cents to 37 cents per pound.

TIN prices have fluctuated considerably during the week, although the present quotations shows no change over last week's quotations and are still holding at 74 cents per pound.

LONDON MARKETS

LONDON, April 29—The peak for high prices in the hardware line has apparently not been reached yet, according to present indications, although it is interesting to note that this week's budget of advanced prices shows fewer changes than for considerable time back.

Wood handles have been marked up to higher prices, while cheap inside sets are also higher. Hammock chains, blasting powder, cocoa door mats and ready roofing, all have advanced in price. Spring lines are moving very briskly, screen doors and windows, lawnmowers, washing machines, fence wire, post hole augers and diggers, shovels and spades, garden tools, poultry netting, etc., all being in good demand.

The volume of trade continues very good in spite of the cool weather and the general belief amongst the merchants seems to be that a few warm days will make business very brisk again.

Prices are very firm with upward tendencies, and higher prices are not unexpected. The scarcity of hardware commodities, however, is causing some concern and many are wondering if a serious shortage will be prevalent later in the season. Collections are very satisfactory.

Hammock Chains Also Have Soared

London, Ont.

HAMMOCK CHAINS.—New and higher prices have been made on hammock chains. This is said to be in line with recent advances which have occurred on other lines of chains, and is believed to be entirely due to the steel situation. Manufacturers of nearly all steel and iron products state that they have great difficulty in securing sufficient supplies of raw material to carry on their man-

ufacture. The new prices o .hammock chains are as follows:

3 feet	$7.20	doz. pr.
4 feet	9.60	doz. pr.
6 feet	14.00	doz. pr.

Blasting Powder Now Costs More

London, Ont.

BLASTING POWDER.—Those who are extensive users of blasting powders will this year have to pay more to secure their supplies. Manufacturers state that price has not only been affected by direct factors bearing on their own markets but also the reflection of higher prices on nearly all other commodities, which naturally has a reaction. The present new price for direct shipment from the factory is $4.75 per keg net cash.

Cocoa Door Mats Again Are Revised Upward

London, Ont.

COCOA DOOR MATS.—Higher prices have been made on this commodity, it is stated that difficulties are many in manufacturing circles and the greatest of these is getting supplies of raw materials. The new increase this week makes cocoa door mats to sell at the following prices:

No. 1, 14 inch x 24 inch	$1.25 each
No. 2, 16 inch x 27 inch	1.55 each
No. 3, 18 inch x 30 inch	2.10 each

Ready Roofing Supplies Very Light; Prices Firm

London, Ont.

ROOFING.—A very heavy demand has been noted for roofing although supplies are more or less limited and restricted at the present time. This is said to be brought about by the scarcity of felt, labor, and also the transportation difficulty. A few of the quotations are as follows:

TECUMSEH

1 ply	$1.95 sq.
2 ply	2.25 sq.
3 ply	2.75 sq.

STERLING

1 ply	$2.20 sq.
2 ply	2.60 sq.
3 ply	3.10 sq.

Screen Doors; Windows Show Active Demand

London, Ont.

SCREEN DOORS AND WINDOWS.—A good demand is noted for this line and many are getting their stocks in shape for a big demand during the fly season. In fact it is believed that many are preparing immediately so as to be ready before the warm weather sets in. The quotations on some of the lines are as follows:

Grained only, $22.35 doz. Mission style, grained, filled and varnished, $33.35 doz. With brackets, grained, filled and varnished, $36.50 doz. Panel bottom, grained, filled and varnished, $39.35 doz. Oval top and janel bottom, grained, filled and varnished, $47.40 doz.

Lawn Mowers Continue to Sell at 25% Discount

London, Ont.

LAWN MOWERS.—Jobbers are very well satisfied with the business offered this season on lawn mowers and state that a great many have already gone out. It is believed that one of the best seasons so far will be noted. The following are the list prices less discount of 25 per cent.:

Daisy.—12 inch, $8.25 each; 14 inch, $9; 16 inch, $9.70.
Star.—14 inch, $10.70; 16 inch, $11.40.
Woodyatt.—14 inch, $11.80; 16 inch, $12.50; 18 inch, $13.20; 20 inch, $13.90.
Empress.—14 inch, $15.25; 16 inch, $1; 18 inch, $16.65; 20 inch, $17.35.
Less 25 per cent. on above lists.

Good Sale For Washing Machines and Wringers

London, Ont.

WASHING MACHINES, WRINGERS.—The demand for this line is very satisfactory and washing machines, and wringers of all kinds continue to move very freely. Notwithstanding the present situation that has developed in lumber and also the very high and firm prices it is selling for, washing machines and wringers continue to hold at the same price and are still quoted at a discount of 20 per cent. off the list.

Fence Wires of All Kinds Are Hard to Procure

London, Ont.

FENCE WIRES.—Practically all kinds of fence wires are enjoying a very good demand and supplies are moving very freely, although jobbers state they have great difficulty in securing sufficient supplies from the manufacturers to satisfy the present demand. Especially is this true of the barb wire, and coil spring and other galvanized wires. The quotation on barb wire two point or four point is now $6.40 per hundred pounds. The No. 9 soft galvanized wire is quoted at $5.05 per hundred pounds; the oiled and the annealed wire No. 11 is $5.97 per hundred pounds, while the number 12 is $6.05 per hundred pounds.

Post Hole Augers and Diggers Have Big Sale

London, Ont.

POST HOLE AUGERS.—Iwans post hole augers are now being quoted at 8 in., $25.00 dozen; 9 inch, $26.50 dozen; 10 inch, $29.00 per dozen.

POST HOLE DIGGERS are in fair demand and the Universal No. 1 by 5 ft. handle sells for $28.50 per dozen, while the No. 2 by 6 ft. handle sells for $31.00 per dozen.

No Change in Prices of Spades, Shovels, Scoops

London, Ont.

SPADES, SHOVELS AND SCOOPS.—A very good demand is noted for spades, shovels and scoops and stocks are steadily going out to the merchants. Reports generally are that merchants are having a good turnover in this line which is said to be on account of the building activities and othe improvements. The present discount continues to hold at 35 per cent. off the list.

Garden and Harvest Tools Selling at Firm Prices

London, Ont.

GARDEN AND HARVEST TOOLS.—Very heavy demand is noted for these lines especially for this time of the year. Garden tools are going out especially well and it is believed that nearly everyone has got off to a good start although the cold weather has been a detriment.

HARVEST TOOLS, jobbers state, are moving very freely and it is believed that this is on account of the merchants being desirous of securing sufficient stocks for when the big demand starts in the harvest season. The price has recently shown no change and discounts of 50 per cent and 10 per cent. are still being quoted off the new list.

Good Movement of Screen Wire Cloth at Firm Price

London, Ont.

SCREEN WIRE CLOTH.—A good sale is noted for screen wire cloth and many are making preparations to have their screen windows and doors fixed up before the warm weather sets in. Jobbers state that those that have secured their supplies for this commodity early in the season were very fortunate, as they are of the opinion that before the season is over there may be a scarcity. The black painted is now selling for $3.60 per hundred square feet.

Poultry Netting Firm; Demand Very Brisk

London, Ont.

POULTRY NETTING.—A good sale is noted for poultry netting at present and nearly all jobbers state that their stocks are very low in this line. Especially is this true of the one-inch mesh. The prices are firm although quotations are still unchanged. The Canadian two-inch mesh is still quoted at net list, while the one inch mesh is quoted at an additional 5 per cent. to the list.

Cheap Inside Sets Have Again Been Marked Up

London, Ont.

INSIDE SETS.—New and higher prices have been made on inside sets of the cheap variety. This is said to be due to the situation which has developed in iron, steel and in fact nearly all metals. The present demand is very heavy for this line and is gradually increasing. The antique copper or the dull brass finish are now being quoted at $9.50 per dozen.

Prices on Rope Continue to Hold

London, Ont.

ROPE.—A fair demand is noted for rope, although no change has been made in price and present quotations are very firm. Owing to the firm and advancing prices of raw material some are surmising that higher prices may be made on rope, although present indications locally

are that the price will not show any immediate change. However, it is hard to state just what the situation will be as commodities of nearly all kinds are very unsettled owing to the surrounding conditions. The following are the present quotations:

Pure Manila	35½	cents base
Pure Manila	28	"
New Zealand Hemp	28	"
Sisal	22½	"

Wood Handle Prices Have Again Been Advanced

London, Ont.

WOOD HANDLES.—Many are wondering what the future will be for commodities whose manufacture consists of wood and lumber materials. Prices on some commodities composed of wood are gradually being raised. Almost every day one hears of some new commodity which has advanced. Manufacturers state they have great difficulty in securing the materials even at the higher prices asked, as manufacturers have very little to sell. They state they cannot secure sufficient lumber to make up. The new quotations for handles are as follows:

All hickory handles, list plus 35 per cent.
Fork, hoe, rake, shovel, spade and manure fork handles, list plus 20 per cent.
All oak, maple and ash handles, list plus 20 per cent.
Maple cant hook and peavy handles, list plus 10 per cent.
Maple and ash pike poles, list plus 30 per cent.
All carriage goods, doubletrees, whiffletrees and neckyokes, list plus 10 per cent.
All goods f.o.b. factory, London. Terms—2 per cent, 10 days. 30 days net.
All orders are accepted subject to delivery as soon as possible after receipt of order.

Wire and Cut Nail Situation Not Improved

London, Ont.

WIRE NAILS.—The supply of nails is very limited and while at present there is a good demand many are wondering what they are going to do in future as they are unable to secure sufficient quantities now when the demand is usually lighter than it is a little later on in the season. Wire nails are quoted at $5.75 base.

CUT NAILS.—Higher prices have been made on cut nails the new base being $7.50 f.o.b. London. The present situation is very unsatisfactory as jobbers state they are unable to secure sufficient cut nails at any price, as the manufacturers state they have none to sell.

Window and Plate Glass Scarce; Makers Rushed

London, Ont.

GLASS.—Little improvement has been shown in the glass situation and sheet glass is hard to procure as ever, and while it is believed that there is sufficient glass in stock to handle the demand at present many are concerned for the future especially near the fall of the year when the big rush commences and all are anxious to get their window lights in before the cold weather sets in.

PLATE GLASS—The demand for plate glass is enormous and jobbers and dealers everywhere cannot seem to procure sufficient stocks to sell. One large importer sent in his order for several million feet, but all he was able to get the factory to accept was a few thousand feet, which he states he could sell to one customer alone. The quotations are as per current quotation pages.

Prices on White Lead in Oil Hold Unchanged

London, Ont.

WHITE LEAD IN OIL.—The demand for white lead in oil continues to be fair, and the present quotations are very firm although no immediate change in price is expected. It is the belief of some that large quantities will be used this year and many are looking forward to a heavy demand. The present quotation is as follows: Pure, $20.45 per hundred pounds, in ton lot, and $20.80 per hundred pounds in less than ton lots. Elephant, $20.95 per hundred pounds in ton lots, $21.30 per hundred pounds in less than ton lots.

Turpentine Prices Hold; No Shipments Arriving

London, Ont.

TURPENTINE.—The shortage of turpentine is beginning to be very keenly felt. At this season of the year shipments of the new crop begin to arrive freely and usually at the low price. This year, however, due to cold weather, frost and other setbacks, the harvesting of the new crop has been delayed several weeks. The tie-up on the railroads had also been a factor in the situation, as any new turpentine available cannot be readily transported owing to the shipping and other conditions. The present quotations, although very high are said not to be out of line when existing conditions are considered. The following are the present quotations:

One barrel lots, $3.80 imp. gal.; 2 to 4 barrel lots, $3.79 imp. gal.; 5 gallons, $3.95 imp. gal.

Linseed Oil Scarce; Crushers Have No Seed

London, Ont.

LINSEED OIL.—The present situation of the linseed oil is a very peculiar one. Usually at this time of the year lower prices are made and the flax seed from all sources begins to arrive in large quantities, allowing the crushers to go ahead with all speed and crush to the capacity of their mills, and thus store up a surplus.

This year, however, this is not the case. Very little Canadian seed has been available and other imported seeds are very hard to procure. Some crushers state that they have seed bought and paid for from Argentine crops but that owing to the labor difficulties there as well as the recent tie-up on the United States railroads they have not been able to procure seed in sufficient quantity to keep their mills running at full capacity.

Some have it that English oil is beginning to arrive freely and are wondering if they will be able to ship enough to this country to be a factor for lower prices. It may be that the situation will soon clear up, although a number are looking for oil to remain at a high figure throughout the year. The following are the present quotations:

	Raw.	Boiled.
1 to 2 barrels	$2.87 gal.	$2.90
3 to 5 barrels	2.86 gal.	2.89
6 to 9 barrels	2.84 gal	2.87

Less barrels, add 15 cents gal.

WINNIPEG MARKETS

WINNIPEG, April 29—Advances in hardware prices still continue to affect many important lines. Hammers, try squares, Stillson wrenches, nails, weather strip, cow bells, cold sheets, lumbering tools, tool handles, butter scoops, gilling twine and calcium carbide comprise the most important lines affected by the week's advances, and with little exception the basic materials of which have appeared frequently on account of repeated advances in the past affecting them. This fact alone explains fully the chief cause for these latest advances. And it seems reasonable that the manufactured product must in time be influenced by activities occurring in the major markets, as is known the trend of these markets has been decidedly upward for a long time, the results of which are clearly apparent in the showing occasioned by the latest activities of the markets.

General business conditions throughout the West, it is said, are very satisfactory, and despite the continued cold weather, many commodities pertaining to the spring trade are moving rapidly.

New Price on Hammers and Sledges 20% More

Winnipeg.

HAMMERS AND SLEDGES.—Further revisions occur on certain styles of hammers and sledges, advancing these lines an average of 20 per cent. on former lists; the styles affected being hand drilling, striking, stone sledge, mason's, and blacksmith's. The cause of the new increase is easily apparent when taking into consideration the present iron and steel situation, and the repeated advances on these materials must necessarily bring influence to bear on lines en-

tirely dependent upon them for their manufacture. The latest prices are quoted as follows:

Hammers—Hand drilling, 28½c; striking, 3 to 4½ lbs., 25¼c; 5 and over, 20¼c; stone sledge, 5 and over, 20¼c; mason's, 3 to 4½, 28½c; 5 to 20, 23c.

Blacksmith's Sledges—4, 25¼c; 5 and over, 20¼c per lb.

Advanced Prices Quoted on Steel Try Squares

Winnipeg.

STEEL TRY SQUARES.—New advances have altered previous lists on steel try squares to the extent of 9 p.c. Considering the stability and firmness shown by this commodity for some time, the latest increase is to be fully expected, being an all steel product, and in view of this the advance is not necessarily of a heavy character when it is considered the number of increases occurring on steel in the past few weeks. To-day's price quote: Blued, 2 ft., $39.75; Nickel Plated, 2 ft., $43.25 per dozen.

Stillson Pipe Wrenches Have New Discount

Winnipeg.

STILLSON PIPE WRENCHES. — A further change affects Stillson pipe wrenches, resulting in a further advance on this line to the extent of 11½ per cent. on previous quotations. This condition can be solely attributed to the greatly advanced cost of the raw material and the keenly felt scarcity of the same. Although the new prices appear firm, it will be seen that further change occurring in the basic metals will quickly influence this class of goods accordingly. The latest prices are quoted net and are:

Stillson Pipe Wrenches—6 in., $1.40 each; 8 in., $1.55; 10 in., $1.75; 14 in., $2.45; 18 in., $3.50; 24 in., $5.05; 36 in., $9.45.

Door Checks and Springs Show an Upward Trend

Winnipeg.

DOOR CHECKS AND SPRINGS. — Higher prices are quoted on Eclipse door checks and springs and show an approximate 23 per cent. increase as a result. This line has shown decided firmness for some time past so that the new increase was to be expected in consequence of the state of the market at present existing of the basic material that this line solely depends upon for its manufacture. The latest ruling prices show: Door Checks—Eclipse, size cylinder, 1½ inch, $3.50; 2 inch, $4.50; 2½ inch, $7 each. Door Springs—Size, light, $2; medium, $2.60; heavy, $3.50 each.

Advanced Prices Again Quoted on Wire Nails

Winnipeg.

WIRE NAILS.—Among the foremost changes of the week will again be found wire nails, on account of previous repeated advances occurring on this line. The new prices, although not necessarily of a heavy character individually, are heavy enough when taking previous advances into consideration. The nail situation, as a whole, is said to be somewhat improved, although there is still plenty of room for further improvement if the demand preceding the commencement of building activities is to be successfully coped with. The new advance shows a further 10 cents per 100 lbs. The new prices are quoted as follows:

Wire Nails—Ft. William, $6.25; Winnipeg, $6.75 per 100 lbs.

Finishing Nails—1 in., $8.75; 1⅛ in., $8.75; 1¼ in., $8.40; 1½ in., $8.15 per 100 lbs.

Cut nails at present continue firm, and are quoted at $7.40 per 100 lbs. net.

Chair Nails Are Also Influenced by High Prices

Winnipeg.

CHAIR NAILS. — Following the week's changes on wire nails, brass-headed chair nails also appear for new revision of price and are advanced an average 20 per cent. as a result. Although this line has not advanced as rapidly and frequently as the more common class of nails they are gradually attaining a high figure not generally looked for in this class of goods. The latest prices appear to be of a staple character, however, although how long they will hold will be solely dependent upon future conditions existing in the major markets. The new prices are quoted at: Chair Nails—Brass heads, Nos. 41, $2.40; 42, $2; 041, $2.60; 042 x 100, $2.20; 042 x 50, $2.30 per 1,000.

New Prices Are Quoted on Weather Strip

Winnipeg.

WEATHER STRIP.—New prices are quoted on Anti-Frost weather strip, increasing this line 4 per cent. The scarcity of, and the advanced cost of raw material is said to be the chief factor responsible for the new raise, and it is said, considering the high and rapid advance of the material, the new advance is of a very moderate character. The latest price quotes Anti-Frost weather strip at 50 cents per box of 40 feet.

Lumbering Tools Now Selling at Higher Figure

Winnipeg.

LUMBERING TOOLS.—A general revision of prices occurs on lumbering tools and shows an average advance of 9 per cent. on previous prices. The wide range of goods covering this line does not permit the tabulating of individual prices. It can be accepted, however, that the increase is general and involves an advance of an average of 9 per cent. on the following: Peavies, cant hooks, pike poles, hookaroons, timber carriers, skidding tongs, hooks, band and belts, clasps, sockets, bolts and timber rollers. The chief cause for this latest advance is chiefly attributed to the present condition of the metal markets which has naturally advanced the cost of raw material, which sooner or later must needs advance the manufactured product. To-day's prices appear firm and no further change is looked for at present.

Heavy Advance Revises Swiss Cow Bells List 80%

Winnipeg.

COW BELLS.—Exceptionally heavy advance occurs on cow-bells as a result of the week's changes, the new prices showing a full 80 per cent. on old prices. Although this line has shown marked stability in the past, the new prices must be admitted as exceptionally heavy and bring this class of goods to an unusually high figure. The high prices of metal are said to be the chief factor governing this change, combined with greatly advanced operating costs. The new prices appear firm and failing any unlocked for occurrence in connection with the major markets, no further change is at present looked for. The latest price are quoted as follows: Cow Bells—Swiss, 4 inch, $12; 5 inch, $25 per dozen.

New Prices on Cold Sheets Showing a 7% Increase

Winnipeg.

COLD SHEETS.—Following recent advances on chain, cold sheets also show new prices in the week's changes to the extent of 7 per cent. on previous lists. This new increase, it is said, although not of a heavy nature, is entirely due to the present conditions that are generally affecting this class of goods, namely the metal markets. To-day's prices are as follows:

Cold Sheets—Wrought iron, ¼ in., 80c per doz.; 5/16 in., 96c; ⅜ in., $1.15; 7/16 in., $1.30; ½ in., $1.75; ⅝ in., $3; ¾ in., $5.75.

Lumber Tool Handles Also Revised Upwards

Winnipeg.

LUMBER TOOL HANDLES have also advanced, showing an approximate 6½ per cent. on previous prices. This latest change relative to this class of goods will create little surprise, however; the lumber situation being too well known to make any comment necessary. The latest bulletin regarding this market shows no appreciable change, the present outlook tending to still higher prices at no distant date. This condition cannot help but influence all commodities whose manufacture consists of this material. The latest prices show:

Cant Hook Handles—Maple, 4 ft., $7.65 per doz.; 4½ ft., $8.50; 5 ft., $9.35; 5½ in., $10.20; Hickory, 4½ ft., $15.30.

Pike Pole Handles—12 ft., $23; 14 ft., $30.60 per dozen.

Butter Spades and Moulds Advance Average 12½%

Winnipeg.

BUTTER SPADES.—Changes occur in woodenware affecting butter ladles, spades and moulds and advancing these lines a further average of 12½ per cent. on previous lists. This will evince little surprise, however, owing to the present unsettled state of the lumber market that is at present influencing these various lines. The new prices show: Butter Ladles—White sugar maple, 10 x 6 inch, $3.30 per doz. Butter Spades—Fluted, $1.25 per doz.; plain, 75 cents

per dozen. Butter Moulds—Square, 1 lb., $2.60 per doz.; round, 1 lb., $2 per dozen.

Higher Prices Quoted on Brasso Metal Polish

Winnipeg.

BRASSO METAL POLISH, after a long period of stability and firmness, shows further advance in the week's changes to the extent of 30 per cent. on previous prices, and is now quoted at the following: Brasso Metal Polish — Size cans, small, $1.67; medium, $2.67; large, $5.34 per dozen.

Revised Prices Affect Gilling Twine 25%

Winnipeg.

GILLING TWINE is affected in the changes of the week and is advanced 25 per cent. on previous prices as a result Sarcity of raw material combined with the greatly advanced cost of same are said to be the influencing forces responsible.

Gilling Twine—No. 18, $4.25; No. 20, $4.30; No. 25, $4.75; No. 30, $5; No. 35, $5.20; No. 40, $5.50 per lb.

Calcium Carbide Prices Are Revised Upwards

Winnipeg.

CALCIUM CARBIDE prices are revised in the week's changes, advancing same 3½ per cent. on old lists and show the new quotations to be: Calcium Carbide—Size cans, 1 lb., $2.85; 2 lbs., $5.70; 5 lbs., $8.25; 10 lbs., $16.50 per dozen; 100 lbs. drums, $8 each.

Wrought Washer Prices Have Been Marked Up

Winnipeg.

WROUGHT WASHERS.—New and higher quotations have been made on wrought washers; this is said to be another reflection from the iron and steel situation. The new price is not as yet available but will be quoted in an early issue.

Disston Saws Advance 5%; Halter Chains Also Higher

Winnipeg.

DISSTON SAWS.—Higher prices have been made on Disston saws and will approximate an advance of about 5 per cent.

HALTER CHAINS also have new higher prices which will average about 5 per cent. over former quotations.

New Prices Pending For Various Wrenches

Winnipeg.

WRENCHES.—The present situation of the iron and steel materials is seriously affecting the manufacture of the finished product, and an early advance is expected on many lines of wrenches; some have it that the advance has already been made but has not yet been ruled into force, and that it will be approximately 5 per cent.

5% is New Increase Made on Paint Brushes

Winnipeg.

PAINT BRUSHES.—The present outlook for brushes is not very bright and manufacturers state it is becoming more and more difficult to procure sufficient bristle to cope with the huge demand. Especially is this true of the longer lengths. The new advance covers a considerable range of prices but will average about 5 per cent. higher than former quotations.

PITTSBURGH MARKETS

PITTSBURGH, April 29.—Transportation conditions as affecting the iron and steel industry of the Central West have been little better in the past week than in the first week of the rail strike. Current reports of the strike waning are somewhat exaggerated, and in any event apply to districts in which the iron and steel industry is least interested.

Between one-fourth and one-third of the iron and steel production of the Central West is cut off, but in the East production is almost normal, while the South is scarcely affected at all. The chief cause of the curtailment is lack of coal or coke, or both, but in one or two instances there is a shortage of iron ore. If prolonged, the strike would cause curtailment by the mills becoming choked with finished products, but thus far the situation in this respect is not serious. In the early part of the strike the mills found enough empty cars to load their current product, and only in the past week has there been much piling of steel.

The movement of coke from the Connellsville region has been reduced to relatively small proportions, but there has been some movement, and there is more now than a week ago. Only a few channels are open. There is a fairly free movement from Connellsville to Buffalo, where the merchant furnaces are operating almost normally, though the New York Central is not moving any coke to that point. Some solid trainloads have been made up and moved to the Youngstown district, particularly to the Republic Iron & Steel Company. There have been various other special movements. The railroad yards in and near the coke region are now congested and while the yards are now almost fully manned the movement is slight.

Shipments of steel are of course curtailed much more than the production. Illustrating the extreme, the Jones & Laughlin Steel Company, one of the very largest independents, with two plants in the Pittsburgh district, has had practically normal production but has shipped scarcely any steel. It loaded no less than 1,500 cars before the supply ran out, then beginning to pile steel, but the cars either stayed on company sidings or moved out to main line sidings near at hand.

The great curtailment in shipments of steel does not seem to have incommoded consumers as much as would be expected. Some consumers, of course, have their own operations curtailed by the strike, and do not need as much steel as usual. Others, perhaps, are operating on stocks, though it was claimed in many quarters consumers did not have stocks.

The rail strike has had practically no effect upon the pig iron and steel markets. They are neither stronger nor weaker as a result of the strike, and while they are dull it is a question whether this condition is attributable to the strike.

Price Prospects

There is no material change in the steel prices, and there has been none of consequence for several weeks. This does not mean, however, that there is no change in the market as to the strength of prices or as to the prospects. There is and has been an unprecedented situation and naturally there are unusual consequences. It is absolutely unprecedented for nearly half the the steel (the Steel Corporation according to the latest statistics makes 44 per cent. of the country's finished steel) to be sold at one price and the remainder to be sold at much higher prices, most of it $10 to $15 a ton higher, with the small remainder at higher prices still.

It might have been expected that when the buying pressure should decrease the prices asked by the independent producers would decline, but the independents have elected not to reduce prices. This is individual, not collective, action since the producers have no conferences with each other. Evidently the large independents felt that reducing their prices would discourage buyers from taking hold, the alternative being to adhere to any prices attained and let buyers take what they would. The general alignment of the market has been that the nearer the delivery the higher the price. Hence if a mill has a certain price and sells at only two-thirds the rate at which it ships, it gradually becomes able to make earlier and earlier deliveries, and the price becomes more attractive to the buyer. This will work all right for a time but when the mill got entirely caught up on deliveries something would occur.

Some of the large independents state positively that they have not regularly opened their order books for third quarter business, though of course, they have taken some orders from special customers, and they would probably will have a little lapover from the second quarter. The smaller independents, that have had still higher prices, on account of delivery, are naturally sold still less distances ahead. The Steel Corporation's unfilled obligations at the end of March amounted to 9,892,075 tons, having increased by 389,994 tons during March. Even

If You Unconsciously Misrepresent Grades of Turpentine, Look Out for Conviction from Revenue Department

Number of Convictions Made Recently—What is Legal Status of "Second Run" Turpentine and Substitutes—Technical Difficulty Prevents Action Against Low-Grade Product Selling as "Turpentine"

ON RECEIPT of the following letter from an Ontario importer of oil and turpentine, HARDWARE AND METAL made an investigation of the legality of what is known as second run turpentine, with the intention of finding out what are the legal standards required of second run and other products which do not come under the heading of pure or genuine turpentine. The letter reads as follows:

"Dear Sir,—The writer on his way to the office this morning noticed lying in front of a hardware merchant's building a barrel which had just been delivered, marked 'second run turpentine.' As your journal has shown during the past few years proof of its interest in things pertaining to the hardware merchant, we think it not out of place to call your attention to the fact that turpentine substitutes sold under the name of 'second run turpentine' are misleading and unfair to the hardware man's business.

"From our somewhat intimate connection with the turpentine business in the South we are prepared to say that the so-called 'second run turpentine' offered on the market to-day is not a pure turpentine, and if analyzed would undoubtedly be found to contain a substitute closely related to the so-called coal oil family, and is a mineral oil and not the product of either first, second, or any other run of turpentine as taken from forests in the South. Because of the high prices ruling in turpentine we have no complaint to make if manufacturers and others find that they can use substitutes for turpentine in many of their operations, but we do think it unfair and unjust that under the name 'second run turpentine' the unsuspected consumer should be misled. There are substitutes we are informed that for certain uses can be employed, but the turpentine trade as a whole should have all the protection that the law allows, and when substitutes are sold they should be so labelled, thus preventing the unsuspecting consumer paying for something that he imagines is a turpentine though perhaps of a second rate quality.

"The writer simply calls your attention to a matter which we think your valuable paper might deal with in your own way to the best interests of the trade, handicapping at least, if not absolutely preventing, unscrupulous dealers selling substitutes under names that mislead the public."

Government officials of the Inland Revenue Department and the Public Health Department which deal with the legal status of such articles as are sold through the retail trade advise that there is no standard set for what is known as "second run" turpentine. However, as the product goes under the name of turpentine it was thought that it probably contained turpentine in some degree. If second run turpentine came from the same source as the pure product it would be turpentine, but the standards do not distinguish between them.

DEALER MUST PROTECT HIMSELF

The turpentine product which comes up to these set standards of the Inland Revenue Department will be marked "pure" or "genuine" turpentine. Any other product, the natural source of which is the same as pure turpentine but which cannot come up to the set standards must not be marked "pure" or "genuine," or a conviction can be made under the Fraudulent Markings Act. The Inland Revenue Department has no knowledge or standards for any other product which may not have any connection with the natural source of turpentine, but with this information the dealer can judge for himself and it is up to him to protect himself against unconscious misrepresentation.

In this connection is a report of the Inland Revenue Department chemical laboratory in connection with an analysis of turpentine purchased from retail dealers during the period from August to October, 1918. The chemist reported that out of the number of samples purchased there were eighteen which were adulterated and could not come up to the set standards. He, however, was unable to take any action because the product was sold as turpentine and not as pure or genuine turpentine. A technical difficulty therefore presents itself which prevents any action being taken under the Fraudulent Markings Act in regard to turpentine.

Terebene, terpenol, and other products made from turpentine are used for medicinal purposes. There is a marked distinction between painters' turpentine and that used for medicinal purposes.

That hardware dealers should watch carefully that they do not unconsciously misrepresent the grade of turpentine which they sell, is emphasized by Inland Revenue Department officials, because the dealer who does so makes himself liable for violation of the law. He is safe as long as he states that the turpentine is "second run" or a substitute, as the case may be. There have been a number of convictions by the Government recently and this point should be carefully watched by the trade.

Standards of Pure Turpentine

The standards set for pure turpentine by the Department of Health are as follows:

I. When turpentine is sold as a drug, for medicinal purposes or to the order of a physician, it shall meet pharmacopoeial requirements as provided by section 7 of the said Act.

II. When turpentine is sold under any other conditions than for purposes of medicine, as above, it shall meet the following requirements:—

(1) It shall be entirely free from mineral oil.

(2) Unless sold as wood turpentine, it shall absorb not less than 340 times its weight of iodine (Hubl Solution and Method). If sold as wood turpentine it shall absorb not less than 240 times its weight of iodine by same method.

(3) The undissolved (unpolymerized) residue on treatment of 10cc with 40cc of a sulphuric acid containing 20 per cent. of the fuming acid, shall not exceed 10 per cent. by volume of the sample.

(4) The refractive index of this residue shall be not less than 1.4950 at 20°C.

(5) The refractive index of the sample at 20°C. shall lie between 1.4680 and 1.4730.

(6) The specific gravity of the sample at 20°C. shall not be less than 0.860.

(7) The initial boiling point shall not be lower than 150°C. under ordinary atmospheric pressure.

(8) At least 75 per cent. by volume shall distil below 160°C.

(9) The residue on evaporation over a steam bath shall not exceed two (2) per cent.

INCORPORATIONS

Ohio Varnish Co. has been incorporated with head office in Hamilton, Ont., to manufacture and deal in paints, oils, varnishes, etc.

Lennard Machine Tool Co., Ltd., has been incorporated to manufacture and deal in all manner of machinery, etc.

In City or Country
Moore's Paints

There is little in common between the huge skyscraper of the crowded city and the small pioneer's cottage of the open prairies. In one essential only have they a common interest, and that is **Paint.** It spreads its colour and adds a touch of beauty to both of them.

Moore's Paints have proven their worth and staying qualities against the dust, smoke and grime of city conditions, as well as standing the test of raging elements in unprotected places. You take no risks by linking up with a **Moore Agency.** Moore's Paint is so 100% efficient under all conditions that it sells on its merits.

Write us to-day for our interesting agency proposition.

The Brush Department

Display Increases Sale of Radiator and Sanitary Brushes

New Store Proprietor Near Toronto Greatly Surprised at Customers' Response to Seasonable Brush Display

A HARDWARE business located in a good trading centre not far from Toronto recently changed hands. The new proprietor was a firm believer in the value of "showing the goods," and the brush department was one of the first to which he applied the principle of effective display.

Radiator and sanitary brushes were prominently shown in the display and the new proprietor was very greatly surprised at the response of the store customers. A great many brushes of these kind were sold ond people entering the store were at once attracted to the arrangement of all types of brushes for various household uses. A remark passed by a number of customers was that the occasion was the first time they had seen such an attractive display of brushes in the store, and the majority of them did not recall ever having seen brushes for dusting or cleaning radiators, or such well-shaped bowl brushes for sanitary purposes.

Suggest Uses of Household Brushes

The experience of this particular dealer is not an uncommon one in the trade, and these examples bear out the point that customers will take an interest in seasonable lines providing the goods are well displayed and possibly some suggestion made as to their usefulness. There are brushes for every season and this is one display which can therefore be changed often to good advantage. Too many hardware stores keep brushes out of sight. The departmental stores give prominent display space to brushes, kitchen utensils and household necessities and make frequent changes in their tables, show boards or basket containers for brushes, and the hardware dealer can take a tip from them in this respect.

The housecleaning season is here and brushes move actively at this time. There are so many handy types of brushes being manufactured for various household uses that the housewife cannot keep advised as to changes. She will always welcome anything which tends to lighten the labor of housecleaning season, however, and hence the necessity for the prominent display of brushes at this season.

The margin of profit on brushes is as good as most average lines and the dealer has it within his own power as to how big a turnover he can make during the busy season.

Girls Display Brushes

It has been noted that some hardware stores are putting girls or women in charge of the brush department in order that the uses of the various types of brushes will be fully and properly explained to prospective customers.

It is wise to always display well in advance the type of brush which may be called seasonable. The man of the house, the housewife, the boatman who has a canoe or sailboat or motorboat, are all anxious to do odd painting jobs in the early summer. Brushes are a line which must be brought to the fore early, and the best use of display space will do much to stir up early enthusiasm.

An Eastern dealer whose brush sales average $600 to $700 per year has found his sales have greatly increased since he carried out an idea for placing brushes where people coming into the store to look around could not help seeing them and handling them. The idea was a simple one but effective. Small trays were employed to hold the brushes. These were really regular knife trays as carried by the trade and which are usually inexpensive. The trays were retinted and handles put on in order that they might easily be lifted for dusting. Some of the trays were provided with a middle section. They were about 9 by 14 inches in size and rather shallow. The trays slanted back at an angle sufficient to allow the brushes to retain their position, providing an attractive display cabinet

Not Necessary to Show Complete Range

Owing to the dangers of pilfering only the cheaper grade of brushes were displayed in this manner, the better grade being kept in drawers. This dealer did not display all his stock, believing it necessary to show only a good range of the less costly variety, it being a simple matter to divert the customer's attention to the place where the better brushes are kept, if such are desired.

The basic idea of the plan was to let the customer see and handle the brushes. There are many who wish to take their time in making a selection and again there are others who will make a purchase as result of the suggestion, who perhaps had no intention of purchasing a brush when entering the store. It is only by taking advantage of every human peculiarity that maximum results can be attained in the sale of brushes.

What Will Linseed Oil Cost in May?

Great Problem is That of Delivery—Much Seed Now En Route, But Delivery Greatly Hampered by Strikes

WITH linseed oil prices a year ago $1.74, at Montreal, single barrel basis, for raw, and with the present quoted basis for similar quantities practically a dollar higher than this the outlook is naturally of interest. Will prices decline? Will supplies be heavy enough, within a short while, to overtake the probable demand of the hardware trade? Will seed arrive regularly from the various points of production?

This week prices have eased somewhat and there is a probability, though no definite promise, that they will lower still more. So involved is the matter of delivery that practically no guesses will be hazarded by the crusher regarding the immediate future outlook. As far as future delivery is concerned there is bound to be improvement in delivery of seed, for supplies are rolling from the Argentine, and will, in due course, arrive on this market.

HARDWARE AND METAL is informed by trade interests, and crushers, that there is plenty of flaxseed en route to this market. As a matter of fact there are many cargoes, at this moment, according to advices just received, waiting for removal from the ships. "In New York harbor there must be from 20 to 30 shiploads," said an informant to HARDWARE AND METAL this week, "and there may be more." And, as already stated in previous issues of HARDWARE AND METAL, there is much seed en route from the Argentine.

Some apprehension is expressed regarding forward deliveries from the Argentine. Weather reports from there indicate that the outlook is not too favorable, and the markets have, as a result, been quite well maintained. But this uncertainty and feverishness still maintains to quite an extent, and aside from a few minor rises and falls in the market dur-

Every Brush Guaranteed

How Hardwaremen Advertise Paints--Nos. 4 and 5

DEFINITE information and a distinct appeal is the feature of the two paint advertisements reproduced herewith.

McPherson Bros., Medicine Hat, Alta., emphasize the point that the giving of a job to the lowest bidder is not the most economical way of executing the work from the standpoint of final cost. This point is brought out very clearly in the statement that when a house is painted it is necessary to go over the entire surface with a brush, every square foot of it—whether a cheap or expensive paint is used. It is evident, therefore, that a painter cannot cut down on the price of a job by doing less work. The alternative is that he must therefore use cheap paint.

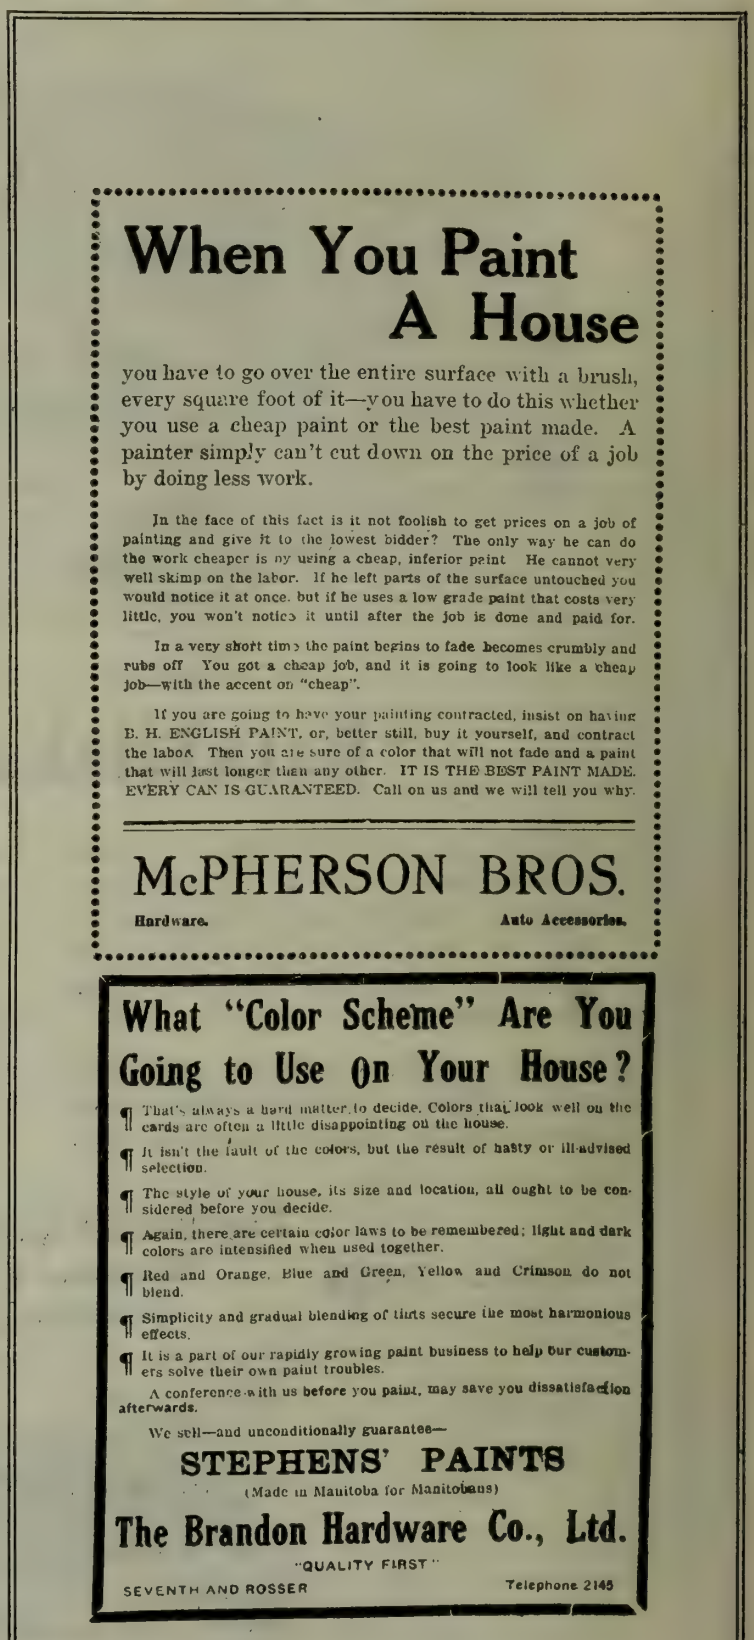
The ad. goes on to point out that the painter cannot skimp on labor or leave parts of the job untouched, for these would be too easily noticed, but he can use a cheap, low-grade paint that costs very little, and it will not be noticed until the job is done and paid for. Then in a short time the paint begins to fade, becomes crumbly and rubs off. The appeal is then made for the purchase of a certain brand of paint to insure a lasting color. The suggestion is made that customers purchase the paint themselves and then contract for the labor to be doubly sure of the quality of paint to be used.

Emphasis on the value of good consideration in selecting color schemes is the feature of the ad. by the Brandon Hardware Co., Ltd., Brandon, Man.

For the information of customers it is pointed out that colors that might look well on cards are often disappointing when used on a house. This is said to be largely the result of hasty selection.

"The style, size and location of your house should all be considered before deciding on color combinations," says the ad., pointing out further that there are certain color laws to be remembered, one of which is that light and dark colors are intensified when used together. It is pointed out that certain colors do not blend; that simplicity and gradual blending of tints secures the most harmonious effect. The ad. winds up with a suggestion that customers confer with the store management as to these matters before buying.

Definite information and suggestions such as are outlined in these two ads. are what secure and retain attention and interest, and constitute the most effective advertising.



When You Paint A House

you have to go over the entire surface with a brush, every square foot of it—you have to do this whether you use a cheap paint or the best paint made. A painter simply can't cut down on the price of a job by doing less work.

In the face of this fact is it not foolish to get prices on a job of painting and give it to the lowest bidder? The only way he can do the work cheaper is by using a cheap, inferior paint. He cannot very well skimp on the labor. If he left parts of the surface untouched you would notice it at once, but if he uses a low grade paint that costs very little, you won't notice it until after the job is done and paid for.

In a very short time the paint begins to fade, becomes crumbly and rubs off. You got a cheap job, and it is going to look like a cheap job—with the accent on "cheap".

If you are going to have your painting contracted, insist on having B. H. ENGLISH PAINT, or, better still, buy it yourself, and contract the labor. Then you are sure of a color that will not fade and a paint that will last longer than any other. IT IS THE BEST PAINT MADE. EVERY CAN IS GUARANTEED. Call on us and we will tell you why.

McPHERSON BROS.

Hardware. Auto Accessories.

What "Color Scheme" Are You Going to Use On Your House?

¶ That's always a hard matter to decide. Colors that look well on the cards are often a little disappointing on the house.

¶ It isn't the fault of the colors, but the result of hasty or ill-advised selection.

¶ The style of your house, its size and location, all ought to be considered before you decide.

¶ Again, there are certain color laws to be remembered; light and dark colors are intensified when used together.

¶ Red and Orange, Blue and Green, Yellow and Crimson do not blend.

¶ Simplicity and gradual blending of tints secure the most harmonious effects.

¶ It is a part of our rapidly growing paint business to help our customers solve their own paint troubles.

A conference with us before you paint, may save you dissatisfaction afterwards.

We sell—and unconditionally guarantee—

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 29.—A reduction of ten cents a gallon on linseed oil has been registered this week in some quarters, while other crushers and jobbers still maintain the $2.80 basis on raw, single barrel lots. Seed is extremely hard to obtain, and it will be several days, perhaps a week, before there is a great deal of relief. Seed is now in New York for delivery to Canadian crushers, and then there may be, ere long, relief from the Canadian West.

Turpentine is scarcer than ever, and there will be, doubtless, much scarcity of this for at least a few weeks. The basis has been advanced this week to $3.80—an increase of 20c per gallon.

Putty and white lead in oil are unchanged, but the delivery dates have been extended to September 1st. Altogether there is a heavy volume of business, and the outlook for active trading is satisfactory.

Ten Cent Decline on Linseed Oil

Montreal.

LINSEED OIL.—In some quarters there has been a decline of price on linseed oil of ten cents a gallon. Others have not reduced their prices and are still quoting raw at $2.80 per gallon, and boiled at $2.82½. One crusher is quoting at $2.70 and $2.72½.

The situation is still tight. Rather heavy supplies of seed are on the way to the Canadian mills, but strike troubles and transportation have been so severe in recent weeks that congestion has not been sufficiently relieved to permit of this sed reaching the crusher. If the situation improves, then seed ought to be easier, with a consequent reduction for the oil. There is much scarcity, and few desire to sell in any but small lots.

	Imp. Gal.	
Raw—		
1 to 2 barrels	2 70	2 80
3 to 4 barrels	....	....
Boiled—		
1 to 2 barrels	2 72½	2 82½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Turpentine Scarcer With Prices Higher

Montreal.

TURPENTINE.—Jobbers state that, if the outlook was poor last week as far as supplies are concerned, it is worse this week. Stocks are perilously low, and manufacturers of paints and varnishes are having their own difficulty in obtaining enough turps for their own needs. "Two or three weeks shortage, at least, this week, "and we have advanced our turer to HARDWARE AND METAL this week," and we have advanced our basis, for barrel lots, to $3.80, with $3.87 for small lots. The position is a tight one, and we cannot expect early relief from the producers in the South."

Turpentine—	Imp. Gal.
Single barrels	3 80
Small lots	3 87

(Packages extra.)

Putty Delivery Date Extended to September

Montreal.

PUTTY.—The only feature of the putty market this week is that of an extension of the present basis to September 1st. After the first of the year dates were extended, on the higher revised price basis, to May 15th. Now bookings may be placed at these prices for delivery up to September 1st, providing, of course, that market materials are not so changed as to interfere with this.

The basis is steadily held without change, and there is a seasonably active movement.

PUTTY—	5 ton	1 ton	Less than ton
Bulk in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Steady Movement of White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—A steadily tinues. There is but one feature of inactive outturn of white lead in oil conterest this week, that of an extension of the forward booking date. Dealers may now place orders at present basis with delivery permitted up to September 1st next. The undertone is steadily unchanged, with fair supplies available and with some export business still being transacted. This, some feel, may soon be less, but there has been, for some time, a fairly active export demand.

Prices are: Five ton lots, per 100 lbs., $19.50; ton lots, $20, and smaller than tons $20.35.

Plenty Paint Orders Keep Makers Busy

Montreal.

PREPARED PAINTS, ETC.—Paint makers are experiencing plenty of activity, and there is not a great deal of diminution in the movement of paints to the retailer. Raw materials have been somewhat hard to get, some of them particularly so, but the shipping of commodities has continued uninterrupedly notwithstanding. The undertone is steadily firm on paints, varnishes, and specialties, all raw materials holding on their high basis.

TORONTO

TORONTO, April 29.—The cold weather which has set in is believed to be responsible for the slight falling off in the paint trade, although a number report a fair business. Manufacturers state that notwithstanding the above-mentioned that their business to date in comparison with that of last year shows this year's sales up to the present time to be much greater.

Putty and white lead in oil are about the only feature in the week's activities. Manufacturers have extended the booking date on these commodities from May 15 till September 1. Whiting continues to be very scarce and prospects for early relief are poor. Prepared paint is moving freely. Shellac and varnish are firm. Collections are good and all are looking for brisk business immediately the weather brightens up.

Prepared Paint Firm; Price Unchanged

Toronto.

PREPARED PAINT.—Spring business on ready prepared paint has been very heavy and manufacturers state that so far it has been one of the best years they have had for sometime. Although the cold weather which has set in has been a temporary drawback, sorting orders are already coming in it is stated.

The present price although very firm is not expected to change at least not immediately, notwithstanding the higher position of ingredients. Blue colors are said to be getting scarce and may prove a difficulty later on in the season.

Window and Plate Glass Situation Unchanged

Toronto.

WINDOW GLASS.—The present demand has somewhat slackened but this it is believed is entirely due to the cold unseasonable weather. Importers and jobbers state there is a very big shortage

"Save the surface and you save all" *Paint & Varnish*

Get the Painter Business

Painter business is steady business. It represents volume—and volume means profit.

It's worth going after.

And worth holding, so go after it with Glidden products and Glidden quality will hold it.

Glidden is a reputable name throughout the Dominion. It is a synonym for good varnish. It is now known as a safe name for paints, enamels and every other kind of material the painter needs.

If you're really in earnest about the paint question we have a proposition that will prove of interest to you. Write for prices and plan.

THE GLIDDEN COMPANY, LIMITED
Toronto, Ontario
Branches at Montreal and Winnipeg

in nearly all kinds of window glass and state that the mill will not accept further orders; especially is this true of double diamond glass.

One importer stated to HARDWARE AND METAL that he personally made a trip to several mills and wished to place an order for several million feet. The mills could not accept his order as they were then oversold. This, he stated, is the situation practically the world over.

PLATE GLASS is said to be harder to procure than sheet glass if possible and many are greatly concerned for future business.

Shellac and Varnish Firm; Also Methylated Spirits

Toronto.

SHELLAC AND VARNISH, prices on both of these commodities are very firm and in some cases there is a scarcity. Especially does this apply to shellac. Some manufacturers state they have the shellac gum but that owing to the difficulty in procuring methylated spirits to cut it they are practically held up in the manufacture of this commodity.

METHYLATED SPIRITS continue to be scarce. This it is believed is caused by the heavy demand during the winter months for different frost-proof preparations for automobile radiators. However, the demand for this is over now for this season and it is believed that the Government can go ahead with their orders much more rapidly and that they will soon be in a position to supply the manufacturers with larger quantities.

September 1 New Booking Date For White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—The present position of white lead in oil is a very firm one, although no immediate changes in prices are expected. Corroders state that the demand is fair and they are keeping up with their orders. Some are of the opinion that the demand will increase as the season gets older and the warmer weather promotes more paining jobs. Corroders and jobbers have put through a new booking date, having extended booking for the present prices from May 15 till September 1 and which they state should prove of great assistance to the merchant.

New Booking Date on Putty Extended to Sept.

Toronto.

PUTTY.—Notwithstanding the fact that the putty season is not in full swing until the fall, the present demand for putty is very heavy considering the season of the year.

Whiting continues to be very scarce and manufacturers of putty stated that they have great difficulty in supplying just what the future situation will be on whiting as the English producers seem unable to secure labor to handle their products. Manufacturers and pobbers have extended the booking date on putty from May 15 till September 1. The following prices are at present current:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure Putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Linseed Oil Prices Firm; Some English Oil Coming

Toronto.

LINSEED OIL.—The present condition of the linseed oil market is very unsettled and unsatisfactory. One crusher stated he was practically forced to close down unless supplies of seeds were available and would come forward. This, however, has not been the case to any appreciable extent and stocks received locally are very light.

It is believed that if the situation on the railroads in the United States were overcome that considerable seed which has been bought in Argentine would begin to arrive immediately to relieve the situation. The present prices are said to be very high compared with normal times but according to the jobbers they say they are reasonable, and while many expect that these prices will not be maintained throughout the season it is the belief of some that the present quotation is reasonable for short delivery. Some state, however, that English oil is appearing on the market. This being the case it may have the tendency to reduce the present price. The following quotations are:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
	Boiled	
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.

New Turpentine Stocks Are Slow to Arrive

Toronto.

TURPENTINE.—Stocks of turpentine locally are practically exhausted and importers and jobbers state they have had shipments on the way for sometime which have not yet reached them and with the present disruption on the States railroads it is hard to say when arrivals of the new crops will commence.

While it is generally understood that the new crop should be at a lower price, jobbers state that the arrival of shipments are so uncertain that it is hard to depend on any date for shipments of the new stock to arrive and relieve the present situation.

While the present quotations are generally considered to be very high some are of the opinion that this price is reasonable and while they do not advise booking or buying ahead at this figure they believe that for short delivery these prices are reasonable especially in view of the uncertainty of the arrival of the new crop. The present quotations are:

Turpentine—	Per Imp. gal.
1 barrel lots	3 80
2 to 4 barrel lots	3 79
5 gal. lots	3 95

WHAT WILL LINSEED OIL PRICES BE

Continued from page 72

ing the past week, prices on seed have changed but little.

Some English Oil

A certain amount of English oil has filtered into Canada during the past week and this has had, to an extent, a favorable effect on the local price bais, the actual prices being reduced, in one or two instances, to the extent of ten cents a gallon. Just whether oil will continue to come forward in round lots from that source is not clearly defined. Paint makers need much oil themselves, and the arrival of this oil from England has served to help, in a limited way, those who need oil for immediate manufacturing.

May seed prices are quoted, at this writing, higher than a week ago, the difference being about two points. This condition has been induced by the unfavorable weather reports from the Argentine. Altogether the grain markets are in a nervous state, and there is particular nesvousness with regard to flax prices.

What will the position be a week or two weeks from now is dependent, materially, upon deliveries. Strikes in New York, if settled, will go far toward relieving the short supply of seed in Canada. Transportation and labor, if improved, will soon yield relief to the crusher, and if this relief be ample, then oil prices ought to rule easier. With the active painting season about to begin, many will welcome relief, and this will be apprecoated by the crusher, and manufacturer, and the dealer alike.

PITTSBURGH MARKETS

Continued from page 69

assuming a smaller rate of increase since the beginning of this month, there would be say 10,100,000 tons now on books. At the corporation's recent rate of shipping this tonnage would be equal to shipments up to the middle of next January, this being merely an average period since some products are sold much further ahead than others.

The divergence between the order books of the Steel Corporation and the independents is therefore very great. Nothing like such a situation has ever obtained in the past. While many of the smaller producers do not usually sell far ahead, the large independents, like Republic, Lackawanna, Jones & Laughlin, and others, have in the past sold for practically the same periods as the Steel Corporation. Not only is there this remarkable divergence, the divergence is increasing, for the Steel Corporation is selling more than it is shipping, while the independents as a whole are selling less than they are shipping.

A. Ramsay & Son Company

All Canadian Paint and Varnish Makers Since 1842

Experience, prestige and reputation count heavily in the volume of sales and turnover, as well as in the quality of the product.

It is but reasonable that in such a period of time improvements would be discovered in methods of production; in the product itself; and more advantageous distribution and co-operation with the merchant handling Ramsay Paints and Varnishes effected.

Ramsay advertising has multiplied the number of consumers who know its merit so that they are ripened into a receptive mood for Ramsay products.

You cannot have too many advantages in your favor—handle Ramsay's.

Big Advertising For C·C·M· Bicycles

We honestly believe this is going to be a big year for bicycles.

We are backing up our belief with a large outlay in newspaper advertising—the biggest publicity campaign in Canada for bicycles during the last twenty years.

The advertisements are large, strong, attractive, sales-producing. They will help you to sell more bicycles.

These advertisements will cover Canada from coast to coast. To cash in on them be sure to let the people in your locality know you carry

C·C·M· Bicycles

Have the C. C. M. transfer on your window so that every one who passes your store cannot miss it. Do some local advertising. Carry a good stock of the different models so that you can satisfy all who call. Don't lose sales this year asking people to wait until you send to the factory for certain models.

All aboard for a big year in

Massey—Cleveland—Columbia—Red Bird

Mechanical Parts Compact

N. J. CABELDU

Mr. N. J. Cabeldu is manager of Beatty Bros. Ltd., at St. John, N.B. He has met with splendid success in introducing the Red Star & Time Saver Washers in the Maritime Provinces. The Branch at St. John handles Nova Scotia, New Brunswick, P. E. Island, and Newfoundland.

Directly you scatter the working parts of a washing machine over the tub, you multiply the chances for trouble. If the tub shrinks or warps the working parts lose their adjustments.

The Red Star Washer

is built so that all the mechanical parts are compact. The flywheel is on the same centre as the dolly shaft.. All mechanical parts are mounted on a solid iron bed plate and cannot get out of alignment.

This feature is largely responsible for the noiseless, easy-running qualities of the Red Star.

TINKER TOM'S TALKS.

Talk 257

Manufacturers Using Sheet Metal

We have an accumulation of several tons of **Waster Sheets, Black and Galvanized,**

Gauges 20 to 28 inclusive

Good-sized pieces could be cut from these and would give **first-class stock at very low cost.**

If interested, write at once. In view of the extreme scarcity of sheet steel this is all the more important.

TINKER TOM.

Look for Talk No. 258 next week

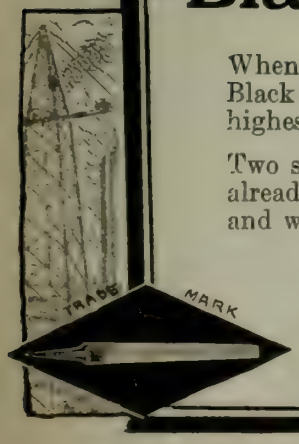
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

The Year Round

Customers appreciate the usefulness of Silkstone. Jog their memories and tell them the facts.

Silkstone Flat Wall Colours are cheaper than wall paper, more sanitary and lasting; Silkstone can be washed often and never rubs off; it gives a beautiful, soft, silky finish that will outwear any other wall covering. The economy of this splendid finish, that costs so little to apply and serves so satisfactorily, is an appeal to every customer.

Do You Read All the News When You Buy a Paper?

If you just skim over it you miss important items about your business. We read every column of the Canadian newspapers as a business and select every item on which we have an order. In this way we gather important news for our many customers and give to them a service which cannot be duplicated in any other way.

We cover United States as well and any subject written upon by the newspapers can be watched for important items. We supply advertisers with ads; wholesalers with new stores and local demand; manufacturers take all local mention of their goods as well as articles on markets, imports, new products, etc. We can supply you with a prompt service which will keep you up to the minute at a moderate rate. Drop us a line.

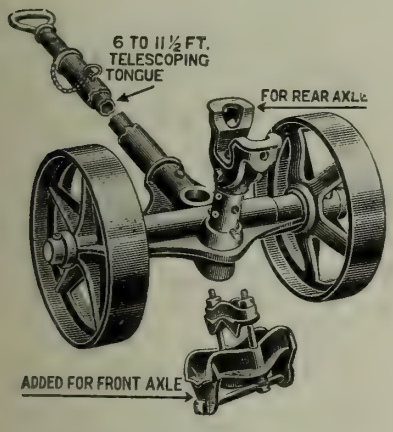
DIAMOND A BRAND
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Weaver Garage Equipment



Auto Ambulance

Telescoping Frame

The frame of the Weaver Auto Hoist is designed so as to permit the height of the arch to be increased approximately 12 inches. This increased height enables the Hoist to raise the rear end of a Limousine or a touring car with the top up.

Single Suspension

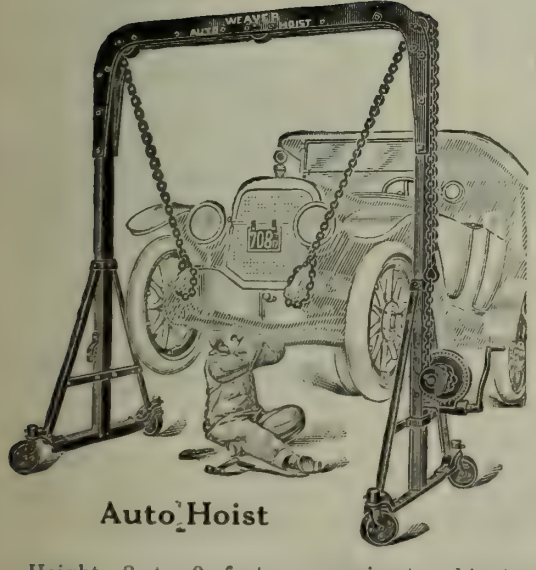
One chain of this Hoist may be carried over the pulley in the center of the frame for performing the work which can be handled to better advantage by a single suspension.

Safety

The hoisting mechanism is operated by worm drive, which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall.

Construction

Weaver Auto Hoist is carried upon four ball and roller bearing casters five inches in diameter which permit it to be moved with perfect ease. The frame is of 5-inch channel steel.

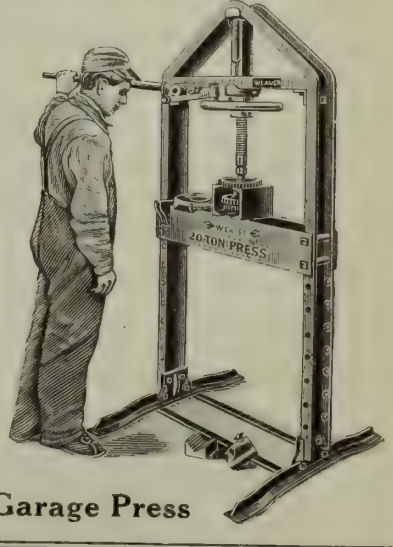


Auto Hoist

Height, 8 to 9 feet; approximate shipping weight, 575 lbs.

We Also Stock

Tire Spreaders,
Towing Poles
Auto Twin-Jacks
(Regular and Extra Heavy)
Puller Clamps
Body Extension and Valveless Bucket Pumps



Garage Press

"61" Dealers Get the Big Ones!

WHOPPERS! — and they *don't* get away! On the contrary, sales come thick and fast. There's no nerve-racking, profit-sacrificing angling for business with "61" Floor Varnish. It is simply a case of selling a quality product to meet a demand created and sustained by high-grade national advertising.

This advertising — begun twelve years ago — has built up a reputation for "61" as *the dependable* heelproof, marproof, waterproof floor varnish.

People have been finishing their floors with "61" for over thirty years. They know how it will "stand up." These lustrous, semi-transparent colors stain and varnish in one operation. They are smooth, clean and clear, and stand out in a class by themselves! "61" Floor Varnish *moves fast* because it is *known* as *the* all 'round, high-grade household varnish.

Effective dealer helps tie up live dealers' stores to the national advertising and assure steady sales and satisfactory profits.

Write today for the details of the very attractive Dealer Proposition.

"Hillcrest"
WHITE
A Superior

Porcelain
ENAMEL
Product

"Save the surface and you save all" *Paint & Varnish*

"Hillcrest"

Porcelain White Enamel

A new product that has the good fortune to spring from superior stock, taking its place immediately as a peer among the Sanderson Pearcy Products that have made good for forty years! The same excellent reputation, prestige and experience is behind this dependable newcomer.

"Hillcrest" Porcelain White Enamel fills the long-felt want for a white enamel paint that **is** white and treats the consumer **"white"** by **staying white.** "Hillcrest" Porcelain White Enamel does all that and dries hard with a beautiful, permanent finish.

Let our salesman show you why it pays to stock the Sanderson Pearcy line.

Sanderson Pearcy & Co.
Limited

272 Van Horne St. (Corner Dufferin St.) West Toronto, Ontario

Barrett Money Makers

How's Your Stock?

Every building owner, every manufacturer, every farmer in your community is a live prospect for every one of these well known Barrett Products. They are business-builders because they are satisfaction-producers. That's why they bear the Barrett name! Don't overlook the opportunity they provide to increase your sales, your profits and the good will of your customers.

EVERLASTIC "RUBBER" ROOFING

The standard ready roll-roofing of Canada. Made of high-grade water-proofing materials. Used on thousands of farm and factory buildings throughout the Dominion. Is low in price — easy to lay — wonderfully durable. You couldn't carry a better brand.

Three weights—light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement with each roll.

EVERLASTIC LIQUID ROOFING CEMENT

Nothing can compare with it for saving and restoring old felt and "rubber" roofs. Comes ready for use. Spreads easily, dries quickly. Forms a smooth, waterproof, weatherproof surface that stops the small leaks, strengthens the weak spots and adds years of service to the roof.

Packages of all sizes, from 1-pint cans to 40-gallon barrels.

ELASTIGUM PLASTIC PATCHING CEMENT

The waterproof cement that *sticks* and *stays*—regardless of weather or temperature. Just the thing for patching holes in roofs, lining gutters and flashings, and stopping leaks in wood, metal or masonry. Known as "The Plastic Cement of a Thousand Uses."

Put up ready for use in 1-lb. tins (cases of 24); 5-lb. cans (cases of 12); 25-lb. and 100-lb. packages, ½-barrels (about 300 lbs.) and barrels.

EVERJET ELASTIC CARBON PAINT

The most popular and most effective protective paint on the market. Impervious to moisture, alkalies and acids. Will not peel, scale or crack. Prevents rust and corrosion on machinery, farm implements, smoke stacks and all metal surfaces subjected to severe exposure.

Put up in 1-gallon lithographed cans (cases of 12); 5 and 10-gal. cans, ½-barrels (about 20 gallons) and barrels.

Morrow

High Speed and Carbon Twist Drills

MEAN much to dealers. In the first place, The John Morrow Screw & Nut Company are pioneers at Twist Drill making in Canada. Every Morrow Drill is fully warranted. That assures Morrow confidence, your confidence, and the consumer's confidence in these reliable drills.

The dealer is certain of plentiful sales because of the good reputation of Morrow Drills; and of continued future sales because of the splendid service they give in action.

Made from hammered steel bars, Morrow tempered; a web of graduated thickness, giving strength where strength is needed; more holes with less regrinding.

Morrow Carbon Drills are made from Sheffield (England) steel. Nothing better.

John Morrow Screw & Nut Company, Limited

Ingersoll **Canada**

London, England—7 Hop Exchange, Southwark Street, S.E.1.
"Oldest, largest and best equipped plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-finished Nuts."

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way. Our leaflet explains it fully.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

WE ARE WHOLESALE MANUFACTURERS—TRY US

WOODS MANUFACTURING CO., LIMITED

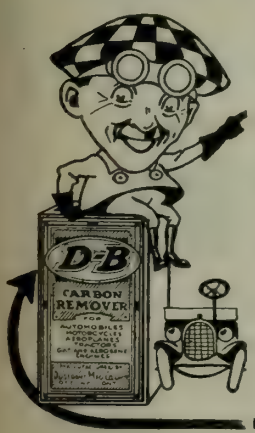
OTTAWA

Mr. Dealer— You're the Doctor!

You know that your customers have engine troubles on account of carbon—and we know those troubles can be cured. Here is the medicine that does the work—

D-B CARBON REMOVER

It does not cut compression. We are telling motorists about D-B through extensive advertising, and they will be asking for it. Will YOU help fill the demand?



You may conscientiously sell D-B as a real "carbon cure"—and there is money in it for you. Write for dealer's proposition.

Auto Jack says:—

To keep your engine healthy, keep it clean. Don't let carbon accumulate. A good engine laxative, such as D-B will remove carbon harmlessly via the exhaust, and keep the engine clean and efficient.

A Winning Combination

A "Lance" Stock and Display Cabinet

and its Contents

The Cabinet displays the goods most attractively. Its highly polished mahogany finish, gold lettering and gilt label channels make it a beautiful addition to the fixtures of any store.

Its Operation.—Your customer selects the parts desired from illustrations on bins (seen through the glass) when cabinet is closed. Your salesman then opens back of cabinet so that all the bins lie horizontally before him like a printer's type case. Then by means of labels on bins and numbers and descriptions on containers, **which are all visible,** the salesman easily selects the desired part.

The next step is to simply raise the tray, thus restoring the cabinet to the display position, at the same time locking it.

Its Flexibility.—It is often desired to replace some numbers with new items or to transpose the positions of those already in the bins. With the Lance Cabinet this is easily accomplished. You have only to pull out the channel slide on which labels are placed, remove label not wanted, insert new one and replace slide.

Get this Cabinet Free

Lance Cabinets are not sold. They are given absolutely free with a stock order. All goods are sold with an absolute guarantee.

A Selling Point That Sells

Kopper King Spark Plugs are anti-fouling and rust-proof. This is a selling feature that really appeals to the car owner. A Kopper King Plug will not rust into the cylinder head.

This enables you to sell your customers a Spark Plug that ensures freedom from trouble.

The Kopper King is a Sales-builder—once a car owner buys his first one, he will, in future, enthusiastically specify Kopper King Spark Plugs throughout.

Rust-proof

A heavy coating of copper protects the body of the plug. This prevents carbon deposits; carbon under electrical heat will not adhere to copper.

KOPPER KING

Kopper King Spark Plugs ensure you a better margin of profit than any competing plug. They meet every requirement. Once sold, they stay sold.

"Tested For Service"

Your Tire Valve Inside May Become Damaged!

Generally it will be because you have run your tires with the valve-cap off, thereby allowing some foreign substance to enter the valve-stem. When this happens you should have with you a box of SCHRADER UNIVERSAL VALVE INSIDES. They come packed five in a dust-proof tin box, each inside is separated from the others to insure it reaching the user in perfect condition.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word first insertion, 1 cent per word for subsequent insertion. An additional charge of 5 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

HARDWARE—I WANT A HARDWARE MAN to join me in taking over one of the best retail and jobbing businesses in one of the best cities west. Don't work for the other fellow, but get in for yourself. The opportunity is here. $10,000 necessary. Box 245, Hardware and Metal.

SALESMAN WANTED — OPENING FOR AGgressive, clean-cut salesman to join sales staff of a large Paint and Varnish Manufacturer; good opening for the right party. State experience and salary on application. Territory, Cape Breton and Newfoundland. Box 220, Hardware and Metal.

WANTED AT ONCE AN EXPERIENCED hardware clerk, state age, experience and salary expected. Married man preferred. Apply to Box 222, Hardware and Metal.

EXPERIENCED HARDWARE MAN WANTED to manage hardware department in general store in Southern Saskatchewan. Established business and good opportunity for right man. State age, experience; whether single or married and salary expected. Morrison-Blackwood Hardwood Limited, Moose Jaw.

WANTED — FIRST-CLASS TINSMITH, CAPable of taking charge of a shop and figuring on work. Married man preferred. Apply to the Fulton Hardware Co., Ltd., Sault Ste. Marie, Ont.

WANTED — GOOD ROAD SALESMAN FOR Wholesale Hardware; must be a live wire, have good personality and be of steady habits. This is an excellent proposition for the right man. Territory covered in Western Canada. Apply in own handwriting, stating experience, age, height, etc., to Box 370, Hardware and Metal.

WANTED—AT ONCE, EXPERIENCED HARDware clerk. State salary expected. References required. Box 131, Hardware and Metal.

WANTED — THOROUGHLY EXPERIENCED hardware pricer, capable of taking charge of Invoice and Order Department. Apply stating experience, references, and salary required to Box 250, Hardware and Metal.

AGENCIES WANTED

ENGLISH FIRM WITH AGENTS ALL OVER Britain desires representation or sole selling agency for good Canadian house. Any good line for Hardware, Ironmongery, Fancies, etc. Exceptional opportunity for distribution. Highest References. Box 87, MacLean, 88 Fleet St., London, E.C. 4.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, La Prairie (Montreal, Que.

SITUATION WANTED

HARDWARE SALESMAN WISHES EMPLOYment in first-class hardware store in good country town. Have been in the business for many years, also have good clerical knowledge. Some time in the future if all is satisfactory could put cash in business. Some person who has made a success and wishes to get out will do well by replying to Box 205, Hardware and Metal.

FOR SALE

HARDWARE—STOCK $40,000, DOING $125,000 Yearly. Owner after many years of successful business must retire and will sell. Located in one of the best cities of Western Ontario. Great opportunity for jobbing trade. The future of this business can only be measured by the energy and attention given it. If interested let me give you particulars. J. P. Lawrason, 25 Toronto St., Toronto.

HARDWARE STOCK AT RIGHT PRICE—CAN rent building. Best spot in live town, doing cash business. Good reasons. Four thousand handles. Box 225, Hardware and Metal.

I HAVE ONE OF THE BEST BUSINESSES IN the Province of Saskatchewan. Population 600. Moderate opposition. During last 10 years have made $150,000. Now wish to move into Winnipeg. Our stock will run $70,000. This is fully $25,000 more than is necessary. We bought ahead to take advantage of markets. Turnover $135,000 per annum. Will expect $25,000 cash, balance easy terms. No use to communicate unless you have necessary cash. Will bear strictest investigation. Reply in confidence to Box 223, Hardware and Metal.

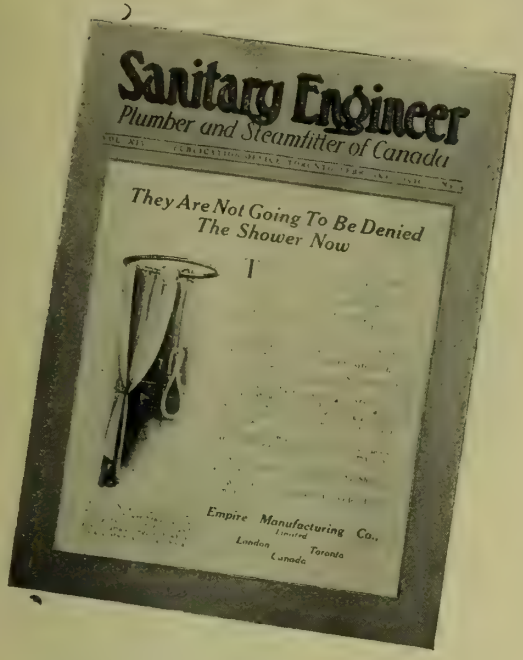
HARDWARE—FINE TOWN NEAR TORONTO. Stock $4,000. Doing high-class business in shelf and other profitable lines. Other interests force me to sell. If interested write first to Box 228, Hardware and Metal.

Hardware and Metal's unique circulation as proven by the A.B.C. audit is due to 31 years of honest effort to give the retail trade the best possible service.

HARDWARE AND METAL is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Have You Received Hardware and Metal Stock Electro Catalog?

Do You Conduct A Plumbing And Heating Department?



The livest, up-to-date sanitary plumbing and heating engineers in Canada are subscribers to SANITARY ENGINEER, **Plumber and Steamfitter of Canada.** This live, breezy paper coming out twice monthly with a large volume of practical and interesting information for its readers is available at the cost of $1.00 per year, or less than 5c per issue. For the small sum of $1.00 you receive 26 issues filled with interesting editorial information and bright, newsy advertising pages giving news and information regarding new goods and the latest developments in plumbing and heating goods.

If you conduct a plumbing and heating department and you are not yet a subscriber to SANITARY ENGINEER, you are overlooking one of the best investments you could possibly make.

Read This Interesting List

Read the following, giving a brief summary of editorial information in the April 1 issue:

"PLUMBING REPAIRS WILL BE CASH." A story telling how 10 Brantford plumbing firms have placed their businesses on a cash basis.

"RIGHT ON THE JOB—GET BUSINESS." An illustrated story telling how Brousseau and Frere, Quebec, Que., have built up a big business on a small beginning. Their methods are described in this issue.

"SASKATCHEWAN CONVENTION REPORT." A detailed report of the convention of the Saskatchewan Society of Sanitary and Heating Engineers held at Saskatoon.

"CONTRACTS AND CREDITS." An address delivered by Neal Beaton, of Beaton & Brady, Saskatoon, before the Saskatchewan Convention.

"SEWAGE DISPOSAL FOR SMALL COMMUNITIES." Fourth article of a splendid series of articles by B. T. Ellis for which SANITARY ENGINEER has the exclusive publication rights for Canada.

"VENTILATION AND EXHAUST SYSTEMS." An address delivered by C. W. Keniston at a recent convention held in Milwaukee.

"TEST YOURSELF WITH THESE QUESTIONS." A test which you can apply to yourself. It consists of 65 questions and will enable you to check up the results of your personal effort and also of your business.

"RUMOR OF A TAX ON SALES IN CANADA." Details regarding the proposed turnover tax and how it will work out.

"MONTREAL CRAFT SEES ENCOURAGEMENT." A page of interesting information regarding the activities of the Montreal organization.

"THOUGHTS." By Napolean Hill—a page of inspirational reading matter.

"BUILDING ACTIVE DURING FEBRUARY." Complete Details regarding the building permits issued in Eastern and Western Canada cities.

"EDITORIAL." Success and Profiteering—Under Production and Over Production—Increasing Sales—Turnover Tax—Causes of Inflation—Are You Insured?

"NEWS FROM HERE AND THERE." A bright breezy page giving news gathered from various sources.

"MARKET CONDITIONS AND TENDENCIES." Two pages of bright accurate market information giving actual prices quoted on goods used by the plumbing and heating trade.

The above is a partial list of the editorial contents of the April 1 issue.

The April 15th issue contained, among other features, a complete report of the Ontario Society of Domestic Sanitary and Heating Engineers' Convention, held at Toronto.

Pin $1.00 to the coupon below, mail it to the address given below, and you will immediately start receiving twice monthly a paper that is easily worth more than the subscription for any one single issue. SANITARY ENGINEER is one of the sixteen papers published by the MacLean Publishing Company. It has been published twice monthly since 1907. Most good plumbing and heating engineers are now subscribers. If you are one of the few not subscribing, **ACT NOW.**

"Save the surface and you save all" *Paint & Varnish*

"Paints and Varnishes for Every Purpose."

Shingle Stains

In the many building plans under way for 1920, the bungalow type of home is conspicuously numerous, especially in the new suburban districts. Many of these stylish homes are finished outside in rough lumber or shingle, and reach their most picturesque effectiveness when treated with O.P.W. Shingle Stains. Shingles may be dipped or treated by spraying.

Users of sprayers are agreeably surprised when using O.P.W. Paints and Stains with spraying apparatus, to find how easily and freely it works, as O.P.W. Paints and Stains are entirely free from skins and lumps — a selling point all dealers and consumers will appreciate.

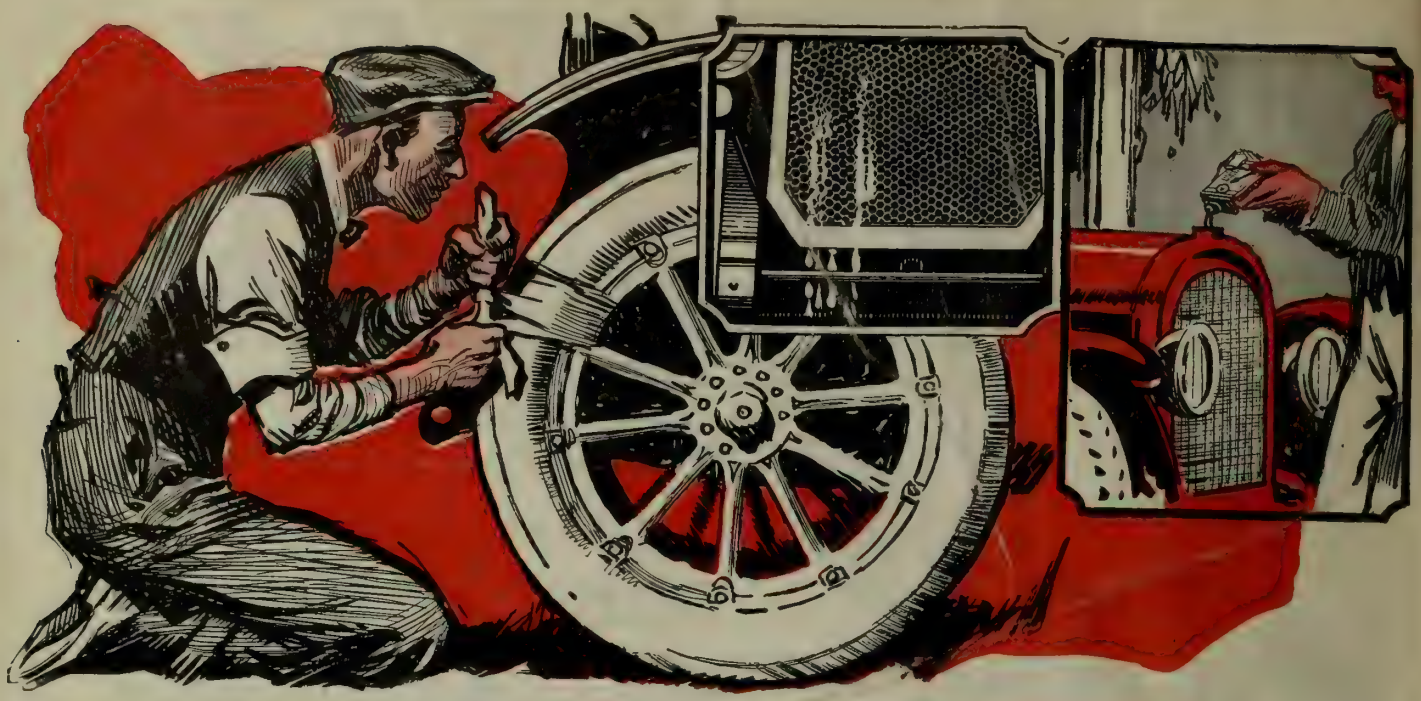
Let Us Show You a Worth While Dealer Plan

Ottawa Paint Works Limited

OTTAWA

Canada

Branches: Montreal, Toronto, Vancouver



Would anyone try to repair a blow-out with a handkerchief—

SOME accessory dealers seem to think that a man parts with his common-sense when he buys a motor car!

How else could you account for the fact that these dealers offer a man flaxseed, cornmeal, glue and such canned "dopes" to repair leaks.

As if a leaky radiator didn't mean trouble enough—**without buying more!**

Unfortunately not every car owner yet knows what harm these "dopes" do in choking the water circulating system.

Wise car owners have learned that "X" is the only scientific Liquid process for making permanent repairs anywhere in the radiator, in the water jacket, pump, motor head, gaskets, etc.

They know that "X" Liquid circulates freely as part of the water—and in 10 minutes "X" makes a metallic-like repair that lasts as long as any soldering job. And "X" Liquid gets to places that solder can't reach.

One can of "X" Liquid has saved a car owner $150.00 in repair bills!

No More Rust or Scale—

A Cooler, Better Working Engine

If "X" Liquid is kept constantly in the water it will loosen all Rust and Scale now clinging to the metal walls. And so long as "X" is in the water no new Rust or Scale will appear.

This improves cooling, saves oil and helps the engine **perform better.**

Keep a can of "X" Liquid handy for emergencies. Keep it in the water and there will never be any cooling system leaks; or any rust and scale, either.

Not a Radiator Cement!

Don't confuse "X" Liquid with radiator cements or flaxseed meals in powder or semi-liquid form. These clog the cooling system and often damage it.

"X" is the only scientific process guaranteed to keep cooling systems LEAKPROOF — RUSTPROOF — SCALEPROOF — and troubleproof.

Used by the U. S. Government, Standard Oil, American Telephone & Telegraph Company, Etc.

STANDARD SIZE . $1.75

Will do a $25 repair job!

FORD SIZE . . . $1.00

Over 25,000 progressive dealers now sell "X" Liquid. Many of them sell "X" Liquid exclusively.

DEALERS! Once a car owner knows the facts about "X" Liquid — learns that in addition to repairing leaks scientifically, it eliminates Rust and Scale —he'll never use the halfway measures that simply plug leaks for a while and endanger the cooling system.

"X" Liquid sells easiest not only because it is the biggest advertised, but because it gives a motorist most for his money.

Over 3,000,000 cans of "X" Liquid have been sold. "X" is selling at the rate of over 1,000,000 cans a year! How much of the profits are you getting?

Stock the "X" Liquid Special assortment. It includes an EXTRA $1.75 can — FREE. Also display stand and selling literature. Ask your jobber — or write us direct — to-day.

The common-sense way of handling credit accounts

MERCHANTS in 182 different lines of business are using the N.C.R. Credit File.

These merchants have found that the file gives them the common-sense way of handling credit accounts.

It is a one-writing system. It eliminates book posting of accounts.

It keeps each day's credit business separate.

It prevents forgetting to charge goods sold on account.

It prevents neglecting to credit money paid on account.

It gives each charge customer a statement of account on every purchase.

It protects every credit record until it is paid in full.

It saves time, work, and worry. It stops leaks and saves profits.

Investigate this common-sense way of handling credit accounts

SAMSON SHINGLES

The Ideal toward which home builders are striving to-day is BEAUTY.

"SAMSON" Shingles help to give that much-sought-after touch of DISTINCTION to a home, yet the cost is moderate.

THE CRUSHED-SLATE SURFACE, in soft, natural shades of red or green, furnishes color and texture to the roof, and at the same time gives it durability.

Each shingle is made of the highest grade waterproofing materials, measuring 8 x 12¾ inches. Packed in bundles containing 106 shingles. Four bundles, or 424 shingles are sufficient to cover 100 square feet of roof surface, laid 4 inches to the weather. Weight per square, 225 pounds.

Hatch
Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.

The Set Includes:

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside.

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

WHEN CHICAGO RECEIVED ONE MAIL A WEEK

IT is very difficult for the present-day visitor to Chicago to realize that within the lifetime of many of our citizens the second city in this hemisphere was but a cluster of buildings in the wilderness, receiving but one mail a week, brought by a post rider from distant settlements.

It was in 1834, ten years after the Plymouth Cordage Company began to send out to the world the rope which has played so important a part in the opening up of the great West, that Chicago was afforded the luxury of a weekly mail. From that time until now the increasing frequency and the increasing volume of the Chicago mails have been greatly aided by Plymouth Rope.

Plymouth played a large part in the construction and maintenance of the railway systems, and now that mail is being delivered by the air route, Plymouth is playing an even greater part in the construction and equipment of the mail ships of the air.

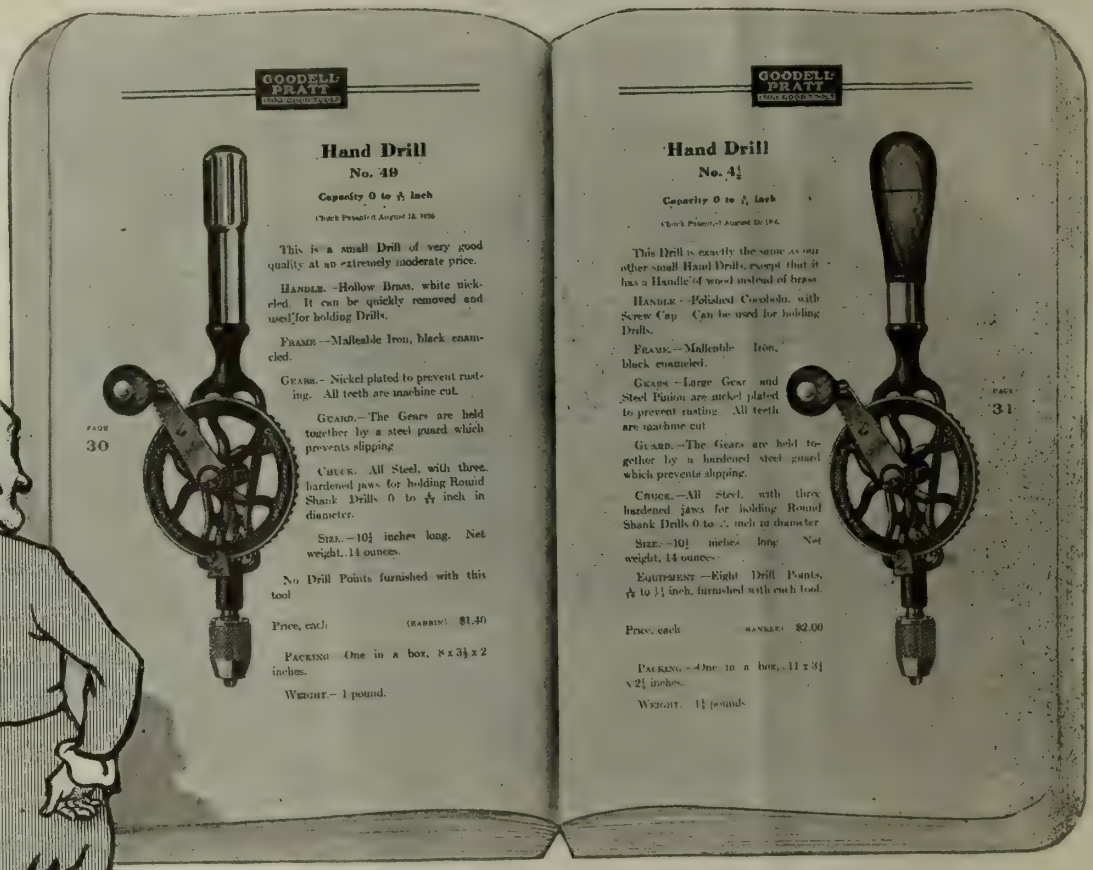
GOODELL-PRATT

1500 GOOD TOOLS



MR. PUNCH SAYS:

The next best thing to a personal visit at the Goodell-Pratt Toolsmith factories is a thorough working knowledge of the big Toolsmith Catalogue.

A lot of hard work and straight thinking is being done all the time to make this Toolsmith Catalogue a regular Service Guide Book for the hardware merchant.

Think of the sales possibilities right here in your own town for the contents of those 464 pages of hand tools — more than 2,000 different tools, the largest line under one name in the world.

The Toolsmith message is being sent out constantly to the users of good tools all over the country.

Did you know that the new Toolsmith Catalogue contains 150 new tools?

There's progress for you — every one of those new tools means new business for Toolsmith Stores.

Goodell-Pratt Company Toolsmiths, Greenfield, Mass., U.S.A.

Story for Week Dated May 8, 1920. **Being No. 4 in the Series**

Over 350 Million Matches Made Every Week

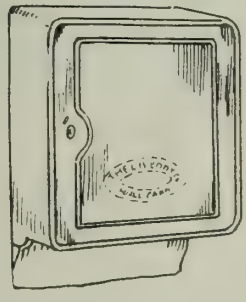
Manufactured at the rate of 70,000,000 a day. From $6,000 to $8,000 per day paid in Excise Tax Alone.

EVERY box of matches that leaves the Eddy plant bears the printed words, "Excise Tax Paid," and your invoice satisfies Government requirements.

When the Excise Tax came into effect The Eddy Company were immediately faced with a necessary outlay of from $6,000 to $8,000 per day to clear their output for the retailer, and immediately machinery was installed to print the Government stamp on every box sent out, though for a time some match boxes had to have the adhesive stamps affixed, because the Eddy Company always keeps a large stock of matches on hand.

This is not the first time the Eddy Company have handled matches requiring an Excise Duty. As far back as in 1878-1880 the Eddy Company were making for export to a St. Louis firm, matches, on the boxes for which a stamp indicating payment of a U.S. Excise Tax of 1 cent per 100 or less had to be imprinted. So the new Canadian regulation did not find The E. B. Eddy Company inexperienced. "Ready," in fact, rhymes with Eddy as regards every new development of the trade.

Now a Government official has his office right in the match factory beside the desk of the superintendent. Not one match can leave the plant without his knowledge. To meet the needs of such rigid official supervision with an output of seventy million matches per day has meant triumphs of organization for the Eddy Company. But in the manufacture of matches the Eddy Company has many times triumphed and the progress of any of the famous Eddy products "From the Tree to the Trade" is a fascinating adventure in industrial processes as this series will from week to week bear record.



The Well Appointed Bath Room

In Your Customer's Home should be fitted with the Eddy Company's "Onliwon"—the ideal toilet paper fixture.

It will pay you well to suggest this need by a good display.

REG U.S. PAT. OFF.
GTD

"Wanted Yesterday"

THE bugaboo of hardware merchandising is the man who has to say "I'll send for them."

How many big dealers have lost good sized orders for taps and dies because they failed to watch the stock and keep it complete with the right sizes?

For the customer who discovered that he wanted taps and dies *yesterday*, a promise of "tomorrow" won't do.

Yes, we know that keeping a hardware stock up-to-date is no picnic—but it pays (doesn't it?) especially with screw-cutting tools.

With a little study you can check up your stock and anticipate those orders *that are surely coming to you* —the best way to hold business, as any good hardware man knows.

Send for the latest GTD catalog today and use it as a guide to fill those empty holes and shelves.

The Sign The World Knows

Throughout the world the red Gargoyle commands respect.

The people of every civilized country know that it is the mark of genuine expertness, of highest quality, in lubrication.

The red Gargoyle means accuracy and dependability in lubrication. Because, Gargoyle Mobiloils when used as specified by the Charts which represent the professional advice of the manufacturers of Gargoyle Mobiloils, give the user maximum lubrication efficiency.

Dealers who display this red Gargoyle, and sell Gargoyle Mobiloils according to the Chart of Recommendations, have the confidence of every motorist —and this confidence is extended to every department of the dealer's business. Is the red Gargoyle in front of your shop?

We will gladly send one of these easily-seen, respect-building, permanent metal signs to every dealer who sells *lubrication service*, rather than just oil.

Create The Right Atmosphere

Cleanliness creates a pleasing atmosphere.

Neat and clean merchandise, well-arranged displays, bright show-cases and an absence of dust, create an atmosphere in your store that makes a favorable impression upon your trade.

Dust and dirt cost you money, not only in the deterioration of your goods but in *loss of trade.* The spick and span type of woman shuns the shop of musty surroundings. Banish dust from your shop and make your store bright and attractive.

IMPERIAL
FLOOR DRESSING
(Standard)

(Formerly "Imperial Standard Floor Dressing.")

is the best ally to wage war on dust. One application cleans and preserves your floor and *prevents the dust from rising.* All dirt and dust which may enter your store is held to the floor so that it may be swept out without contaminating the air. One gallon is sufficient to treat upwards of 700 square feet of floor surface, and one application lasts for months. Imperial Floor Dressing is sold in gallon and four-gallon lithographed sealed cans, half-barrels and barrels.

Iron Stairways and Builders' Iron Work

There is a special field for profitable sales for the hardware man in wire rope. There has been much discussion recently of the unusually large value of the Building Permits issued in Canada. Analysis shows that a very large proportion of these is for the expansion of existing industry.

In both the construction and equipment of buildings of this character there exists an opportunity for large sales of wire rope for both haulage and hoisting. Your district will reveal splendid rewards for a little investigation on your part.

Recommended

for Flat Roofs

by Architects and Engineers

For factories, stores, office buildings and other structures with flat roofs, Brantford Asphalt Roll Roofing or Brantford Rubber Roofing, laid according to what we term Brantford Specification, is giving entire satisfaction.

Hundreds of buildings have been covered with Brantford Specification Roofs for many years. It is being used more and more all the time and is endorsed by leading contractors, architects and engineers throughout Canada.

The sanded surface of Brantford Asphalt Roofing not only adds to its protection, but causes it to adhere readily and firmly to our Branroco cement, insuring absolutely watertight laps.

Give us dimensions of the roofs you are estimating on and we will send full particulars as to cost of using Brantford Specification and complete instructions for laying.

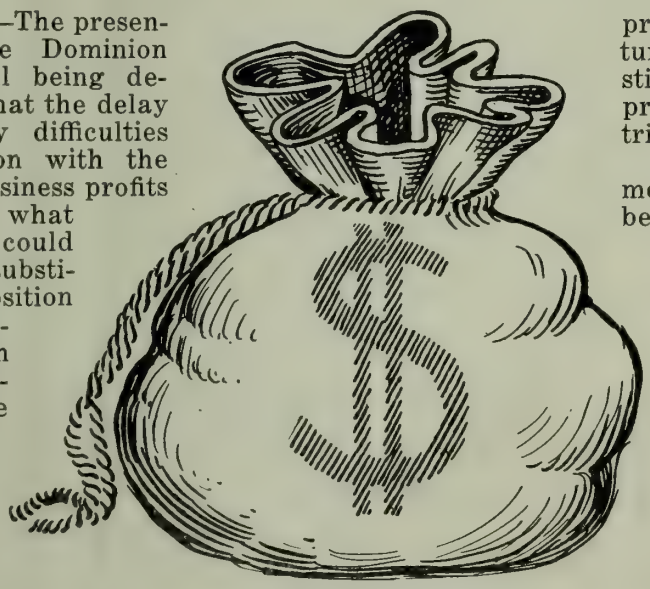
Budget Still Witheld; Western M. P.'s Favor Tariff Elimination on Some Hardware Lines

Delay Over Form of Business Taxation to be Applied—Caucus of Western Members Favor Eliminating Duty on Washing Machines, Stoves, etc.—Little Apprehension Among Manufacturers, as Cabinet Enquiry Was Promised Before Tariff Revision

OTTAWA, Ont.—The presentation of the Dominion budget is still being delayed. It is stated that the delay is being caused by difficulties arising in connection with the application of the business profits tax and doubts as to what other form of levy could satisfactorily be substituted in view of opposition to the practice of taxing profits. The length of the session will depend on when the budget will be presented, and the last statement of Sir George Foster, acting Prime Minister, was that it would be brought down "pretty soon." This is expected to mean within a week or ten days.



Important matters affecting the trade, to be dealt with in the budget, are the plans for raising revenue by taxation and the question of tariff revision. The matter of taxation has been dealt with at length in recent issues of HARDWARE AND METAL and the opinions of those representing all branches of the trade have been quoted. In the matter of tariff revision there is a little apprehension, in view of recent action taken by Western members of the Government.

Western Members Favor Reduction of Tariff on Washing Machines and Stoves

At a recent caucus the members from the West decided on several lines of action in connection with matters which are expected to come up in the budget. It was proposed to eliminate the duty on farm household commodities, such as washing machines, cook stoves, as well as farm implement lines, such as threshers, binders, etc. In lieu of this it was advocated that an excise tax be levied, it being figured that through the proposal of an excise tax the farmer would not pay any more for his goods than at present, while the manufacturer would pay more taxes and still enjoy the same amount of protection from similar industries in the United States.

The general feeling of the members gathered was said to be favorable toward a lowering of the tariff to this extent.

Very Little Apprehension Among Manufacturers

Discussing the matter with an official of the Canadian Manufacturers' Association, HARDWARE AND METAL was advised that there was little apprehension among manufacturers of such lines as stoves and washing machines, on which products it was proposed to lower the protection against foreign commodities. The opinion was expressed that a general election would be necessary before such a drastic step could be safely taken by the Government. It was further pointed out that the Government has had the question of a general tariff revision in mind for some time, but that a committee of the Cabinet under the chairmanship of the Minister of Finance would precede any action by a full inquiry, at which all sides of the question would be dealt with.

Information has been sent in to the Minister of Finance by manufacturers in all parts of the country, from time to time, dealing with their side of the tariff question. This information, it is understood, has been filed for reference when the general question is being taken up.

There is no question the majority of Western members are in favor of some radical steps toward tariff reduction on many lines which come within the scope of the hardware trade and in some quarters there will continue to be some apprehension of what action may be forced by this faction in the Government.

Manufacturers Can Improve Invoicing System

No Two Manufacturers Make Out Invoices in Similar Manner, Says Buyer of Large Wholesale Hardware—Goods Not Invoiced According to Quotation—Different Checking Methods Required on Same Invoice

The following article is based on an interview by P. H. Butler with the buyer of a large Eastern wholesale hardware firm.

"HOW long will it be before some of the larger manufacturers employ invoice clerks who can make out an invoice that does not have to be studied and puzzled over before the buyer knows how much he is being charged for his merchandise?"

These are the words of the buyer for one of the largest jobbing hardware houses in Eastern Canada. Discussing the matter further, he went on to say:

"This is a subject I should like to see discussed in HARDWARE AND METAL. There is room for a great deal of improvement in the manner of invoicing. Hardly two manufacturers make out an invoice in the same way."

To substantiate his statement, he threw down a bunch of invoices on his desk and said, "Look these over."

We picked out an invoice at random. It was from one of the largest manufacturers in Canada.

"Now," said the buyer, "tell me if those goods are invoiced according to quotation."

List Price on Invoice Disagrees With Catalogue List Price

We looked up the goods in question in the manufacturer's catalogue, but the list price on the invoice did not agree with the list price in the catalogue. Was there an error in charging? No, the discount sheet showed that the cost of the goods was list plus 30 per cent. less 10-5 per cent., but the invoice clerk had added the 30 per cent. to the list and only showed the total on his invoice. Then he had shown the discount of 15-5 per cent. and extended the amount. At the first sight it appeared that the manufacturer had omitted to add the 30 per cent., but after a good deal of figuring and checking everything was found to be in order. To make matters worse, on this same invoice we found items that were charged according to list and discount, so the method of checking had to be changed for each item.

We picked up another invoice. This was charged net. Taking the catalogue, we looked up the goods and found that there was a discount of 25-15 per cent. from the list. This discount had been taken from the list price of every item, and only the net amount appeared on the invoice. In order to check the cost, it was necessary to take the catalogue and figure the discount from the list of about twelve items. If these had been invoiced according to the catalogue, and the discount taken off the total, look at the amount of time that would have been saved, both for the man who made out the invoice and the man who had to make the selling price on the goods. Of course where different discounts apply it is impossible to take them off the total of the invoice, but all articles carrying the same discount should be grouped together, and the discount taken off the total of this group.

The next invoice we examined was a puzzle. It read 120 at $250.

"What are we going to sell these for per dozen," said the buyer. "I ordered 10 dozen at $2.50 per dozen and expected the invoice to be made out as I was quoted, why is it necessary to have to figure out the cost price per dozen?"

In this case it was an easy matter to find the cost per dozen, as the figures were all even numbers, but what if the total had been $267.75 and the quantity 153?

PRESENT INVOICING METHODS ARE CONFUSING

The buyer of a large Eastern wholesale hardware asks for a discussion in HARDWARE AND METAL of manufacturers' methods of invoicing. He points out that invoices as at present issued by some manufacturers require a number of different methods of checking because there is no uniformity. It is asked that manufacturers make out invoices according to their catalogs and show the discounts according to the discount sheets, also that the name of the month be shown instead of its number in the year, in order to avoid confusing the pricing clerk, checkers, etc. Other opinions on this matter will be welcomed.

Another invoice read: "24 at $6 = $1." Why didn't it read "1-6 gross at $6 = $1, or "12 only at $1.50 = $18."

Another read: "12 only at $18 = $18." This should have read: "1 doz. at $18 = $1" or "12 only at $1.50 = $18."

Different Dating Methods are Confusing

"Now what is the date on this invoice?" asked the buyer. This was an easy one. It was marked 1/7/20. "Why, January 17, 1920," we said.

"So far so good," said the buyer, "But look at this one."

It was dated 16/1/20. This upset our rule for reading dates altogether, and we had to give in. He then showed us others. Some were dated March 6, 1920, others 6 March, 1920. While these were easy to read, they showed no system of dating.

"I would say to all manufacturers," the buyer went on to say, "make your invoices out according to your catalogue and show the discounts according to the discount sheets. This is the correct method and easier for both the invoice clerk who makes out your invoice, and our pricing clerk who figures the selling price of the goods. Also date the invoices showing the name of the month. What sense is there in your clerk having to count up the months on his fingers before he makes out an invoice, and our clerk having to do likewise to find out in what month the goods were charged."

We left the buyer of this large jobbing house with a poor opinion on invoice clerks in general, but he had firmly convinced us that there was room for improvement.

"Good Year in Builders' Hardware"

HAMILTON, ONT. — Fitzgerald & Kent look for a very promising year in builders' hardware and to this end have laid in enough stock for twelve hundred houses. "It is going fast," said Mr. Kent. "Many of the contractors who formerly bought locks by the dozen are now buying by the case."

Good buying, Mr. Kent considers, the greatest factor in business. It is just a little over a year since the firm was organized and Mr. Kent stated that the turnover for March amounted to twenty thousand dollars. They have taken over an additional warehouse and are now at work making alterations above their King street store, where a large room is being fitted up for displaying mantels.

Consumers Cordage Extend Plant

MONTREAL.—The Consumers' Cordage Company, Limited, Montreal, is at present extending its plant at Montreal. The new quarters now being provided will be used for making twines and other sundry lines. Of mill construction, the addition will be of three-storey capacity and will provide ample room for expanding this department.

Annual Meeting of N.H.A.

The ninth annual meeting of the National Hardware Association of the United States will be held in Cleveland on May 21 and 22 A number of important topics affecting the hardware trade particularly those applying conditions in the period of re-adjustment, are to be discussed.

Dean of Hardware Trade Passes Away

The Courage and Fearlessness of Death as Displayed by Edward Campbell Simmons in His Last Moments is Told by Officials of the Simmons Hardware Company—Had Built Important Institution in His Sixty-Four Years in Hardware Trade

The death of Edward C. Simmons, founder of the Simmons Hardware Company, St. Louis, as announced in last week's issue of HARDWARE AND METAL, came as a distinct shock to the hardware trade and to the host of business men among whom he was held in high esteem. Mr. Simmons has been referred to as the dean of the hardware trade, he having started his long and successful career as a youth on January 2, 1856, with the wholesale hardware firm of Child, Pratt & Co., St. Louis.

An announcement of the company's staff by A. W. Douglas, vice-president, stated that the founder of the business departed this life on Sunday afternoon, April 18th. It continues in part as follows:

"He passed away peacefully and quietly and conscious to the last. His life came to its close just as he would have it, with the love and regard of all who knew him and who assembled to pay their last respects. We shall all miss him more and more as time goes on.

"The accompanying letter from the president to our salesmen and employees tells how all of us feel towards him, whom we affectionately knew as 'Number 8'.

"Our friends outside of our organization will, of course, recognize this as being an intimate personal letter, carrying out the custom by which the members of the Simmons family and others are known by numbers. No doubt many who read this were sufficiently familiar with Mr. E. C. Simmons to know him by the name of No. 8, which title was always used in a way that bespoke respect and affection on the part of our business family. No. 3 is our President, Mr. W. D. Simmons; No. 2, our Mr. E. H. Simmons, and No. 4, Mr. G. W. Simmons."

THE following personal letter from President W. D. Simmons, to the salesmen and employees of the company, tells of the courage and fearlessness of death displayed by "No. 8," the familiar name by which the founder of the company was known among his business associates:

"The founder of this business entered into his last long sleep on Sunday, April 18, 1920, after one more characteristically courageous fight in which he displayed such wonderful will power and such absolute fearlessness of death as to astound his physicians and lead them to say they had never seen anything which made so great an impression on them.

"He had been at his office on Friday, the sixteenth, attending to business as usual, and had also gone that day to his bank board meeting and after it to the club for luncheon.

"While his doctors had noticed that his heart action was much weaker during the last day or two, no one else was permitted to see any evidence of that in his manner and his outward appearance of vigor. Even his surgeon who came Friday evening to look at his broken arm, which had so recently been taken from the sling, found him particularly cheerful and talkative.

"Friday, at midnight, when the other members of the family were asleep, came the attack which proved to be the beginning of the end, but he did not summon any of the family until about six o'clock Saturday morning.

"When I reached his home, about 6.30, and went immediately to his bedside, he said to me in that quiet tone with which you are so familiar, 'Good morning, Wallace, I am glad to see you. Please get a scratch block from my desk over there and take a memorandum of a few things that I will have to ask you to attend to for me.' Then he dictated as I wrote, and in a few minutes, when he had finished, he said, just as quietly, 'That is all. Everything else is attended to. A pretty clean slate, isn't it?'

"Although already breathing with great difficulty, he then began to discuss other matters. He expressed his great satisfaction that we had so successfully financed our business for the next five years and discussed several things of general current interest.

"Later, when his suffering became quite acute and we had to send for the doctors again and his nurse and I were trying to make him comfortable, he said, in the same quiet way—his words broken by his inability to get his breath—'I do not think you can help me. I think this is the climax.'

"When the doctors arrived and found what they knew must be causing great suffering, they administered opiates to relieve that, and he went to sleep where they had placed him, in his reclining chair, in order to make him more comfortable than he could be by lying in his bed.

"In this way he slept most of the afternoon, and about sundown awakened and showed that his wonderful vitality had again asserted itself, even to the astonishment of those physicians who had known him and his remarkable record in that respect.

"No. 2 and No. 4 and I had been taking turns sitting close to him, and I happened to be there when he first opened his eyes and looked about and said, in the same calm manner, 'Well I am surprised. I had thought that would be the beginning of my last long sleep.'

"I told him that he had surprised everybody else many times in a similar way, and now he had even surprised himself.

"And so he continued through Saturday night, sleeping and waking, taking a little nourishment, holding a cup in his hand without a tremor, deciding in his characteristic

Hamilton Celebrates "Bicycle Week"

City Which Claims to Have Originated the "Week"—Publicity Brings Profitable Business —Prizes Given to Those Accosting "The Bicycle Man"

HAMILTON, Ont.—Bicycle week in Hamilton is a big event and this year it proved to be no exception. Plans for the fifth annual "Bicycle Week" were made well in advance, which accounts for the success which attended the celebration. It is claimed that Hamilton originated the annual bicycle week which has now spread over the continent.

Hamilton dealers have found that the publicity given in a special week of display is a profitable business. So to this end the advertising was one of the big features this year. For the past two months advertisements were placed in the local papers periodically on Tuesdays and Saturdays by the dealers, who have been co-operating along this line.

One of the greatest drawing cards was the employment of an individual known as "the bicycle man" whose photo appeared in the local papers. During the week he rode about the city on a bicycle and to anyone accosting him with the phrase, "I ride a bicycle" was given a prize of ten dollars. Up to Wednesday of last week he had been caught once.

"The bicycle is coming back," says J. R. Dixon, president of the Canadian Bicycle Association to HARDWARE AND METAL. "The advertising done here in bicycle week is resulting in a demand for bicycles all through the summer where formerly the demand was only for a short time in the spring and early summer."

To aid the local dealers the Ontario executive of the Bicycle Association had pennants bearing the words, "I ride a bicycle. Do you?" These were sold to the retailers at a small cost. They in turn distributed them free to the boys and others entering the stores. In this way, many of them were scattered on the bicycles throughout Hamilton.

To stimulate trade enthusiasm and window displays, a splendid cup, standing fifteen inches high, was offered by the Goodyear Tire and Rubber Company for the best window display. The judges in the competition were members of the Hamilton Ad. club.

Another feature of the week which attracted considerable attention was a parade, with both fancy and dress sections. First prize of a sixty-five dollar bicycle was given. The advertising for the parade was conducted on a large scale with posters and handbills together with newspaper advertising. Mayor Brooker was selected as the gentleman to award the prizes.

"The idea has been so profitable that we would not think of discontinuing it," one dealer informed HARDWARE AND METAL. "It is not for the immediate results that we advertise but rather for what we consider institutional advertising. It gets the people thinking and speads trade out over the whole season."

Some idea of how people are "set thinking," may be gathered from the fact that many of the advertisements in the papers used cuts of crowded street cars illustrating the advantage of riding a bicycle compared with travelling on a street car; they strive to show the time saved; the great advantage to health; how much quicker than walking; the economy of a wheel; the reward of good service on the part of the boy who passed his entrance. Those were some of the points dealt with in the advertising copy. On the first Saturday and Wednesday of the week the dealers together took a half-page of advertising.

DEAN OF HARDWARE TRADE

Continued from page 39

way whether he had had enough or wanted more, but voicing those decisions invariably in the same gentle voice which bespoke consideration for the young woman who had served him so faithfully as well as appreciation of her devotion to him.

"Sunday morning, in spite of the constantly increasing rapidity of his respiration, he asked No. 2, who was sitting by him at the time, what the morning papers had to say with reference to one or two matters of general interest, and directed his nurse with reference to some things which he wished her to do for him.

"About one o'clock, when No. 2 was again sitting with him, his nurse's watchful eye detected what led her to say quickly that something was wrong. 'Yes,' he said, in the same quiet tone, 'I think there is something wrong. I think I am going.'

"No. 2 raised him up and held him in his arms for a few minutes, while he went peacefully to sleep, and the great heart stopped.

"I am giving you these details because I know they will interest you more than anything else I can say. I will attempt no eulogy in this letter to you because I know it could not measure up to the sentiments with which your hearts are overflowing. Our part is not one of words, but one of deeds. We must show ourselves worthy pupils of a great Teacher. We must give evidence in our daily lives that the seeds of precept and of inspiration and of the good example which he gave us, fell in fertile soil.

"He demonstrated to the world that a successful business man could invariably command the respect and admiration of all with whom he came in contact, and that he could, under all circumstances, be the highest ideal of a Christian gentleman.

"He put into his daily life the teachings of Christ and made his work one of continual service. Whatever he did had its origin in the thought of benefiting someone else. His influence upon the standard of trade ethics has been such that even we who have been with him most constantly, tend to underestimate.

"It is now our responsibility to carry on his work, that his influence may continue to bear fruit throughout the ages. It is for us to take up that work where he had to lay it down and to so conduct the great institution which bears his name that it shall continue to grow in value and usefulness to this country as it has steadily grown for so many years under his guidance and his inspiration.

"Twenty-three years ago when his frail physique broke under the great strain and it seemed as though he could not live more than a few months, his greatest anxiety was lest there might prove to be some truth in the current prophecy that the great organization which he had founded would go to pieces as soon as it lost its guiding hand.

"Those of you who were with us then, and those of you who have since joined our business family, have helped his sons to rebuild the organization and to lift from his mind any doubt or anxiety on that score. You have helped to construct and put upon a firm foundation, a wonderful monument to the genius, character, and high purpose of the frail, ambitious boy who started in building the fires and sweeping the floor, who was the first one down in the morning, and the last one to leave at night, and who, more than any other one man, has been the dominant factor in givig the hardware business of America a unique characteristic which has no counterpat in the trade customs of any other country of the world.

"He was the pioneer in practically all of its progressive movements. He was the first man to put consistently into practice and to devote his whole thought and energy to the theme that the relationships of trade were of a co-operative, mutual character for the benefit of all concerned.

"When it pleased God to at last summon No. 8 to rest, He took away the best friend of so many people that no man may name or number them.

"There will never be another No. 8, but there will be a great and concerted effort on the part of those who loved him to continue the building of the great structure which was his life work, and to leave it upon so strong a foundation of character and usefulness as to make it stand throughout the ages, and stand, as he stood, for the highest type of manhood which the Almighty has permitted us to know.

"We approach the great task before us with entire confidence because we know we shall have your co-operation and, inspired by a great personality, we shall make this institution an even greater factor in the progress and prosperity of the nation because of the principles upon which it was founded and the example set for us by the great spirit which will, I believe, continue to watch over us."

Enthusiasm Kindled by "Bicycle Week"

Fifth Annual "Bicycle Week" Just Ended is Now Adopted Throughout Canada and United States—Last Year's Bicycle Sales Exceeded Boom Years of Twenty Years Ago—Canadian Bicycles in Export Trade

THE week just passed has been a "Bicycle Week" and has been marked in cities and towns throughout this country and the United States by special effort on the part of dealers to encourage the use of bicycles. This effort has taken the form of window displays, local advertisements, store and window cards and all other forms of publicity having for their end the stirring up of enthusiasm.

Now that the ball has been started rolling this effort can well be continued to bring in maximum returns. The enthusiasm already kindled will have cumulative effect if kept alive.

This is the fifth year that a special week has been named in which special attention is directed toward this form of locomotion, and in past years the plan has worked successfully.

To-day there are perhaps more arguments for the use of bicycles than at any previous time. One of the foremost is the general increase in the cost of living. Riding a bicycle instead of the street car results finally in an economy, and to this end there are a great many people riding bicycles to-day who never did before. Labor troubles affecting street railway systems throughout the country also render street car service more or less uncertain in any community, but the bicycle is not affected by labor troubles.

Anticipate Larger Sale This Year Than During Boom

It is believed by representatives of the industry that more bicycles will be sold this year than during the best year of the bicycle boom. It is predicted that in Canada sales will reach 100,000 this year. The value of bicycle production will run into millions of dollars in Canada alone. There is to-day an average of one bicycle for each family in many cities and towns and taking the country as a whole there is a bicycle for every fifteen people.

The year 1899 was the big year according to past records, but statistics show that sales in the Dominion last year exceeded the total sales of 1899. It is noteworthy that more bicycles are to-day being sold in the larger cities than was the case twenty years ago. This is claimed to be the result of organized effort on the part of city dealers, and indicates that there is good reward for such effort.

The progressive plans of the various Provincial Governments for the improvement of country roads is expected to have the effect of stimulating sales of bicycles in the rural and farm districts. and the dealer can cash in on such developments.

Prices Advanced 50 Per Cent. to 60 Per Cent. in Past Five Years

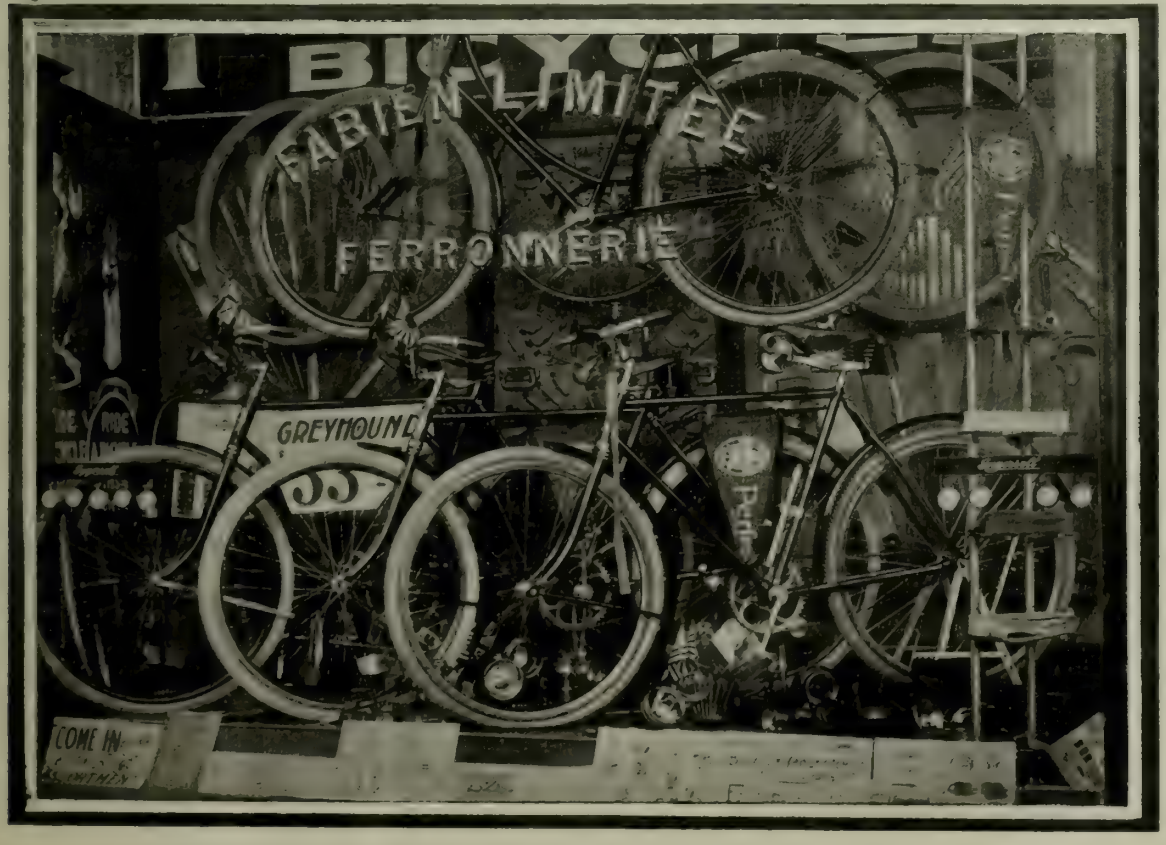
During the past five years prices of bicycles in Canada have advanced 50 to 60 per cent. While at first glance this may seem to be a substantial increase, yet when compared with the increase aggregating 100 per cent. which has been made on the majority of other commodities during that period, it is reasonable. One prominent bicycle man of Montreal points out that to-day the price of a good bicycle is much lower than the prevailing price twenty years ago.

Since the end of the war there have been active steps taken to revive various forms of sport, and bicycle racing is one of the foremost now receiving attention. In a number of Canadian cities steps are being taken to construct athletic parks with tracks suitable for bicycle racing. Many dealers are becoming interested in bicycle racing, and by showing interest in this form of sport the dealer can help to encourage the general use of bicycles.

Canadian Bicycles in Export Trade

Export trade in Canadian bicycles is now developing and there is in this coun-

(Continued on page 43)



A window of bicycles and accessories such as this is seasonable and does much to stir up enthusiasm at this time of the year. There are a great many sound arguments, which the dealer can put forward in the shape of window cards and his local advertising, as to why more bicycles should be used as a utility and for pleasure. The windows can give valuable help toward this end.

EDITORIAL COMMENT

RAPID DEVELOPMENT OF CANADA'S EXPORT TRADE

DESPITE difficulties produced by an insufficiency of raw materials, labor troubles and other disturbances in Canadian industry directly connected with the readjustment to peace-time conditions, Canadian manufacturers have not only provided for the home market, but have kept enough in reserve to enable them to put up a stiff fight for the world's trade, now that export conditions have returned to a more normal state.

This issue of HARDWARE AND METAL contains editorial data indicating the strides Canada is making as an export country. Elsewhere it is shown that for the fiscal year ending March 31, Canada's trade has increased $165,980,266, with an increase in exports for the year of $23,048,292 as compared with the same period one year ago.

It is reported that a large number of firms, fully representative of the various branches of Canadian industry, are planning to reserve space at the Canadian Industries Exhibition to be held in London, England, next June. This exhibition will serve to put Canadian products before buyers from all parts of the world and will give the widest publicity to the lines which Canada is in position to develop for export.

SUCCESS ATTENDS "BICYCLE WEEK"

FIVE years ago "Bicycle Week" was introduced in Canada, the intention being to set aside a week during which the effort of every dealer handling bicycles would be combined to stir up enthusiasm for bicycles and thereby increase the number in use. The innovation was successful and has since been adopted by dealers in the United States. The past week has marked the period set aside for this year in Canada and bicycle dealers, by maintaining the enthusiasm already kindled, are hoping to reap good rewards. Manufacturers anticipate a larger sale for bicycles this year than during the boom days of twenty years ago. Sales of bicycles in Canada this year are expected to reach as high as 100,000. This will represent millions of dollars in production. Canadian bicycles are also beginning to find their way into export trade, thus it is seen that the bicycle industry is fast coming to the forefront in Canada.

SAYS CONDITIONS ARE NORMAL FOR BUSY TIMES

THE importance of using sound judgment and keeping in full view conditions as they exist is outlined in an article by H. C. Atkins, president E. C. Atkins & Company, who points out that present conditions as to supply and demand and prices are really normal for busy times. He expresses himself further, as follows:

> "Similar conditions as to supply and demand in 1914 and 1915 would have been welcomed with open arms by everybody. Business in every line at present is good. The demand for goods is insistent. The market resembles the prosperous days of 1906 and 1907 without the danger of financial panic which followed over-extension of credits at that time.
>
> "Concerning present high prices: we have learned to regard that situation as normal for the times. Many chronic diseases are far from fatal. High prices are traceable to legitimate causes and are logical and necessary at the present time. They are no longer speculative but what one might term chronic. The further logic of the situation is that these high prices are going to stay high. The 'Wall Street Journal,' March 17, 1920, says:
>
> " 'The Industrial Outlook of the current year is encouraging. Nearly all branches of business have well-filled order books and are operating at as near capacity as physical conditions will permit. Industry as a whole is in a very strong position to go through a period of business expansion without seeking financial assistance from the outside.'
>
> "With the financial situation sound and the demand insistent we should go ahead in a business-like normal state of mind, with an abiding faith that the present conditions are sound fundamentally and will not change for the worse to endanger the prudent and careful business man. Carry your usual stock of goods firm in the belief that there are just as many people living, breathing and carrying on the ordinary pursuits as ever."

Steel Merger is Completed

New Corporation Stands Second Only to U.S. Steel Corporation—Capitalized at Five Hundred Million Dollars—Number of Important Companies Merged

Montreal.—The new British Empire Steel Corporation, the largest consolidation in the British Empire, and second only to the United States Steel Corporation, has now come into definite existence, as an imperial organization. Capitalized at $500,000,000, this Canadian consolidation of steel, coal and transportation companies, associating the iron and coal deposits of the Atlantic seaboard of the Dominion with the steel-making experience and financial resources of Great Britain, is now an accomplished fact, according to Colonel W. Grant Morden.

Included in the consolidation are the following: Dominion Steel Corporation and its subsidiaries; Nova Scotia Steel and Coal Co., Ltd., and its subsidiaries; Canada Steamship Line, Ltd., and its subsidiaries; Canada Foundries and Forgings, Ltd., and its subsidiaries; Maritime Nail Co. and its subsidiaries; Collingwood Shipbuilding Company, Ltd.; Port Arthur Shipbuilding Company, Ltd.; Halifax Shipyards, Ltd.; Davies Shipbuilding and Repairing Company, Ltd.

Merger of Pipe Machinery Manufacturers

BRANTFORD.—The John Hall & Sons, Limited, pipe manufacturers, of this city, have merged with the Williams Tool Corporation of Erie, the largest manufacturers of pipe machinery in the United States, with a capital of one million dollars. John R. Hall & Sons, Limited, are the largest manufacturers of pipe machines in Canada.

The local plant will be known as the Hall Plant of the Williams Tool Corporation. No radical change will be made in the management.

Leslie S. Hall, president and general manager, will be vice-president of the American company, taking an executive position between the two plants. A. R. Hall will be manager of the local plant, and E. L. Williams in charge of the office. E. W. Hall is retiring as secretary, and treasurer of the company, and E. L. Hall will no doubt continue with the new corporation on his return from England.

A large factory is under consideration, but it is too early to give definite plans.

ENTHUSIASM KINDLED BY BICYCLE WEEK

Continued from page 41

try the nucleus of an industry, the product of which in future years will have its place in the markets of the world. Special interest is being taken in bicycle sporting events by reason of the fact that Canada will be represented at the Olympic games in Antwerp, Belgium, by five riders. The idea of holding a bicycle week has been so successful in Canada that it has been adopted in the United States, and bicycle sales are now boosted simultaneously in both countries.

Sample Room for Manufacturers' Agents

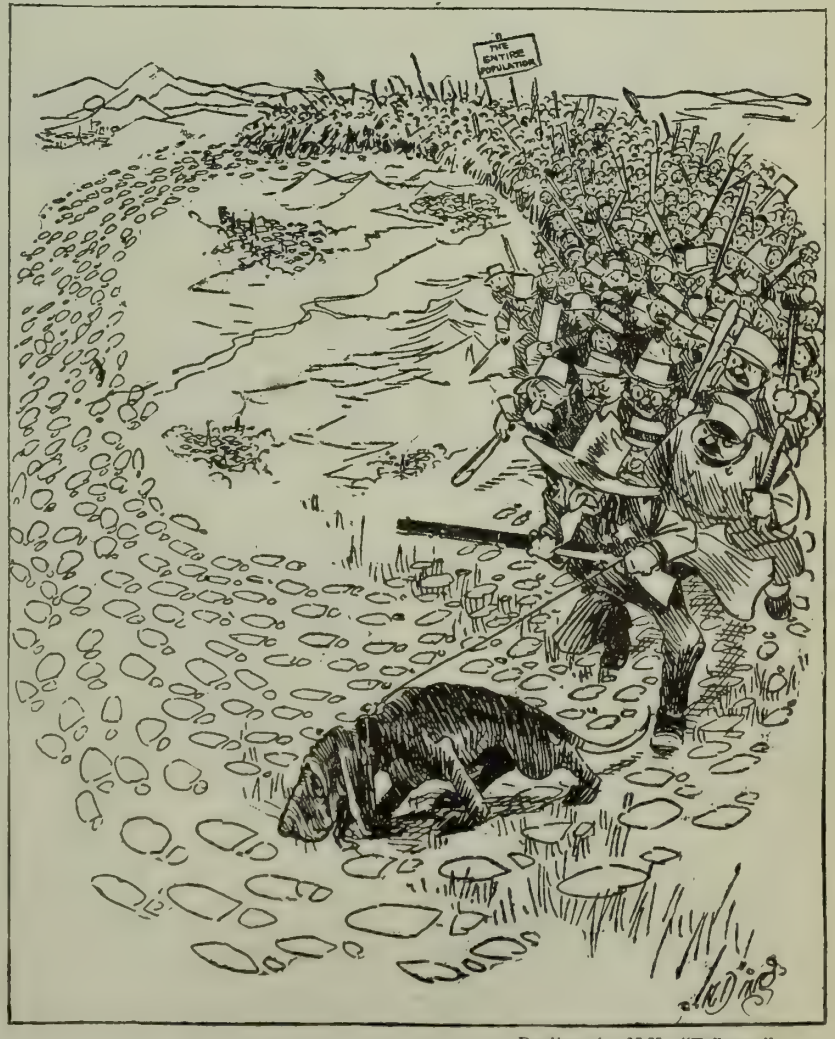
MONTREAL.—Among other novel features recently adopted and made effective by His Majesty's Senior Trade Commissioner in Canada and Newfoundland, a large sample room has been made available for the use of British manufacturers' representatives. This, particularly when such accommodation is limited in Montreal, will enable visiting sales representatives to quickly display their samples before the Canadian buyer. Already the innovation is proving a pleasing success. In addition to this, Captain Edwards has arranged a small private office which, as occasion requires, may be used by visitors from the Old Country.

French Embargo on Hardware

The French Government has put into effect an embargo on the importation of articles of "luxury" and included on the list are certain articles of hardware. The embargo will affect Canadian manufacturers of such lines to some considerable extent. The list consists of one hundred and eighty-seven articles, including cutlery, wall papers, brushes, enamelware and rubber goods. Manufacturers of rubber goods will be affected to the great extent of the lines mentioned as $439,459 worth of such goods were exported to France during the ten month period ending January 1920.

Rosin and Turpentine Imports

Some interesting figures showing the extent of Canada's importations of rosin and turpentine from the United States during the month of February are given in U.S. reports. It is shown that during the month of February Canada imported 3,700 barrels of rosin from the U.S. These importations were valued at $72,-186. Importations of spirits of turpentine for that period amounted to 42,612 gallons having a total value of $79,-693.



Darling in N.Y. "Tribune."

HUNTING THE PROFITEER

EVENTS IN THE TRADE

Business Changes

W. W. Baker, who has been running a hardware business at Granton, Ont., for a number of years, has sold out to W. H. Gunning.

Obituary

Oshawa, Ont. — Frank Robson, vice-president of the Robson Leather Company, died this week.

Incorporations

Ductite Steel Co., Ltd., has been incorporated with head office in Toronto to manufacture iron and steel products.

Perkins, Limited, has been incorporated with head office in Toronto to operate stores in all lines of mercantile business.

Riverdale Leather Co., Ltd., has been incorporated with head office in Toronto to engage in the manufacture of leather articles.

K. Farah & Sons, Ltd., has been incorporated with head office in Toronto to manufacture and sell beds, couches, hammocks, mattresses, etc.

Personals

G. J. Lawrie, hardware merchant, of Maple, Ont., was in Toronto this week on business.

O. B. Henry, hardware merchant, of Drayton, Ont., also of Arthur, Ont., made a business trip to Toronto this week.

Geo. A. Binns, hardware merchant, of Newmarket, Ont., visited Toronto on business this week.

E. Lewis Evans, has joined the staff of Rice Lewis & Sons. Mr. Evans was previously connected with the above firm for a number of years.

K. N. Forbes Goes to Winnipeg

St. John, N. B.—Kenneth N. Forbes, who has been local manager for the Canadian Fairbanks-Morse Co. for the past five years, has been transferred to Winnipeg, where he will manage the office of his company. Mr. Forbes has been held in high esteem by his associates here and by the citizens in general. His successor is Watson J. Hill, who has been with the Fairbanks-Morse for sixteen years.

Building Association Organize

St. John, N. B.—At a recent meeting of representatives of employing painters, builders, contractors, foundrymen, masons and others interested in building and construction work, the St. John branch of the Association of Canadian Building and Construction Industries was organized. A good representation of hardware dealers was included, among whom were: D. J. Barrett, Phoenix Foundry; Phillip Grannan, Ltd.; James McDade; E. S. Stevenson & Co., Ltd.; Union Foundry; J. E. Wilson, Ltd.; Steiper & Co.

Daylight Saving—Yes and No

Brockville.—Brockville has adopted daylight saving for three months, commencing the first of June.

Chatham.—The city council has decided to dispense with the daylight saving by-law for the present season.

Cobourg.—The town council decided to introduce daylight saving time on May 17, to remain in effect until September 6, 1920.

New Plant for Carborundum Co.

Niagara Falls, N.Y.—The Carborundum Co. has acquired from the Alien Property Custodian the plant formerly owned and operated by the Didiermarch Company at Perth Amboy, New Jersey. The plant will be taken over at once and converted to the manufacture of a complete line of carborundum refractories.

In addition to this property, the Carborundum Company acquires sixty acres of high grade fire clay lands at Bonhamton and a clay excavating plant in operation.

The plant will be used exclusively for the manufacture of carborundum refractories for the entire field of high temperature furnace work.

No Glass From Belgium

That there is no hope of relieving the glass shortage in America with supplies of Belgian glass, is the information contained in a report on the plate glass situation by C. E. Herring, trade commissioner of Brussels. He states that it is almost useless for American importers to visit Belgium or conduct negotiations for plate glass because Belgian manufacturers are overwhelmed with domestic and export orders which cannot be filled. Even pre-war customers are receiving less than 50 per cent. of their average pre-war purchases. All the manufactured product of Belgian plants is disposed of by a syndicate and orders will be accepted only for goods ready for shipment. Production is now said to be slightly over 60 per cent. of the pre-war output with prospects poor for increasing it.

Reopen Steel Foundry

Welland, Ont.—An official statement has been given out that the Canadian Steel Foundries of this city, which plant has been closed for a year, will commence operations again in six weeks' time. The rolling mills will engage in steel bars and angles as previously. Mr. Fred. Curtin, former purchasing agent, has returned from Hamilton to take over his former position. The plant, when running at full capacity, will employ 700 men, about 300 being required by June.

Western Firm Changes Name

Winnipeg, Man.—The Winnipeg Ceiling and Roofing Company will in future be known as the Western Steel Products Company. The late W. J. McMartin, who held the position of president of the company prior to his death as recently announced in HARDWARE AND METAL, founded the Winnipeg Ceiling and Roofing Company in 1904.

Appoint Montreal Manager

Montreal, Que.—C. F. Masse, a native of Montreal, has ben appointed local manager for the Northwestern Chemical Company, Marietta, Ohio. Mr. Masse has spent the past five months at the factory in preparation for his present work. The company's branch factory in Montreal was opened about a year ago, and the new appointment bears out the intention to operate a distinct Canadian institution employing Canadian help and securing Canadian raw materials. A sales organization is to be maintained, the Eastern Provinces under the supervision of P. W. Robinson, Montreal, and W. B. Campbell in charge of the Western Provinces.

St. John Firms in Merger

St. John, N. B.—Some local concerns are to be effected in the steel merger proposed under the name of the British Empire Steel Corporation. A meeting of the directors of the Maritime Nail Co. was held last week, at which it was decided to recommend to the stockholders the acceptance of the terms. The James Pender Co. will be included in the merger also. It is likely that S. E. Elkin, M.P., will head the local end of the organization. Speaking of the merger yesterday, Mr. Elkin said: "The promoters of the merger have big plans and the working of those plans will be very beneficial to St. John."

Another Industrial Congress

Calgary, Alta.—Continuing the work commenced at the Industrial Congress held in Alberta last year, a similar congress is to be held this year on a more comprehensive scale in conjunction with the Province of British Columbia. The congress will be attended this year by members of the Canadian Manufacturers' Association, whose annual meeting will be held in the West immediately following the congress sessions. Delegates to the congress will assemble at Medicine Hat on June 2 and will proceed to Lethbridge, Calgary, Edmonton, Vancouver and Victoria between June 2 and 11. At each stop visits will be paid to local industries; addresses and exhibits will also be a feature at the larger centres. The aim of the congress is to assist in the development of the great natural resources of the Western Provinces and to assist in creating a better understanding of the country's problems, as between the East and the West.

Compensation Act Amendments

A number of important amendments to the Ontario Workmen's Compensation Act, as formerly outlined in HARDWARE AND METAL, have now been made ready for presentation to the Ontario Legislature.

Some of the more radical proposals are:

1. An increase from 55 per cent to 75 per cent. in the compensation rate.
2. A minimum rate of $12.50 per week.
3. Increased allowances for widows and children.
4. Making all increases retroactive to 1st January, 1915.

These amendments will mean a direct increase of 36.3 per cent. in the present compensation, and will necessitate a great increase in the rate of levy on the industries now in operation, which will be obliged under the retroactive feature of the bill to provide not merely for their own pensions but for the trail of pensions left behind by munition works and other industries which have done business from time to time since 1915, but have now been wound up.

German Steel in Britain

The fact that German steel manufacturers are in the British market and have actually made deliveries, has created quite a stir in the trade according to a report in "The Ironmonger." Continuing, it states that it had been believed that disturbed conditions in Germany would put German manufacturers out of the market for some time, but now a quantity of German steel, not less than 10,000 tons, has been sold for delivery by May. "Despite revolutionary conditions in Germany manufacturers have kept to their contracts. The business has been confined to relatively few firms in this country, the material being purchased largely for export, although limited quantities are for consumption in Britain."

Hardware Dealers Are R.M.A. Officials

Brandon, Man.—J. E. Curran, Brandon Hardware Co., was elected first vice-president of the Brandon branch of the Retail Merchants' Association at its recent annual meeting. John Popkin, of Johnson Hardware Co., was elected secretary. It was the unanimous decision of the merchants to close on Thursday afternoons during May, June, July, August and September. The city will be asked to make a by-law to this effect.

HARSH TREATMENT OF INNOCENT OFFENDERS OF REVENUE ACT

The following letter has been sent to HARDWARE AND METAL by R. M. Clements of Clements & Co., Milton, Ont. Its publication may carry a warning to others in the trade and so prevent them from being taken unawares and fined by the officers of the Revenue Department where insufficient notice has been given the dealers:

The Editor,

Hardware and Metal,

While R. M. Clements, manager of the firm of Clements and Co., Milton, was in Bermuda in March and early part of April last, a shipment of Dr. Hess' Stock Goods came in. Included in this shipment was 1 doz. Roup Cure, an article that had never been in the store before. Along came a Revenue Officer and purchased a 25c package without the customary 1c stamp affixed, from a clerk who is a returned soldier and taking a vocational training since February. A charge was laid and Clements and Co. on May 4th was fined $50.00 and costs. The officer of the law said he had warned the Drug and Feed Merchants two years ago but hadn't called on the Hardware. Even if he had called on the Hardwares at that time both R. M. Clements and the young clerk who sold the goods were "Overseas." Surely the Government can find some more gentle way of warning innocent offenders than issuing such a Bolshevist method, especially since this firm had been putting the necessary stamps on the regular line of Stock Foods in pails and packages, but this being a new line it never occurred to the clerk that it came within the law.

Cancel Prepayment Clause

Steps were about to be taken in protest of the action of United States railways in demanding the prepayment of freight to Canadian destinations in U. S. currency, when that clause was withdrawn. This section has now been rescinded and U. S. railways will allow reconsignment at the border to Canadian points, thus permitting payment being made for the Canadian haul in Canadian currency. This announcement precluded action on the part of Canadian coal dealers from raising the price of coal 50 cents a ton, the effect of which would have been felt in many other departments of the trade as well.

Steel Output Increased

Steel and other metal industries in the Maritime Provinces showed increased activity during March, according to a report in "The Labor Gazette." One large plant showed the following increase over the previous month:—Pig iron, 18,300 tons; ingots, 23,800; blooms, 2,750; billets, 5,400; rails, 3,350; rods, 9,260; plates, 2,500; fit rails, 700; wire, 200; nails, 1,850. Output was partly hampered by the shortage of cars affecting receipt of equipment and material. The stove, furnace and metal roofing industries continued active during the month. At Halifax activity in the skate, bar, iron nuts and bolt trades continued steady with good prospects.

Want Canadian Business

N. L. Hutchinson, buyer for the J. H. Ashdown Hardware Company, Winnipeg, has recently returned from England, where he attended the British Industries Fair in London, Birmingham and Glasgow.

Discussing various phases of trade conditions in England, Mr. Hutchinson states that while at the present time only skilled workers can work at the building trade, the Government is endeavoring to allow unskilled labor to work as well, due to the shortage of houses and offices in England. There is very little unemployment.

While Mr. Hutchinson was in England, there was a threatened strike in the cutlery trade, the workers demanding 25 per cent. increase, but were likely to arbitrate and get only 15 per cent. English manufacturers are said to be able to make reasonable deliveries on small arms. The situation was improving in regard to delivery on butcher knives and razors. Pocket knives were scarce. There will be no delivery of edged tools, such as chisels, for a long time. The Sheffield manufacturers of cutlery did not exhibit at this fair due to the fact that they cannot make deliveries for some time. Orders placed now for cutlery could not be delivered for a year's time. Mr. Hutchinson remarked that the English paint firms were anxious for Canadian business.

American Tinplate in Europe

Dealing with the offers of American tinplates on British and European markets "The Ironmonger" states that such offers have upset the merchant trade in England even though the terms asked are not such as to render them serious competitors of the Welsh manufacturers. American demands of irrevocable credit have been considerably modified. Continuing it states: "With the exception of a few large contracts the American tinplates have been sold in small quantities. Our merchants have not bought to the same extent as Continental houses owing to doubts regarding delivery and to a dislike of selling terms."

Newsy Notes From Here and There

PORT PERRY, Ont.—A. M. Roberts of the Carnegie Hardware has gone to Otterville to start business as a tinsmith and plumber.

HUNTSVILLE, Ont.—A quiet but very pretty wedding took place at Huntsville on Wednesday, April 29th, when Mr. Allan T. White, travelling representative of Whites, Limited, Collingwood, was married to Miss Olga Bushfield.

WINNIPEG, Man.—W. S. Fallis, of Montreal, managing director for the Sherwin-Williams Company of Canada, was a recent visitor in the city. Mr. Fallis, when Western manager for the company, was a resident of Winnipeg.

MONTREAL. — George Henderson, president Brandram-Henderson, Ltd., was away this week to the Eastern branch at Halifax.

George F. Sheppard, manufacturers' representative, has moved his offices from the Shaughnessy Building, McGill Street, to the Southam Building, 128 Bleury Street.

W. P. Walsh, Martin-Senour representtive at Halifax, was in attendance last week at the "Save the Surface" convention at Montreal.

MONTREAL.—J. N. Warminton, of J. N. Marminton and Co., steel goods importers, left on a business trip to France, Belgium and England ,and will be absent several months.

H. J. Knapp, representing Ashcroft Manufacturing Co., Consolidated Safety Valve Co., Hayden and Derby Mfg., Co., and Hancock Inspirator Co., New York, is expected in Montreal next week.

MONTREAL, Que.—Other visitors included Harry M. Patterson, president of the Stratford Brass Co., Ltd.; O. A. DeGraw, Sales manager Western Clock Co., Martin LeMetis, representing the American Steel Wool Manufacturing Co., New York; R. R. Ross Canadian Fasteners Limited, Hamilton.

MONTREAL.—Alexander Gibb, Manufacturers' Representative, is spending a few weeks at Atlantic City. John Richardson of Richardson and Bureau, Manufacturers' Representatives, is away to the Maritime Provinces for a couple of weeks; James Robertson, president the Thos. Robertson Company, is away this week to Atlantic City.

MONTREAL.—Visitors to the city this week included the following:—F. R. Crawford, Maritime representative for Paint & Varnish, Limited, St. John, N. B., attended the "Save the Surface" convention, also J. R. Houle, Quebec representative for Paint & Varnish, Limited. C. A. Bower, representing Pratt and Lambert, Inc., was this week a Montreal visitor, and L. M. Croft, president and general manager of S. C. Johnson and Son, Canadian branch, was calling this week on the Montreal trade.

T. F. Moneypenny, Mr. Mihell and Mr. Penberthy were in Montreal attending the "Save the Surface" convention last week.

MONTREAL.—Richardson and Bureau, 55 St. Francis Xavier Street, Montreal, have been appointed Canadian sellinng agents for products of the National Machinery Co., Ltd., Montmagny, Quebec.

Winnipeg Plans "Paint Up" Campaign

Winnipeg, Man.—Members of the Winnipeg Paint Club are planning the commencement of a "Paint-Up" campaign, bearing out the work of the "Save the Surface" campaign. It will take the form of extensive advertising, in which street car advertising will be used.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

INCOME OR PROFITS TAX

The following letter dealing with this subject is from The Blairmore Hardware Company, Blairmore, Alberta:

The Editor, HARDWARE AND METAL,
Toronto, Ont.

Dear Sir:—

Re income or profit tax—I have read with great interest the discussion which is taking place in your paper regarding the above, and also the contemplating of another tax by the Finance Minister in order to make both ends meet. There is no doubt the present income tax, as instituted, is the most fair and just that could be drafted, that is, if it were possible to economically and thoroughly collect it as intended; but the income tax as we see it created a profitable field for tax-dodgers, and if we are to believe the reports that appeared in Hansard lately (and we have no reason to disbelieve them), the collecting of the income tax in the past has been nothing but a farce. In other words, the income tax is like that prohibition law of ours, it does not hit the people it intended to hit. And nobody seems to have anything to suggest to remedy the situation without enormous clerical and travelling expenses to the Finance Department. Then came the idea of a turnover tax; while this tax, no doubt, would be a better revenue-producer, it would eventually be borne exclusively by the consumer, which, rightly enough, does not seem to be the policy of the Government.

But why not tap the main artery and tax the land? When it comes to taxation, land is the main river, and all other forms of taxation become but tributaries. Why not levy one mill, or part of it, according to requirements, each year, taking municipal assessments for basis: but when I say tax the land, I mean all lands, vacant or otherwise, surface rights, timber rights, mining rights, oil rights, regardless of ownership. Such a tax could be collected through land title offices, municipal offices, etc., at a comparatively small expense, and to my mind, cannot help but be fair.

Taxation in Canada (in fact all over the countries that took part in this Great War) will be "some problem" to solve, and the more widely discussed the subject is the better it is, and I certainly welcomed the opening of the columns of your valuable paper for the purpose.

Every hardware man is vitally interested in the subject, and each one of us should offer what he has in the way of suggestion. Thanking you in advance, I beg to remain,

SUGGESTS DEPOSITS TAX

A letter dealing further with the question of taxation and suggesting a levy on deposits is from Wm. Q. Phillips, Sarnia, Ont.

The Editor, HARDWARE AND METAL,
Toronto.

Dear Sir:—

The discussion of a proposed turnover tax turns chiefly on the principle of the thing. Is it reasonable, and can it be applied fairly? A few years ago we should have said "No; business taxes should be based on profits, and there is no fixed relation between profits and turnover."

But probably the Finance Minister would say that any tax that can be efficiently collected and will yield a good revenue is good principle, for the Government needs the money. If this is right, then we turn to the problem of collection. My own opinion is that it would be very troublesome and expensive in operation.

We have had some experience with the excess profits tax, which touches only those business enterprises with $50,000 capital or more; and also with the income tax, which applies as an alternative to any business with profits of more than $3,000 a year.

These taxes apply only to enterprises which will probably keep proper books of account, and can report their profits with reasonable accuracy. Yet there has been great delay in collecting the taxes, for the reason, I understand, that the Commissioner of Taxation has undertaken to audit the books of contributors, so far as may be required, and the work is far behind.

However, if we admit the principle of a turnover tax then there is a way of assessing and collecting it that will require no large staff of officials, and there will be no prying into private affairs. The method would be to tax turnover as shown by the bank clearings, which for 1918 were over 13 billions. This includes only the clearings of important centres, but since most remittances find their way to a bank clearing house sooner or later, the totals are fairly representative. Of course, we cannot tax them directly, for they are bookkeeping totals, but we can get what is wanted by taxing bank deposits, collections, discounts and other items at the moment they go to the credit of the customer.

A trader goes to the bank with a $1,000 deposit. The teller deducts the tax, say ½ of 1%, which would be $5.00, and that is all there is to it. Every branch would list its tax collections daily, and report them to the head office, and the head office would credit the Minister of Finance. The system would be automatic when once established, and the money would come in continuously.

The scheme is an ideal one for nicking the dollar when the dollar is there. To those who say, "Oh, we must not think of taxing deposits." there is the answer that you cannot make an omelet without breaking eggs, and the best time to take a man's money is when he has the money to take.

Hardware Letter Box

TENNIS RACKETS

Cochrane Hardware Limited, Copper Cliff, Ont.—Can you tell us where we can purchase Wright Ditson tennis rackets?

Wright Ditson tennis rackets can be purchased from the following:—Harold A. Wilson Company, 299 Yonge Street, Toronto, Ont.; Wright & Ditson, Inc., Boston, Mass.—Ed.

CHANNEL TIRE STEEL

The Martineau Co., Ltd., Quebec.—Can you tell me where we can procure channel tire steel?

Channel tire steel can be procured from the United States Steel Products Corporation, Royal Bank Building, Toronto, Ont.—Ed.

CORK FLOORING

The Finkbeiner Hardware Co., Milverton, Ont.—Can you tell me where to procure cork floor matting for church aisles?

Floor matting for church aisles can be procured from Armstrong Cork & Installation Company, Toronto, Ont.—Ed.

MALLEABLE IRON CASTINGS

Hollands Manufacturing Company, Erie, Penn.—Can you give the names of the foundries in Canada who make malleable iron castings?

The names of some of the foundries in Canada who make malleable iron castings are the following: International Malleable Iron Co., Guelph, Ont.; Pratt & Litchworth, Brantford, Ont.; Galt Malleable Iron Co., Galt, Ont.; Owen Sound Malleable Iron Co., Owen Sound, Ont.; Ontario Malleable Iron Co., Oshawa, Ont; Fittings, Limited, Oshawa, Ont.; McKinnon Industries, St. Catharines, Ont.; Smiths Falls Malleable Iron Works, Smiths Falls, Ont.—Ed.

STEEL BUCK SAW FRAMES

The Martineau Co., Ltd., Quebec, Que.—Can you tell me the names of manufacturers of steel buck saw frames?

Shurly Dietrich Co., Ltd., Galt, Ont.—Ed.

CROCKERY, CHINA, CUT GLASS

Mr. H. A. Hess, Evesham, Sask.—Can you give names of wholesalers and manufacturers of crockery, fine china and cut glass?

The names of wholesalers and manufacturers of crockery, fine china, and cut glass are the following:—Cassidys Limited, Montreal and Winnipeg; Gowans, Kent & Co., Ltd., Toronto; Gundy, Clapperton Co., Ltd., Toronto; Geo. Phillips & Co., Montreal, Que.; Ontario Crockery Co., London, Ont.; Johnson & Barbour, London, Ont.; Quintee Glass Co., 57 Queen St. West, Toronto.—Ed.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

868. **Mill and tool steel in bars, round, square, flat and hexagonal.**—A Buenos Aires firm of manufacturers' representatives with an established clientele are desirous of handling these articles on a commission basis.

871. **Enamelware.**—A British firm in Guatemala city, Guatemala, would like to get into communication with Canadian manufacturers of enamelware.

872. **Rubber goods.**—The Holland office of a Toronto firm would like to get in touch with Canadian exporters of mechanical, druggists' and surgical, and plumbers' rubber goods.

Paper Containers, Tin Boxes and Cans

American Auto Specialty Company, Sault Ste. Marie, Ontario.—Can you advise us where we can procure paper containers, also tin boxes or cans?

Paper containers are manufactured by thefollowing: Rudd Paper Box Co., Toronto; Lawrason, Doughty & Co., Toronto; Automatic Paper Bag Limited; Dominion Envelope and Carton Co., Toronto; Collett Sproule, Limited, Toronto.

Cans can be procured from the Whittall Can Company, Limited, Montreal.—Ed.

Automobile Upholstering Material

A. M. Robinson, Esq., Prelate, Sask.—Can you advise us of the names and addresses of Winnipeg firms handling automobile upholstering material and supplies?

Firms handling automobile upholstering material and supplies are as follows: J. H. Ashdown Hardware Co.; Great West Electric Co., Ltd.; Motor Products, Limited; Wood Vallance Limited; Marshall Wells Co., Limited; Merrick-Anderson Co., Ltd.; Miller-Morse Hardware Co., Ltd.—Ed.

KNIFE CLEANING MACHINES

Dunbar & Ragan, Stettler, Alta.—Can you tell me where to procure knife cleaning machines?

Knife cleaning machines may be procured from the Kent Mfg. Co., London, England; Wrought Iron Range Company, Limited, 149 King St. West Toronto; George Sparrow & Company, 119 Church St., Toronto, Ont.—Ed.

PARK FOUNTAINS

Cochrane Hardware Ltd., North Bay, Ont.—Can you tell us where the procure park fountains?

Park fountains may be procured from Empire Mfg. Company, London, Ont.; Standard Sanitary Mfg. Co., Toronto; Hope Sanitary Mfg. Co., Toronto; James Morrison Brass Mfg. Co., Toronto; Canada Metal Co., Ltd., Toronto; Amherst Foundry Co., Amherst, N.S.; Galt Brass Co., Ltd., Galt, Ont.; H. Mueller Mfg. Co., Sarnia, Ont.—Ed.

Catalogs and Booklets

The Office Specialty Mfg. Co., Newmarket, Ont., have issued a new general catalogue No. 1975, containing 96 pages of well-illustrated matter showing different styles of filing cabinets, filing systems, special maps and map cabinets, record safes, vertical and horizontal, card index files, also a complete line of tables, desks, stands, trays and many other lines manufactured by the company.

They have also issued a new catalogue, No. 1850, describing their filing system supplies. This also is very well illustrated and contains 72 pages, and describes fully the many systems of filing, correspondence, catalogues, circulars and other special papers. It also contains folders and file pockets, index, tabs, transfer cases, paper clips, perforators, clip files and many other sundries and accessories manufactured by the company.

The manufacturer will gladly mail either of the above catalogues or both upon request to readers of HARDWARE AND METAL.

De Haven Manufacturing Co.

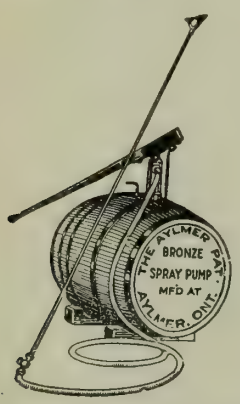
De Haven Mfg. Company, 50 Columbia Heights, Brooklyn, N. Y., have issued a very attractive booklet on box strapping and metal specialties for the shipping department. Besides much descriptive reading the book contains many cuts and illustrations of the line manufactured by the above company, which includes box strapping on reels, special lines of embossed box straps, such as self measuring, with marker over twelve inches, also the different embossed designs, self drawing wire stamp, steel packing hoops, cold rolled steel band, baled tie buckles, clutch nails, flexible pail clasps, pail hooks, detective seals, corrugated steel fasteners, oval tag fasteners and other lines. The book is very attractive and is neatly arranged and is made up into a pocket edition so as to be possible to be carried around. Readers of HARDWARE AND METAL may have one on request from J. N. Warminton & Company, Montreal, who are Canadian selling agents for this line.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

The Canadian Potato Machinery Co., Ltd.

The Canadian Potato Machinery Co., Ltd., Galt, Ont., are offering to the trade their O.K. Aylmer sprayer, formerly manufactured by The Aylmer Pump & Scale Co., which they claim is an all-round sprayer and can be used to do the



TREE AND SHRUB SPRAYER

spraying to the ordinary farmer such as spraying fruit trees and shrubs, disinfecting and whitewashing coops and stables. With the adjustable attachment it can be put in a democrat to spray all kinds of field crops such as potatoes, celery, wild mustard in grain, etc.

The following is a description by the manufacturers: The cylinder, pistons, valves, etc., are made of high-grade brass, accurately machined. The handle operates the cylinder to which the agitator is attached, so that the extra labor required to operate a mechanical agitator is eliminated, besides the advantage of having the liquid agitated at the point of intake, which prevents clogging.

The leverage obtained by the fulcrum handle makes the pump easy to operate, giving double the power to the pump, so that an easy motion of the handle keeps the nozzles supplied. Another feature of the working parts is the construction of the piston, it being equipped with piston rings which operate in the cylinder, eliminating the possibility of lost compression by the blowing out of packing.

Each outfit is supplied with a spray calendar suitable for Canadian conditions, so that the operator will know what mixture to use and when to spray.

The above-named firm have also issued a new catalogue on sprayers, which describes and illustrates compressed air and two-row sprayers, etc., as well as the above. The makers will mail a copy to readers of HARDWARE AND METAL on request.

The Wayne Manufacturing Co.

The Wayne Manufacturing Co., 124 Sydney St., St. Louis, Mo., are putting on the market their new washing machine which is registered under the trade name "Wayne." They state that its construction is fool-proof and is constructed on the rocker type on the principle that the action of the tub agitates the water, forcing it through the clothes. No projections are necessary and thus there is also a minimum of wear on the clothes.

The manufacturers describe their new machine as follows: Simplicity is a feature of the "Wayne" rocker. There are but seventeen moving parts. All the bearings are oilless and the dirty oil can is done away with; by this means the danger of neglect and consequent scarred and cut bearings—and general breakdown of the machine—are eliminated, the copper or galvanized tub is not fastened to the machine by any bolts or rivets, but merely rests in the rocker cradle. Thus, with any injury due to accident or wear or tear of use through years of operation, the machine need not be scrapped. Because of the fact that the tub can be easily removed, the machine is sanitary, as by removing the tub the entire mechanism inside the cabinet can be easily and quickly cleaned.

WASHING MACHINE

In construction it is as strong as it is possible to make it. The frame is of channel and angle steel, welded. The panels are of sheet steel japanned. The tub is copper, heavily tinned on the inside. The wringer has all the features of simple control, swinging to various positions; is reversible and is equipped with a perfect quick release device.

The simple, strong and efficient construction, and the absence of bearings which need constant attention and oiling, make it an attractive washer, as only the motor and one clutch need attention a few times a year.

Mueller Electric Co.

Mueller Electric Co., 425 High Avenue, Cleveland, Ohio, have put on the market their new universal battery clip, which they state has many improvements, such as being made of steel and lead coated, the teeth of the jaws bite through cor-

BATTERY CLIP

rosion on dirty battery terminals, and make a good contact without the necessity of scraping the corrosion of the terminals. The jaws are made to open as wide as 1½ inches in order to be ample to take the large size battery terminals. The channeled necks are made with the object of having great strength. The lead-coated helical springs are oil-tempered wire with an 18-pound bite to hold jaws on battery terminal and are readily renewable. The humps in the metal are also for the purpose of reinforcing the neck at the upper bend. The contact screw has an undercut head to hold the lead or jumper wire. It also has lips to clamp down on the insulation of the lead or jumper wire to relieve the conductor strain. The double-lipped hinge also is made with the idea of preventing the jaws from offsetting. It also has flanges which reinforce the side members and retain the spring in place, as well as a flange to reinforce the neck at the lower bend.

The manufacturers claim that with the use of these clips the car owner is enabled to charge lighting and starter batteries without disconnecting them or removing them from the car, and are especially recommended for use as a quick and ready means of connecting storage batteries for charging. To charge batteries in series, provide a number of pieces of flexible cord or cable of suitable size and length and equip clips at each end, using these jumpers to connect the batteries by snapping the clips over the lugs.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A HEAVY budget of advances in hardware prices has been made this week and many commodities have been affected. Especially does this apply to lines having iron or steel as their basic material. Little relief has been shown in the wire nail situation and an advance of 35 cents over the base price has been made.

Other important lines that have higher prices are: Sheets and plates, brass escutcheon pins, weather strip, molasses gates, self-wringing mops, alarm tills, machinists' hammers, shoe lasts, chair seats, horse and wool cards, step ladders, sporting goods, prepared wax, window shades, heel chains, cast washers, roofing caps, pipe fittings, foot valves, rolling pins, injectors and ejectors, grease cups, stocks and dies, automobile wrenches, screw drivers, post drills, pipe cutters, cabinet clamps, D tops and fork handles, sash weights, bread knives and pipe fittings. Shaft splices, watches, sheep dip, boat spikes, hand saws and churns also have higher revised prices.

The tie-up of freight transportation on the United States railroads has aggravated the shortage of many commodities coming from this source. Especially is this true of shipments of coal and raw material consigned to factories, etc.

Jobbers state the present demand is a heavy one and that they are having great difficulty in securing sufficient supplies.

Collections are very satisfactory and present indications point to a brisk turnover for the balance of the spring season.

MONTREAL MARKETS

MONTREAL, May 6—Even more numerous this week are the changes on various hardware lines, the revisions being nearly always of an upward nature. Those goods made of steel are naturally in the majority. Steel curry combs, for instance, are entirely revised and new prices will be found elsewhere. Prepared wax is 10 per cent. higher. Window shades are up. Heel chains, cast washers and roofing caps are now on a new high price basis. Pipe fitting discounts are revised upward. Foot valves are marked on a new high basis, while rolling pins and wood butter moulds are all higher. Lubricators, ejectors and injectors, grease cups, cheap lock sets, etc., are revised upward. One line of stocks and dies are marked higher. Forges, blowers and automobile wrenches are being changed for a higher price basis. Automobile wrenches are higher, as are also certain types of screwdrivers. Post drills, pipe cutters and common cabinet clamps are all marked higher. Shoe lasts, veneered chair seats, horse and wool cards, step ladders, decoy ducks, sporting goods, have joined the procession in the trend upward. Fibrewares are selling on a new high list. Coal oil and gasoline are firm and may go up. Solder is down one cent and old materials are sagging somewhat. London cables state that tin has slumped twenty pounds, but spot prices here are firm.

Advance is Made For Various Curry Combs

Montreal.

CURRY COMBS.—Higher prices are effective for curry combs of various styles, and the list is subject to a discount of 30 per cent. Net prices are available on a number of lines. Number 48 is selling at $3.25 per doz., net; 98, $2.38; 100, $3.36; 101, $1.65; 102, $1.93; 111, $1.85; 121, $1.96; 147, $2.80; 270, $2.90; and 127, $3.80.

Window Shade Prices Are Revised Upward

Montreal.

WINDOW SHADES.—Prices on various shades are now higher, existing quotations on some numbers being as follows: Plain, Dominion, 3x6 feet, doz., $12.70; 3x7, $14.80; lace, same sizes, $16.90 and $19; with insertion, $17.25 and $19.35; with lace and insertion, $21.40 and $23.50. Corresponding prices for Regal line, in the same sizes and styles are, per doz., $17.60, $20.05, $21.75, $24.30, $22.10, $24.65, $26.75, and $27.60.

Prepared Wax is Costing More Money

Montreal.

PREPARED WAX.—Higher prices are being asked for Old English floor wax. While net prices are not to hand, the advance approximates ten per cent.

Heel Chains Are Revised Upward

Montreal.

HEEL CHAINS.—Higher prices are effective for heel chains, No. 85x5-16, with 4 links, selling at, per doz., $3.50; No. 90x5-16x5, $3.75; and No. 150x5-16x 5, $1.80.

Cast Washers Up; Roofing Caps Higher

Montreal.

WASHERS AND CAPS. — Higher prices are effective for cast washers, these selling at ten cents a pound.

Roofing caps, also, are marked up, the present price of these to the trade being 11½c per lb.

Advances Are Made For Rolling Pins

Montreal.

ROLLING PINS.—Increased prices are effective for wood rolling pins. The plain handle type are selling at $3 per doz., and those with enamelled handle $3.50.

"Save the surface and you save all" *Paint & Varnish*

The Paint For The Purpose Will SAVE THE SURFACE

The educational effect of the "Save The Surface" campaign is creating in every community a truer appreciation of the value of paint and varnish as surface-protecting mediums.

The increased demand resulting from this publicity will mean much to the paint dealer particularly if the stock he carries has the quality that will truly save the surface.

Sherwin-Williams Paints and Varnishes have this quality to a marked degree. They are the ideal surface savers. And the paint buying public know the "Cover the Earth" trade-mark to be an assurance of a quality product that will protect and beautify.

Sherwin-Williams dealers are right in line for a good, big share of this new paint demand. For in addition to the "Save the Surface Campaign" they have back of their selling efforts the greatest selling force of all—the confidence of the public in the quality of the goods.

If you are not now selling these products, and would like to learn about the exclusive S-W Agency proposition, write us to-day for full particulars.

SHERWIN

Co. of Canada

PAINT, VARNISH AND COLOR

FACTORIES : MONTREAL, TORONTO,

Offices and Warehouses: Montreal, Toronto, Winnipeg,

"Save the surface and you save all" *Paint & Varnish*

The Paint For The Purpose Will SAVE THE SURFACE

Whatever surface it is that requires protection, the safest plan is to use the right quality product for that purpose.

It is true economy to use a paint or varnish of known merit, and property owners everywhere have learned by experience that Sherwin-Williams products are thoroughly dependable. All over the world they are recognized as standard—the high quality never varies—They are truly the safe choice.

The volume of paint sales is greater to-day than ever before. People are following the doctrine of "Save the Surface" and Sherwin-Williams dealers are naturally getting the greater share of this business. The quality of the line is so well known that the S-W dealer is selected in preference to all others by paint buyers.

A postcard will bring you full particulars of our agency proposition.

WILLIAMS *Limited*

MAKERS: LINSEED OIL CRUSHERS

WINNIPEG, LONDON, ENG.

Calgary, Vancouver, Halifax, N.S., London, Eng.

An Advance Made For All Foot Valves

Montreal.

FOOT VALVES.—An advanced price basis is effective for foot valves, both black and galvanized. Prices are as follows on the regular sizes: 1¼ in., black, 65c; galv'd, 90c; 1½ in., 80c and $1.20, and 2 in., $1.10 and $1.75.

Butter Moulds Go To Higher Basis

Montreal.

BUTTER MOULDS.—Prices are revised on butter moulds, and very probably other butter wood tools will follow. The present price on one pound size is $2.75 per dozen.

Lubricators and Grease Cups Are Advanced

Montreal.

LUBRICATORS, GREASE CUPS.—Penberthy goods are marked higher, and while the increase and revision applies to the various lines, only a few net prices are available. Lubricators of this make are selling now as follows: Half pint Polar, each, $10.45; 1 pint, $12.65; grease cups, 950-953, discount 33 1-3 per cent.; 954, 25 per cent.; oil cups, 300-303, plus 5 per cent.; 304-305, 5 per cent. off; injectors, 50 per cent. off; ejectors, XL 96, 55 per cent.; air cocks, tee and lever handle, 10 per cent. off.

Cheap Lock Sets Again Marked Up

Montreal.

LOCK SETS.—Higher prices are again effective for lock sets of the cheap or ordinary variety. The one-piece style is now selling at $11.40 per doz., and the two-piece at $10.20. They are said, by the jobbing trade, to be particularly scarce.

Stocks and Dies Being Quoted Higher

Montreal.

STOCKS AND DIES.—Prices are revised on Oster line of stocks and dies. On the list prices applying to these lines it is now necessary to add 35 per cent. to obtain the correct trade prices.

Automobile Wrenches Follow With Advance

Montreal.

WRENCHES.—Advanced prices are effective for automobile wrenches. This increase applies to Walden Worcester wrenches and the advance approximates 10 per cent.

Forges and Blowers Have New High Prices

Montreal.

FORGES AND BLOWERS.—Prices are higher this week on various blowers and forges. No. 73 are quoted at $44 each; No. 76, $36.50; 83, $40; 85, $24; 100, $14.20; 101, $16; 150, $12.25; and 151, $13.50.

Combined blowers and forges are selling as follows: No. 42, each, $36; No. 45, $27.

Post Drill Prices Show Varied Advances

Montreal.

POST DRILLS.—A number of advanced prices are available on post drills, and net prices on some of the popular makes are: No. 92, each, $9.50; 93, $19; 96, $26; and $98, $15.

Pipe Cutter Prices Register an Advance

Montreal.

PIPE CUTTERS.—Higher prices are applicable to Trimont pipe cutters. Number one are selling at $3.75 each; No. 2 at $5; and No. 3 at $8.25.

Beltings Very High; May Advance Again

Montreal.

BELTINGS.—Prices are very firm on belting. HARDWARE AND METAL is informed that advances on both leather and rubber beltings are not improbable, and these may be effected at an early date.

Common Clamps Are on Higher Basis

Montreal.

CLAMPS.—Advanced prices are in effect on common cabinet clamps. No. 3 are selling at $8.60 per doz.; 4, $12; 5, $15; 6, $19.50; 8, $33; 10, $39; and 12, $50.

Shoe Last Prices Are Marked Higher

Montreal.

SHOE LASTS.—Three-leg shoe lasts are higher. The new prices being charged the trade are $7.20 per dozen.

More Money Asked For Veneer Chair Seats

Montreal.

CHAIR SEATS.—Prices are revised to higher levels on birch veneered chair seats. The present net prices, per dozen, are: 13 in., $1.70; 14 in., $1.80; 15 in., $2.10; and 16 in., $2.30.

Horse and Wool Cards Are Higher

Montreal.

WOOL, HORSE CARDS.—Prices on wool and horse cards are up. No. 5 wool cards are selling at $22.50 per doz., and No. 813 at $21.50. Horse cards. No. 04, are priced at $5 per doz., and No. 4 at $6.25.

Screw Driver Prices Show Quite an Advance

Montreal.

SCREW DRIVERS.—Higher quotations are made on Perfect Handle screw drivers, the jobbers selling these as follows: No. 3, per doz., $5; 4, $5.40; 5, $6.25; 6, $7.50; 8, $10; 10, $12.50.

Machinist type, 4½ in., are $15 per doz.

Advance is Imminent For Step Ladders

Montreal.

STEP LADDERS.—Prices are very firm on step ladders, and jobbers expect to be quoting higher prices immediately. The prices are expected to run from 30 to 35c per foot.

New Safety Razors Are Available

Montreal.

SAFETY RAZORS.—Prices are now being quoted by the jobbing trade on new lines of Auto Strop safety razors. No. 350 is quoted at $5.50 each; 351, $5.50; and 400, $6. The usual 25 per cent. trade discount applies.

Increases Are Made For Decoy Ducks

Montreal.

DECOYS. — Jobbing prices to the trade on decoy ducks are marked higher. Glass Eye are now quoted at $15 per doz.; Tack Eye, $14.50, and Painted Eye, $14.

Revised List and Price on Various Sporting Goods

Montreal.

SPORTING GOODS.—Reach line of sporting goods, including balls, bats, gloves, etc., are subject to a new list and discounts. HARDWARE AND METAL understands that these prices and discounts record advances for the various lines shown.

New List Issued on Fibre Wares

Montreal.

FIBREWARE. — Manufacturers of these goods have issued to the jobbing trade a new list on these goods, including pails and tubs. The prices represent an advance over those obtaining prior to the issuance of this list of ten per cent.

Great Nail Scarcity; Wire Goods Moving

Montreal.

NAILS AND WIRE.—Prices on nails hold steadily firm. The greatest anxiety to the trade at this time is that of delivery. On every side there are complaints regarding short stocks, and it would seem that there will be, throughout the summer, great difficulty in obtaining requisite supplies, particularly of the popular sizes used in rough building. There has been no change of price, standard wire nails being still based at $5.85 per keg, and cut at $6.35.

WIRE.—Fencing of staple character

is going out to the trade freely, and any special fencing that is desired is hard to obtain. There is a seasonably active selling all around. Smooth steel wire is based still at the unchanged price of $5.75.

Steady Cordage Sales With Fibres Firm

Montreal.

ROPE AND CORDAGE.—Prices are steadily held on hard fibres, and the undertone is quite firm. Various rope, while unchanged, is naturally holding under the influences of difficult deliveries, and acute labor situation in various points. Pure manila basis is still 35½c; British, Beaver and New Zealand at 28c, and sisal at 22½c. Owing to the return of navigation there is quite an active volume of business.

Better Arrivals Now of Old Scrap Material

Montreal.

OLD MATERIAL.—Prices are sagging somewhat under the influence of heavier arrivals from the country dealer. The list is quotably unchanged, but some expect that there will shortly be revisions downward on a number of lines. Old scrap iron, in particular, is likely to be reduced in price. There is a fair movement, in a general way.

Dealers' Buying Prices—

Coal Oil and Gasoline Meeting With Big Sale

Montreal.

OIL, GASOLINE. — Refiners state, at the present time, business is very decidedly active, and it is just a bit difficult to promptly fill orders. Both coal oil and gasoline are firm, though unchanged, oil selling at 27 to 30c per gallon, and motor grade gasoline at 38c. Both may, ere long, be advanced in price. Fuel oil is firm.

Solder Prices 1c Less; Lead Products Held

Montreal.

LEAD PRODUCTS.—A reduction of one cent a pound on bar solders has been effected, and this is the only actual change in the list this week. Lead traps and bends, pipe and sheet lead are unchanged and are enjoying a fair sale. Plenty of pig lead is due to arrive in the near future, and this may have the effect of somewhat reducing quotations:

Lead pipe, per 100 lbs.	....	17 50
Lead waste, per 100 lbs.	....	18 50
Note.—Lead pipe is subject to a discount of 10%.		
Lead traps and bends		List plus 30%

Do., broken lots	....	0 18

Stoves For Summer Are Present Sellers

Montreal.

STOVES AND WARES.—While at present there is not a great deal of sale for stoves and ranges of the regulation coal and wood type, the movement of summer oil stoves is active. Prices on these lines are firm, with manufacturers stating that there has been quite a little difficulty in obtaining necessary raw material, particularly raw steel for the bodies and backs of these stoves.

The ware list is steadily firm. Discounts, however, remain unchanged.

Iron Bars Are Active; Some Sales of Steel

Montreal.

IRON AND STEEL.—Prices on these lines have, naturally, been ruling firm. The basis is unchanged, however, and jobbers report a fairly brisk sale for iron bars. There have been, also, some brisk enquiries for steel bars.

IRON AND STEEL

Iron finish machinery steel		$4 95
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		4 90
Tire steel		5 10
Toe calk steel, per 100 lbs.		5 80
Band steel		5 80
Harrow tooth steel		5 05
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 55
Refined iron, per 100 lbs.		5 55
Mild steel		4 90

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Few Sheets Available Either Black or Galv'd

Montreal.

SHEETS AND PLATES. — Even those who have had some meagre supplies of sheets right along are now reporting that stock is practically exhausted. The price basis, under existing conditions, is naturally nominal. When sheets will arrive from abroad is doubtful. The market is very uncertain, and jobbers find it easy to sell supplies if they are able to get them.

BLACK SHEETS—		
10 gauge	....	9 00
12 gauge	....	9 05

18 and 20 gauge	....	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Ingot List Quiet; London Tin Down £20

Montreal.

INGOT METALS.—While there has been a quietness surrounding nearly all the metals, some activity has been noticeable occasionally in one or two lines, but there is much room for improvement all around. Tin has had a decline in London.

COPPER.—Very difficult to procure from the States, owing to railway embargoes. Prices are somewhat firmer in the local market, electro being quoted at 25c, and casting at 24c.

TIN.—While in London there was a twenty-pound drop this week, the local market has reflected no change, owing to the fact that there is a present shortage of supplies. As a consequence of this shortage, there is really a firmer market on spot tin, prices being 73c, with 70c quoted on import tin.

ANTIMONY.—Still quiet and unchanged at 13½c for English, and 13c for Chinese.

ALUMINUM.—Some report this to be scarce still. The price remains unchanged at 35c-40c according to quantity.

SPELTER.—A bit easier this week, with quotations 11-11½c per lb.

LEAD.—From stock, a price of 10¾c is being quoted, while, for import, 10¼c is being named.

TORONTO MARKETS

TORONTO, May 6—Higher prices have again been made on some lines of hardware and the tendency is still upward. Transportation difficulties have not as yet been overcome and jobbers state they have considerable difficulty in securing sufficient supplies to meet the heavy demand which is gradually increasing.

Wire nails are the feature of this market, having been marked up 35 cents over former base prices. The steel mills have finally declared their policy for the second quarter of the present year and the new schedule of prices is higher. Sheets and plates have been advanced 25 cents per cwt. as a result.

Other lines that have been advanced in price are sash weights, brass escutcheon pins, weather strip, molasses gates, self-wringing mops, Tucker alarm tills and machinists' hammers.

Prices on many hardware lines are very firm and in the opinion of many the peak has not yet been reached. Business is very brisk and a heavy turnover is expected by nearly all in the trade for the balance of the spring season. Collections are still coming in very satisfactorily.

Lawn Mower Stocks Low; Demand Heavy

Toronto.

LAWN MOWERS.—Jobbers state the demand has been heavy for this line and that they are finding difficulty in supplying the present demand, and it is believed that the stocks generally are very light. It seems to be the general opinion that merchants have put in fairly heavy stocks this year and are looking forward to heavy business. The present price is very firm although the quotations are unchanged and are as per current quotation pages.

Solid Sash Weights Advanced to $3.40 Cwt.

Toronto.

SASH WEIGHTS.—New and higher prices have been made on sash weights. Some account for this for the fact that the common iron formerly put in this product has practically been used up and manufacturers are forced to put in an iron of better quality. The new quotation is $3.40 per hundred pounds. The sectional continues to sell at an unchanged price, the quotation still being $5.00 per hundred pounds.

New Price Has Been Made on Brass Escutcheon Pins

Toronto

BRASS ESCUTCHEON PINS.—Higher prices have again been made on brass escutcheon pins and the new price is now quoted at 5 per cent. advance to the list prices.

Frost King Weather Strip Has New Price $5.25 Doz.

Toronto.

WEATHER STRIP of the Frost King brand has had an upward revision of price, and the new price is quoted at $5.25 per dozen net.

Prices on Molasses Gates Have Advanced 5 to 10%

Toronto.

MOLASSES GATES.—In harmony with kindred lines whose basic material is iron or steel, molasses gates of the Scoville pattern have been advanced in price. Although the prices vary the new advance will approximate from 5 to 10 per cent.

Self-wringing Mops Now Quoted at $6 Doz.

Toronto.

MOPS.—New and higher prices have been made on mops of the self-wringing variety, and the new price is now being quoted at $6.00 per dozen net.

Tucker Alarm Tills Have New Higher Quotations

Toronto

ALARM TILLS of the Tucker make have been marked up to higher levels. Number 502 is now being quoted at $5.75 each, while the number 503 is quoted at $5.50 each.

Heller Bros.' Machinist Hammers Are Higher

Toronto

MACHINISTS' HAMMERS.—Higher prices have been made on the line of hammers manufactured by Heller Bros. Owing to the great number of prices it would be impossible to give all the new prices here. The advance is said to be between five and ten per cent. over former prices.

Silver Flatware May Have Sharp Advance

Toronto.

SILVER FLATWARE.—The present situation on this line is very unsettled and many are wondering what the next few weeks will show in the way of price changes, as it is understood that some firms have withdrawn their prices and that new and higher prices are pending, in fact some are of the opinion that the new prices will show quite a sharp advance.

Copper Wares Have New Higher Quotations

Toronto.

COPPER WARE.—An advance of approximately 10 per cent. has been put through on some lines of copper ware and copper tea and coffee pots, also copper tea kettles will now cost more. This price is said to be a very firm one, and stocks are generally considered to be very light. The new quotation is list plus 50 per cent. in place of a former price of plus 40 per cent.

Increasing Scarcity of Canada Plates

Toronto.

CANADA PLATES.—Manufacturers and jobbers state that there is an increasing scarcity of Canada plates and they have great difficulty in getting any one to accept an order for either present or future delivery. This, they believe, is on account of the extremely heavy demand for tonnages of the heavier plates. They also state that formerly this market depended considerably on English iron, but since war activities many have been importing from other sources, which are now unable to supply the demand in sufficient quantities.

NEW SCALE-STAMPING CHARGES

The Department of Weights and Measures at Ottawa have issued a new classification rate for stamping scales of various kinds. The new rates are an advance over previous charges and the following list shows those applying to the better known lines handled by the hardware trade:

10 pounds and under	25c
11 to 30 pounds	50c
31 to 250 pounds	75c
251 to 1,000 pounds	$1.00
1,001 to 2,000 pounds	$1.50
2,001 to 4,000 pounds	$2.00
4,001 to 6,000 pounds	$2.50
6,001 to 10,000 pounds	$3.00

Eavestrough Has Good Demand; Price Firm

Toronto.

EAVESTROUGHS.—The season's demand is started in full swing regardless of the cool weather which has prevailed and all in the trade are looking for a good year's turnover.

Manufacturers are beginning to concern themselves for the future manufacture of this commodity as they state their supplies of sheets are rather low and the possibilities of getting more in

the near future are not very good. However, the present price continues to hold unchanged although the quotations are very firm.

Long Terne Plates May Not Arrive

Toronto

LONG TERNE PLATES are daily increasing to be very scarce and many are wondering whether they will be able to secure any more of these plates for the balance of this year. This situation is said to be due to conditions at the mills. Some have it that the labor and the manufacture of this commodity is very disagreeable, and with so many other jobs offering the mills find great difficulty in securing labor to keep their plants running. There is also said to be the fact that the demand has greatly increased. Most of this is attributed to the manufacture of automobiles and other kindred commodities.

Many Kinds Wire Scarce; May Withdraw Prices

Toronto.

WIRE.—The difficulty of securing wire of nearly all kinds is becoming more pronounced and there are rumors that all quotations on wire of nearly every kind will be withdrawn in view of the fact that stocks are so depleted. Although the wire situation has been very unsatisfactory for some time back, it is believed that the tie-up of all the freight on the American railroads has seriously aggravated the situation. Especially is this true of the shipments of coal to the mills, and many are of the opinion that this disruption is just now begining to be felt.

Mills Open Books For Second Quarter; Prices Up

Toronto.

SHEETS AND PLATES.—The mills have finally declared their policy for the second quarter of the present year and again threw open their books for this period business. The quotations, however, are at a higher figure than those of the first quarter, and local jobbers have advanced their prices accordingly.

The new price on black and galvanized sheets is approximately 25 cents per hundred pounds higher than formerly, and is held very firmly. Jobbers state their stocks are practically exhausted and do not see any immediate relief in sight, although the period of a heavy buying season is at hand and the demand is unusually heavy, it is stated. One jobber stated to HARDWARE AND METAL that it was his opinion that if the embargo was lifted off freight on U. S. A. railways that sheets would not immediately come forward as they have been held back and tied up to such an extent in their manufacture at the mills. However, it may be that a short time will see the situation straightened out to a more satisfactory basis.

The following quotations are merely nominal owing to the great scarcity of stocks; it is believed that very few, if any, have a complete list of sizes in stock:

BLACK SHEETS—

14 gauge	....	$8 95
16 gauge	....	9 05
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
29 gauge	....	9 75
3-16 inch plate	....	....
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—

	Premier		Apollo	
10¾ oz.	$12 00	$11 50	$12 00	$12 25
U.S. 28	11 45	11 70	11 45	11 85
U.S. 26	11 15	11 40	11 15	11 55
22 and 24	11 00	11 25	11 00	11 40
16	10 70	10 95	10 70	11 10
16	10 70	10 95	10 70	11 10
12 and 14	10 55	10 20	10 55	10 95

WIRE NAILS ADVANCE TO $6.10 BASE

Wire Nails—As intimated in these columns from time to time the price on wire nails has finally broken, and local quotations have now been revised up to $6.10 per keg base in place of a former $5.75 per keg. Jobbers state the difficulty of securing wire nails is daily increasing and the demand continues to be a very heavy one, which is gradually depleting stocks.

Merchants generally seem to be looking for heavy building activities and it may be that they have stocked fairly heavy, although the general opinion is that few have bought much ahead of their season's requirements.

If some relief is not soon offered jobbers state the situation will prove serious, and it is believed that some manufacturers are out of the market for some time to come and have no nails to offer and have therefore withdrawn their price.

Fencing Wires of many kinds are also in a very unsettled condition and the difficulty in securing wire of nearly all kinds is becoming more pronounced, and there are rumors that quotations on wire of nearly all kinds will be withdrawn in view of the fact that stocks are about depleted and in some cases manufacturers having no wire to sell.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Old Iron and Steel Firm; Other Materials Quiet

Toronto.

SCRAP AND WASTE MATERIALS. —Dealers state they are at a loss to understand the present weak nature of the scrap and waste material markets, and state that outside of iron and steel nearly all materials show a downward tendency. Iron and steel are very firm, however, and some grades are at a premium. Some account for this situation for the fact that many mills were forced to close down on account of the freight embargo and general tie-up of the American railroads on account of not securing sufficient coal, raw material, and other commodities, and incidentally they believe this has hindered the demand for the scrap and waste materials; however this may be of a temporary nature and many are expecting a brisk business in the not distant future. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	....	13 00
Stove plate, per ton	....	32 00
Yellow brass	....	0 10
Red brass	....	0 15¾

Overseas, lumbermen's rubber boots	..	0 04
Bicycle tires	....	0 01½
Automobile tires	....	0 03
Heavy lead pipe	....	0 05¾
Tea lead	....	0 11

Boiler Tube Stocks Fair; Price Remains Unchanged

Toronto.

BOILER TUBES.—Although it is the in-between season for boiler tubes, the present demand is said to be a very heavy one, and jobbers state the prospects for the new business which will soon be in season are very bright. They also state they are well caught up with their orders, and notwithstanding the embargo which has been put on the United States railroads, have been able to secure fair supplies of boiler tubes. A lot of jobbers are anticipating that as the year advances that boiler tubes may become very scarce; this they say is due to the skelp situation, which is much upset by the present demand and shortage of raw material. Manufacturers of skelp are also affected by the tie-up of the railroads and are affected by shortages of coal, raw material, and other commodities, in fact this is true of nearly all manufactures. The following are the present quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	30 00	.....
1½ inch	31 50	.....
1¾ inch	33 00	30 00
2 inch	32 00	29 00
2¼ inch	37 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	49 00
3½ inch	70 00	39 00
4 inch	96 00	63 00

Corrugated Sheet Prices Unchanged; May Go Up

Toronto.

CORRUGATED SHEETS.—Little improvement is noted in the corrugated sheets situation and manufacturers state their difficulty in supplying the demand is magnified if anything; they also state that the embargo in the American railroads is causing the tie-up of freights and is having a serious effect on their deliveries and state that while they have been getting some shipments through

that the demand is so heavy and the shipments are so small that it practically does not help the situation at all. It may be that higher prices will be made in the near future as the mills have announced their policy for the second quarter and have also made new quotations which are considerably advanced over the former ones during the first quarter. The following are the present quotations on corrugated sheets:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	9 25	7 75
No. 26 gauge	10 00	8 75
No. 24 gauge	15 00	11 00
No. 22 gauge	17 50	13 75
No. 20 gauge	21 00	17 50
No. 18 gauge	26 50	21 50

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

An additional charge of 10% of the list price is added to cover exchange.

Discount, 7½%.

Iron and Steel Bar Prices Firm; Unchanged

Toronto.

IRON AND STEEL BARS, regardless of the freight embargo which has had a serious effect of tying up production at the mills, jobbers state they have fair stocks of bars of iron and steel of the common kinds, and no change in price has been made. Production is still being held back by the embargo on the railroads as the mills state they cannot get sufficient coal, and in some cases raw material and other commodities that are necessary. The present quotations are firm and are quoted as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Comman bar iron, 3-16 in. and heavier	6 00
Comman bar iron, ¼ in. and heavier	5 50
Tngle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....

Lead Pipe and Waste in Good Demand

Toronto.

LEAD AND ZINC PRODUCTS.—With the opening up of the spring season the demand for lead pipe and lead waste pipe, etc., has been of a heavy nature. Solder also has been moving briskly and is quoted from a very firm basis. Manufacturers state that pig lead is now coming in better quantities, and although the demand for products of nearly all kinds is of a heavy nature, that they are able to take care of any business offered. The following quotations are being quoted at present.

Lead pipe, list, per lb.	0 17½
Lead waste pipe, list, per lb.	0 18½
Do., over 8 inches, list, per lb.	0 19½
Above subject to discount of 10%.

Zinc sheets, per lb.	0 19
Solder, guaranteed, lb.	0 43¾
Solder, wiping, lb.	0 37¼

Tin Shows Weakness; Lead Improved; All Quiet

Toronto.

INGOT METALS.—Little change in price has been noted this week on prices quoted last week on ingot metals. Lead has improved some although stocks are light; spelter shows a fair demand, while aluminum and copper are very quiet. Tin shows some decline in the primary markets but is offset by the exchange.

LEAD.—Some improvement has been shown although the present quotation shows no change; stocks are very light and prices are being quoted at 11½ cents per pound.

SPELTER.—A fair demand has been noted for spelter but the quotations remain unchanged, 12 cents a pound being the present price.

ALUMINUM. — Little demand is shown for aluminum and prices remain unchanged, the present quotations being from 36 to 37 cents per pound.

COPPER.—The present price of copper shows little change, the demand being rather light, the quotations still remaining at 24 cents per pound.

ANTIMONY is very quiet, the market conditions on this metal are practically unchanged, and the stocks are considered rather light. The selling price continues to be quoted around 15 cents per pound.

TIN shows some decline in primary markets although this is offset by the exchange rate, and this week's quotation remains at 74 cents per pound.

LONDON MARKETS

LONDON, May 6—The peak does not seem to have as yet been reached and higher prices on many hardware commodities have again been made. Pipe fitting prices have been marked up. Also some lines of builders' hardware, including inside lock sets of the cheap variety.

Other hardware lines to have new prices are: Shaft splices, D tops and fork handles, sheep dip, files, cow chains, sash weights, bread knives and Ingersoll watches.

The wire nail situation has shown little improvement and higher prices are predicted. Wire of many kinds is becoming very scarce and many are concerned for the future.

The United States transportation embargo is causing many delayed shipments and jobbers state that warehouse stocks are getting low.

Business is increasing in volume each day. Warmer weather starts good sale again for paints, varnishes, roofings, builders' hardware and housecleaning accessories. Prices are very firm and collections continue to come forward freely.

Advance Shaft Splices to New Price of $5.15 Doz.

London, Ont.

SHAFT SPLICES.—In line with other commodities manufactured from iron, steel or wood the prices on shaft splices have been revised upwards, and the plain are now being quoted at $5.15 per dozen.

D. Tops and Fork Handles Have New Higher Prices

London, Ont.

D TOP FORK HANDLES.—In line with recent advances in wood handles, D. tops and D top fork handles complete have been revised upwards. This is said to be due to the wood situation and is also affected by the situation of the iron and steel. Manufacturers state they have great difficulty in securing the materials even at the higher prices asked as the majority it is believed have very little to sell.

D TOP MANURE FORK HANDLES—
New price, $9.80. D Tops, only for manure for handlesfork handles, $4.55. D top handles for ensilage and beet forks, complete with strap ferrule, $14.

Zenoleum Sheep Dip Has Further Advance

London, Ont.

ZENOLEUM SHEEP DIP.—New and higher prices have again been made on zenoleum sheep dip and disinfectant and the new prices are quoted as follows:

35 cent farm size, $3 dozen; 75 cent small size, $6 dozen; $1.25 medium size, $11 dozen; $2 large size, $16.50 dozen; 35 cent lice powder, $3 dozen.

Black Diamond Jibs Have Further Adjustment

London, Ont.

FILES.—A new price has been made on the black diamond file, this time more in the line of a revision, it will be noted that an advance on this line was quoted in last week's issue and gives a new discount of 25 per cent. This has now been revised again and the new quotation is now 27½ per cent. off the list.

STAMPING SCALES.—The old rates for stamping scales have been dropped and a new schedule of prices have been made to apply on the various kinds of scales through a new classification issued by the department of works and meas-

ures at Ottawa. Stamping charges from 10 pounds and under are 25c, 11 to 30 pounds 50c, 31 to 250 are 7$c, 251 to 10000 $1.00, 1001 to 2000 pounds are $1.50 and 2000 to 4000 pounds are $2.00.

Peterboro Lock Sets Have Higher Revision

London, Ont.

LOCK SETS of the Peterborough make have been advanced to higher prices. This is said to be due to the situation which has developed in nearly all metals, as well as the higher cost of manufacture, although this line has various prices, the new price of net list will apply to the most general lines.

Inside Mortise Sets of Cheap Variety $10 Doz.

London, Ont.

INSIDE MORTISE SETS, of the cheap variety, have been revised upwards and now cost more. The scarcity of metals of nearly all kinds as well as the advancing cost is said to be mainly due for this lates advance. The old copper and dull brass finish are now being quoted a $1.00 a dozen.

Cow Chains Now Quoted Additional 25% to List

London, Ont.

COW CHAINS.—The price on cow chains have again been advanced and the new quotation is now an additional 25 per cent. on the list in place of a former 15 per cent.

Sash Weight Prices Have Been Advanced

London, Ont.

SASH WEIGHTS.—New and higher prices have been made on sash weights for sectional and solid. Some have it that this is owing to the fact that manufacturers are forced to use a better grade of iron than formerly as it is believed the majority of manufacturers find that the old iron is very scarce. The solid weights are now quoted at $4.50 per hundred pounds for 3 pounds and heavier, while the sectional is quoted at $5.00 per hundred pounds for 1 pound weight and $5.50 per hundred pounds for 1-2 pound weights.

Lightning Bread Knives Advanced to $4.50 Doz.

London, Ont.

BREAD KNIVES.—Are also among the lis of advances this week and the lightning brand are now quoted at $4.50 per dozen.

Pipe Fitting Prices Have Been Advanced

London, Ont.

PIPE FITTINGS.—In view of the higher cost of material, labor, also the shortage and difficulty in procuring raw material, prices on pipe fitings have been advanced. It is also stated that there are many other factors in the case and that the present price is very firm. Some of the new quotations are class C. black 20c per pound, galvanized 30c per pound; class B. black, 30c per pound, galvanized 40c per pound. Plugs have also been revised upwards and are 7½ per cent. off the list while bushings are quoted at 10 per cent. off the list and union 30 per cent. off the list.

Wire Nail Firm; Situation Unsettled

London, Ont.

NAILS.—The present nail situation is very uncertain and many of the better informed are concerned for the future. The demand for nails, in fact wire products of all kinds, have been exceptionally heavy this year and heavy inquiries have also been received for export, it is stated.

It may be that the recent tie-up of the American railroad causing coal shortage and other inconvenience to the manufacturer has had considerable bearing on the situation. However, stocks generally are reported very light with a heavy demand showing which shows signs of increasing with the warmer weather. The prices on wire nails continue to sell at $5.75 base, while the cut nails are still quoted at $7.50 base.

As HARDWARE AND METAL goes to press it is learned that an advance has been made on the price of Smart's Crescent model wrenches, which is 10 per cent. over former quotations.

Prices now in effect to the trade are: 6 inch, per dozen, $8.60; 8 inch, $10.55; 10 inch, $13.20.

Ingersoll Watches Have New Higher Quotations

London, Ont.

INGERSOLL WATCHES.—New and higher prices have been made on this line and it is believed that the new prices are mainly due to the advanced cost of labor although there are other factors in the case. A list of some of the new prices is as follows:

	Jobbers' Price	Retail Price
Maple Leaf	$2 15 each	$3 25 each

Reliance Screw Case	6 20 "	9 25 "

Poultry Netting Prices Firm; Low Stocks

London, Ont.

POULTRY NETTING.—Like many kindred lines the demand on wire for manufacture is very heavy. Poultry netting is gradually becoming very scarce, and jobbers and merchants are experiencing increasing difficulty in securing sufficient supplies. The season demand is said to be a very heavy one and those who have fair stocks to sell are doing an active rade. The one inch mesh is particularly hard to procure, although the two inch mesh is also scarce. The present quotation on Canadian 2 inch mesh is net list and on 1 inch mesh and 5 per cent. to list.

Rope Prices Remain Unchanged; Sales Brisk

London, Ont.

ROPE.—With the opening of the warmer weather, increased navigation, and other seasonable events, rope has shown considerable activity and a good volume is moving. The quotations are unchanged although the present quotations are firm and are quoted as follows:

Pure Manila	35½ cents base
Beaver Manila	28 "
New Zealand Hemp	28 "
Sisal	22½ "

Prices on Gem Casters Have Been Marked Up

London, Ont.

GEM CASTERS.—In line with other commodities manufactured of wood or metal, higher prices have been made on gem casters. The following list shows the new prices:

GEM CASTERS—Numbers 351, 352, 355 and 356, 52 cents set. Number 451, 452, 455 and 456, 60 cents set. Numbers 651, 652, 655 and 656, 67 cents set. Numbers 751, 752, 755 and 756, 75 cents set.

Screen Wire Cloth Price Firm; in Good Demand

London, Ont.

SCREEN WIRE CLOTH.—A very satisfactory business is being handled for screen wire cloth and black in particular is showing a good movement. The present quotation although firm, remains unchanged and is quoted a $3.60 per hundred square feet.

Garden and Harvest Tools Have Very Strong Demand

London, Ont.

GARDEN AND HARVEST TOOLS.—Of nearly all kinds are becoming very seasonable and the demand is increasingly heavy. The price continues to hold very firmly although no change has been made and 50 per cent and 10 per cent. discounts are still the quotation off the new list.

Lawn Mower Prices Firm; Supplies Not Heavy

London, Ont.

LAWN MOWERS.—A heavy seasonable spring business continues to come forward for lawn mowers, and nearly all in the trade are very well satisfied with the business being offered. It is believed that this is partly accounted for by the great ——— who have purchased their own houses this year and seem to take more interest in fixing up the yards and lawns and other general appearances.

The price remains firm and the quotations are as follows:

Daisy	.25	per cent. off list
Star	.25	"
Woodyatt	.25	"
Empress	.25	"

Fencing Wire Scarce; May Withdraw Prices

London, Ont.

FENCING WIRE.—A heavy demand is noted for fencing wire and the s supplies are very limited. Jobbers state they have great difficulty in securing fresh stocks and even after the orders are accepted they are very slow coming in. The wire situation is said to be in a very uncertain condition and some have it hat in the near future quotations will be withdrawn and all prices will be on application only, and it is believed that very few will have a complete line in stock. However, the present quotations on some kinds of wire are as follows:

BARB WIRE $6.46 per 100 lbs., 2 or 4 point; number 9 galvanized wire, $5.85; O and A wire, number 11, $5.97; O and A wire, number 12, $6.05.

Fence Staples and Hooks Have Big Demand

London, Ont.

FENCE STAPLES AND HOOKS.—A heavy demand is noted for these commodities which naturally are the result of the heavy wire sales. The present quotations on staples and also hooks are as follows:

Fence Staples — Bright, kegs, $6.10 per 100 lbs.; boxes, $6.60 per 100 lbs. Galvanized, kegs, $7.10 per 100 lbs; boxes, $7.60 per 100 lbs.
Fence Hooks—Galvanized, kegs, $7.10 per 100 lbs.; galvanized, boxes, $7.60 per 100 lbs.

Hose Clamp Quotations Are Revised Upwards

London, Ont.

HOSE CLAMPS.—New and higher price schedule has been made effective on galvanized hose clamps. The higher cost of manufacture is said to be the reason for the new higher prices which are now quoted as follows:

½ inch	$ 40 dozen
⅝ inch	45 dozen
¾ inch	45 dozen
1 inch	80 dozen
1¼ inch	1 50 dozen
1½ inch	1 75 dozen

Turpentine Scarce; New Stocks Not Coming

London, Ont.

TURPENTINE.—Stocks of turpentine are reported to be very low and owing to the embargo on the United States railroads it is believed that no new turpentine is coming forward. Many are wondering just what will be the situation in the very near future as it is understood that a further embargo has been placed on shipments of freight throughout most of the United States which may have a serious effect on supplies, as it is believed that local supplies are very low. The following prices are current at present:

1 barrel lots	$3 80	imp. gal.
2 to 4 barrel lots	3 79	"
5 gal. lots	3 95	"

5 gal. jacketed cans, $1 each.

Flax Seed Not Coming Forward; Oil Scarce

London, Ont.

LINSEED OIL.—The scarcity of flax seed is still said to be a great detriment to the crushing of linseed oil and crushers, it is believed, are only working to partial capacity in view of the fact that there is no seed coming in to crush.

The last few days, however, have shewn fair shipments of linseed oil, although this is believed to be imported English oil and whether these shipments continue to come in large enough quantities to relieve the present shortage remains to be seen. The present price is firm and remains unchanged at the following quotations:

	Raw.	Boiled.
1 to 2 barrels	$2 87 gal.	$2 90
2 to 5 barrels	2 86 gal.	2 89
6 to 9 barrels	2 84 gal.	2 87

Less barrels, add 15 cents gal.; 5 gal. jacketed cans, $1 each.

Glass Scarce; Prices Remain Unchanged

London, Ont.

GLASS.—Notwithstanding the shortage of glass sorting orders are coming in very freely and fair percentage of these are being filled. Some have it that considerable glass is in transit but it is tied up owing to the United States railroad embargo. The present demand for plate glass is a very heavy one, and although jobbers and importers state that they are getting some glass from Belgium as well as other sources that the shipments are altogether too light to supply the present demand. The following prices are current on sheet glass: Single and double diamond 15 per cent. off the list, cut lights 40 per cent. off the list.

Shortage of Whiting Firms Putty Prices

London, Ont.

PUTTY.—A very good demand is noted for putty, although to some extent the season is a trifle off. The putty situation is said to have shown little improvement and manufacturers state that it is as difficult as ever to procure whiting. This traces back to the English
in turn state that it is impossible for him to supply the enormous demand which is world wide, it is stated. This can be understood when it is remembered that little whiting has been shipped since the first year of the war and now that the markets are opening up once more a great number are in the market for English whiting all at once. The following are the present quotations on putty:

	Per 100 lbs.
Standard, 100 lb. drums	$8 30
Standard, 25 lb. drums	8 55
Pure, 100 lb. drums	10 80
Pure, 25 lb. drums	11 05

Prices on White Lead in Oil Firm; Unchanged

London, Ont.

WHITE LEAD IN OIL.—Fairly good sales have been noted for white lead in oil although the recent weather has been more or less unseasonable. This, however, is expected to soon right itself and manufacturers and jobbers, and in fact nearly all the trade, are looking forward for heavy business on this commodity. The following are the present quotations:

Pure, tons, $20.45 per 100 lbs.; less tons, $20.80. Elephant brand, tons, $20.95 per 100 lbs.; less tons, $21.30.

WINNIPEG MARKETS

Revised Prices on Hand Saws Show 10% Increase

Winnipeg.

HAND SAWS. — New and higher prices affect Disston's saws, advaancing same an approximate 10 per cent. on previous lists.

A few of the latest quotations to give an approximate idea of the whole are:

Disston's Saws—No. D8 x 26 in., hand, $44.80; 26 in. rip, $44.80; 28 in., rip, $51.15; 18 in., panel, $33.60; 20 in., panel, $37; 22 in., panel, $39.80; 24 in., panel, $42.65; No. 120 x 26 in., hand, $72; 28 in., rip, $76.70; 20 in. panel, $60.55; No. 12 x 26 in., hand, $58.30; 28 in., hand, $63.45; 28 in. rip, $63.45; 20 in. panel, $46 per dozen.

Railroad and Boat Spikes Are Revised Upwards

Winnipeg.

RAILROAD AND BOAT SPIKES. — Higher prices is the showing on railroad and boat spikes, advancing these lines an approximate 10 per cent. on previous lists,

To-day's prices show:

Boat Spikes—¼ in x 4 in., $10.55; ¼ in. x 6 in., $10.20; 5-16 in. x 5 in., $9.80; 5-16 in. x 6 in., $9.80; ⅜ in. x 6 in., $9; ⅜ in. x 7 in., $9; ⅜ in. x 8 in., $9; ½ in. x 8 in., $8.75; ½ in. x 9 in., $8.75; ½ in., x 10 in., $8.75; ½ in. x 12 in., $8.75; ⅝ in. x 10 in., $8.75; ⅝ in. x 12 in., $8.75 per 100 lbs.

Railroad Spikes—5-16 in. x 2½ in., $10; ⅜ in. x 3 in., $9.35; ⅜ in, x 3½ in., $9.35; ½ in. x 4 in., $9; ½ in. x 5 in., $9.15 per 100 lbs.

Blacksmiths' Tools Also Incline to Higher Prices

Winnipeg.

BLACKSMITHS' TOOLS.—Nine-and-a-half per cent. increase appearing on blacksmiths' tools is occasioned by the latest changes occurring in the markets. The new prices affect the following lines, and are quoted at:

Blacksmiths' tools. — Hardies, 52½ cents; chisels, 52½ cents; flatters, 52½ cents; swedges, 52½ cents; fullers, 52½ cents per lb.

15% Advance Named on Wrought Iron Washers

Winnipeg.

WROUGHT IRON WASHERS. — Higher prices are again affecting iron washers and are advancing all sizes, an average of 15 per cent. on previous lists.

Paint and Varnish Brushes 16% Higher

Winnipeg.

PAINT AND VARNISH BRUSHES.—A general change occurs affecting all styles and sizes of paint and varnish brushes and advancing same an average of 16 per cent Owing to the wide range this line covers, it is impossible to tabulate all styles, etc. It can be accepted, however, the change is general, affecting paint and varnish brushes and sash tools, the whole averaging an average of 16 per cent. increase.

Formaldehyde Prices Have Been Withdrawn

Winnipeg.

FORMALDEHYDE. — Owing to the uncertainty of securing raw materials and the unsettled condition of the markets and other factors, formaldehyde prices have been withdrawn.

New High Price Made on Turpentine $3.95 Gal.

Winnipeg.

TURPENTINE.—Stocks are very light anad litile new stock is coming forward. This is said to be mainly due to the embargo on the U. S. railroads. The present price is quoted at $3.95 per gallon in barrel lots.

New Price on Extension Ladders 40c Per Foot

Winnipeg.

LADDERS.—The situation which has developed throughout on lumber and woodenware has been cause for higher prices on ladders of nearly all kinds. The new quotation on extension ladders is 40 cents per foot.

Step Ladders—Common, 3 ft., 93c; 4 ft., $1.24; 10 ft., $3.10.
Faultless—4 ft., $1.84; 5 ft., $2.30; 6 ft., $2.76; 5 ft., $1.55; 6 ft., $1.86; 7 ft., $2.17; 8 ft., $2.48; 7 ft., $3.22; 8 ft., $3.68; 10 ft., $5.20; 12 ft., $6.24; 14 ft., $7.28 each.
Mechanics—4 ft., $1.96; 5 ft., $2.45; 6 ft., $2.94; 7 ft., $3.43; 8 ft., $3.92; 10 ft., $5.40 each.

Advanced Prices Made on Daisy Churns

Winnipeg.

DAISY CHURNS.—New prices have been made on this line of churns, and needless to say are of an advanced nature. The woodenware situation does not look very bright at the present time, although it is hoped that some developments will occur to relieve the situation.

Butterfield Stocks and Dies Advance 5%

Winnipeg.

STOCKS AND DIES of the Butterfield make have been revised upwards, the advance being approximately 5 per cent. The great shortage of iron and steel, and the advancing cost of the same is the cause for continued advances in nearly all commodities where they enter as a basic material.

Sash Cord, Cotton Rope, Twine Quoted Higher

Winnipeg.

SASH CORD.—New and higher prices have been made on sash cord, and the Nos. 8, 9, and 10 are now being quoted at $1.08 per pound.

COTTON ROPE has also had higher price revisions, and the ¼ inch has been marked up to 86 cents per pound.

COTTON TWINE prices have kept in line with advances on other cotton commodities and new prices have been made on the various kinds which will approximate 5 per cent. of an advance.

Scarcity Advances Prices of Canada Plate

Winnipeg.

CANADA PLATE.—Advances have again been made on this commodity. The scarcity which has prevailed for some time back has had little relief and indications are that future supplies will be harder to procure than ever.

PITTSBURGH MARKETS

ITTSBURGH, May 6.—Blast furnaces and mills are getting along decidedly better than a week or two weeks ago, as to both production and shipments. The improvement is due not so much to striking railway workmen going back to their jobs as it is due to the employment of various expedients, particularly the movement of solid trainloads of freight, and the help of an increasing number of volunteers who are helping to break the strike.

The Youngstown district was affected the most by the rail strike, practically everything being closed for a time, but now about one-half the blast furnaces in the district are operating, and steel production is nearly if not quite one-half of normal. In the immediate Pittsburgh district production is but slightly curtailed, hardly by as much as 20 per cent. Shipments are reduced by a much larger percentage, but the steel at any rate has been made and some time it will go forward, probably to the embarrassment of some customers who will get too much at one time. East of Pittsburgh the furnaces and mills are operating fairly well, while there is no trouble in the south. In the Chicago district, including Gary, operations are at 50 per cent. or more of normal.

The trainload movement that has helped so much has been chiefly of coal and coke. Even single merchant blast furnaces have received coke by the trainload. The blast furnaces operating are not all running at capacity. One merchant furnace interest, for instance, which has ten furnaces scattered at various points is operating all ten, but with slack blast, so that the pig iron output is only about 75 per cent. of capacity. This procedure is regarded as better than banking furnaces entirely at intervals.

The worst feature of the rail strike is that nothing very definite, certainly nothing very vigorous, is being done to settle it. The wage commission at Washington, only set up after the strike started, is at work but there are no definite reports of its making progress.

Taking the iron and steel industry as a whole, operations are curtailed by the rail strike by not more than about 20 per cent., while shipments of finished steel are curtailed by a larger amount. Just before the rail strike the production of finished rolled steel in the United States was at the rate of fully 110,000 gross tons per working day, so that while it is literally true that hundreds of thousands of tons of finished steel are piled in mill warehouses and yards and are loaded on cars which either remain on mill sidings or have gone only a few miles to a convenient public siding, this does not mean such a great deal after all.

Consumption Curtailed

There is a great deal of curtailment in operation of factories that consume steel, arising from the rail strike. Of all materials, coal seems to be the greatest of the restrictive influences, but some factories lack other materials and not a few of course have run out of steel itself. It appears, however, that there were more consumers having a 30 days' supply, or thereabouts, of steel than was generally assumed. The automobile factories have long made it a rule to carry 30 to 60 days' stock of all their materials, but for several months past it has been impossible to follow the rule in all cases. Some stocks of steel, however, had evidently been built up. There have been various reports in the past week of the rate at which the automobile factories in Detroit were running, the reports bein of a 15 per cent. operation up to a 50 per cent. operation. There is much motor trucking of the finer forms of steel such as wire and strips, classes of steel the lack of which may hold up the consumption of much larger quantities of other descriptions of steel that may be in stock. Only a few pounds of strip steel, for instance, are required per automobile, and it is not remarkable that this material is being trucked in five-ton loads.

The Foundries

It is being pointed out that while the average foundry usually carries a good stock of pig iron, the foundries lately have been running into their higher-priced contracts, at above $30 or perhaps even above $35, and have been less willing to stock the higher priced iron than they were in the case of the cheaper iron. Coke has been so scarce for months that the average foundry has not been able to accumulate much stock. Thus some foundries are running out of pig iron, while others are running out of coke.

Less Than 25% of Homes Use Their Requirements in Paints and Varnish; Increased Values Should Be Insured

Planning a Campaign Week to Stir Up Enthusiasm for Floor Finishes—Strike While Housecleaning Season is On—Use Mailing Lists, Advertising, Window Displays — Offer Concrete Suggestions for Finishing Floors and Woodwork

DEALERS in all parts of the country are now active in developing trade in housecleaning lines. The spring housecleaning season is here and the housewife is susceptible to suggestions for lightening the labor and improving the appearance of the home.

Paint is an important requirement at this time for both interior and exterior use, and the dealer knows that the time to strike is when the iron is hot. The time to go after floor painting trade is when floors are being closely scrutinized in connection with housecleaning operations. Carpets are now coming up, furniture is being moved in order that every corner may be cleaned of its winter accumulation of dust and dirt.

A well-stocked paint department offers hundreds of suggestions which the housewife will be glad to have at this time for the improvement of floors. This applies to such lines as fillers, waxes, varnishes, polishing brushes, etc., for the hardwood floors. Crevice fillers, ground color, graining compounds and graining tools to assist in renewing old floors. Floor paints, varnishes, stains and floor enamels to brighten up and renew the kitchen, bath and bedroom floors. Porch and veranda paints for the outside floors and steps. There are here plenty of opportunities and plenty of materials to support a full planned floor paint week.

Select Week During Housecleaning Season

In planning such a week to stir up early spring enthusiasm for painting, the week that is best adapted to anticipate the housecleaning season is the one to decide upon. The campaign will take the form of newspaper advertising with special attention drawn to the lines of floor paint. This should commence about the end of the week prior to the campaign week and run throughout the latter period. Literature concerning the sale should be sent out to prospects, and every facility used to make the campaign known throughout the community. It is not alone enough to make an announcement. The attention and the interest of the community must be obtained in order to draw a crowd and this can only be accomplished by keeping in mind certain important factors. Something unusual will generally suffice to attract first attention, and then the big point is to hold the attention and develop interest. This can best be done by making a seasonable appeal, offering suggestions for the use of paints, varnishes, etc., as aids in beautifying the home, giving definite information concerning possible color schemes, best grades for

(Continued on page 62)

A seasonable window display of paints and varnishes such as will help to stir up enthusiasm at this time of year.

SIGN OF MERIT
BEST B M & Co MADE

MOORE'S AUTOMOBILE FINISH

is easy to apply, flows evenly and produces a smooth, tough elastic finish that wears well.

It gives THAT NEW APPEARANCE to any automobile on which it is used.

MOORE'S AUTOMOBILE FINISH is made in eight popular shades—

Brewster Green, Wine Color, Jockey Red, Auto Gray, Cobalt Blue, Vermilion, Buick Gray, Oriental Yellow.

Put up in convenient size packages and sells at a very *reasonable price.*

MOORE'S AUTO FINISH

MORELUSTRE ENAMEL

MORELUSTRE ENAMEL

Is made with weather-resisting pigments, combined with hard-drying, elastic varnish and meets the demand for a High Grade Enamel which can be used with equally good results on either EXTERIOR or INTERIOR WORK.

MORELUSTRE is especially adapted for Floors, Stairs, Wainscoting, Verandah Furniture, Canoes, etc., and any other surface requiring a durable finish.

MORELUSTRE is made in twelve beautiful shades and put in small size packages for the benefit of the consumer.

LESS THAN 25 PER CENT USE THEIR REQUIREMENT

Continued from page 60

the work required, and by offering the experience and ideas of the staff as advice in the selection of these lines.

A plentiful supply of advertising literature from the manufacturers whose lines will figure in the sale, should also be secured for distribution in the store and for enclosure in any letters being sent out. The use of demonstrators, if available, also proves a valuable drawing card as they can give expert advice on the application of the various lines in order to secure best results.

Make Best Use of Windows

Window displays of paint are too valuable a factor to overlook at any time, but their value in connection with such a campaign week as has been suggested is even greater. Possibly concentration upon some one outstanding feature of floor finishes would make a good basis for the display. Such a feature might be the wearing qualities of the line. The use of some comprehensive illustration that will indicate this fact on first glance can be used to good advantage.

In this connection there are one or two suggestions which have been used to display the wearing qualities of floor finishes. One has been to display on a show card how many thousand times boot heels beat up a floor section of flooring finished actually with the dealer's floor varnish or paint and on it places a number of worn-out boots well down at the heel. A card will indicate that the dealers' floor finishes will outwear the shoes that try to wear it cut. There are numerous other ways of effectively demonstrating the wearing qualities of the finishes.

There is little doubt that a campaign if carried out at a seasonable time and along the right lines will bring good results. Every housewife has a keen interest in the appearance of the floors of her home, and there are a great many verandas, back and front, which will need new floor covering in the spring. The increasing use of hardwood floors calls for the greater use of fillers, waxes, floor varnishes, etc.

In proceeding with the campaign week steps should be taken to post each store clerk on the location of the stock, its uses, best method of application, etc., so that some real service can be given the customer when he has been induced to visit the store. The final results of continued neglect of floors can be pointed out in a diplomatic manner, and some suggestions made along such lines as the fact that the replacement value of flooring and other woodwork has increased so rapidly that better protection is now required, just as fire insurance has been doubled owing to higher values. The customer will appreciate the thoughtfulness behind such concrete suggestions and the kindling of a spirit of service to the customer will do much to ensure the success of such a campaign.

"Save the Surface" Convention Held

Gathering of Paint and Varnish Men in Montreal Are Told of Cumulative Effect of Campaign

A CONVENTION of paint and varnish men, sales managers and retail salesmen, master painters and others was held on Friday last at the Windsor Hotel, Montreal, and which was attended by about 125. An outline of the creation of the "Save the Surface" campaign was given, and addresses delivered by local and visiting paint men served to make an interesting and instructive programme, which was enlightening and educative. Planned for the purpose of making salesmen, dealers and painters better acquainted with the objects of this campaign, it was around this idea that the addresses were woven, and a variety of viewpoints were expressed by the various speakers, probably one of the most important of these being the cumulative effects aimed at by the committee directing this campaign.

WM. C. MacLAREN

formerly of Winnipeg, who recently assumed the position of general manager of Ottawa Paint Works, as outlined in a former issue of HARDWARE AND METAL. *Mr. MacLaren takes over the interest formerly held by J. M. Young, and will give special attention to financial and office administration.*

George Henderson, president of the Canadian Paint, Oil and Varnish Association, and chairman of the "Save the Surface" committee, in his address, referred to the "why and the wherefore" of this campaign. It was, Mr. Henderson said, a national gain as well as a gain and benefit for the manufacturer and the dealer. There was not more than one-third of the surfaces of Canadian homes, plants and other paintable surfaces being treated with paint before the campaign started two years ago. There were three reasons or excuses given for not painting, the first of these being the war and its results, but which argument resolved itself into a "penny wise, pound foolish" excuse. The second excuse was that paint and varnish is decorative and not preservative, and which is utterly foolish as an argument. And the third big excuse was that the cost of paint was so relatively greater than such costs before the war that paint or varnish could not be afforded. For these reasons, the speaker said, this educational campaign of the "Save the Surface" committee was opportune.

Mr. Henderson stated that, while the paint manufacturer could doubtless impart a good deal of information as to the advantages of such a campaign, he would be glad to learn from others as to what advantages could be attained.

In delivering an address on "What Has Been Accomplished," A. T. Black, a member of the "Save the Surface" committee, and general manager of the Martin-Senour Company, stated that he believed it was almost impossible to measure the accomplishments. This is evidenced in the fact that there is no machinery that it not being worked to capacity. Travellers, salesmen, retailers and master painters, Mr. Black said, are all linked in the campaign as important factors in its success. They are, so to speak, all cogs in the wheel.

The slogan, "Save the Surface and You Save All," had its birth in the States. The Canadian trade had closely coordinated its efforts with those of the manufacturers in the States, although the campaigns were financed separately. The appeal was made on the highest possible plane, and was general. A great fact was that the sympathy of the Conservation Commission of Canada had been extended, while the campaign had the definite endorsement and approval of the Canadian Trade Commission.

The slogan adopted, Mr. Black said, was one of the most effective that had ever been coined, and as a result of its use the results were difficult to measure. Mr. Black took advantage of the occasion to illustrate some of his facts with slides projected on the screen.

Speaking for the United States committee's work, O. C. Harn, of the National Lead Company, New York, gave an effective and interesting review of what had been done "across the line." He stated that the paint industry was one of the most necessary in the world, and that, whereas certain manufactured lines were made to replace old and discarded ones, paint and varnish had the unique distinction of affording protection and preservation for these manufactured lines. In this way paint and varnish were adding to the wealth represented in these manufactured lines. "It is not what we produce that makes wealth," said Mr. Harn, "it is what we produce and save."

Hillcrest Finishes

Hillcrest Varnish Stain

A leader among the highest-grade varnish stains on the market. Hillcrest dries in twelve hours with a very durable and beautiful high gloss.

One of the reasons for its popularity with the consumer, and its consequent excellent sales, is the handsome and effective imitation it gives of the natural wood in all its beauty.

If you have never sold the Hillcrest Line of Superior Paints and Varnishes, let us send a salesman to demonstrate what the Hillcrest Line will do for you.

"Save the surface and you save all" *Paint & Varnish*

How Hardwaremen Advertise Paints--Nos. 6 and 7

BEARING out the underlying idea of the "Save the Surface" campaign, this advertisement by W. A. May, Creemore, Ont., emphasizes the economy of using paint and varnish to protect the surface. It points out that the real value of a paint or varnish is in the amount of preservation and protection given. Continuing, it indicates that ———— paints possess the required protective value and that they are made for that purpose. "Service, not price, determines the value of paints and varnishes" is the final remark.

"WHAT About Painting This Spring?" is the heading on the ad. by Collingwood Hardware Co., Collingwood, Ont. The use of a strong and bold heading asking a question is one good way of securing attention, providing the question gives a sufficiently complete idea of what the ad. is about, as does this one. In both this ad. and the one above, certain points are emphasized by the use of bold type and then some definite message with a strong appeal is outlined. This ad. points out that keeping the woodwork painted will preserve it indefinitely, while if neglected it will spoil more during one season than it would cost to paint it twice, and then the painting will still have to be done. The use of an attractive border improves the appearance of the anonuncement.

The Luxeberry Painter Says:

"A Smiling Finish Makes a Laughing Household. This is just another way of saying that an attractively finished interior is a big factor in promoting domestic happiness. From this standpoint Berry Brothers' Finishes are joy-makers; I always use them."

The "Berry" label is a sales-maker. Even the smallest buyers know and trust it.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 6.—There has been little or no cessation of the activity that has, for a long while, characterized the paint markets. Night and day shifts are being employed to take care of the business, and "we cannot get the goods forward as fast as we would like," is a frequent expression.

The linseed oil situation is no better as far as supplies are concerned. This means that there has been no relief from a price standpoint, and crushers expect that there will be, for some time to come, a continuation of the present tight situation. This is due to the non-delivery of Argentine seed, and supplies from Western Canada are also very scarce. No lowering of prices has been effected this week.

Turpentine is scarcer than ever, part of this being due to the freight congestion, and partly to a heavy demand from all sources. Some jobbers are entirely without stock, they report.

Whiting is scarce, and this means that putty will continue to be very firm. It is unlikely that there will be an immediate improvement. Paints and varnishes, specialties, etc., are selling freely.

"Worse" Turpentine Situation, Say Jobbers

Montreal.

TURPENTINE.—The inevitable reply of jobbers to a question as to the turpentine situation is worse, or no better. This means that freight congestion, labor conditions, and heavy demands have all served to give the jobber but limited supplies of turpentine, and manufacturers are even in a bad way for the required raw material. The market undertone is very firm. A $4 price basis is not at all improbable.

May be Weeks Before Linseed Oil Easier

Montreal.

LINSEED OIL.—Congestion in New York is, at the moment, largely responsible for a continuation of the price basis on linseed oil. There has been no reduction from the prices prevailing last week and with—it is reported—250,000 carloads of Western-bound freight lying in New York for transhipment, it means that the situation cannot be immediately relieved. Some expect that it may take two or even three weeks before seed is received in round lots at the mill, and this means, if such a condition continues, that there will be no cheap oil in May. No one desires to hazard a guess, however, and the trade may find some surprises. Seed from Western Canada is being held at high figures and the mills feel that if Argentine seed could be secured soon there will be an early easing of prices. English oil is reported to have arrived, and at a slightly lower price, but as yet the whole matter of supply is indefinite; acute.

Whiting Harder To Get Than Ever

Montreal.

PUTTY.—Jobbers report that, while whiting has been scarce in the past few months, there is even a more acute situation at this time. Some whiting is of an inferior quality, but it is the better whiting that is so difficult to obtain. Prices on putty are naturally very firm and there is little probability that there will be any lowering of the basis. Trading is seasonably good.

Much Steady Trade For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have changed in no sense, and the market undertone is steady. Orders have been coming to hand in a fairly brisk manner, and the jobbers are satisfied with this volume of demand for the product. Government standard lead is selling in 5-ton lots at $19.50 per 100 pounds; in tons at $20, and in smaller lots than tons at $20.35.

Some Belgium Glass May Be Received

Montreal.

GLASS.—Prices of plate and box glass are still very firm, and there is a real heavy demand for all grades. Plates are very scarce as are also the larger sizes of window glass. It is expected that some supplies of Belgian glass may arrive on some of the freighters now sailing, although there is no definiteness in this regard.

Paints and Special Goods Are Very Active

Montreal.

PAINTS AND SPECIALTIES.—Prices are still steadily firm on all paints and varnishes. The same applies on various specialties. Raw materials of various kinds are scarce, and this is causing the manufacturer more or less anxiety. The tendencies are firm. Varnishes are particularly firm in all respects, raw gums, turpentine, oil and other materials being scarce, and labor conditions still difficult.

TORONTO

TORONTO, May 6.—The demand for nearly all paint commodities has again been stimulated and all lines are moving again in full swing. Local stocks of turpentine are said to be almost exhausted and jobbers are rationing their present supplies but are looking forward to a relief of the situation. Practically the same situation applies to linseed oil. Glass continues to be scarce. Commodities depending on whiting for their manufacture are also scarce and in many cases behind in delivery. Ready-prepared paint sales are said to be the heaviest experienced for a number of years. Prices on Paris green are firm and the demand is daily increasing. Collections are coming forward very satisfactorily.

Ready Prepared Paint Sales Are Heavy

Toronto.

READY-PREPARED PAINT. — The cool, unseasonable spring weather which set in during the past week is believed to have delayed paint sales, at least as far as the merchant is concerned. Jobbers state they have been kept very busy shipping out orders which are already on their books; they state new business has not been extra heavy although a fair amount has been offering. The past few days, however, have made a considerable difference to sales, and jobbers state the rush for repeat and sorting orders is again in full swing.

White Lead in Oil Prices Remain Firm

Toronto.

WHITE LEAD IN OIL.—A fairly heavy demand still continues for white lead, although jobbers state the season has developed a backward tendency the last few days on account of the cool weather. However, as the season for warmer weather is fast approaching, they expect that this will soon be remedied and are looking forward for a heavy turnover. There is said to be considerable inquiry for export business, but whether this develops remains to be seen.

although it can readily be seen that with the extensive building requirements of Europe that large quantities of this material would be needed. The present price is very firm and low stocks of pig lead are said to be on hand.

Paris Green Prices Firm; No Prospect of Decline

Toronto.

PARIS GREEN.—A fair movement is noted for Paris green, although jobbers state that most of this is booked. Orders at present quotations are held very firmly. The opinion seems to be that there is no chance of lower prices being made for the present. The present quotations are as per current quotation pages.

Plate and Window Glass Still Scarce; Price Firm

Toronto.

GLASS.—The scarcity of glass continues to be very noticeable and very few are able to get all their requirements it is believed. It may be that when the freight embargo is lifted from the United States railroads that shipments will come in better and the demand to a certain extent will be satisfied. Fair shipments of plate glass are coming from Belgium, although it is stated that even with this relief the quantity is not nearly sufficient for the present demand, which is generally considered to be a very heavy one. The prices on window glass are as per current quotation page.

Whiting Situation Affects Cold Water Paints; Putty

Toronto.

COLD WATER PAINTS.—The situation of this commodity may not be at all favorable in the near future unless whiting comes to hand in larger quantities, it is stated. Jobbers state the demand is a heavy one and that they are receiving in many cases shipments now which they should have had in their warehouses around the first of the year, and believe this is true all down the line. The reason for the shortage is attributed to the English producer, who in turn states that he cannot get sufficient labor even at a higher price to handle the product as in pre-war days, and that owing to the war activities stocks all over the world have become so depleted that the rush seems to come all at once, and everybody is crying for their shipments. The present quotations on cold water paints are firm although no immediate change is looked for. The prices are quoted in the current market quotation pages.

PUTTY.—The above conditions practically apply to putty. The present quotations are firm, although unchanged, and are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure Putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

How Hamilton Merchants Sell Paint

(Some notes of value from the experience of Hamilton dealers, who report good-sized paint sales).

HAMILTON, ONT.—One of the fast moving lines in Brown Hardware, Ltd., store is paint. A new plan has been adopted by the management this year. "Where formerly we could sell to people by advising them to paint for decoration, we now have to advise them to paint for protection in order to make sales," said Mr. Brown to HARDWARE AND METAL. "The new plan seems to appeal strongly to our customers."

"What do you consider the greatest essential in selling paint?" was the question put to R. S. Simpson, manager of Stanley Mills & Co., hardware, after he had informed HARDWARE AND METAL that business in paints this year has been greater than formerly despite poor weather.

"Quality is the first thing," he replied, "and then it is necessary to have someone selling paint who understands the line and can offer suggestions for color schemes and how paints should be applied."

Harry Boniface, of the Boniface Hardware, has some novel ideas in the sale of paints and varnish which have helped to develop the substantial trade in these lines now being done.

"With every parcel wrapped up I place one of the color cards or booklets issued by the paint manufacturers. They are of great value when handled in this manner, in encouraging the idea of painting in the home," says Mr. Boniface.

Discussing paint sales with HARDWARE AND METAL he told of an incident showing the value of studying color schemes and knowing good color combinations. In reply to an advertisement a customer came to the store from a great distance. He did not know what color combination he wanted and so complied with the clerk's suggestion. A short time later another customer came to the store and wanted suggestions as to color schemes. "Where do you live?" he was asked. On naming the street he was asked if he had seen a certain house, being the one the former customer had painted.

"Why that was the very one I had in mind. Could you sell us the same shades as that?" was the reply.

Turpentine Supplies Almost Exhausted

Toronto.

TURPENTINE.—The turpentine situation is proving a considerable drawback to manufacturers and consumers alike throughout the trade. While it is the season of the year for receipt of the new crop, the freight transportation and other difficulties have practically cut off shipments from the South, leaving the local markets almost bare. It may be that transportation difficulties will right themselves in the course of a few days, This being the case jobbers and importers are hopeful for an early arrival of supplies to fill up their depleted stocks. Owing to the great shortage no prices for barrel shipments are current as no one seems to have barrel quantities to sell. Jobbers generally are only delivering in lots of from 5 to 10 gallons to a customer in order to make supplies spread out till the arrival of new supplies.

Turpentine—	Per imp. gal.
1 barrel lots	....
2 to 4 barrel lots	....
5 gal. lots	4 00

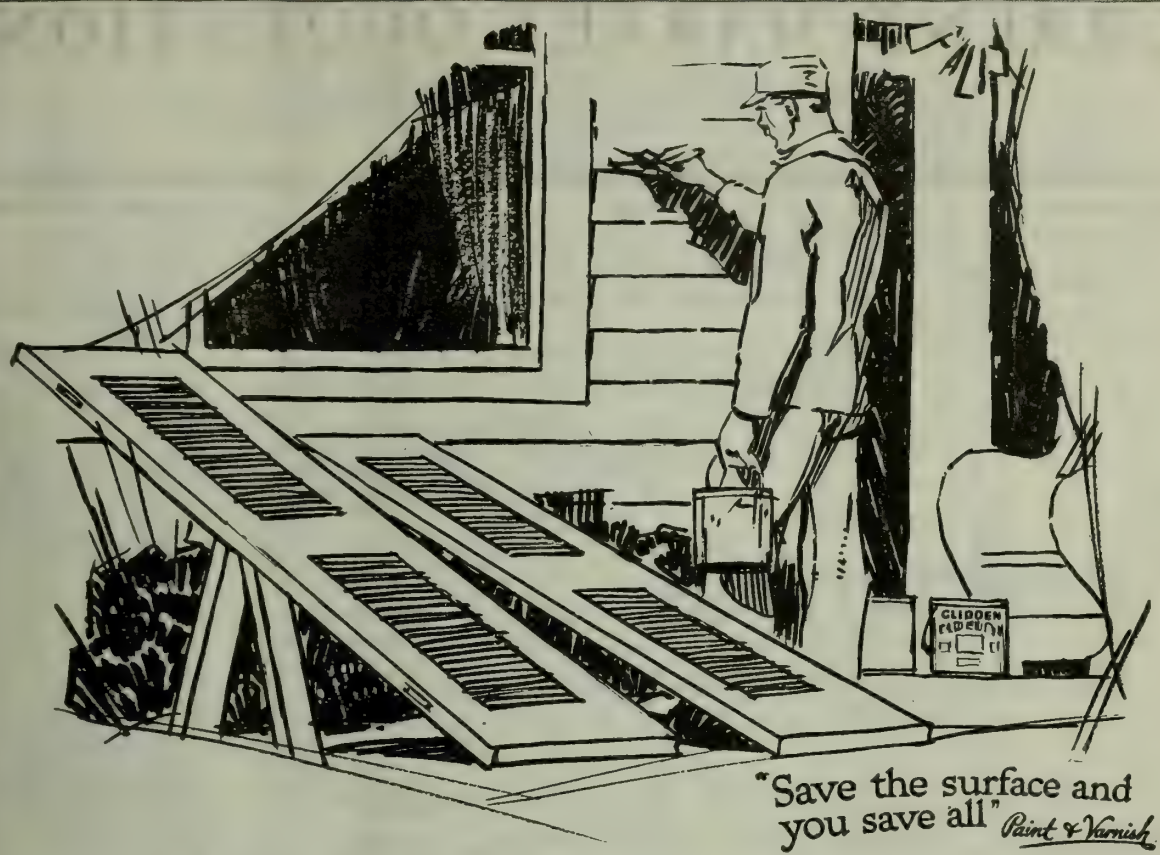
Linseed Oil Stocks Light; Situation Not Relieved

Toronto.

LINSEED OIL.—Little improvement is shown in the linseed oil situation and stocks are still said to be very light. The embargo on the United States railroads may account for this to a considerable extent as it is believed that very heavy shipments are tied up in transit and crushers are practically helpless as far as securing the seed is concerned. It was believed at one time that there might possibly be considerable seed of Canadian origin appearing on the market around this time of the year, but so far the opinions seem to be groundless, and crushers state that Canadian seed is not coming forward, should there be any quantity, although it is the season of the year when linseed oil is usually at its low level for the season, this year's price has shown no weakness for considerable time past, and while it may be true that English oil is coming on the market, it is not believed that the quantities are heavy enough to influence the price, at least at the present time, and jobbers and crushers are of the opinion that no lower prices will be made on linseed oil for at least two or three weeks. The following are the present quotations:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
	Boiled	
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.



"Save the surface and you save all" *Paint & Varnish*

Confidence in Paint

Because the name Glidden is known throughout the Dominion for good quality in paint and varnish materials is one reason why you can have every confidence in Glidden Endurance Paint. Glidden Varnishes stand in high esteem by painters everywhere. So with Glidden Enamels. Glidden Jap-a-lac is a household word. Now this word stands for Paint—Glidden Endurance Paint—a pure lead and pure zinc paint having just the right proportions of those paint pigments and paint liquids that produce enduring ability.

Not the cheapest paint you can sell per gallon, but by far the most profitable paint you can handle when "turnover" and general consumer satisfaction are considered.

Let us mail you our special paint proposition.

The CROWN DIAMOND *Quality Line of Paint Products*

"Save the surface and you save all" *Paint & Varnish*

WHITE LEAD

Our White Lead plant is equipped with the most modern and improved machinery. The corroding is done by the modified Dutch process which ensures a lasting white of remarkable smoothness and freedom from moisture. We have prepared a little booklet describing our White Lead Plant which we will gladly send on request. It is entitled "From Pig Lead to White Lead."

From the very inception of our business 78 years ago, we have consistently endeavored to maintain a high standard of quality and create a lasting impression for all Crown Diamond Paint Products.

In keeping with this our policy is to control, as far as possible, all the raw materials which enter into our paints. We trace materials to their source and import from the four corners of the earth. We manufacture our own dry colors. Corrode our own white lead, and by doing this we have continuous control of practically all the products which enter into our paints. This assures high and constantly uniform quality.

Modern scientific research and tests have given convincing proof that Crown Diamond Paints are essentially pure paints. Paints made to endure.

The Crown Diamond Line of Paints is most complete. A paint for every purpose, and each made specially to give the utmost value for the money expended.

We manufacture Crown Diamond Liquid House Paint, Floor Paint, Porch Paint, Barn Paint, Shingle Stains, Marine Paint, Flat Wall Tone, Carriage Paint, Implement and Wagon Paint, Varnish Stain, Shellacs, Varnishes, Dry Colors, Colors in Oil, etc.

If you are interested in procuring reliable information on the purity of paint and what constitutes a practical paint, write us to-day.

Lift the Dolly—then Raise the Lid

The sale of the Time-Saver Electric Washer and Wringer is increasing by leaps and bounds in Canada and abroad.

There are many reasons for its popularity. It does perfect work, has no complications to get out of order, runs quietly, is solidly made, beautifully finished and reasonable in price.

Perhaps the most appreciated feature of all is the patented dolly. The dolly revolves the clothes in the hot, soapy water—sixty times one way and sixty times back again, every minute. The hot suds are forced through the clothes—thoroughly cleaning them **—without rubbing.**

The dolly on the Time-Saver has an exclusive and patented advantage. **It can be raised independently of the lid.**

When you raise the lid, you do not drag up a pile of heavy, wet clothes. The dolly is lifted first and the clothes freed from it. When you lower the lid again, the clothes are not scooped over to one side of the tub. Lower the lid and then drop the dolly right on the centre of the washing. There is no danger of tearing delicate materials when the lid is raised.

Your customers—like so many other up-to-date housewives—will appreciate the Time-Saver.

MR. A. S. WALBRIDGE.

Mr. Walbridge is Manager of Beatty Bros., Limited, Selby Ave., Westmount, Montreal.

The Montreal Branch has been unusually successful in introducing BT Washers. Previous to undertaking the management of the Branch in Montreal, Mr. Walbridge travelled all over Quebec in the interests of Beatty Bros. Limited, and is well known throughout the Province.

TINKER TOM'S TALKS.

No. 258

PICKLED SHEETS

Just about the scarcest thing in Canada. We can do the pickling (oiling afterwards to prevent rusting) if you can furnish the stock. Maybe this will help you out "in a pinch." Our price is quite low.

TINKER TOM.

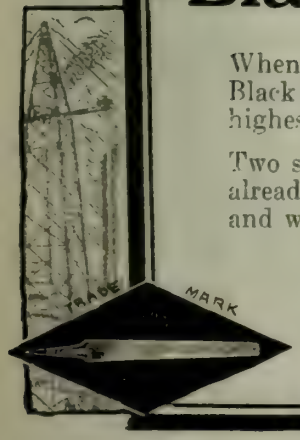
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

"The World is Painting Buy Early"

Stephens'

REGISTERED TRADE MARK

Every indication points to the imperative necessity of early buying. Reports from domestic sources and abroad show the certainty of extensive painting throughout the Dominion and the world.

The great revival of building and the completion of vast plans interrupted by the war are but a part of the forces now acting to create a remarkable season for paints and varnishes. Order early.

Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

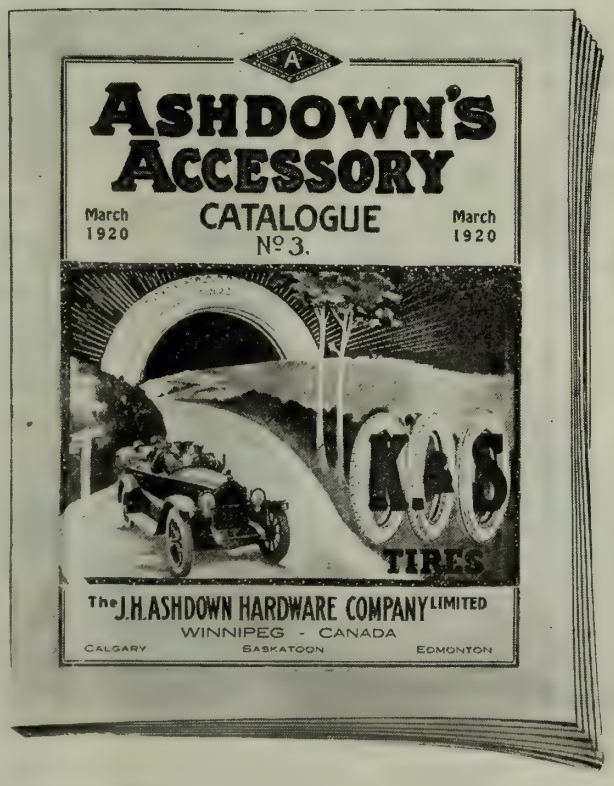
The Largest Wholesale Hardware Dealers in Canada

ASHDOWN'S
Third Annual
Automobile Accessory Catalog

In presenting our Third Annual Automobile Accessory Catalog we seize the opportunity of expressing to our many friends and customers our sincere thanks for their liberal patronage during the fifty-one years we have been in business.

The phenomenal growth of the Automobile Accessory Business has prompted us to greatly increase our facilities in order to take care of our customers' requirements and give them service of an acceptable character. We have endeavored to make our this season's catalog a valuable guide to the dealer in the selection of his accessories, supplies and shop equipment and have spared no expense in compiling all necessary data and information on the complete line carried by us.

Our line embodies all actual necessities in Automobile Accessories. Truck and Tractor supplies and Garage Equipment lines have been materially increased in order to supply the growing demand.



In selecting our stock our aim has been to procure lines of recognized merit and quality and which we can recommend without hesitation to our customers.

The price list accompanying this catalog is approximately correct at the date of issue, but owing to the constant fluctuation of market prices it is subject to change without notice. Only such changes in Prices and Lists will be made during the season as are absolutely necessary, and we assure you that we will give you the advantage of a decline as quickly as a change in advance. We expect to issue corrected price lists monthly during the season.

When ordering write your name and address plainly, state quantity wanted, give catalog number or name, also size, and be particular to state whether shipment is to be made by Freight, Express or Parcel Post.

A Valuable Guide to the Dealer in Selecting Accessories.

"Save the surface and you save all" Paint & Varnish

Concentrate your buying—for greater economy and better service

PRATT & LAMBERT VARNISHES
The famous "61" Floor Varnish. Vitralite—the long-life Enamel. Effecto Auto Finish.

ALABASTINE
The widest advertised and easiest selling paint product.

CROWN DIAMOND PAINTS
The exclusive agency for your town is a most valuable one. It assures you larger sales and good profits and gives your trade some relief from the H. C. of L.

LIQUID GRANITE FLOOR VARNISH
The dealer who sells this varnish is building his business on quality.

VALSPAR
"The varnish that won't turn white"

CROWN DIAMOND WHITE LEAD
"The Superior Lead."

LUCAS' IMPERIAL FRENCH GREEN
The leading Green in the markets of the world.

LINGERWETT
The "canned lightning" Remover is 100% efficient.

MUNNS WALL SIZE
Guaranteed as a perfect undercoating for Kalsomine, Paint, Varnish, etc.

LEAD-OIL
The celebrated flatting oil. Is a combination of vegetable oils and turpentines only. Is sold for less money than turpentine, but is worth many times the value of turpentine for all paint purposes.

Ontario Distributors for Munro's Pure Paris Green---the popular poison

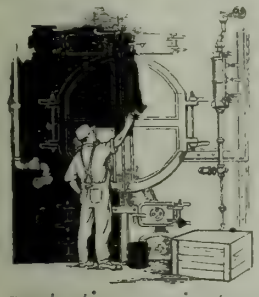
Barrett Roofings, Cements Industrial Paints etc.

ANY Product bearing the name of "Barrett" is first of all a quality article. It is also a fast seller because it insures customer satisfaction. The products described below are the result of long years of manufacturing experience and each of them is the best product on the market for its particular use.

Our advertising in the leading publications and newspapers is telling your trade that the Barrett trademark is always a sure pledge of dependability.



Everjet Elastic Carbon Paint

This high quality, moderately priced, protective carbon paint has the same base as the famous Barrett Specification Pitch. It is positively proof against weather, steam vapors, acids and alkalies. It can be used on either metal or wood and wears stubbornly under the most severe conditions.

Although Everjet Paint has been on the market less than ten years it is used extensively by railroads and large industrial concerns all over the Dominion.

It is particularly recommended for exposed metal surfaces such as machinery, farm implements, tin roofs, smokestacks, etc., as it gives perfect protection against rust—the greatest destroyer of metal.

Easy to apply and comes ready for use in the following sized containers: Barrels (about 40 gals.); ½ Barrels; 5 and 10-gal. cans and 1-gal. cans, Lithographed (cases of one dozen).

There is a big field for Everjet Paint in every community. You can recommend it to your customers with the utmost confidence.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market. Low in price—high in quality—long in service—easy to lay—thoroughly waterproof. Comes in three weights, light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 square feet. Nails and cement packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out felt and "Rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing at very small cost.

Put up in all sized packages from 1-pint cans to barrels of 40-gallons.

Elastigum Plastic Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Elastic Cement of a Thousand Uses."

Unequalled for patching holes in roofs, repairing flashings and gutters, stuffing cornices, etc., etc.

Comes ready for use in 1-lb. tins (24 to the case); 5-lb. cans (12 to the case); 25-lb. packages; 1-lb. packages; ½ barrels of about 300 lbs., and barrels of about 600 lbs.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

An inexpensive and effective destroyer of flies, lice and vermin on livestock and poultry. Its use means healthier horses, fatter hogs and increasd production of milk and eggs.

Creonoid is a sure and fast seller in every progressive farming community.

Comes in 1-gallon cans (12 to the case); 5 and 10-gallon cans; ½-barrels and barrels.

Displays Make Profits

Your tool window displays will prove more interesting to your customers if you show a good display of "Morrow High Speed and Carbon Drills," the kind that drill more holes with less regrinding.

You can link up with our advertising in consumer papers and with the thousands of expert drill users in Canada, who from practical experience know the advantages of using "Morrow" drills.

Morrows are the pioneers at Twist Drill making in Canada and have gained the confidence of thousands of drill users.

Cash in on this drill confidence by stocking and displaying "Morrow High Speed and Carbon Drills," the kind that drills more holes with less regrinding.

More Holes With Less Regrinding

John Morrow Screw & Nut Company, Limited

INGERSOLL, London, England---7 Hop Exchange, Southwark St., S.E.1. CANADA

"Oldest, largest, best equipped plant in the Dominion manufacturing Set Screws, Cap Screws, Engine Studs, Semi-finished Nuts. etc."

What is the Life of a Paint Brush?

Generally it depends on the usage it gets and the preparations in which it is used.

TRADE SET IN RUBBER MARK

Paint Brushes

can be used in any paint, oil or varnish preparation, kalsomine, glue, paint removers, etc., and yet live longer than the ordinary brush that is used in only one kind of paint.

The SIMMS brush lives until its bristles are worn down to the handle, and it gives excellent service all the time, under all conditions.

The painter's trade will come your way if you handle SIMMS Set-In-Rubber Paint Brushes.

Our other lines are also winners.

Brooms	**Stove Brushes**
Whisk Brooms	**Lather Brushes**

The Volume of Sales in Feet
of
Lion Brand Manila Rope
Would Measure Distance Beyond the Grasp of the Mind

The reasons why Lion Brand Manila Rope is sold and liked all over Canada is the same that applies to all the Consumers Cordage products: marked superiority in yardage, strength, durability, wearing and lasting qualities.

The proof is simple. Put Lion Brand Manila Rope to the severest tests in comparison with others—stretch it, examine it, work it, twist it, and observe the result.

Success of

Crown & Anchor Paints & Varnishes

is due to expert selection of material, supported by exacting standards of manufacture, and these being enforced by relentless inspection.

Many years experience in manufacturing paint, enables the Jamieson organization to render Service that is manifestly superior.

PREPARED PAINTS READY FOR USE

HARDWARE AND METAL

is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Varnish Brushes a Specialty

Ask for our prices and list of goods available for spring business.

Our prices are right.

EXCELSIOR WIRE CO. LIMITED
22 VICTORIA SQUARE, MONTREAL

SAYS THE MASTER MECHANIC: The Greb Automatic Grip Puller is a One-Man Puller—Quick-acting, strong and simple in the extreme. May be locked in any desired position. A combination of two or three arms. CROWBARS

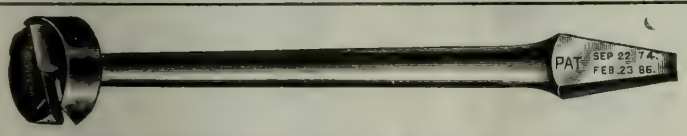
No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Hardware and Metal's Audited Circulation

There is no secret about HARDWARE AND METAL'S circulation. It is audited by the A.B.C.—the best authority in the world—and above all, the paper is read by practically every worth-while hardware buyer in Canada. There is no waste circulation in HARDWARE AND METAL. It is the paper to use if you have a message for the Canadian hardware trade. HARDWARE AND METAL carries more business than any other trade paper in Canada, and is read more closely than any other paper. HARDWARE AND METAL will carry your message to the hardware trade of Canada.

Mechanics Call It The Best Made

Dealers find it a Wonderful Seller

A Kerosene Fire Pot with many improvements. Mechanics call it a "pippin" for dandy construction and heat-giving properties. An automatic brass pump supplies air pressure.
Yes, and C. & L. are good to sell, too; ask about discount and list prices. They sell, satisfy, and multiply your sales. Jobbers supply at factory prices.

No. 221
List Price, $33.60

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

Canadian Firms Bid for Export Trade; Substantial Increase Shown in Value of Goods Exported During the Fiscal Year

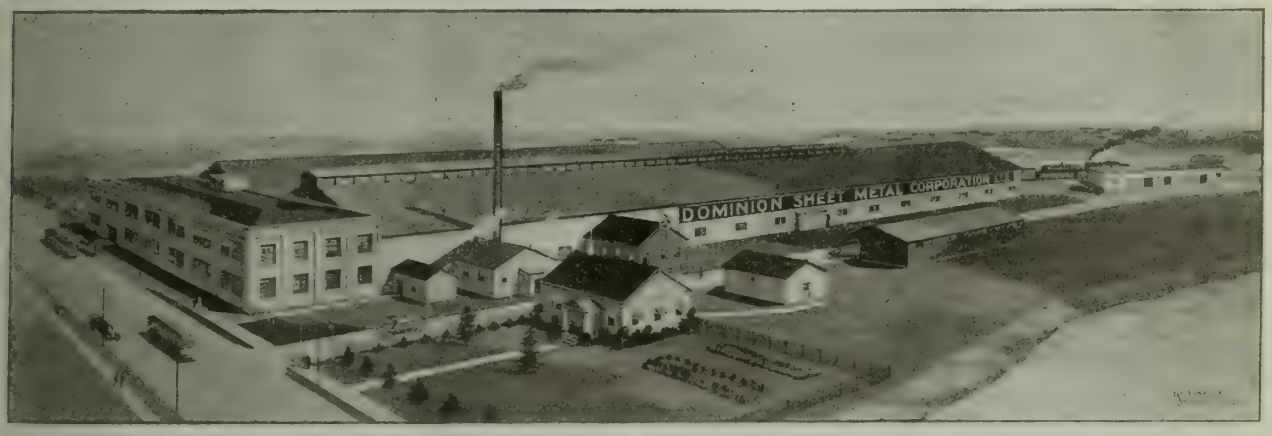
Increase in Canada's Trade of $165,980,266 Shown for Year Ending March—Representative Canadian Industries to be Introduced to World's Buyers—Cutlery Shows Big Increase in Trade With United Kingdom

THAT Canadian manufacturers are taking advantage of every facility to extend export connections and are fast developing trade in the foreign markets of the world, is proved by figures showing an increase in Canada's trade during the fiscal year ending on March 31, of $165,980,266. This indicates a further increase of approximately forty million dollars since the last available figures were quoted in a January issue of HARDWARE AND METAL. The total volume of Canada's exports and imports during the year was $2,351,174,886 compared with $2,185,194,620 for the year ending March, 1919.

Increase in exports for the year amounted to $23,048,292 as compared with 1919, the total value of goods exported from Canada during 1919-1920 being $1,239,492,098 as against $1,216,443,806 in 1918-19.

A glance at the export figures for the two years shows a great increase in the value of agricultural, animal and wood products sent out of the country in 1919-20 as compared with the previous year.

An evidence that Canadian firms are bidding for a share of world trade is contained in the extent of interest aroused in Canada over the Canadian Industries Exhibition to be held in London, England, in June. There are said to have been a large number of applications made for space in order that Canadian firms may be introduced to the world's buyers. It has been suggested that the exhibition be held periodically in order that the progress of Canadian industry may be given wider publicity. The names of a large number of leading industries in Canada have been listed as having reserved space at the exhibition. The firms represented will no doubt give British and other overseas buyers some idea of the wide range of Canadian industries now actively interested in export trade.



A Typical Canadian Industrial Plant

A glance over Government reports indicates that cutlery is one of the leading hardware lines listed insofar as increase in export trade is concerned. Considering the leading position formerly held by British manufacturers of cutlery it is indeed significant to note that Canada's exports of cutlery to the United Kingdom during the eleven-month period ending February, 1920, were valued at $1,765,769, with no exports shown for the corresponding period one year ago. Exports of cutlery to other countries amounted to $511,940, with a total cutlery export of $2,278,325.

Exports of nails, brads, spikes and tacks of all kinds also showed considerable increase during that period. These products to the value of $387,532 were sent to the United Kingdom;

$78,939 to the United States; $105,341 to British South Africa; and $280,933 to other countries, making a total of $852,745 worth of these commodities exported during the eleven months as compared with no exports to these countries listed for the corresponding period in 1918-19.

Total value of exports of bolts and nuts for the period was $108,705, as compared with no exports listed for last year. Of this amount $63,841 worth were exported to the United Kingdom.

An increase in the export value of screws amounting to $60,170 is shown. Exports of needles and pins increased $107,155.

The total export value of various cutlery and hardware lines to the United Kingdom showed an increase during the eleven-month period of from $2,446,339 in 1918-19 to $3,680,006; to the United States an increase was shown of from $631,724 in 1918-19 to $1,045,158 in 1919-20. The total exports of cutlery and hardware to all countries during that period amounted to $6,642,289 as compared with the 1918-19 figure of $6,498,787.

A substantial increase in exports of paints, varnishes and pigments is also shown for that period.

Figures indicating total value of exports of these products to the United Kingdom are $615,753 for the eleven months ending February, 1920, compared with $185,151 for the same period ending in February, 1919. This shows an increase of $430,602. Exports of these commodities to the United States for the period amounted to $111,081 and to other countries $685,729. These figures showed a slight decrease for the period. Total value of Canada's exports of these products for the period was $1,412,563.

Canada is largely interested in the export of automobiles and accessories. The United Kingdom purchased passenger automobiles during that period from Canada to the value of $767,061. Australia was a large purchaser, having imported from Canada automobiles to the value of $2,094,998. India was the largest buyer of Canadian automobiles, leading the list with $2,398,939 worth of cars. South Africa and New Zealand also were high on the list. The total value of Canadian exports of automobiles was $11,161,553. The value of automobile parts exported increased from $937,563 in 1918-19 to $2,952,326 in 1919-20.

Shipping Activity in a Canadian Seaboard Port.

The British preferential tariff which went into effect on September 1st, 1919, is expected to impart a considerable stimulus to the Canadian automobile industry. It grants a preference of one-third provided that not less than 25 per cent. of the labor on the furnished car shall have been done within the British Empire.

These figures indicate that Canadian industry is gradually becoming readjusted to conditions following the war and that while fully meeting the home market requirements, the value and importance of developing export connections is being kept well in sight and rapid strides being made to place Canadian merchandise in the markets of the world.

BRASS VALVES

"With the Composition Disc"

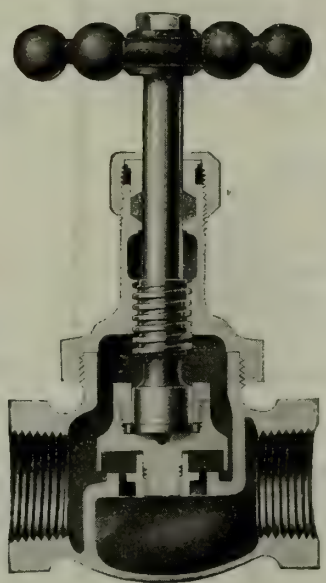

Fig. 550-S

"Outside Bonnet Construction"

The first improvement made in brass valve construction in generations past

Government Approved for 175 lbs. Steam Pressure.

What the outside bonnet construction means—
It prevents corrosion of threads. It prevents spreading or enlarging bonnet end of body when tightening down bonnet to place. It eliminates all strains or stripping of threads. It makes a more compact valve, consequently a stronger one. The discs used in these valves will give long life under severe conditions. Every valve is fitted with packing gland and follower. Workmanship and finish unequalled anywhere.

Manufactured by

PENBERTHY INJECTOR CO., LIMITED

"Outside Bonnet Construction"

Improved Design Improved Efficiency

All Penberthy Gate Valves are designed with outside bonnet construction, same as our compodisk and regrinding lines of valves. It is the most practical and reliable idea of valve construction.

Penberthy Gates are made with solid wedge disc, which has proven much superior to the split or two-piece disc type.

Penberthy Gates are Government registered for 150 lbs. steam pressure.

Design, workmanship and finish unequalled anywhere. Be sure this name is on the valve you buy.

If there had been any doubts of the efficiency of SE-MENT-OL, they vanished in face of the conclusive tests of this radiator repairer before the assembled jobbers.

They saw a radiator, spurting water from several leaks, completely repaired in **seven minutes** with a can of SE-MENT-OL. The permanence of SE-MENT-OL repairs was convincingly demonstrated when a can in which several holes had been SE-MENT-OL sealed was thrown time and again down a flight of concrete stairs until the can was almost demolished—before a single repair opened.

In similar tests they were shown that SE-MENT-OL could not possibly clog or injure the radiator.

Now these jobbers know why SE-MENT-OL is guaranteed for the life of the car. They know that they can stand back of it to the limit. They will recommend that you **stock** SE-MENT-OL—**concentrate** on it—and push it.

The demonstrations before the jobbers were filmed and the film will be shown throughout the country through the courtesy of jobbers.

Livingston Brand

Livingston quality does not start with the selling organization but right back with the first step in the manufacture, and is followed through every process to the finished article.

As evidence of the truth of this, we submit one fact which those who know will appreciate.

Livingston Oil Cake and Meal are recognized as the highest quality products obtainable, which means that there is more mucilageous matter in the meal and less in the oil. This substance in oil lowers the quality but enhances the value of the meal as a fattener.

LIVINGSTON (*Old Process*) LINSEED OIL

Livingston Products

–for 50 years known as the old reliable Baden Oil

With our extensive buying, manufacturing and selling organization, spread as it is from coast to coast, we are placed in a most favorable position to offer Livingston product to not only the Canadian trade, but to all the world.

Livingston products have long been recognized for their superior quality due to the painstaking care exercised in their manufacture resulting from our pride in the product whose quality was established so many years ago. *Insist on Livingston Brand products.*

Known the World Over

Many Motorists Will Brighten Up Their Car For Summer

Nearly every customer that comes into your store for a car part or accessory is a prospect for one of the BEATS-ALL Products.

It is easy to sell any of these products when you explain to your trade that the original Stormproof qualities and Factory Durability can be restored by using any of these car ECONOMIES.

BEATS-ALL Top Dressings for Mohair. Pantasote and Imitation of Leather are the only Top Dressings which incorporate LIQUID RUBBER into the base. That is why they are sold on a guarantee to WEATHERPROOF and RERUBBERIZE the fabric.

If your jobber cannot supply you, write direct to the factory.

Every Can Contains Lasting Protection for the Car Owner

Mohair Top Dressing
Will give the shabby, leaky weather-beaten top that new appearance and factory durability. It re-dyes and rerubberizes, making the fabric stormproof, leaving the top soft and pliable.
Pints, 85c; quarts, $1.50

Knu-Lac FORD Top Dressing
A coat of Knu-Lac applied to any FORD, Rubber or Imitation of Leather Top will positively waterproof and re-rubberize it. Gives it that original pliability and wearing quality—produces a rich gloss black durable finish.
Pints, 75c.; quarts, $1.35.

Drab Lining Dye
It re-dyes and re-finishes the inside lining a fast light color, giving it that fresh and new appearance. Covers all stains and discolorations.
Pints, $1.35; quarts, $2.50.

Dull-Lac Top Dressing
For all Leather and Pantasote tops—weatherproofs and re-rubberizes — softens and preserves the material, giving it that rich egg shell non-gloss finish.
Pints, 85c; quarts, $1.50

Re-Knu Upholstery Dressing
The Upholstery which has become worn and shabby can be made to look as good as new by a coat of this dressing. Puts on a rich and elastic surface, retains the new pliability and affords a good durable wearing finish. Dries in 15 minutes.
Pints, 75c; quarts, $1.35.

BURGESS-NORTON MFG. CO. BUR-NOR GENEVA, ILLINOIS, U.S.A.

BUR-NOR
All-Steel Hatchets

A justly popular hatchet, due to its great improvement over the old-style wooden-handled hatchet. Bur-Nor hatchets have reached a leading place in sales volume. They are recognized by all hatchet users as the better "buy."

Bur-Nor hatchets cost less and sell better than the old-time hatchets. They offer a way to new business and repeat sales. The dealer can make a sale of every inquiry and pocket a good margin of profit.

Heads Cannot Come Off

The hollow steel handle is so reinforced and riveted under high pressure that the heads cannot loosen or come off—an all too familiar characteristic of the old-style wooden-handled hatchet.

Let us convince you of the advantage in this year 'round profit-maker. Read our special offer to jobbers. Let us send you our catalogue. Act now.

We allow Canadian jobbers a special discount and will accept their checks on a Canadian bank at par, thereby eliminating all difficulties which may arise through the present high rate of exchange.

Our Concrete Bumpers will open a larger field of profit for importers abroad. Automotive accessory dealers, domestic and foreign, are finding an ever-increasing demand for a durable and dependable bumper. Concrete Bumpers are a real necessity—not a fad. In Canada the motor car owners for 1919 reached the figure of 330,649. Assuming that each man owned only one car, you will see the enormous field of prospects open to the dealer for Concrete Bumpers. The number of cars is growing. The wise motorist equips his car with a Concrete Bumper. Enough said.

Our line consists of our celebrated Concrete Filled Rod Bumper and Spring Steel Rod Bumpers. Channel, Hexagon Channel and Dismond Rod Bumpers in all sizes are available. Write for catalog today.

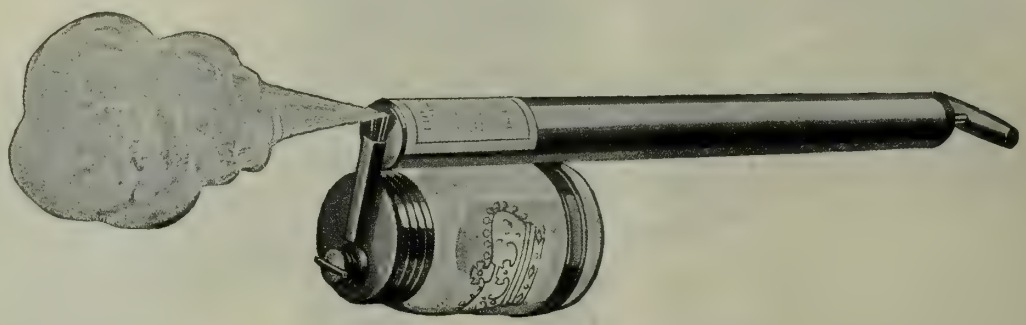
Sprayers for Spring



THE CROWN

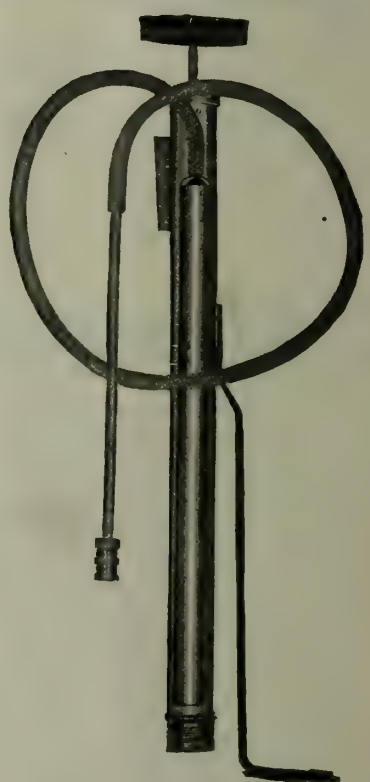
THE BUCKET

Just what its name implies,

The best class of customers are looking for and appreciate a reliable sprayer at this time of the year, when they are anxious to safeguard their plants, trees and shrubbery by destroying bugs, beetles and various kinds of insects.

Collins' goods will meet with the buyers' highest expectations and also their most exacting requirements.

Orders Filled Promptly.



For whitewash, garden and tree.

THE COLLINS MANUFACTURING CO.

The Popular KRIBS Electric

Simplicity--Efficiency--Low Cost

The demands for this beautiful washing and wringing machine increases daily.

It works on the most approved principles and gives immediate and absolute satisfaction.

The price makes it available to the ordinary home where the fancy, high-grade machine is out of reach. Low price does not mean less efficiency. In the KRIBS you buy only *essentials*, not *frills* or *fancy work*.

Dealers handling the KRIBS find it easy to sell. Its popularity spreads. Pleased purchasers tell their friends.

The store selling this machine gains reputation for high quality products at lowest costs. This means satisfaction to both buyer and dealer.

Write for information and catalogue. We have *Hand Power*, *Water Motor* and *Gasoline Motor* machines of the same high standard.

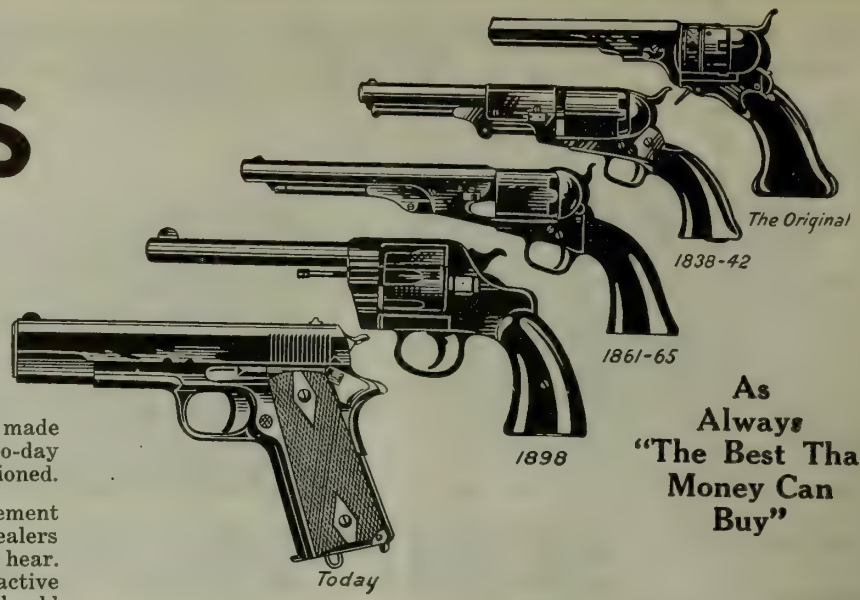
COLT'S FIRE ARMS



As Always "The Best That Money Can Buy"

Leadership! From the earliest *Colt* made in 1836 to the masterpiece of to-day Colt's supremacy has been unquestioned.

Linked with the record of achievement is the romance of a Colt which dealers find their customers delight to hear. This romance is told in a most attractive little booklet which every dealer should have and make use of. If you have not already received your copies, send to us for them.

Also send for folder A-62 which contains an interesting story of how a Colt established a new world's record for accuracy at the National Shoot at Caldwell, N. J.

For Extreme Accuracy Use Empire Levels

YOUR reputation as a quality workman demands that you use a level of assured accuracy—one that you can depend upon to do its work in a consistent manner under all conditions. A good reliable level pays for itself many times over in a single day by eliminating all possibility of incorrect or ill-fitting work.

Empire levels are manufactured under a system of exacting tests which makes hair-line accuracy a feature of every tool. They are durable too, only the best material obtainable is used in their construction.

The Empire adjustable aluminum level pictured here is the highest type level on the market. It is made of a special alloyed metal, very light and has the additional feature of adjustable vial glass cases which can be set for angular work.

The Empire line of levels includes one for every use, made in both wood and aluminum styles. Ask your jobber or send for descriptive catalog.

Empire Level Mfg. Co.

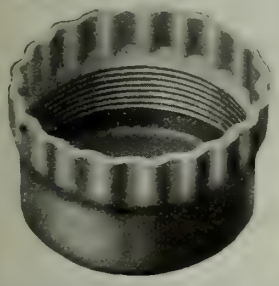
313 First Ave. **Milwaukee, Wis.**

Canadian Office: 140 McGill St., Montreal, Que.

A New Canadian Stamping Plant

KALES STAMPINGS

Pressed metal parts, light and medium weight stampings, card holders, washer, shims, clips, retainers, spacers, cover plates, shells, motor, axle, transmission and clutch stampings — we are at your service with quality and prompt deliveries on any of this work. Send for folder listing 1,000 different sizes of washers—also send us your blue prints and samples for estimates.



To insure convenience and prompt service to our Canadian customers, we have established a factory at Walkerville, Ontario.

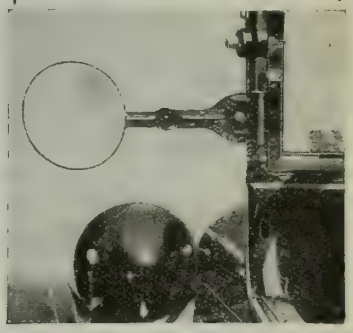
The new plant is now ready to do business. It is strictly an independent factory, capable of taking care of any light and medium weight stamping needs you have—and capable, too, of producing the same quality of work which has maintained the reputation of Kales Stampings for 15 years.

KALES STAMPING CO., Limited
63 WALKER ROAD WALKERVILLE, ONT.

Hindview

AUTO MIRRORS

Mirrors are required by law in Ontario. "Hindview" is a mirror that has been making good for hundreds of dealers and jobbers in Canada and the United States. Strictly a quality mirror—made for open and closed cars and trucks. Write for descriptive literature.

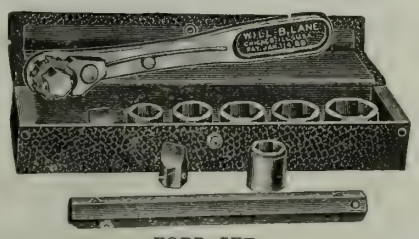


Lane's Handy Auto Ratchet Tools

A popular quick-selling line that interests your customers at once because of their ability to perform tasks where other wrenches fail.

The line comprises the "Standard" and "Ford" Sets of the Lane "Unique" Ratchet Wrench, the Lane "Super-Unique" Ratchet Wrench Set and the "Unique" Off-Set Ratchet Screw Driver.

SUPER-UNIQUE SET



FORD SET

STANDARD SET

All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

A line that meets many requirements and presents unusual selling opportunities for the dealer.

OFF-SET RATCHET SCREW DRIVER.

Manufactured by

Will B. Lane Unique Tool Co.

THEY CUT FOR THE WHOLE WORLD

"Acme" shears, scissors, and tinners' snips are sold in every market on earth and delight consumers and dealers everywhere. The consumer is highly pleased when he tests the specially hard ened, sharp cutting edges. The splendid performance of this line in service increases business for the dealer; the profits are good; the prices interestingly low for the quality. An output of 35,000 pairs daily assures satisfactory deliveries and indicates something of the wide sale of this popular "Acme" line. Send for No. 5 catalog and prices.

The Wonderful Selling Kiddie-Kar

The very largest selling child's vehicle in the world with a big margin of profit. That's the combination you want!

Kiddie-Kar is so soundly constructed, so simple, and of such powerful appeal to children and parents that it has sold wonderfully from the start.

Extensive advertising of the most compelling kind to consumers has made its great merit "known to the millions"—that's all, for Kiddie-Kar sells on its worthiness. Maybe you're missing this?

Ask Your Jobber.

Canadian K-K Company, Limited

Elora, Ontario, Canada

Here's the strongest Ratchet Drill made

Bridge builders, ship builders, boiler makers, and all who ask constant heavy service from Ratchet Drills are proving the "Monarch" Square Sleeve Single Acting Ratchet to be the strongest Ratchet made. The body is made of Drop-forged Steel, and handle of solid Bar Steel. Parts subjected to wear are extra hardened. This is the ideal Ratchet Drill for heavy work.

Remember that a Ratchet is almost useless without a Drilling Post. Therefore, always suggest with every sale a "Keystone" Drilling Post. It will save many hours of time and permit of more perfect work.

"Keystone" Tools are known everywhere for quality of material and workmanship. If your jobber cannot supply you, write direct to us.

The World-Famous Trademark of Safety

The familiar picture of the carpenter's hammer striking the hammer of the revolver tells the story of Iver Johnson safety in language everyone can understand—the language of pictures.

And the trademark tells more than a story— it tells a truth. If ever there has being an instance of an Iver Johnson being discharged by a drop, thump, thud, or knock—we have not heard about it. "Hammer the Hammer" means just what it says.

The automatic safety—the fact that there is nothing to remember to do to make it safe, the accuracy, the constant alertness and readiness for use, the simplicity of construction—all combine to make the Iver Johnson the most wanted revolver for home protection—therefore the obvious revolver for you to sell.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

Why not stock Iver Johnson shotguns too? Then you can capitalize on the entire Iver Johnson line of firearms.

Write for firearms catalogue and complete dealer information. Ask for literature on bicycles and motorcycles, too.

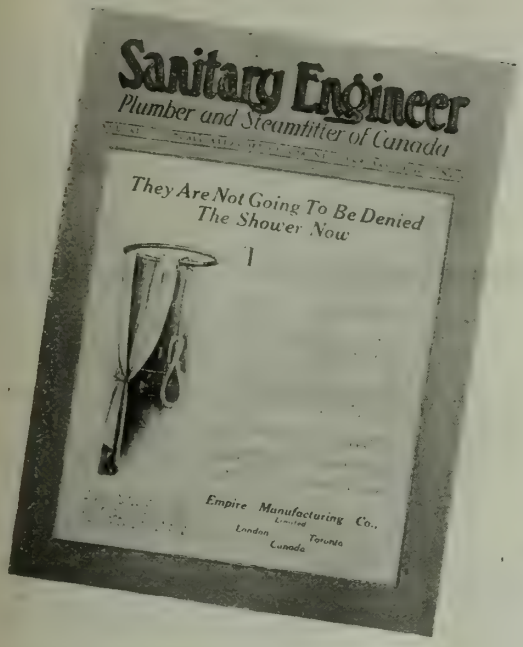
Do You Conduct A Plumbing And Heating Department?



The livest, up-to-date sanitary plumbing and heating engineers in Canada are subscribers to SANITARY ENGINEER, **Plumber and Steamfitter of Canada.** This live, breezy paper coming out twice monthly with a large volume of practical and interesting information for its readers is available at the cost of $1.00 per year, or less than 5c per issue. For the small sum of $1.00 you receive 26 issues filled with interesting editorial information and bright, newsy advertising pages giving news and information regarding new goods and the latest developments in plumbing and heating goods.

If you conduct a plumbing and heating department and you are not yet a subscriber to SANITARY ENGINEER, you are overlooking one of the best investments you could possibly make.

Read This Interesting List

Read the following, giving a brief summary of editorial information in the April 1 issue:

"PLUMBING REPAIRS WILL BE CASH." A story telling how 10 Brantford plumbing firms have placed their businesses on a cash basis.

"RIGHT ON THE JOB—GET BUSINESS." An illustrated story telling how Brousseau and Frere, Quebec, Que., have built up a big business on a small beginning. Their methods are described in this issue.

"SASKATCHEWAN CONVENTION REPORT." A detailed report of the convention of the Saskatchewan Society of Sanitary and Heating Engineers held at Saskatoon.

"CONTRACTS AND CREDITS." An address delivered by Neal Beaton, of Beaton & Brady, Saskatoon, before the Saskatchewan Convention.

"SEWAGE DISPOSAL FOR SMALL COMMUNITIES." Fourth article of a splendid series of articles by B. T. Ellis for which SANITARY ENGINEER has the exclusive publication rights for Canada.

"VENTILATION AND EXHAUST SYSTEMS." An address delivered by C. W. Keniston at a recent convention held in Milwaukee.

"TEST YOURSELF WITH THESE QUESTIONS." A test which you can apply to yourself. It consists of 65 questions and will enable you to check up the results of your personal effort and also of your business.

"RUMOR OF A TAX ON SALES IN CANADA." Details regarding the proposed turnover tax and how it will work out.

"MONTREAL CRAFT SEES ENCOURAGEMENT." A page of interesting information regarding the activities of the Montreal organization.

"THOUGHTS." By Napolean Hill—a page of inspirational reading matter.

"BUILDING ACTIVE DURING FEBRUARY." Complete Details regarding the building permits issued in Eastern and Western Canada cities.

"EDITORIAL." Success and Profiteering—Under Production and Over Production—Increasing Sales—Turnover Tax—Causes of Inflation—Are You Insured?

"NEWS FROM HERE AND THERE." A bright breezy page giving news gathered from various sources.

"MARKET CONDITIONS AND TENDENCIES." Two pages of bright accurate market information giving actual prices quoted on goods used by the plumbing and heating trade.

The above is a partial list of the editorial contents of the April 1 issue.

The April 15th issue contained, among other features, a complete report of the Ontario Society of Domestic Sanitary and Heating Engineers' Convention, held at Toronto.

Pin $1.00 to the coupon below, mail it to the address given below, and you will immediately start receiving twice monthly a paper that is easily worth more than the subscription for any one single issue. SANITARY ENGINEER is one of the sixteen papers published by the MacLean Publishing Company. It has been published twice monthly since 1907. Most good plumbing and heating engineers are now subscribers. If you are one of the few not subscribing, **ACT NOW.**

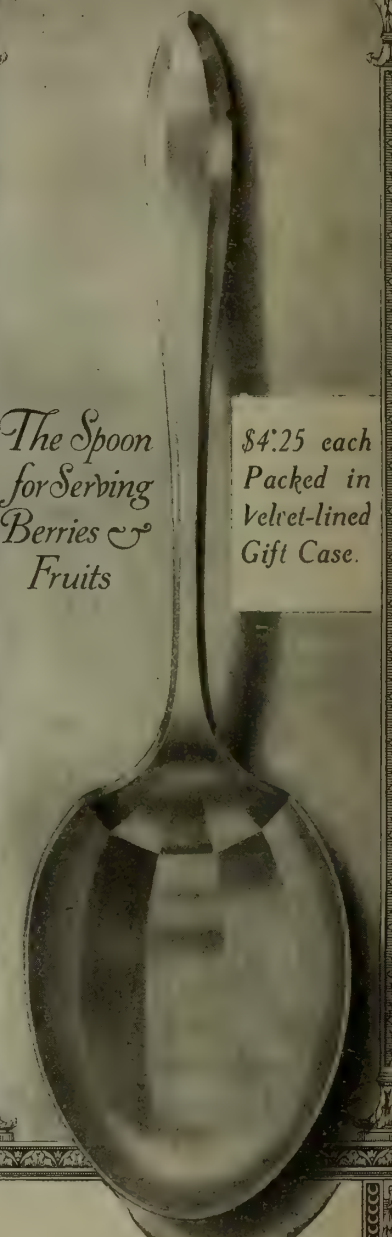
COMMUNITY PLATE



The Spoon for Serving Berries & Fruits

$4.25 each Packed in Velvet-lined Gift Case.

The Service of Fruits

WITH all her appreciation of the elaborate service accorded her in her Hotel or Club, the woman of taste rarely tries to emulate it on her home table. Instead she keeps her accessories few and simple—and is very careful to have them *right*.

Her Grapes are separated into dainty clusters before they come to the table. Sharp-pointed, sharp-edged *Community* FRUIT KNIVES for *Apples, Peaches* and *Pears*. *And* for *Berries* or *Preserved Fruits*—never the ordinary tablespoons; but this *Community* FRUIT SPOON, with its generous bowl, set on the handle at just the correct angle for serving daintily from a deep dish.

Indeed, one finds the BERRY SPOON almost indespensable also for *Salads, Large Vegetables*, and serving from a *Casserole* or *Pudding Dish*.

"Your" Goods

"A retail merchant who would specialize in advertised articles — who would show them, push them, do everything possible to identify himself with them—would, in any trade, grow rich."

Such is the statement of a man who has himself prospered by that very method of merchandising. Many other merchants have proved it to be correct.

Where once there was a tendency to side-track advertised products because of a feeling on the merchant's part that such goods were not their goods, we find to-day a widespread appreciation of the ease with which a dealer can "turn over" lines widely advertised by their manufacturers.

Where once advertised goods were kept in the background—and stocked grudgingly because of a mistaken idea that such articles should take second place to those not so well known, we find to-day a pretty general realization that the advertised line is the profitable line — for the dealer.

Merchandising methods have swung into line with the progressive spirit of the age. Dealers have come to understand that every line they have requests for are "his" goods. If he receives outside support in finding a market for them—if the maker is progressive enough to advertise his article's merits—that advertising support is of benefit to the dealer. He should encourage it, by making all the sales he can, of such products.

O-Cedar Polish and O-Cedar Polish Mops are outstanding examples of advertised goods. They sell readily in any store that stocks them. But the "turnover" of these two products in your store may be increased by displaying them in your windows and prominently about the shop —and by "linking-up" your advertising with ours. **Local** advertising will direct the demand created by our **national** advertising, to **your** store. Hundreds of merchants have proved this—those who most freely display and advertise O-Cedar are the ones who are doing the lion's share of the O-Cedar business in their respective communities.

Farming in the Backyard

is on in full force.

The steadily soaring cost of living is driving people to maximum production in their garden plots.

The call for garden tools of all kinds will probably be more insistent this season than in years, so you will be well advised to have your stocks well sorted in the following lines:—

Malleable and Steel Rakes, straight and concave teeth.

Five Prong Garden Cultivators—"Invincible" and "Pull Easy."

Solid and Socket Shank Hoes

Solid Shank Turf Edgers

Gross Shears and Garden Trowels, etc.

We carry a full range of gardening equipment and can ship promptly.

Ask the "Rice Lewis" man for price on our Special Garden Hoe (or write direct).

A·G·M·CO
VIKO
ALUMINUM

A Great Line to Handle

It is in the test of hard daily use that aluminum ware has proved its merit for cooking purposes. For not only does aluminum endure heat, but it is a tough and durable metal which can take a lot of punishment otherwise.

In modern kitchens aluminum utensils are coming more and more into use. They do not chip nor crack, and because of their long life are an economical purchase.

VIKO, The Popular Aluminum, is a great line to handle. It includes every kitchen need, and has a big trade-appeal in its popular price. Viko utensils are staunchly constructed, too, and embody the latest improvements in design. For full information about VIKO—

Putting Welcome on His Door Mat

A DEALER called on the purchasing agent of a manufacturing concern in Connecticut the other day and showed him how he could save a thousand dollars a year on screw-cutting tools.

He got the order, made his profit and has since enlarged his GTD line, to anticipate the business he plans to get from other manufacturers in his territory.

He also moved his GTD stock down on the ground floor. "I'm going to have it where folks can see it," he said.

The right spirit—a good tip for live hardware dealers. You make money when you save money for others.

Get out of your store, once in a while, if only to shake hands. And give the GTD line a good front row seat. It's like putting welcome on your door mat.

ARMCO

Washing Machines that Last for Years

Washing machines, with all their sheet-metal parts made of heavily galvanized Armco Brand of American Ingot Iron, give the housewife the relief from scrubbing-board labor that she naturally desires—and length of service and freedom from repairs far beyond her expectations.

For Armco Brand of American Ingot Iron is made as pure and even as it is possible for iron to be. And a pure, even iron will always resist rust and the corroding influences of strong, alkali soaps; and it will take and hold a galvanizing coat better than ordinary metals. Armco Brand of American Ingot Iron and the galvanizing coat literally hook together, so that much greater durability than usual is assured, also the kind of galvanizing that won't peel, scale of flake off into the wash to the injury of delicate fabrics.

The washing-machine that offers both labor-saving and extraordinary lasting qualities is the machine to buy. Here is a list of manufacturers who make that kind of machine—each with the sheet-metal parts made of heavily galvanized Armco Brand of American Ingot Iron:

Altorfer Bros.
Peoria, Ill.
"A-B-C Super—Electric"

Brokaw-Eden Mfg. Co.
New York City, Alton, Ill.

Story for Week Dated May 15, 1920. **Being No. 5 in the Series**

Eddy Matches Are Made In Washed Air

ONE of the wonders of the Eddy Plant is the air-washing process, which provides for the interior of the match factory in the sultriest days, a supply of air sweet and cool as that of an October morning.

Perfect matches cannot be made in any kind of air. The humidity has to be watched many times an hour, and the slightest change noted, for millions of matches depend for their efficiency upon the air conditions under which they are made.

For Eddy match-making, cool, dry, clean air kept just below 60° F. is insisted on, and as a result the atmosphere inside the match factory is deliciously refreshing. Here nimble-fingered girls keep pace with immense machines through which the matches march at the rate of seventy million a day.

Down below a 50-ton ice plant is cooling the air from outside, and every breath of that air is sent through a gloriously exhilarating spray bath. You can peep through a double glass window at the sprays in action. There are a hundred of them, each sending a perfect Niagara of finest ice-clear ice-cold water against the currents of air as they arrive from the pumps. The chill has the effect of squeezing the moisture out of the air, and gallons of the superfluous humidity go out with the dust and impurities which are washed out of the air before it passes on to the match factory.

In winter the process is reversed, and the cold outside air is washed and warmed to 60° F., so that for a really equable climate the proper place to go is to the E. B. Eddy Company's match factory, if you can get there. As a matter of fact you can find all varieties of "climate" from temperate to torrid amongst the various processes of making Eddy products, but Eddy matches are made in the most heavenly atmosphere of them all.

Eddy's Fire Pails

Sound, reliable pails of Indurated Fibre Ware, sure and safe when wanted; will not shrink, leak or fall apart.

Eddy's Wash Tubs

Are better than wood or metal. Made of Eddy's famous Indurated Fibre Ware, they hold the heat of hot water longer; cannot be dented or bent, and never leak, shrink or fall apart.

Eddy's Butter Tubs

of Indurated Fibre Ware are much in demand by rural trade. The Canadian farmer has never found anything to equal these convenient tubs for marketing butter. Odorless, clean, sanitary and durable.

The "Seafoam"

Engine Drive Washing and Wringing Machine

FOR THE FARM

Wrings while it washes, washes while it wrings

The SEAFOAM can be driven by gas engine, windmill or electric motor. Both washing and wringing are done by power. The machine is simple, durable and trouble-proof, so that anyone in the home can operate it with absolute safety—all gears are covered.

The washer is of the dolly type, has tub of selected Cypress lumber and the reversible wringer is fitted with highest grade rubber rolls.

Dealers will find the Seafoam an unusually satisfactory seller, because of its established reputation and reasonable price. Descriptive folders on request.

To the man who doesn't care how it works, so long as it does the work

IF you are guided purely by precedent, when you select a steam trap, you will probably never know how good, how simple and how efficient a steam trap can be. Because there isn't a single thing about this 3-part Johns-Manville trap that in any way resembles the other kinds.

Four years ago the novelty of this trap appealed to everybody—now the efficiency of the trap itself has taken the place of its novelty features—because the trap brings results.

And now about results—The Johns-Manville Steam Trap discharges not only water of condensation, but air from any steam piping or apparatus, without the loss of steam. Size of pipe connections being equal, it has a greater capacity than any other trap of the same size that we have ever seen.

Year after year this trap has given and will give satisfaction to thousands of users to whom results are the only things that count.

Try out a Johns-Manville Steam Trap where you've been having trouble and watch it deliver the goods. Any of our branches will send the descriptive booklet and full information.

Possibly you have experienced the vexations caused by a constantly sagging clothes line and rusty, shrieking pulleys, which become obstructed either by knots or snow or ice.

Your customers will appreciate an effort on your part to relieve them of such troubles and incidentally it will be financially profitable for you.

AERO Clothes Line Pulleys manufactured of waterproofed hardwood are 6 inches diameter, with deep V-shaped groove, giving perfect friction to varying diameters of line, are self-lubricating, rustless, knot-passing and will run noiselessly under all weather conditions, and are guaranteed for ten years, if oiled annually.

The **Aero** method of installation as per above cut is a departure from common practice, but a glance at it will convince you of its practicability in securing a taut clothes line at all times without splicing the line itself. If desired, the line and pulleys may be taken in after use.

The Aero Line Support prevents sagging in the center when carrying heavy loads.

Your jobber probably has these in stock. If not, communicate with us direct or with our Western Agents—H. L. Perry Co., Ltd., Winnipeg, Man.

A PHENOMENAL SELLER

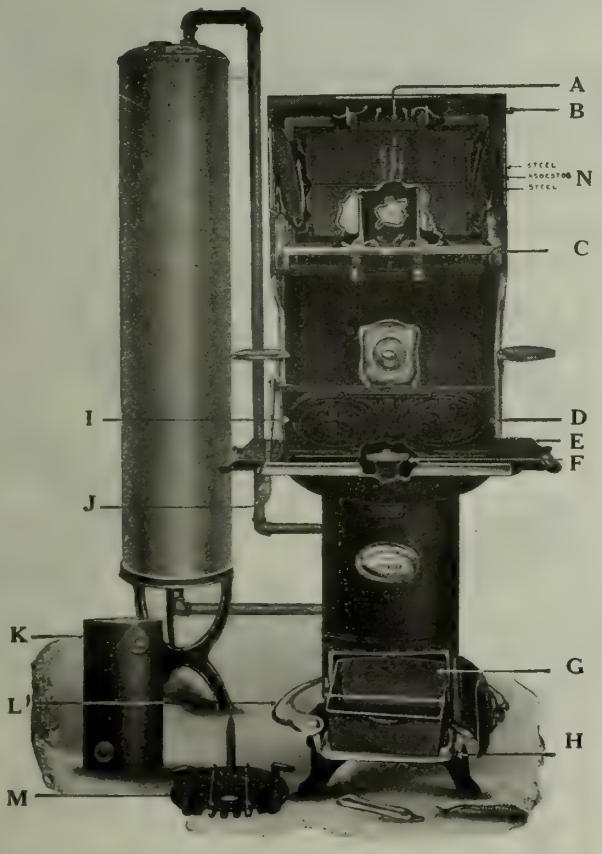
A Combination Home Device for Heating, Cooking and Baking

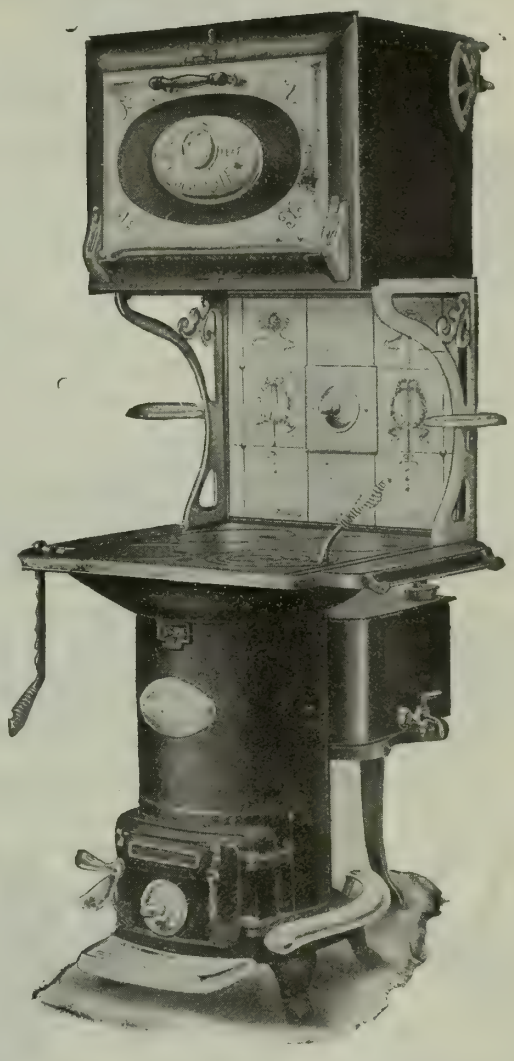
SECTIONAL VIEW OF COMPOSITE

Showing how the heat travels on five sides of the oven, giving remarkable baking powers.
Note these features as indicated below:

A. Adjustable damper gives correct heat for oven.
B. Ratchet damper handle can be set at desired point on dial.
C. Balanced drop oven door, double lined, with dead air space between equipped with oven thermometer, friction catch, and non-heating handle.
D. Strongly ribbed lids.
E. Removable side shelves.
F. Heat spreader gives even heat on all four lids.
G. Large ash pan.
H. Nickelled removable ash tray.
I. Sectional reducing lid.
J. Ratchet broiler lift holds up front section for broiling or fuelling.
K. Powerful water-section can be installed.
L. Nickelled foot rails.
M. Suspended wod grate for use in moderate weather.
N. Showing insulation of oven casing.

BRIEFLY:—
The Composite does work of Range and Heater, costs less, works faithfully and keeps out of the way in crowded kitchens.





THE COMPOSITE

An entirely new system of heating, cooking and baking. Thoroughly tested and guaranteed.
Satisfied users make the sales.
Great saver of floor space.
Burns coal or wood.
Economical in the use of fuel.

The Composite is a wonderful seller. Endorsed by thousands of satisfied users. Get the facts to-day. Write for book of testimonials telling of success. Thoroughly protected by patents and design registered—Manufactured only by

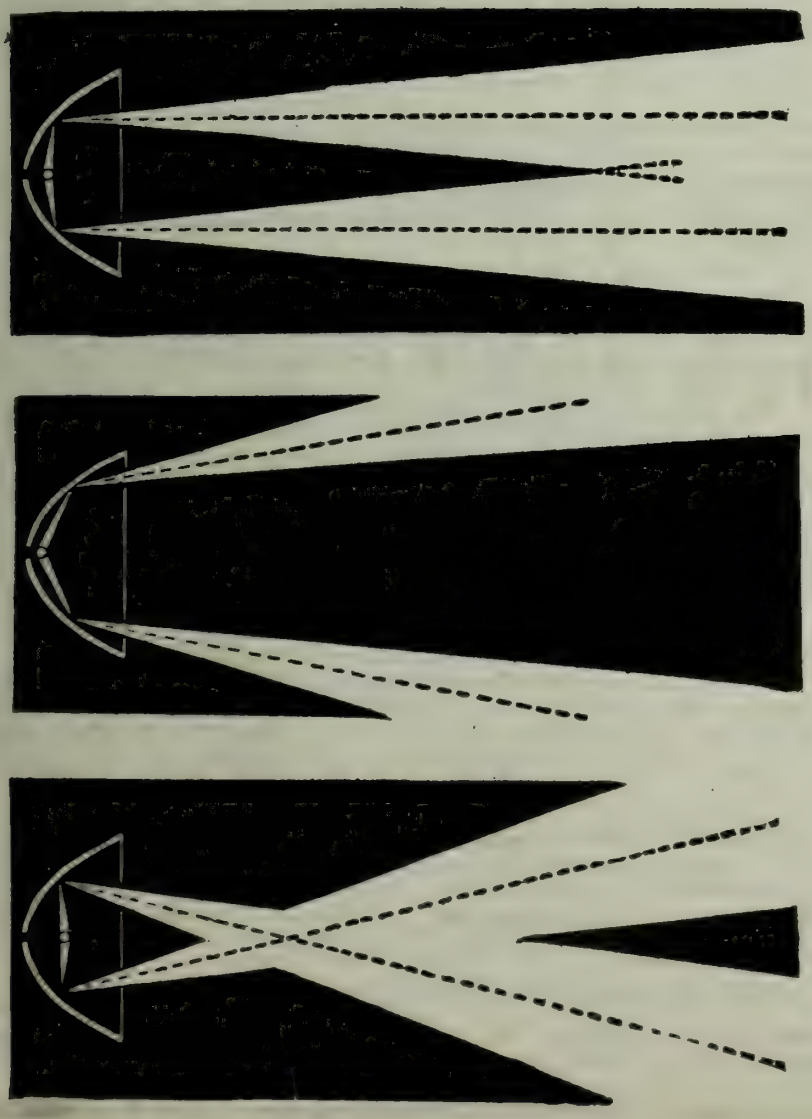
Requirements of Anti-Glare Headlight Law

Best Anti-glare Devices Will Not Comply With Law Unless Each is Properly Applied and Adjusted—Some Pointers the Dealer Should Have to Advise Customers—Wrong Application of Lenses Will Intensify Glare

THERE are two months before the motorists of Ontario will be compelled by law to comply with the requirements of the new anti-glare headlight law which will then require every motor vehicle to have its headlights equipped with anti-glare lenses or devices approved by the Department of Highways and to have them correctly adjusted so as to eliminate glare.

From now until such time as the law is enforced there will be much discussion as to what type of lenses or devices will comply with the law, and this is an interesting point to be considered.

In the first place it will be necessary for the motorist to exercise care in the adjustment of the particular device which he adopts in order that the rays of light projected will not rise above the authorized level. It is noteworthy in this connection that the application of any of the prismatic deflecting type of lenses upside down, intensifies the glare. Furthermore, when a new electric bulb is placed in the lamp the light should be refocussed because of the greater intensity of its light when new. The wrong application of devices known as the "cup" or "spoon" and the application of "visors" to the upper half of the lens when the bulb is behind the focal point are other mistakes which will not only reduce the illumination of the road but will violate the law. Manufacturers of such devices state that a great many of the complaints of the inefficiency of the devices is due to their misapplication or the misalignment of the reflectors or headlights themselves. The importance of correctly focussing the bulb is indicated by the fact that if the bulb is one-quarter of an inch out of focus, less than 4 per cent. of effective candlepower remains. The best devices manufactured require that the bulbs be correctly adjusted in order to secure the desired results, and therefore a few tips which the dealer can pass on to his customers who purchase lenses or other headlight devices will be of value at this time.



In order to make a light suitable for good illumination in a headlight it is necessary to gather the rays in the form of a beam. The two methods of doing this are first to use a lens which bends the rays passing through it, and the second is by means of a polished reflector which, because it utilizes more light rays, is the one most generally employed. Owing to the fact that lamp filaments have different lengths and thicknesses instead of obtaining parallel rays of light, every point on the surface of the reflector projects a cone of light, consequently the headlight beam is cone-shaped, and this is where most of the headlight trouble starts.

Bulb Must Be at Exact Focal Point

The extent to which these light beams spread in cone shape depends on the size of the light source and the location of the light source in front of the reflector. The most highly concentrated beam is obtained only if the lamp is placed ex-

actly at what is known as the focal point. The illustrations show what is meant; the first figure indicates the light source at the exact focal point and the beams projected are horizontal. In Figure 2 the light source is somewhat back of the focal point and the beams diverge; the top ones are so high as to fall into the face of approaching traffic and the lower ones are too depressed to illuminate the road for more than a short distance ahead. Figure 3 shows the light source in front of the focal point and the light rays cross each other and scatter.

Some headlights are equipped with focussing adjustment devices. This may be a simple ratchet back of the reflector enabling the moving of the bulb back or might be an adjustment which provides a knob or screw outside of the lamp casing for adjusting the light source. In cheaper grades of lamps it will be necessary to take the reflector out of the lamp and loosen the screw which holds the lamp socket in place, which will allow the moving of the bulb back and forth.

How to Test Headlight Devices

A simple way to find out if the headlight device is adjusted to comply with the law is to stand the car on level ground fifty feet from a vertical surface and then mark two crosses 42 inches from the ground and as far apart as the lamps on the car. The covers or lenses of the lamp should then be removed and the light trained on the two marks, the bulbs being adjusted until the smallest circle of clear light is centred on the crosses. If the light circle shows a black spot in the centre the bulb is too far back in the reflector and if the circle remains fuzzy, streaked or without sharply-defined edges, proper focus has not been obtained. The crosses will also allow the checking up of the lamps for alignment. When the lamps have been focussed the lenses should be replaced, and if they are correctly applied the light should be as nearly efficient as can be expected.

Practically every province in the Dominion is interested in the establishment of reasonable lighting standards for the guidance of motorists and the regulations to be enforced in Ontario are therefore of interest to all parts of the country.

New Suit Against U.S. Steel Corporation

A despatch from Washington says that a new suit against the United States Steel Corporation will be instituted by the government, it is expected in an effort to have new evidence presented bearing upon the charge of the Government that the United States Steel Corporation is an illegal combination in restraint of trade.

Report of Deputy Minister of Highways on Headlight Question

Department of Public Highways, Ontario.

To the Minister of Public Works and Highways.

Sir,—I have the honor to transmit for your consideration the accompanying report on Motor Vehicle Headlamps, to be published as an Appendix to the Annual Report of this Department. The report is the work of Mr. G. C. Parker, an Assistant Engineer of the Department, acting on instructions to fully investigate the matter of glaring headlamps.

The dazzling glare from motor vehicles is caused by the direct beams of light thrown from the reflector of the headlamp.

It has been very generally sought to overcome the blinding glare by the use of lenses or other devices which act in one of two ways:

(1) To control and deflect the direct reflected rays so that they will not ordinarily reach the eye of an approaching driver or pedestrian.

(2) To diffuse the reflected rays so that the brilliancy is reduced and is less offensive.

In the case of deflecting lenses, it is essential that the light be carefully adjusted to a proper focus; and in the case of diffusing lenses, the candle-power of the lamp should be restricted.

Lamps of excessively high candle power are in all cases productive of glare, and their use with or without special devices is an unnecessary interference with the rights of others on the public highway.

The Ontario Statutes contain a provision, which the Lieutenant-Governor in Council is authorized to bring into effect by proclamation. This provision, based on laws existing in several of the States, has been in part endorsed by several competent organizations, and provides that, "It shall be unlawful to carry on a motor vehicle any lighting device of over four candle-power, equipped with a reflector, unless the same shall be so designed, deflected or arranged that no portion of the beam of reflected light when measured seventy-five feet or more ahead of the lamp shall rise above forty-two inches from the level surface on which the vehicle stands."

A car owner may easily test the general condition of headlamps with clear lenses by standing the car, after nightfall, on level ground, and facing a plain wall or building, the car being seventy-five feet distant from the wall. The direct beams of reflected light, which are of a dazzling nature, are then indicated in a more or less clearly defined circle of strong illumination.

A special type of lens is not necessary to make the headlamp conform to the proposed law. A bare headlamp may be made to conform to the intention of the law by bending the supporting bracket downward until the direct beams of reflected light, as indicated by the circle of strong illumination, do not rise to a greater height than forty-two inches, at a distance of seventy-five feet from the car.

The enforcement of the proposed law presents technical difficulties. Mere observation will not fix a standard of glare which the courts could properly enforce. A testing floor with trained men using special light-measuring equipment would be necessary to procure evidence to convict. The present tentative adoption of the statute has drawn attention to the matter, however, and a large proportion of car owners, seeking to avoid the use of offensive lights, have procured lenses, and other devices which moderate the glare; so that the difficulty is largely curing itself, and the writer is of the opinion that no date should be fixed for bringing the statute into effect. Before this is done the law might be amended in certain particulars, so as to establish a standard of glare applicable to all types of headlamps and devices, and one which is readily applied.

A large number of devices for glare elimination were examined in the course of the investigation, all of which, it was found, could be so adjusted to meet the requirements of the proposed law. Their relative values, when properly focussed, or with necessarily restricted candle-power, were largely a matter of comparative driving light, necessary to the safety not only of the driver of a car, but to others using the highway. The devices examined were merely those submitted to the Department for this purpose, and numerous others not examined would, no doubt, prove of equal merit.

Were manufacturers and dealers in all cases to fit each car with a suitable type of headlamp and have the lights properly focussed and adjusted before the car is delivered to the purchaser, much of the difficulty would be overcome at its source. Manufacturers can render an important public service by dealing with the situation in this manner.

I have the honor to be, Sir, your obedient servant,

W. A. McLEAN,

Deputy Minister of Highways.

Hints on Seasonable Advertising

The reproduction of some sample advertisements herewith will give some idea of the lines being advertised by others in the trade in all parts of Canada, and will impart some ideas or suggestions which others may incorporate in their local advertising.

"DON'T BORROW LAWN TOOLS FROM YOUR NEIGHBORS," is the point in an ad. on lawn and grass tools by Consumers' Hardware & Supply Co., Lethbridge. "Our prices on garden tools, hoes, rakes, spades, forks, etc., will allow you to have a complete outfit of your own at a small outlay of money."

* * *

"COOKS THE FOOD BUT NOT THE COOK," says an ad. on oil cook stoves by John H. Lee, hardware, Oakville, Ont. "That tells the story in a nutshell of the benefits and results of using one of our oil cook stoves. Many makes of oil stoves have come and gone but this one goes on giving entire satisfaction to the owner and stays on the job."

* * *

Under the heading, "The Most Profitable Reading Matter," it goes on to say that such matter is found in the advertising pages of the daily, weekly and monthly publications. "History and Romance can only tell of how others lived. But advertising points out the way for you to live right by calling your attention to the necessities of present day requirements." The final appeal is made for the reader to look for the ad. next week.

* * *

"A GOOD WORKMAN IS KNOWN BY THE QUALITY OF THE TOOLS HE USES," says an ad. by Turnbull & Cutliffe Ltd., Brantford, Ont., advertising lines required by mechanics. It states that the stock is most complete and the product of high-class manufacturers whose aim is to provide the best. "The best is cheaper," it continues. "We invite inspection of our stock of carpenters, masons, plumbers, linemen, farming and garden hardware at best possible prices."

* * *

"A FRESH COAT," is the heading on a paint advertisement by McKelvey & Birch, Ltd., Kingston, dealing with a sale of limited stock. "Now is the time to give your house a coat of fresh paint or touch up the interior. We have only —— colors left so we would advise you to come and get your shade while we have it in stock. Owing to the high cost of Paints and Oils people will not feel inclined to paint but we have a price that will reach everybody."

THE RED FRONT HARDWARE

SPRING WILL SOON BE HERE

Are you prepared for it? With the prolonged cold winter we have just passed through, it is but natural to expect a quick and early spring. We would advise all to anticipate their wants now, for two reasons:-- First, goods will not be any cheaper, and second, it may be difficul' to obtain them at all.

Below we mention a few of the large stock necessary Spring Goods we carry:

Sap Buckets & Spiles
Syrup Tins

Be sure and ask for sample tin of

Sherwillac

the very preparation that stains and varnishes at one operation.
For Floors, Furniture, Etc.

Paints

House, Floor, Porch Floor, Roof Paints, and all kinds of Varnishes and Hard Oil Finishes.
Auto and Buggy Enamel & Finishes.
Wagon and Implement Paint.

Colorite & Hat Brite
for renewing or coloring straw hats
Comes in all colors

Washing Machines
Patriot Waverly
Connor's Beaver Power
Connor's Dolly Electric

O'Cedar Mops & Oil
Liquid Veneer and Renuall Furniture Polish
Mops Mop Cloths Mop Wringers

Carpet Sweepers
Vacuum Cleaners
Vacuum Cleaner for Hire, $1.00 a day

The above are just a few of the lines we carry. If the particular article you require is not here, remember, that we are sure to have it in stock if you only ask far it.

We Have It, Can Get It, or It Isn't Made

Telephone 52

S. McIntyre Durham, Ont.

A Western ad. dealing with garden tools and seeds is headed, "Do It Now." "The abundant snowfall of the winter months points to the drought being well broken. The soil conditions are excellent and there is every prospect of a banner year. This district is going to take full advantage and if you are going to be in the band wagon get your order in early for field and garden seeds." The ad. is by Jackson Bros, Ltd., Pincher Creek, Alta.

* * *

An announcement by the Hunter Hardware Co., Wiarton, Ont., deals with the sale of bicycles, tires, tubes and sundries. "Many years of satisfactory service have proven the superiority of —— bicycles," it is headed. Full details as to the model and equipment are given, and prices are listed. Under the heading of bicycle sundries are listed the following: tire tape, pumps, saddles, lamps, mud guards, parcel carriers, patching cement and rubber, ball bearings, carbide.

* * *

Ladies of the community are invited to attend the display of wall-papers by the O. B. Henry & Co., Drayton, Ont., in a local announcement. Continuing it points out that the display will present the season's finest offerings in wall decorations and that many exquisite productions are included in the array.

* * *

"With the coming of spring there also comes the desire for newer and brighter things, both in one's life and the things we see about us," says an ad. by Jeffrey Hardware, Teeswater, Ont. "The trees will soon be putting on new foliage, the fields again will be green and the freshness is all about us. Springtime also brings with it the season of housecleaning and as you go about the house or barn you will see many old and worn-out articles that will need replacing. Some paint here and there will keep pace with nature, and when all is completed you will have the satisfaction of seeing everything in order for another season." The ad. deals with the sale of paints, fencing, kitchenware and oil stoves. Dealing with the latter line the ad. says: "The oil stove will give you heat just where and when you want it. This is the season of the year when an oil stove is needed most, after the coal heater has gone out. The radiant heat from one of these stoves will drive away the chill from a room in a few minutes."

GARDEN IMPLEMENTS

Real good stock and up-to-date, made of best material.

Save money by buying our Garden Implements, real good stock, and up-to-date, made of best material, and the best value.

Garden Hose, from	.50 to .75
Garden Rakes, from	.35 to .90
Garden Spades	$1.60
Garden Trowels, from	.25 to .65
Pruning Shears, from	.50 to $1.75
Pruning Saws, from	.75 to $1.00
Grass Shears, from	$1.25 to $2.50
Dung Forks	$1.80
Lawn Mowers, from	$7.50 to $10.00

Hanbury Hardware Co., Brandon, Purchased by Wood, Vallance, Ltd.

Entire Wholesale Hardware Stock of Brandon Concern Taken Over—To Retain Chain of Retail Hardware Stores

MESSRS. Wood, Vallance Limited, wholesale hardware, automobile accessories, and sporting goods firm, of Winnipeg, have just completed a deal with the Hanbury Hardware Co., Ltd., of Brandon, whereby they purchase and take over the entire wholesale hardware stock belonging to that concern. The transfer is to occur at once.

Although the Hanbury Hardware Co. are discontinuing the wholesale business they retain their chain of retail hardware stores and lumber yards in different parts of Manitoba and Saskatchewan, which have been conducted under the name of the Manitoba Hardware & Lumber Co., Ltd.

Messrs. Wood, Vallance, Limited, do not intend to continue the Hanbury business at Brandon. They will remove a portion of the stock to Winnipeg, while the balance goes to Regina, where a large warehouse for the purpose of handling their wholesale trade in the territory tributary to that point is now in the course of construction.

The Regina branch warehouse is expected to be completed about the beginning of next July. The present house at Hamilton, Ontario, was established in the year 1849 and the firm there are now putting up a new warehouse embodying all the latest features of construction at a cost of approximately five hundred thousand dollars.

Variation in Metal Prices During The Past 20 Years

London, Eng.—An interesting and instructive chart has been compiled showing the prices on the first day of each month during the past 20 years (1900 to 1919, inclusive) of spelter, standard copper G. M. tin, soft lead without silver, and Scotch and Cleveland iron.

In 1914 spelter prices ranged from $180.06 to $104.02; in 1915 they touched $559.65, but were also as low as $136.26; in 1916 they ranged from $535.32 to $194.66; in 1917, from $284.69 to $206.83; in 1918, from $272.52 to $243.33, and in 1919, from $284.69 to $167.89—all per ton of 2,240 pounds. For standard copper, the highest price per ton occurred in 1916, namely, $744.57; in 1917 the maximum was $683.74; in 1918, $596.15, and in 1919, $581.55. In 1906 the highest price was $532.88, and in 1907, $545.05; the lowest maximum price, $277.39, as well as the lowest minimum, $219.60, occurred in 1902.

G. M. tin touched $1,941.73 per ton in 1918, and $1,677.72 in 1919, and was lowest at $474.48 in 1901. Soft lead reached its highest, $222.64 in 1919, and its lowest, $48.67, in 1902. Scotch iron prices are given in the chart from 1900 to 1903 and Cleveland iron thereafter; taking the two together the highest price per ton was recorded in 1919 at $38.93, and the lowest, $10.14 in 1904.

Merchants Protest Low Postal Rates

Dominion Executive of R.M.A., on Behalf of the Merchants of Canada, Make Representations to the Postmaster-General—Point Out That Public Money Enables Mail Order Houses to Deliver Goods

REPRESENTATIONS on behalf of the retail merchants of Canada have been made to the Honorable P. Blondin, Postmaster - General, Ottawa, by the officers and executive of the Dominion Board of the Retail Merchants' Association. Attention is drawn to the dissatisfaction and unrest that is felt among retail merchants generally, owing to the great development of a few mail order houses who, in the opinion of the Dominion executive, have become immensely wealthy by taking advantage of the low postal and railway rates at the expense of the general public, for the reason, it is pointed out, that they have been, and are using, public money to enable them to have their goods delivered in all parts of Canada, at what, it is considered, is a direct loss to the Government and against the best interests of the citizens and tax-payers of every municipality of Canada.

Making Canada Prosperous

It is urged that Canada can only become prosperous by having prosperous cities, towns and villages located in convenient parts so as to be of service to the agricultural community, and to those engaged in mining, fishing and other productive pursuits, as well as to serve all those who are engaged in all sorts of occupations and professions and who make up the civil life of the community.

As an association of retail merchants it is asserted that the occupation of the retail merchant is absolutely necessary, and that his services cannot be dispensed with. He therefore claims the same protection from the Government of Canada that is tendered to every other class.

Present Conditions

From facts the Dominion Board has been able to secure, it is claimed:

(1) That the contract made between the Postal Department of the Dominion Government and the railway companies of Canada for carrying mail matter, including parcel post, is much below the cost of carrying the same and consequently, now that a large part of the railway corporations have been taken over by the Government, the loss so sustained is coming directly out of the public treasury of Canada, to the detriment of the growth and development of the cities, towns and villages of Canada, and for the special advantage of a few mail order house proprietors.

(2) That, in the opinion of this board, if the proper cost for carrying parcels by mail was charged against the said parcel post, that the cost of postage stamps on letters would be greatly reduced.

(3) That, the present rates of wages and commissions that are being paid to the rural postmasters, mail carriers and postal clerks are not in proportion to the service they render, and as this large army of people is being underpaid they are suffering at the expense of the public of Canada, and the mail order houses are receiving the benefit to the detriment of the growth of the cities, towns and villages of Canada.

(4) That when the Post Office Act was amended creating zones of twenty miles radius, each increasing the cost of the mail service the further they proceeded from the point of mailing, it was understood at that time that this plan would be carried out in reference to mail order house catalogues as well as to all articles sent by parcel post. Since then, it is learned, that mail order houses send their catalogues by freight or express from their central warehouses to the central post office within the twenty mile zone, and from this point they are delivered, thus defeating the original proposal.

In conclusion the Postmaster-General is reminded that a resolution was passed at the last meeting of the Dominion board, requesting the Dominion executive officers of the association to interview the Postmaster-General on this important matter, and to request him, along with other members of the Dominion Cabinet, to appoint a special committee from the members of the House of Commons to hear evidence on this subject and investigate the same, and provide the necessary remedy.

British Retail Opinion of Canadian Hardware Imports

Representatives of Five Leading Retail Stores of London, Express Opinions of Canadian Hardware Lines—Trade Not as Big as It Could Be

IN its March issue the "Canadian Export Pioneer," published in London, concluded an interesting series of interviews with leading British buyers upon the quality and success of Canadian products in British markets. Representatives of the five greatest London departmental stores gave their opinions freely upon their Canadian purchases. The following concerns, buyers of many millions of Canadian manufactures yearly, were interviewed:

Army and Navy Stores.
Harrods.
Civil Service Co-operative Association.
William Whiteley, Limited.
Selfridges.

Almost the entire range of Canadian manufactured exports was covered by one firm or another, and the accompanying summary represents their opinion on imported lines of hardware, etc.

Hardware Future Good

A majority opinion agreed that Canadian trade under this head was by no means as large as it might be. Canadian articles were in good demand, and with the exception of lines of enamelware were entirely satisfactory. All the representatives could not say as much for Canadian selling methods, however, and Harrods and the Civil Service Co-operative Association mentioned illustrations of failures that cost trade. Harrods accepted a Canadian stove, and wished to place orders, but the Canadian agents failed them utterly and they were forced to give the same order to an American firm; the Civil Service stores ordered Canadian oil stoves at 44s. and before they arrived a competitor was buying the same stove at 37s. 6d. In both cases the product was preeminently desirable. Whiteleys considered that the cheap Canadian lines of enamelware and tinware failed in attractiveness, but believed that Canadian manufacturers could cut into the American market in many other hardware lines. The general impression was that the opportunities for the future were greater than present trade, and much of the discussion upon this department concerned the English desire for Canadian lines which are not at present supplied.

Enamelware and Tinware

An excellent demand exists in the Britsh Isles for enamelware, tinware, and aluminium ware, but the British market was rather critical of the Canadian product. Selfridges declared that

EDITORIAL COMMENT

DEALERS SHOULD BE POSTED ON ANTI-GLARE LAW REQUIREMENTS

IN the sale of anti-glare headlight lenses and other devices, which will be active in the near future, owing to the enforcement in Ontario of such regulations, the dealer can be of great assistance to customers in posting them as to the requirements. It is not alone necessary for the automobile owner to purchase a set of headlight lenses and put them on his car, for manufacturers of the best devices require that the headlights and bulbs be correctly adjusted in order to secure best results from the use of their lenses. A lens applied upside down will intensify glare and a bulb not correctly adjusted to the correct focal point in front of the reflector will greatly impair the illumination of the headlight. On such points as these the dealer should be posted. A further outline of this subject with illustrations appears elsewhere in this issue.

THE OUTLOOK FOR IRON AND STEEL

SPEAKING of the outlook for iron and steel, John A. Topping, chairman of Republic Iron & Steel Co., told the convention of the American Iron and Steel and Heavy Hardware Association that high prices are likely to remain while the present condition of demand exceeding supply exists. In view of expected growth in the shipbuilding industry, in the production of motor vehicles, and in the construction of buildings, railway equipment, etc., Mr. Topping sees justification for his opinion that prices cannot decline. He agrees that high prices may somewhat curtail buying, but states that this will not be the case to the same extent as if iron and steel stood alone on the peak of high prices or if the character of the demand was of a less necessitous character. By comparison, he states iron and steel prices are not high when thus considered.

EFFORTS OF BRITISH AND U.S. INTERESTS TO SECURE OIL CONTROL

THE competitive efforts of British and United States interests to secure control of the world's oil supply is being watched with interest and in this connection the recent announcement that British interests have secured director control of the Shell Oil enterprise is significant, for it is stated that this step will also bring the Royal Dutch Company into line. If this is the case, these companies, along with other British interests, will give to Britain control of about three-fourths of the known oil areas of the world outside of the United States and Mexico. British interests are confident that through this control the United States will in ten years be partly dependent upon British supplies. Since 1861 the United States has produced two-thirds of the world's petroleum and now produces about 66 per cent. of the supply. The 1919 output was some 376,000,000 barrels, though consumption for that period was greater than the supply.

WILL BE A FORMIDABLE COMPETITOR OF U.S. STEEL CORPORATION

MUCH interesting comment is appearing in United States papers concerning the formation of the British Empire Steel Corporation, merging as it does a number of the leading Canadian industries. The fact that the new corporation presents a potential competitive factor of the United States Steel Corporation does not seem to be comprehended by people of the United States, according to opinion expressed through their papers, though some there are which give full credit to the possibilities lying before such an enterprise in securing a large portion of the world's steel business. Those expressing this opinion are cognizant of the fact that the Canadian project is backed by the interests of both Canada as a colony and also those of the British Empire. It is thought to be significant that while the United States Department of Justice is taking action against the United States Steel Corporation on the grounds of it being a combine, Canadian and British interests are inviting the utmost co-operation among steel, coal and iron ore interests to stimulate production. Securing, as it will, preferential treatment in the British markets of the world, the enterprise should soon be a formidable competitor of the United States Steel Corporation.

How to Preserve Window Trim Material

Valuable Aids Supplied by Manufacturers Are Often Neglected—A Monetary Loss to Both Manufacturer and Retailer—A Suggestion for Preserving Window Trims

Written for Hardware & Metal by G. O. White, The Sumner Co., Moncton, N. B.

IS IT because they cost us nothing, a lack of appreciation, pure carelessness or because a good way has not been figured out for preserving them, that so many merchants and window trimmers do not give the attention and take the care of the window trims, posters, cut-outs, etc., which some manufacturers furnish so freely but at no small expense to themselves?

A recent issue of an American paint publication in a short article under the heading "Who will solve the advertising waste problem?" quotes Luddington Patton, general chairman of the regional organizations of the paint and varnish industries, as saying that in his judgment fully 75 per cent. of the advertising matter sent to jobbers and retailers of paint by manufacturers is never distributed, and is therefore wasted.

It is not the writer's intention to go into the complex question of the general distribution of advertising matter, but to deal with one particular avenue of waste by which the manufacturer suffers through the carelessness of the retailer, and to point out to the merchant the advantage to himself of adopting a system for taking the proper care of window trims.

Manufacturers Should Use Mailing Lists

I have always been a believer in mailing lists as the best method by which the manufacturer can place literature in the hands of the trade. Jobbers will willingly furnish lists of the customers to whom they are selling and to whom they would like advertising matter sent. Where large packages of such literature are sent direct, it is often left around and eventually ends up in the discard. Manufacturers frequently flood dealers with display cards and circulars dealing with lines not handled by that particular dealer. The idea is to stimulate demand but the results obtained are naturally out of all proportion to the cost, in such cases. One circular sent with a personal letter announcing an "added line" or indicating the advantages of a certain line which the dealer has not formerly seen fit to stock, will certainly accomplish more. Then if an order is forthcoming it can be found out how much advertising matter will be required by that dealer.

Thousands of circulars for enclosure are sent out annually by manufacturers who have not any idea as to how many of them will be used. Apart from the use of mailing lists furnished by the jobbers it might help for the manufacturer to find out how much each dealer will distribute and confine the supply to that amount.

Window Trim Material is Valuable

There are few merchants who do not fully appreciate the value of their windows as an advertising medium. It is perhaps the best advertising factor they have, for it enables the display of the article itself, and the "art of suggestion" can be used in its most subtle form. Men, women, and children alike are attracted by pictures and bright colors, and so the cut-outs, posters, banners, etc., that the window trimmer uses, make their own special appeal. They are one of the best mediums through which the dealer can increase his business. But does the dealer appreciate and care for them as he should or does he figure that if he loses or destroys them that he can easily get more for the asking? I fear too often that the fact that the securing of these posters costs nothing in money and very little effort on the part of the dealer, led him to wastefulness not intentionally but thoughtlessly.

When a window trim reaches the dealer what does he do with it, providing he decides to make use of it at that time? Does he stand it in some corner out of the way where he will probably forget it, or is it left around till some box or keg is set on it and spoils its use. Or does he tie it up again carefully, label it and file it away safely where he can lay his hands on it at a moment's notice? And what does he do when he takes out a window? Does he sweep some of the trim out, put some of it here and some of it there, so that it will take half a day to again collect it?

File such literature away for future use. A file is easily constructed. It should be built high enough off the floor to escape the dirt, and should be large or small according to your special requirements. Make it four or five feet high and about the same depth, for some of the present trims are large. Place it wherever it is most convenient and make it strong enough so the top can be used for stock. Another plan would be to place the shelving above. Tag each parcel with the firm name and the particular goods which are illustrated. Five sections can be lettered according to the alphabet with one section for "specials." Following this plan will save time and trouble, will be another business system added to the business and will help to solve the wasted advertising matter problem.

AMENDMENTS TO GAME AND FISHERIES ACT DO NOT AFFECT FISHERMEN

Some discussion arose in the Ontario Legislature concerning the act to amend the Game and Fisheries Act, whereby certain restrictions hitherto applying to guides for hunters were applied also to fishers. Objections were made that a man could not go out for a day's fishing, hiring a boat, without seeing that the man he employed held a departmental certificate. A penalty attached for this line of action was struck out of the bill and restrictions on granting licenses for hunters' guides were not permitted to extend to the fishing industry or sport.

BRITISH RETAIL OPINION

(Continued from page 39.)

a satisfactory introduction of such lines could only be made through a study of British tastes. In enamelware, the Army and Navy stores did not handle Canadian goods because of its lack of the white interior finish so greatly desired by British housewives. Galvanized dustpans, baths and pails were in strong demand, and Whiteleys believed that such Canadian articles might be marketed. Cheapness, however, was the great essential in such lines.

Woodenware and Fibre Articles

One large Canadian concern has created an excellent impression for Canadian woodenware and fibreware upon the British market. Four of the firms interviewed expressed marked appreciation of the quality of the Canadian articles. Army and Navy stores have dropped all other manufacturers for their Canadian connections, and Selfridges considered many Canadian wooden articles to be the finest on the market. Harrods are importing large quantities of wood fibre pails direct from Canada, but believe that the Dominion will have difficulty in competing with Holland in the general run of woodenware, as the ocean freights are abnormal, and the Dutch article is excellent. The Civil Service stores consider the average of Canadian woodenware to be better than the corresponding British product.

Articles particularly in demand were tubs and pails, wash boards and pastry boards, rolling pins, clothes pins, and sleeve boards. In regard to brooms, the Canadian broom is excellent, but the British domestic is prejudiced against a flat broom, and the home manufacturers had specialized on brooms to a greater extent than the Canadians. Canadian stepladders were considered to be rather heavy and clumsy, but Army and Navy stores believe that Canadian fibre trunks would take on the British market.

Justifies Freight Rates Increase

Information Supplied "Hardware and Metal" by D. B. Hanna, President of Canadian National Railways, Shows Relation Between Operating Costs and Revenue Which Justifies Higher Rates on Freight

As a result of endeavors to secure definite information as to the facts which justify increased freight rates, HARDWARE AND METAL has been provided with the following information dealing with operating costs, revenue, etc., by D. B. Hanna, president of the Canadian National Railways.

"In trying to establish when the high cost of living began to affect the operation of Canadian railways," says Mr. Hanna, "I came across the interesting fact that away back in 1875 the railways of Canada on the average got more for each ton of freight transported than they have received in any year since then, up to and including the year ended June 30, 1918, which is the last year for which the Government statistics for all Canadian lines are available.

"Beyond any doubt, the average distance the freight was hauled in 1875 was less than in 1918, as in 1875 there was no transcontinental line. Canada in all had 4,804 miles in 1875. The cost of running a train one mile was about 90 cents. We find that in 1875, on the average, a locomotive moved only 5,786 tons of freight and 5,296 passengers, whereas in 1906 the average locomotive moved 19,773 tons and 9,549 passengers. When this information is coupled with the facts that the average earnings per ton carried showed a decline, whereas the earnings per freight train mile showed a steady move upwards, a pretty good indication is obtained that the advances in methods of operating were also being carried on during this period.

"By 1907 the cost of running a train one mile had advanced to $1.249, or an increase of 57 per cent. over the average cost for the years 1890 to 1899 inclusive.

"From 1907 to 1918, in the face of the increases in the cost of labor and every known commodity the railways year by year, up to and including 1917, were able to practically offset increases in expenses by economies of operation, and with an average revenue per ton per mile that declined, were able to generally increase the net earnings per mile.

"A table showing the very low average return the railways got for moving a ton of freight one mile during the period from 1907 to 1918 indicates a decline from .815 in 1907 to .736 in 1918.

"During this period (1907 to 1918) the freight density, which is the term used for the number of tons hauled one mile per mile of line, increased from 518,485 tons in 1907 to 798,093 tons in 1918.

"A general idea of the magnitude of the railway development may be obtained from noting that the operating expenses of the railways increased from a total of $146,738,214 in 1907 to a total of $273,955,436 in 1918.

"Total operating expenses per mile of line increased by $2,425, viz.: from $4.621 to $7.046, or 52½ per cent. during that period.

"The average compensation of the individual railway employee increased from $473.50 in 1907 to $1,061.46 in 1918, or 124 per cent.

"The cost of fuel, which is the largest single item of material, increased from $2.69 to $5.17 per ton, or 92 per cent.

"It should here be pointed out that these increases in expenses do not include the very much heavier expenses which were laid on the railways in Canada in the latter half of 1918, and in the year 1919 by reason of adopting the McAdoo scale of wage increases.

"From 1907 to 1917 Canadian railways collectively were able generally to increase their net earnings per mile of line even though absorbing 14,982 miles of railway, but expenses mounted too rapidly to enable this to be done in 1918. For the year ended June 30, 1918, the total net earnings as compared with the previous year fell from $87,880,842 to $56,264,714, decreasing the net per mile from $2,276.46 to $1,447.17, due to an increase in operating expenses over 1917 of more than $51,000,000. Had the estimated value of the first freight (and passenger) increase for an entire year been added to the gross of 1917, it would have produced an increase of only about $28,000,000, showing how inadequate was the relief granted to the railways at that time. The estimates of the McAdoo Award increases and attendant expenses are in the neighborhood of $77,000,000 and against this the railways have been allowed the additional freight increase which was estimated to produce approximately $43,000,000, so that the two increases together fall short by about $57,000,000 of re-establishing the relation between gross and expenses that existed in the year ended June 30, 1917, and it must be remembered that, due to the falling off in traffic, the increased rates have not produced as much additional revenue as was estimated."

Decorated Parade Featured "Bicycle Week"

Ottawa.—A costume and decorated bicycle parade was held in connection with "bicycle week." The parade assembled at Cartier Square and the judging took place at 7.30 p.m., after which the cyclists toured the down-town streets. Fifty dollars in prizes were given for the decorated bicycle competitions and awards were made for the handsomest turnouts as well as the funniest outfits.

Arrangements were made to take care of a crowd of five hundred bicyclists. Handsome souvenirs were given to all riders who took part in the procession.

Somebody At Work

EVENTS IN THE TRADE

Business Changes

Montreal.—Ontario Hardware and Paint Store organization has been dissolved. The business is being continued under the same name by Jos. Veisov.

Fire Losses

Brantford, Ont.—The building occupied by the Buck Stove Works was badly gutted by fire recently.

Obituary

The death is announced of Mrs. Sarah Ann Vokes, mother of Miles Vokes and James Vokes, hardware merchant, of Toronto.

Hurled Through Window

Stratford.—B. F. Kastner, a well-known hardware merchant, was severely hurt when jammed into a store front by an automobile. He had left the car in gear, and when he cranked it, it ran away carrying him on the bumper. The store front was completely smashed, Mr. Kastner being thrown through the window.

To Erect New Factory

Joseph Rodgers & Son, Limited, Sheffield, England, propose to enter the stainless steel manufacturing field and are about to erect a factory, HARDWARE & METAL is informed, for the production of this steel, and the use of which has become popularized during the past few years.

Montreal Bicycle Parade

Montreal.—The annual bicycle parade of the Canadian Wheelmen's Association held at Montreal attracted some four hundred riders. The day was fine and this was responsible for such a wide interest.

A start was made from the new Cartier Monument on Fletcher's Field, and the entrants in this contest made a detour of the city, finally arriving at Lafontaine Park, where prizes were distributed. The contestants were led by two members of the Mounted Police Force, followed by judges in automobiles and a band.

Daylight Saving and Half Holidays

Sudbury, Ont.—The Town Council has adopted summer time from May 1 to September 30, and local stores will close at 12.30 p. m. every Thursday, commencing May 6th, and ending Thursday, August 26th.

Kitchener, Ont.—Local stores will observe Wednesday half-holiday on Wednesday afternoon during May, June, July, August and September.

Port Burwell, Ont.—Local stores will observe Wednesday afternoon as a half-holiday each week from May 19th to September 22nd, closing at 12.30 p.m.

The Barrett Company to Build

Announcement is made that The Barrett Company, Ltd., roofing manufacturers, will erect a $150,000 warehouse at the corner of Keating and Saulter Streets, Toronto.

Heavy Demand for Insecticides To Erect New Factory

Montreal.—Speaking with Royal Cluxton, manager of the Canada Paint Co., Ltd., manufacturers of insecticides, HARDWARE AND METAL was informed that the demands for insecticides this year are away ahead of anything yet developed in the Canadian trade in previous years. "We are very busy filling orders for these lines yet," said Mr. Cluxton, "that is, on insecticides wanted for this year's use. And there is also a considerable demand from Europe, where the supplies seem to be inadequate."

It appears that there has been a great demand from all sources this year, and, as stated in HARDWARE AND METAL on several occasions, the farmer, the back-lotter, and many others have come to look upon the use of insecticides as a necessity and a blessing. The demand for these will doubtless be greater each succeeding season, for it has been found better to spray freely than to suffer a drawn-out visit of the insect pests. Greatly-increased production has followed the use of proper sprays and insecticides.

Gathering of Hardware Dealers From All Over United States

As a part of the development of its new distribution plan, the Winchester Repeating Arms Co. announces a gathering of hardware dealers from all parts of the United States, at the main plant of the company in New Haven, Conn., the last week of June. This plan is said to be a thing without parallel in the history of hardware merchandising.

The Winchester Company is inviting every one of the thousands of retail hardware men who have accepted the opportunity of co-operating in the Winchester plan to go to New Haven for the largest convention of hardware men that has ever been held in the United States, which will also be the First National Convention of Winchester agents.

Waterloo Saves Daylight

Waterloo.—As the result of a canvass made by members of the town council among the employees in some of the factories of the town to ascertain their attitude on daylight saving, a large majority signed in favor of summer time.

Must Ship Goods Collect

Ottawa.—Canadian exporters will be obliged to ship freight to the U.S. charges "collect" as long as the Canadian railways refuse to accept prepayment of such charges.

The Canadian Railway Commission has issued an order dismissing for want of jurisdiction over the subject matter thereof, the complaints before the commission on March 6, in Toronto, and March 16 and 17 in Ottawa, by boards of trade of Toronto and Montreal, the Canadian Manufacturers' Association, and a score of Canadian exporters protesting against the action of Canadian railways in ordering their agents not to accept prepayment of freight charges to the U.S. on account of the adverse exchange situation.

The judgment of the railway commission, which will give the precise reasons for its dismissing the application of exporters, has not yet been handed down.

More Safety Razors From Canada to United Kingdom

London, England.—Figures of imports of hardware, hollowware and cutlery into the United Kingdom during March from Canada are now available.

The only article which shows a material expansion over the previous month is the safety razor, the imports of which in March totalled nearly 335,000 dozen, compared with 23,000 dozen in February. The increase is principally due to Canada having sent 235,600 dozen last month, compared with 2,360 dozen during February. The imports of hardware and hollowware generally show a decrease. The figures for wrought enamelled hollowware show a reduction of more than half compared with February, and those for enamelled cast hollowware have doubled.

Of hardware other than hollowware, the United Kingdom imported from Canada 612 cwt. valued at $10,335. Of wrought enamelled hollowware imports of 63 tons are recorded, having a value of $35,785.

Imports of safety raors from Canada to the extent of 235,698 dozen were made during the month, having a value of $197,125.

Big Steel Plant for Sydney

Sydney, N.S.—It is reported that construction would begin this year on a $50,000,000 steel plant, a $3,500.000 dry dock, a $1,000,000 ocean terminal, and an $800,000 hotel. The interests behind the project were not mentioned, but it is believed that the new enterprises will be one of the British Empire Steel Corporation's new projects in carrying out its plans for expansion.

A Phase of the Steel Plate Situation

Producing mills in the United States, upon which the Canadian trade so largely depends, have been unable to meet the orders that have been placed with them. The situation has been aggravated by the labor disturbances that came along unexpectedly, in part, and by other serious difficulties which arose overnight. This situation has meant a pushing forward of delivery dates for plates that had been promised early in the present year. Such deliveries could not be made because of enforced shut-downs. Then, when production was recommenced, it was but logical that orders would have to take their turn, and HARDWARE AND METAL is informed that the mills have been doing everything possible to take care of the trade dependent on them for their raw material. While not giving manufacturers all they asked for, the mills have, in many instances, HARDWARE AND METAL is advised, been supplying enough tonnage to enable such manufacturers to take care of the orders already in hand reasonably well. While delivery of placed orders has had to be advanced into the second and third, and even into the fourth quarter of 1920, it is expected that supplies will come along in a fair proportion, as related to the extent of orders now in hand.

GOOD SUPPLIES OF FIREARMS FROM ENGLAND

According to F. E. Fraser, of the Fraser Company, Montreal, who has just returned to Canada after a business visit to the Old Country, fairly adequate supplies of sporting rifles will be available for the Canadian trade this year. Already, Mr. Fraser states, shipments are coming to hand, and a weekly arrival of sporting rifles is looked for, so that the frequent arrival of these goods, very difficult to procure during the war, will serve to supply the Canadian hardware trade with supplies which they probably need more or less urgently.

There have been difficulties, of course, in the way of production. Labor demands made on the manufacturers in England have been many, and still the mechanics have been well paid. Manufacturers are not, Mr. Fraser states, expecting to make big returns on their investment in arms manufacture, not at the present time. Wage and tax demands prevent this. However, conditions are greatly improved over what they were a year ago, and there is a steadily big improvement. Shotgun manufacture and output will also increase in time.

Formidable Competitor of U.S. Steel Corp.

Thus Say U. S. Papers of the British Empire Steel Corporation—Significance of Merger Not Appreciated by U.S. Manufacturers—Will Have Leading Position in Race for World's Business

COMMENTING on the formation of the British Empire Steel Corporation and its effect on business in the United States, the "Daily Metal Reporter" says as follows:

"While considerable publicity attended the announcement of the formation of the giant steel, shipping and coal combine in Canada, it is doubtful if the significance of the merger is generally comprehended and that it presents a potential competitive factor to be considered by the manufacturers in this country. Although many months will elapse before this new combination will make itself felt in the steel markets of the world, it starts out with all the essential advantages to place it in a leading position in the race for world business."

"Amalgamation of the principal steel companies of Canada and allied metallurgical interests into a single corporation, with the open backing of both the Dominion and the Imperial Governments, calls attention to the difference of view of industrial combinations taken by the British Empire and the United States, assuming each to be truly expressed by their administrative policy," says the "Wall Street Journal."

"The Department of Justice invites the Supreme Court to stultify itself on the United States Steel decision. The British Government invites the steel, coal and iron ore interests of the empire to get together and stimulate production for all they are worth, to their own advantage and that of the empire.

"The Canadian project will go through, backed as it is by the political and financial interests of both the colony and the empire. It will possess vast natural resources of coal and iron ore advantageously placed at tidewater. The corporation will get preferential treatment in the vast British world markets. It will be a formidable competitor even of the great United States Steel Corporation. It may well be the greatest industrial organization in the British Empire. Besides raw materials, rail and water transportation, a nucleus of iron and steel manufacturing units and abundance of British capital, it will have British brains and British banking behind it, and they are making an impressive showing just now while Washington is merely talking.

"Great British ironmasters have no prejudices, and if they can manufacture to better advantage in Canada, producing slabs and billets cheaper from access to raw materials, they can look at the proposition with a vision as wide as this continent or the world itself. They are not afraid of $500,000,000 capital stock, nor of question-begging epithets like that of 'water' which may be, as it was in the case of the United States Steel Corporation, on the proved book value of its stocks, merely intelligently anticipated growth. The British bankers and manufacturers know that the stock exchange will attend to squeezing out the water if there is any. Under the excellent British corporation laws the investor will know exactly what he is buying, and will be trusted thereafter to blow his own nose."

DEATH OF DANIEL STERN

The death is announced of Daniel Stern, publisher and proprietor of "American Artisan and Hardware Record." Mr. Stern was stricken with illness while on a business trip and died at Alton, Illinois, on May 4th, being buried in Chicago three days later with full Masonic honors. A large number of friends and business associates grieve his death, as he was very popular among the trade. Born in Chicago on April 26, 1859, he showed early journalistic ability and throughout his subsequent career he was connected with a number of trade publications. His presence was always welcomed at trade banquets and conventions because he knew how to be helpful and instructive without being dull and prosy. He was a member of a number of lodges, the Hardware Club of Chicago, American Hardware Manufacturers' Association, Iowa Retail Hardware Association and others.

Decline in Output of Canadian Minerals

The preliminary report on the mineral production of Canada for 1919 shows the total estimated value of the metal and mineral production in 1919 was $173,075,913, which is less than the total value reached during any of the three preceding years. The production in 1918 was valued at $211,301,897.

The output and also the value of nickel shows heavy declines, 1919 production being 44,452,953 pounds, against 92,507,293 pounds in 1918.

Zinc showed little change, production for 1919 being 15,869 tons, against 17,541 tons in 1918. Both imports and exports of zinc showed a decline.

The 1918 production of copper was the highest recorded in Canada. That of 1919 is the lowest since 1911. Compared with 1918, copper production shows a decline of 36.7 per cent. in quantity and 52 per cent. in value.

Newsy Notes From Here and There

Toronto.—J. Henry, of J. Henry & Son, hardware merchants, Orono, Ont., was in Toronto this week on business.

—

Winnipeg, Man.—C. C. Craig, manufacturers' agent, Winnipeg, has left on a trip to the coast and will be away until the end of June.

—

Bowmanville, Ont.—W. H. Dunstan, hardware merchant of Bowmanville, has returned from California, where he spent the winter with his son.

—

Sackville, N. B.—W. T. Fisher, president of the Enterprise Foundry Company, has recently been visiting the company's distributors in the West on his return from California where he spent the winter.

—

Montreal.—F. E. Fraser, of the Fraser Company, returned last week from an extended business trip to the Old Country, where he visited the factories of his principals, Birmingham Small Arms Co., Ltd.; J. A. Darlow, of the All-Way Oiler Manufacturing Co., Toronto, was in Montreal this week.

—

Montreal.—Colonel Robert Starke is away this week attending the Southern Hardware Jobbers' Convention in Atlantic City. Col. Starke represents the Canadian Wholesale Hardware Association, of which he is vice-president for 1920; Mr. Marks of Oneida Community, Ltd., Niagara Falls, called this week on the Montreal trade; John A. Fraser, sales manager Lewis Bros., Ltd., was last week in Ontario points, where he spent several days; J. Walker, of the James Walker Hardware Co., Montreal, was in New York during the week; Mr. Marshall of the Toronto Lock Manufacturing Co., Ltd., called on Montreal trade this week.

—

Montreal.—H. P. Goodman, representing H. L. Goodman and Son, importers and exporters, London and Bristol. was in Montreal this week. Mr. Goodman is seeking hardware lines for export to Great Britain and also to India, and expects to visit various Canadian cities before returning.

—

Montreal.—S. M. Ward, trade sales manager of the Canada Paint Co., Ltd., Montreal, is visiting Ontario points this week; George Henderson, president Brandram-Henderson, Ltd., and chairman of the Save the Surface committee, is in Toronto this week attending a convention there of the manufacturers and others interested in the campaign; W. E. Champagne has been appointed as sales representative for the Province of Quebec for the Canada Paint Co., Ltd. Mr. Champagne will make his headquarters at Levis.

—

MONTREAL.—A. C. McQuaig, Montread manager of the Dominion Linseed Oil Co., Ltd., was a visitor this week to New York; W. S. McLennan, general sales manager Brandram-Henderson, Ltd., was in Ottawa during the week; E. W. Ward, recently appointed as assistant trade commissioner, has sailed via England, for Capetown; C. V. Johnston, of the office staff of Brandram-Henderson, Ltd., was last week a visitor to St. John, N. B.; Frank H. Smith, advertising manager Brandram-Henderson, Ltd., spent a few days last week in Ontario points; J. M. Shellenberger of Baeder and Adamson Co., was in Montreal this week.

Iron and Steel Prices Comparatively Low

Authority States High Prices Will Remain as Long as Demand Exceeds Supply—Europe's Production One-Third of Normal—Farmers' Exceeds Steel Consumed in City Skyscrapers Trade in Hardware, Nails, Fencing, etc.,

JOHN A. TOPPING, chairman of Republic Iron and Steel Co., speaking before the American Iron and Steel and Heavy Hardware Association at its convention in Philadelphia on "The Outlook for Iron and Steel," said, in his opinion, high prices will remain as long as demand exceeds supply and that a change from this condition for the iron and steel trade is not yet in sight. He said:

"In considering the present growing necessities of the world for iron and steel attention should be directed to the fact that the 'damming-up' process, through unsatisfied demand so strongly operative during the war, continues, production has not been speeded up to a point of full supply.

"Europe, which ordinarily was more than self-contained in its steel supplies, and had therefore a large surplus available for export, is at present unable to take care of its home requirements, because production is at the lowest ebb ever known. While reliable data is not obtainable, I think it safe to state that Europe's production at present is not in excess of one-third normal.

"Lack of comprehension or consideration, as to the gap between demand and supply is, perhaps, an explanation of the mistaken opinion heretofore held by a number in the steel trade, that prices must decline, as this gap still exists and may be widened, because (aside from a loss in shipbuilding) growth in all other directions seems probable.

"In shipbuilding the pre-war world's estimated annual construction was about 3,000,000 deadweight tons, as compared with the 1919 program of about 8,000,000 deadweight tons, and, as soon as the ship losses from war sinkings have been replaced, future requirements in steel for ships will, undoubtedly, drop back to repair necessities, and to new construction suggested by growth. As against a loss in steel tons for shipbuilding, of possibly 2,000,000 tons, growth is promised by increased requirements in the way of railroad equipment, it being estimated that the present shortage in railway car equipment will require not less than three years of full capacity of shop production, one authority estimating the car shortage at not less than 800,000 cars, to which must be added a large shortage in motive power and track facilities.

"Increased demand is also in sight from the makers of automobiles, trucks and tractors, as indicated by factory extensions now under way.

"That the magnitude of the farmer's business may be appreciated, I would state that good authority estimates the aggregate tonnage of iron and steel required to supply hardware, nails and fencing, used by the farmers, far exceeds the aggregate tonnage annually consumed of steel, in the construction of our city skyscrapers.

"Fear is felt in some quarters, while recognizing growing demands, that high prices will discourage purchasing, and to an extent this, undoubtedly, will be true, but not to the extent that would be the case if iron and steel stood alone on the peak of high prices, or if the character of demand was of a less necessitous character. Furthermore, as all values are relative, iron and steel prices, by comparison, are not high when thus considered; neither are they high as compared with costs, as evidenced by recent financial statements issued by important companies; furthermore, prices are not high, when measured by English or European rates, and are not high when measured by what iron and steel will buy in other commodities.

"If it be admitted that present prices are the effect and not the cause, then I think it may be concluded that high prices will remain, so long as present conditions continue, or until time has wrought the necessary economic changes favorable to liquidation and lower values. This change cannot be effected, in my opinion, until supply exceeds demand, and this condition for iron and steel is not yet in sight; in fact, there is every indication of continued shortage in supply, and of further depletion in stocks on hand."

Trade Inquiries

959. **Pig-iron and iron ores.**—A Glasgow firm are open for quotations for the above, and also for iron and steel scrap in handy pieces suitable for charging into steel and foundry furnaces.

961. **Black plates.**—A Japanese firm wish to receive quantities of No. 30 gauge black plates 35 by 72. Orders for considerable quantities can be placed.

962. **Plumbers' supplies** — A house in Naples is interested in importing the foregoing from Canada.

964. **Varnishes.**—A Turin house wish to buy in Canada the above.

890. **West African trade** — A Liverpool firm of West African merchants wish to be placed in touch with exporters of asbestos roofing, building materials, enamelware, iron bars, wire nails, locks, hinges, galvanized ware, shovels, tools, flour, etc., for direct export to West Africa.

891. **West African trade** — A Liverpool firm of West African merchants ask to be placed in touch with exporters of enamel and galvanized ware, building materials, wire nails, locks, hinges, all classes of hardware, and for direct export to West Africa.

892. **Nails and barbed wire**—A London firm desire to secure from Canadian manufacturers supplies of galvanized bright wire nails and barbed wire for shipment to India

893. **Malleable iron and steel castings, steel blooms, billets and bars.**—A Birmingham company wish to represent in the United Kingdom, Canadian manufacturers of malleable iron and steel castings, and also steel blooms, billets and bars.

895. **Motor cars and accessories.**—A Cape Town firm wish to get in touch with Canadian manufacturers of motor cars and accessories, with a view to taking up agency for same. Correspondence with full particulars requested.

896. **Hardware specialties**—A well-known South African firm of commission agents are in the market for a line of hardware specialties, enamelware, and stoves. Request correspondence with Canadian manufacturers interested in this industry.

897. **Hardware**—A London firm, possessing an established connection in the hardware trade, wish to obtain the representation of Canadian manufacturers of hardware lines.

898. **Hardware**—A Johannesburg firm of general commission agents wish to represent a Canadian hardware manufacturer, and request correspondence, together with catalogues and price lists.

907. **Window glass**—A Cape Province firm of picture framers and fine art dealers wish to obtain sheet-glass from Canada, and will be pleased to hear from any Canadian manufacturer interested as soon as possible.

Catalogs and Booklets

The Stanley Works, New Britain, Conn., have issued a very attractive catalogue dealing with the ball bearing butt hinges. The new catalogue is very nicely illustrated and contains 31 pages, some of which are devoted to description of the working parts, such as the non-rising loose pins and special features of the hinge with the ball bearing washers. Complete list of finishes with the different symbols that represent each is also shown. The above named firm will mail copies on request to readers of HARDWARE AND METAL.

The Plymouth Cordage Company, Welland, Ont., have issued a new general catalogue which contains 94 pages of well-illustrated reading matter. Cuts are profusely used and to good advantage showing testing operation, oil rooms, also other interesting cuts to illustrate the different articles: Many kinds of rope, fibres, clothes lines, tent rope, wheel and transmission, lath yarn, hydro rope, cable rope, binder twine, and other products of their manufacture. A table is also shown giving the approximate dimensions and cubic inches or cubic feet. The Plymouth Cordage Company will mail copies to readers of HARDWARE AND METAL upon request.

Hall & Pickles, 64 Port St., Manchester, England, have issued a very attractive catalogue treating on the manufacture of high-speed tool steels. The new book describes at some length the different processes of making high-speed steel, and contains various other valuable suggestions. There is also a department in the book devoted to instructions for treating, forging, hardening, and annealing, etc., of some of the different brands. There are also several charts showing sizes kept in stock and the different qualities, also equivalent temperatures, weight in pounds per lineal foot of round or square, flat, and other shapes, including a full code for different sizes and kinds, etc. A very interesting tempering chart showing the different colors for tempering many kinds of fine tools, as well as showing another chart of the different heat colors, is included. The manufacturers will mail a copy of this catalogue upon request to readers of HARDWARE AND METAL.

Stanley Rule and Level Company, New Britain, Conn., have issued a new catalogue, No. 120, listing a very complete line of their tools. The catalogue is well gotten out, and in many cases describes fully the construction of the different tools. Among the many lines shown are rules of many different kinds, levels and plumbs of iron and steel, wood, also pocket adjustable, as well as levels for special purposes. Try and mitre squares, angle tools and levels, gauges of many different kinds, steel squares, vises, braces, breast drills, planes, hammers of various kinds, screw drivers, tool sets, chisels, mitre boxes and many other lines of tools. Readers of HARDWARE AND METAL may have a copy from the manufacturers on request.

National Manufacturing Company, Sterling, Ill., have issued a new builders' hardware catalogue containing 112 pages. The new catalogue illustrates many lines of builders' hardware, such as barn door hangers of many kinds, also showing the rail or track, also garage door sets, foot and chain bolts, garage door holders, swinging door latches, also sliding door latches, of different varieties, barn door bumpers, stay rollers, hasps and staples, hinges, washers, corner irons and plates, cellar window sets, cabinet door sets, automatic cellar window sets, foot scrapers, screen and storm sash hangers, cupboard turns and sash locks, butt hinges, and many other kinds of hinges, as well as other lines of builders' hardware. Readers of HARDWARE AND METAL may have a copy from manufacturer on request.

Stove Shortage Likely This Fall

Unless there is relief from the present acute situation in raw materials there is every evidence that there will be difficulty, next fall, in meeting the needs of the trade for stoves and ranges. "The outlook is not promising and conditions are getting worse all the time," said a large Eastern stove maker this week to HARDWARE AND METAL. "We cannot get deliveries of raw material, and the mills will make no promises. They cannot and will not keep promises that they have made, for the switchmen's strike, particularly in the Pittsburgh district, has been prolonged and difficult.

"There has been difficulty, too, in getting coke," continued this manufacturer, "and some mills are already faced with having to close down. If it continues thus, we, too, will have to close. Then, in addition to this the fuel oil situation is getting bad. The refiner has promised us, for instance, a car of oil in a day or two, and then we may get another in two weeks. This will not be sufficient and we may have to close down if conditions do not improve."

Many U.S. Manufacturers to Establish in Canada

Quite an extensive influx of United States manufacturers is developing at the present time throughout Canada. Many manufacturers have definitely decided to locate in Canada, while others have this important matter under advisement and they may arrive at a decision in the near future. It appears that better labor conditions are responsible somewhat for these decisions.

Manufacturers are much interested in the general labor situation and it applies in Quebec province, where strikes are less numerous than they are in many parts of the American Union. Under the changing conditions in many parts of the world to-day the manufacturer must, of necessity, have as much assurance as possible that he will be able to operate his plants uninterrupted.

Of course, these firms desire, primarily, to establish in Canada in order to avoid paying heavy duty on manufactured goods coming into Canada, and in addition to this they desire to secure the benefit of the British trade preference on export to the British Empire.

Among the companies which are interested in establishing plants in Canada is that of the Thomas Edison Company of Orange, New Jersey. This firm may establish a branch in or near Montreal in the near future. If they do establish it is understood that their plant will be an extensive one.

The J. H. Ashdown Hardware Company, Winnipeg, Man., have just issued their new spring auto accessory catalogue. The new catalogue is very well illustrated, and contains 224 pages, showing a very complete line of auto accessories and requirements.

The above-named company state that these are now ready for distribution, and that they will send one on application to readers of HARDWARE AND METAL.

Bring the Farm Trade with

HOMESTEAD LIQUID RED

FOR BARN AND SILO

Homestead Liquid Red offers the farmer an ideal paint protection for valuable buildings, such as Barns and Silos.

A clean, vivid red—it combines good appearance with weather-resisting qualities that recommend it strongly to the farmer painter.

And the farming community knows Homestead Liquid Red. Intensive advertising in the leading Farm Journals and Magazines is convincing thousands of buyers that this C. P. product affords satisfactory paint protection at little cost.

This consumer publicity backed by the guaranteed quality of the Paint itself—is a splendid sales pulling combination to tie up with for the coming season.

If we are not already represented in your own town learn what it means to be a C. P. Dealer Agent. Postcard us for detailed particulars.

THE CANADA

Makers of the famous "Elephant"

MONTREAL TORONTO HALIFAX

to Your Store and

C. P.

INSECTICIDES

Another line to interest your farmer customers is C. P. Insecticides.

Every farmer knows what a serious menace the insect pest is to his fruit and vegetable crops.

C. P. Insecticides afford him an economical and effective means of combatting the insect pests. And here again our consumer advertising will help the C. P. dealer agent. For C. P. Insecticides are extensively advertised in Canada's most widely read Farm Journals reaching and influencing thousands of fruit and vegetable growers all over the Dominion.

Included in C.P. Insecticides are Arsenate of Lead (Dry and Paste) Arsenate of Lime (Kalcikill) Paris Green, Sprayide and Dry Lime Sulphur.

Your share of the Insecticide demand can be secured by means of the C. P. Agency. Write us to-day for full particulars.

PAINT CO., LIMITED

Brand "Genuine White Lead

WINNIPEG CALGARY VANCOUVER

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

Closet and Drain Cleaner

A new chemical compound for opening pipes, drains, etc., is being placed on the market by Allan J. Coleman, 208 N. Wabash Ave., Chicago, Ill. The manufacturer claims that his new preparation is the result of scientific research work and is compounded with the idea of removing stoppages from pipes, drains, or traps, which occur in such inconvenient places that make it difficult to reach by other methods. They claim that their preparation will thaw out frozen stacks and drain pipes, leaving them clear, cleaned, and unharmed, being a powerful heat producer, which will work effectively with cold water. The preparation is put up in one-pound packages, three dozen to a carton.

Pipe and Drain Opener

The above firm also manufacture a preparation for cleaning porcelain and vitreous closet bowls, urinals, traps, etc., and claim that as soon as this chemical touches the bowl it dissolves and immediately begins to decompose the incrustations and, after flushing, this bowl is kept clean and white.

Closet Bowl Cleaner.

They also state that this preparation will effectively remove stains without injury to the bowl or connections and eliminates the disagreeable task of scrubbing the bowl as well as killing unsanitary odors. This preparation is packed in a 24-ounce can, three dozen to the carton.

Combination Socket

The Bryant Electric Co., Bridgeport, Conn., are placing on the Canadian market through their distributing agents, the Northern Electric Co., Ltd., a new double duty socket with pull chain control. The manufacturers describe their socket as follows:

It is a pull chain extension socket with two Edison screw base outlets having a lower socket and a side socket. The lower socket, they state, will carry 250 watts at 250 volts and will take a standard shade holder without interfering with the use of the side socket. The side socket will carry 660 watts at 250 volts, and will take any standard Edison type screw plug. The current is always turned on in the side socket, while a pull chain controls the lower socket. When the socket is attached to rigid fixture, the lamp and shade on the lower socket will retain the same position as they would have if there were no side outlet.

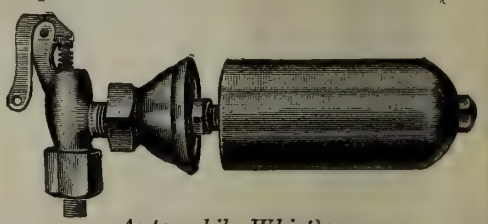
Combination Socket

Automobile Whistle

The Stiles Gillihland Mfg. Co., St. Louis, Mo., are offering to the Canadian trade their new adjustable explosion whistle, which they say is a perfect warning device which may be satisfactorily used for passenger cars, trucks, etc., on account of it being adjustable to any tone or pitch.

The manufacturers claim that this adjustable feature makes it possible to get the desired tone regardless of the compression power of the motor.

In most cases, they state, the device may be installed in place of a priming cup on the cylinder head, this, however, does not include the Ford cars, where it is necessary to install with a special adapter to be used in connection with regular spark plug, although an adapter is furnished with every whistle and either the half inch or seventh-eighth inch will be furnished as required. Another feature the manufacturers point out is the fact that it is unnecessary to drill any holes and practically no mechanical work is necessary to install, and once installed no attention is required.



Automobile Whistle

The device operates by a cord attached to the dash or steering wheel column, and on a slight pull of the cord a valve is opened and the compression is forced through the bell on the whistle.

Aero Cord Correction

The Aero Manufacturing Co., Ltd., Sherbrooke, Quebec, advise that in a new goods item which appeared in May 8 issue of HARDWARE AND METAL, their Aero brand cord was mentioned as clothes line cord. The manufacturers state that this is a general purpose cord which may be used satisfactorily for clothes lines. A typographical error also occurred, cord being spelled card.

Some Belgian Glass to Hand

HARDWARE AND METAL is informed that some box glass has arrived from Belgium, quantities arriving in Montreal last week. This will, in part, be trans shipped to Western points, it is understood, and other shipments may follow. The demands are increasing with the advancement of the active building season and there is likely to be an active demand for all arrivals immediately they are received. While the present difficulties continue regarding the movement of freight from the United States, it is likely that there the receipt of the Belgian glass will be most welcome.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PRICES on hardware commodities continue to advance and many important hardware lines are affected this week. Ammunition has again been revised upwards. Silver flatware also has higher prices. Cast iron, hollowware, electric fans, clothes line pulleys and galvanized clothes line wire all have advanced in price.

Other lines that have higher quotations are: Vulcanizers and vulcanizing materials, plain wire, extras for repacking wire nails, padlocks and night latches, wrenches and screwdrivers, range boilers, handcuffs and leg irons, garden shears, emery, wood planes, repair chain links, cabinet clamps, saw sets, sisal and jute halters, ice tongs, curry combs, machinists' punches, hammers, etc., wax candles, children's sleds and wagons, revolvers, brushes, firepots and torches, cobbler sets, asbestos millboard, hack saw frames, trowels, stocks and dies, hat and coat hooks, post hole augers, surface hinges, iron handles, floor wax, cotton packing, sash and awning cord, golf clubs and fire backs.

The freight embargo on the United States railroads has been the means of tying up many industries and has held up shipments of nearly all hardware commodities, and jobbers state their warehouse stocks are becoming low and immediate relief is not looked for as it is believed that some time may elapse before the congested freight in nearly all shipping centres is straightened out.

The warmer weather of the past few days has stimulated the already heavy demand and jobbers state they are unable to secure sufficient supplies to completely fill their orders, although heavy shipments are being made. Collections are very satisfactory and money continues to circulate freely.

MONTREAL MARKETS

MONTREAL, May 13—Many prices are advanced again this week, and there is practically no downturn on any products. Vulcanizers and vulcanizing materials, patches, etc., have advanced. Plain wire and the extras for annealing have been moved higher. The extras have been revised upward for repacking wire nails in small packages. Padlocks are higher, as are also night latches. Clothesline pulleys have advanced and galvanized clothesline wire is higher in price. Wrenches and screwdrivers are marked up. Malleables are hard to procure and prices are high. Cartridges and loaded shells are costing more through discount revision. New high prices are effective on range boilers and copperware discounts are reduced, effecting an advance of about ten per cent. Handcuffs and leg irons are up. Garden shears are higher and new high levels have been reached for various grades of emery. Wood planes are revised upward. Repair chain links are advanced. Cabinet clamps are up again this week, though an advance was effected only last week. Cast cauldrons are higher as are also frying pans, saw sets and screwdrivers. Gasoline and coal oil are firm and may be advanced. Stoves are scarce and prices may have to be revised upward. Tin, lead and spelter are a bit easier. Trade in most lines has been satisfactorily active.

Vulcanizers and Gums on Higher Price Basis

Montreal.

VULCANIZERS, ETC.—Prices to the trade on Adamson line of vulcanizers, gums, brake shoes, etc., have advanced. The jobbing trade was recently advised of the change, and the new prices given as follows are effective as from May 15:

Vulcanizers—Model E, $1.75 each; Model M, $2; Model T, $3; Model U, $4; Model S, $20.

Repair Gum—¼ lb. rolls, 75c each; ½ lb. rolls, $1.50; 1-12 lb. Kit Rolls, per doz., $3; Quick Patch, can, 50c.

Brake Shoes for Fords—Unlined, with 4 springs, $1.30 pair; lined shoes, with 4 springs, $2.25 pair; Cut-outs for Fords, $2.25 each; Accelerators for Fords, $2.50 each; Anti-Rattler Springs for Fords, 50c pair.

Plain Wire Up 25c; Fencing Sales Heavy

Montreal.

WIRE FENCING.—The movement of made-up fencing is steadily active, and a healthy trade continues to be transacted. Manufacturers state that they have about as much enquiry for various lines as they can now satisfy, and there is no indication of declines in well-informed circles, although some have expected better conditions. Some raw material is said to have arrived from foreign sources. Base price on smooth steel wire is advanced 25 cents per 100 lbs. to $6, while annealing is now charged for at 15 cents over this basis.

These Prices Apply on the Following Locks

Montreal.

PADLOCKS.—Revised prices, of which mention has been generally made in HARDWARE AND METAL, are now available on Yale padlocks, and are as follows: No. 813, per doz., $21; No. 823, $23; No. 833, $26.40; No. 843, $29.50; No. 853, $32.50; No. 863, $41.50; No. 873, $72; No. 326, $14.50; No. 674J, $5.25, and No. 745V, $36.

Night Latch Prices Are Revised Upward

Montreal.

NIGHT LATCHES.—The price basis of various night latches of Yale and Towne manufacture has been advanced and the new quotations are: No. 26, per doen, $8.40; No. 33, $24.50; No. 34, $29.50; No. 37, $33; No. 042, $41.25; No. 042P, $51; No. 42, $44.50, and No. 44, $50.50.

Special Line Pulleys Have Been Advanced

Montreal.

CLOTHES LINE PULLEYS.—Prices have stiffened on "Aero" clothes line pulleys. The new price to the trade is $4.80 per dozen, this making quotations 80 cents a dozen higher than formerly.

Wrench Prices Have Been Marked Higher

Montreal.

WRENCHES.—While there have been many advances on various lines of wrenches, "Hawkeye" make have not been in the limelight for a while. These are now selling on an advanced basis of $7.50 per dozen.

Advanced Prices Out on English Floor Wax

Montreal.

FLOOR WAX.—Last week advices in HARDWARE AND METAL stated that an advance was effective for floor wax. Prices are now to hand on Old English make and are as follows: Case lots, per pound, 73 cents; less than case lots, per pound, 80 cents. This is a straight increase of 10 cents a pound.

Malleable Hard to Get; Many Prices Revised

Montreal.

MALLEABLES.—Jobbers report real difficulties in obtaining requisite supplies of straight malleable lines and also lines in which considerable malleable is used. Some lines have already been revised upward, including cobblers' sets, post hole augers, sash fasts, bench screws, common hat and coat hooks, etc., on which the increase averages ten per cent

Cartridge Discounts Are Revised Upward

Montreal.

CARTRIDGES.—Various lines of cartridges, loaded shells, etc., have been revised. This change applies to Dominion Cartridge Company's shells and cartridges and the new discounts are 30 per cent. and 20 per cent. from the lists recently issued.

Wire Clothes Lines Go to Advanced Basis

Montreal.

CLOTHES LINES.—New high prices are effective for wire clothes lines of the gavanized variety. Prices are as follows: No. 19 x 100 feet and over, per 1,000 feet, $6; 19 x 50 feet, $6.80; 18 x 100 feet, $6.90, and 18 x 50 feet, $7.55.

Range Boiler Prices Now Much Higher

Montreal.

RANGE BOILERS.—Stiff advances have been made for range boilers, and this is due, largely, to the scarcity of plate. The present revised quotations are as follows: 30-gal. Standard, each, $15; 30-gal. Heavy, $18 each. The market is firm.

Handcuffs Are Up; Leg Irons Advance

Montreal.

HANDCUFFS, LEG IRONS.—Prices higher on handcuffs and leg irons. The former are quoted at $6 per pair for polished, and at $6.50 per pair for nickel-plated. Leg irons are selling at $8.50 per pair for polished and at $9 for nickel-plated.

Garden Shear Prices Have Moved Upward

Montreal.

GARDEN SHEARS.—Quotations are moved higher on garden shears. The following net quotations will be of interest to the trade: No. 100 x 9, $23 per dozen; 101 x 9, $25.20; 104 x 9, $36; 105 x 9, $39.60; 106 x 9, $36; 107 x 4½, $19.80.

Emery of Various Grades is Higher

Montreal.

EMERY.—Prices on emery have advanced. The following quotations are made in jobbing circles and prices are per 100 pounds: In 10 lb. packages, Nos. 20 to 50, $9.50; 54 to 60, $10.50; 70 to 120, $10. Flour, $7.20. In 80 lb. barrels the comparative prices are: 20 to 50, $7.20; 54 to 60, $8.50; 70 to 120, $8, and flour, $5.75.

Ice Cream Freezers Are Now Very Active

Montreal.

ICE CREAM FREEZERS.—Prices are fully maintained on ice cream freezers, the basis being unchanged. Demands are said to be extremely heavy at this time and both staple and large sizes are selling freely.

Wood Plane Prices Record an Advance

Montreal.

WOOD PLANES. — "Monty" wood planes are changed in price, an advance being made effective. The advance is about 20 per cent. and prices are: No. 4, each, $1.55; No. 5, $1.60; No. 6, $1.70; No. 61, $1; No. 62, $1.10; No. 63, $1.15; No. 225, $2.10; No. 226, $2.20; No. 227, $2.30. Half rounds are also advanced: No. 6 H. R. are $1.75 per pair; No. 8, $1.75; No. 10, $1.80; No. 12, $1.80; No. 14, $1.90; No. 16, $2; No. 18, $2.10, and No. 20, $2.15.

A Second Advance For Cabinet Clamps

Montreal.

CABINET CLAMPS. — Prices are again revised for cabinet clamps, although a change was recorded in HARDWARE AND METAL only last week. No. 3 are priced now at $9 per doz.: per doz., $1.55; 5-16 in., $1.65; ⅜ in., $20.25; No. 8, $35; No. 10, $40.50, and 12 in., $52.50.

Missing Link Prices Have Moved Upward

Montreal.

MISSING LINKS.—Prices are revised upward on repair links of polished make and some of the new prices are: ¼ in., per doz., $1.5; 5-16 in., $1.65; ⅜ in., $1.75; 7-16 in., $2.10; ½ in., $2.30; ⅝ in., $2.80, and ¾ in., $4.80.

Molasses Gate Costs Are Revised Upward

Montreal.

MOLASSES GATES. — Prices are much higher on "Stebbins" molasses gates. No. 1 are quoted at $6.30 each; No. 2, $7.20; No. 3, $8.40; No. 4, $9, and No. 5, $10.

More Money Charged For Cast Cauldrons

Montreal.

CAULDRONS. — Prices are higher on cast cauldrons. These, with cover, are selling in the plain style at 8 in., $1.30; 9 in., $1.45; 10 in., $1.65; 11 in., $1.80; 12 in., $2.05; 13 in., $2.30; 14 in., $2.60; 15 in., $3.10, and 16 in., $3.30. The corresponding prices for the flanged pattern are as follows: 10 in., $1.65; 11 in., $2.05; 12 in., $2.40; 13 in., $2.60; 14 in., $2.90; 15 in., $3.45, and 16 in., $3.70.

Saw Sets Advanced; Screwdrivers; Fry Pans

Montreal.

VARIOUS LINES.—Advanced prices are effective for Whiting saw sets, $7.50 per dozen now being quoted. Pocket screwdrivers are also marked higher at $3 per dozen, the previous price being $2.78 per dozen. Cast iron fry pans are higher in price at 95 cents each for the No. 8 and $1.05 each for the No. 9.

Sheet Outlook Has Not Improved Any

Montreal.

SHEETS AND PLATES.—Prices have not lowered on sheets and the trade has had little or no encouragement regarding replenishment of stocks. The transportation problems are still acute, and supplies of sheets are daily growing smaller according to jobbers. The basis is distinctly a nominal one.

BLACK SHEETS—	
10 gauge	9 00
12 gauge	9 05
14 gauge	9 10
16 gauge	9 35
18-20 gauge	9 40

18 and 20 gauge	....	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Lead Products Are on Unchanged Basis

Montreal.

LEAD PRODUCTS.—Prices have been steady on lead products. Pig lead has been easier, and this may make some favorable change in the price of various products, but the cost of the manufactured products is kept high owing to labor costs. There is a fair amount of trading.

Lead pipe, per 100 lbs.	....	17 50
Lead waste, per 100 lbs.	....	18 50
Note.—Lead pipe is subject to a discount of 10%.

Rope and Cordage Are Actively Moving

Montreal.

ROPE AND CORDAGE.—While prices have been unchanged for some weeks, the market is quite steady, and sales are better. The opening of navigation has been a help in improving demand, and from the trade there has been a fair request of late. Pure manila basis is quoted 35½ cents, Beaver and British at 28 cents, and sisal at 22 cents.

Activity Expected on Old Materials

Montreal.

OLD MATERIAL.—While there has been little change over last week in the old metal list, activity is looked for. Enquiries from the dealers in the country, as to present buying prices, are more numerous, and as a result it is expected that shipment coming forward will be greater in the near future. The basis is steady and unchanged.

Dealers' Buying Prices—		
Old rubbers, boots and shoes	....	0 08¼
Overshoes, lumbermen's rubber boots	....	0 05½
Overshoes, etc. (trimmed)	0 05	0 06

Machinery, cast (ton)	40 00	42 00

"Extras" Advanced on Nails and Boxing

Montreal.

NAILS.—The only change of the week is one for coating and bluing. A charge of 35 cents extra over base is now charged for this, the former charge being 25 cents. For packing in 25 and 50 pound boxes the extra charge is $1 per cwt. extra instead of 50 cents, while in 10-lb. lots the differential is $1.50 over the base keg price. These rules apply for staples. Wire nails, while firm, are unchanged at $5.85 per keg, with cut basis holding still at $6.35.

AXES—The scarcity of iron and steel is developing a situation where nearly all commodities using iron or steel as a basic material are being revised upwards as a result. An important hardware commodity to be affected this week is chopping axes, single and double bits of all kinds, also boys' and hunters' axes of the Smart's manufacture have been advanced $1 per doz. on the list.

Iron Bar Stocks Reported Limited

Montreal.

STEEL AND IRON.—Bars are moving out quite freely, and jobbers state that it is somewhat difficult to obtain requisite supplies of various sizes. Some state that they have provided for their needs ahead of time and that it is only these precautions that now enable them to fill orders. Prices are firm but unchanged.

IRON AND STEEL

Iron finish machinery steel	...	$4 95
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		4 90
Tire steel		5 10
Toe calk steel, per 100 lbs.		5 80
Band steel		5 80
Harrow tooth steel		5 05
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 55
Refined iron, per 100 lbs.		5 55
Mild steel		4 90

3-16 and thinner flats in iron or steel take extra 50c. per 100 lbs. over base and regular extra.

Copperware Advanced; Stoves May be Scarce

Montreal.

STOVES AND WARES.—Prices have been very firm on stoves, the demand has been maintained and booked orders have been such as to absorb, says a prominent manufacturer, the probable capacity of the foundries. That is to say, the raw material outlook is such that makers feel they cannot promise to take care of a great deal of increased demand, over and above that which has already been made. The ware list feature of the week is that of a change in the discount on copperware. The line is advanced about 10 per cent., and the plus discount is now 50 per cent.

No Change Yet But Gasoline, Oil May Go Up

Montreal.

GASOLINE, OIL.—Prices are very firm on gasoline and coal oil. The undertone suggests that there will be an early revision upward, and, following the increases made in the United States this week, the local refiners anticipate that advices will be received shortly making effective higher prices for both commodities. The crude oil situation is very strong. Gasoline is quoted at 38 cents, motor grade, and others sell up to 43 cents. Coal oil is quoted still at 27 to 30 cents per gallon.

Tin Price Is Less; Spelter; Lead Softer

Montreal.

INGOT METALS.—Little change has been made this week in the ingot list and the market is very quiet for the most part, with tin prices softer, and lead and spelter a trifle weaker.

COPPER.—Spot prices on this remain unchanged from last week, sales being made on the basis of 25 cents per pound for electro and 24 cents for casting.

TIN.—A precipitous drop of 45 pounds was made this week in London. With more stock available here the prices have softened, and 68 cents is being quoted.

ANTIMONY.—Quiet and unchanged at 13½ cents for English and 13 cents for Chinese.

ALUMINUM.—Some sales are said to be made at 35 cents per pound, while small lots are quoted higher. There is but a limited sale for the product.

SPELTER. — Somewhat softer this week at 11 cents a pound.

LEAD.—Lead has softened a little with spot stock quoted at 10½ cents a pound.

TORONTO MARKETS

TORONTO, May 13—Higher prices continue to be made on hardware commodities and many important lines are affected this week. Dominion ammunition has advanced 10 per cent. Silver flatware also has sharply been advanced in price. The wire situation shows little improvement and supplies are very scarce. Sisal and jute halters are now quoted at the same price and the new quotation shows an advance on both.

Other lines that have been revised upwards are: Clothes line wire, wood smooth planes, ice tongs, curry combs, machinists' punches, wax candles, children's sleighs and wagons, revolvers, gasoline fire pots and torches, brushes, cobbler sets, asbestos millboard, hack saw frames, Marshalltown trowels, Oster stocks and dies, cast iron, hollowware, hat and coat hooks, Vaughan post hole augers and range boilers.

The demand for all hardware lines is a heavy one and many seasonable lines are moving freely. Jobbers express themselves as very well satisfied with the present business turnover, but are concerned for the near future, as they state their warehouse stocks are getting very low and replacements are coming very slowly from the factories, etc. This is mainly attributed to the freight embargo on the United States railroads and few are expecting the tie-up to be easily straightened out. Collections are good and money seems to be circulating freely.

Dominion Ammunition Now Quoted at 30-20%

Toronto.

AMMUNITION of the Dominion make has been marked up 10 per cent., the new discount being quoted at 30 and 20 per cent. off the new list in place of a former 30, 20 and 10 per cent. The higher cost of metals is said to be one of the factors for higher prices, although the manufacturers state that the price of labor is not to be overlooked.

Silver Flat Ware Prices Have Sharply Advanced

Toronto.

SILVER FLAT WARE of the Community pattern has been advanced to approximately 20 per cent. This is in line with HARDWARE AND METAL'S prediction in last week's issue and is said to be due to the higher cost of raw material and other factors that affect the manufactured products. The new quotations on some of the better known lines are as follows:

COMMUNITY PLATE, SILVER FLAT WARE		
Tea Spoons	$ 6.38	per dozen
Dessert Spoons	12.10	per dozen
Table Spoons	12.76	per dozen
Dessert Forks	12.10	per dozen
Table Forks	12.76	per dozen
Cold Meat Forks	22.68	per dozen
Sugar Shells	13.32	per dozen
Berry Spoons	32.40	per dozen
Pickle Forks	15.12	per dozen
Butter Knives	13.32	per dozen

Wire Situation Shows Little Improvement

Toronto.

WIRE of nearly all kinds is very scarce and quotations are very firm. The present quotations on O. and A. wire and annealed hay baling wire are as follows:

O and A Wire—	
0- 9 gauge	$6.00 per cwt.
10 gauge	6.06 per cwt.
11 gauge	6.12 per cwt.
12 gauge	6.20 per cwt.
13 gauge	6.30 per cwt.
14 gauge	6.40 per cwt.
15 gauge	6.55 per cwt.
16 gauge	6.20 per cwt.
Annealed Hay Baling Wire—	
12 gauge	6.10 per cwt.
13 gauge	6.20 per cwt.
14 gauge	6.30 per cwt.
15 gauge	6.45 per cwt.
16 gauge	6.50 per cwt.

Sisal and Jute Halters Both Same Quotations

Toronto.

HALTERS.—New and higher prices have been made on sisal and jute halters and it is interesting to note that the jute halter is now being quoted at the same price as the sisal, while both have been advanced. The small (7/16) are now quoted at $24.75 per gross, while the large (9/16) are quoted at $37.50 per gross.

Clothes Line Wire Prices Reach Higher Levels

Toronto.

CLOTHES LINES, in line with nearly all other kinds of wire prices have been revised upwards, and the new prices are as follows:

Clothes Line Wire—	
18 gauge x 50 ft.	$7.80 per 1000 ft.
18 gauge x 100 ft.	7.15 per 1000 ft.
19 gauge x 50 ft.	7.00 per 1000 ft.
19 gauge x 100 ft.	6.25 per 1000 ft.

Ice Tong Prices Have Been Revised Upwards

Toronto.

ICE TONGS are among the list of hardware commodities to have new prices. The 13 inch are now being quoted at $18.50 per doz.; 17 inch, $22.80 per doz., while the 24 inch are quoted at $24.75 per doz.

Wood Smooth Planes Have Higher Quotations

Toronto.

WOOD PLANES.—Owing to the situation which has developed in wood and lumber nearly all commodities manufactured from this material have been revised upwards. This is also true of wood planes. Some of the new prices on this commodity are as follows:

WOOD PLANES		
Smooth	2 1-8-inch	$1.70 each
Smooth	2 1-4-inch	1.80 each
Jack	2 1-8-inch	2.00 each
Jack	2 1-4-inch	2.05 each

New Lower Curry Comb Discount Advances Same

Toronto.

CURRY COMBS.—A new lower discount has advanced the price of curry combs, and the quotation now reads 30 per cent. discount from the list.

Machinists' Punches, Hammers, Etc., Advance

Toronto.

MACHINIST TOOLS, punches and hammers of the Stanley make have been revised upwards, and in most cases the new quotation is 97½ per cent. added to the list, although in a few special cases the quotation reads list plus additional 105 per cent.

Gasoline Prices May Again be Advanced

Toronto.

GASOLINE.—The quotations on gasoline and coal oil are very firm, and while an advance of 1½ cents a gal. has been made on gasoline in the United States no change has yet been made on this market, although higher prices would not be unexpected. The present quotation is 37 cents per gal. for gasoline and 29½ cents for coal oil.

1c *Increase Made on Wax Candle Prices*

Toronto.

WAX CANDLES have been advanced in price 1 cent, sixes in case lots now being quoted at $7.16, while twelves in case lots are quoted at $7.36 per case.

Child's Sleigh and Wagon Prices Increase 15%

Toronto.

SLEIGHS AND WAGONS of the Canadian Buffalo Sled make have been advanced to higher prices. The new quotation will approximate 10 to 15 per cent. increase. This is said to be due to the situation which has developed in lumber and labor, etc. And manufacturers state that raw material is very difficult to get even at the higher prices.

New and Higher Prices to be Made on Revolvers

Toronto.

REVOLVERS.—Higher prices have been made on some makes of revolvers,

and although the new prices are not yet available it is believed that an increase of at least 10 per cent. will be made.

Fire Pots and Torches Have Advanced 10%

Toronto.

FIRE POTS AND TORCHES—prices have been revised upwards to the extent of approximately 10 per cent. over former quotations.

Some Brushes Marked Up; Other Advances Pending

Toronto

BRUSHES.—The situation on brushes has shown little improvement and in some cases manufacturers have advanced their price from 10 per cent. to 15 per cent., while other manufacturers' products are pending higher prices. The scarcity of bristles continues to be keenly felt; especially is this true of the longer lengths. The high cost of lumber is also said to be a factor, while labor and other costs that enter into manufactured products are all said to have a bearing on the case.

Economy Cobbler Sets Quoted at $16.50 *Doz.*

Toronto.

COBBLER SETS of the Economy Brand have been revised upwards, the new price now being quoted at $16.50 per doz.

Asbestos Mill Board Costs $13.75 *Per Cwt.*

Toronto.

ASBESTOS MILL BOARD is among the list of advances made this week, the new quotations now being quoted at $13.75 per hundred lbs.

Union Hack Saw Frames Have Advanced 10%

Toronto.

HACK SAW FRAMES of the Union Hardware make have been revised upwards, and the number 10 is now quoted at $10.50 per doz., while the number 50 is quoted at $6.30 per doz. This advance is approximately 10 per cent. higher than former quotations.

Marshalltown Trowels Are Marked Up 10%

Toronto.

MARSHALLTOWN TROWELS are also among the list of commodities to have higher prices this week and an advance of approximately 10 per cent. has been made on this make.

Oster Stocks and Dies Have New Higher Prices

Toronto.

STOCKS AND DIES of the Oster make have been revised upwards this week and the new quotations are approximately 10 per cent. higher. Owing to the many styles and sizes involved, it would almost be impossible to give the list here on account of space being limited.

Cast Iron Hollow Ware Has Been Advanced 10%

Toronto.

CAST IRON HOLLOW WARE of the James Smart manufacture has been advanced 10 per cent. on practically all lines. Some of the better known lines are quoted as follows:

Lipped Kettles, each—8 inch, $1.60; 9 inch, $1.70; 10 inch, $1.90.

Straight Pots, each—8 inch, $1.60; 9 inch, $1.85; 10 inch, $2.

Cast Iron Spiders, each—No. 7, 90c; No. 8, 95c; No. 9, $1.05; No. 10, $1.15.

Scotch Bowls, each—No. 1, $1.00; No. 2, $1.10; No. 3, $1.25; No. 4, $1.35; No. 5, $1.50; No. 6, $1.65.

Cast Iron Tea Kettles, each—No. 7, $1.60; No. 8, $1.75; No. 9, $1.85; No. 10, $2.00.

Bellied Pots, each—8 inch, $2.20; 9 inch $2.30; 10 inch, $2.55.

Chaudrons, each, with plain covers—No 80, $1.30; No. 90, $1.45; No. 100, $1.65; No. 110, $1.80; No. 120, $2.05; No. 130, $2.30; No. 140, $2.60; No. 150, $3.10.

Pancake Griddles, each—No. 1, 95c; No. 2, $1.05; No. 3, $1.75; No. 8L., $1.00; No. 9L., $1.10.

WIRE.—The situation which has developed in wire does not present many possibilities at the present time for early improvements and some have it that the situation is getting worse and wire is daily becoming more scarce. The demand for wire of nearly all kinds is very heavy and warehouse stocks are becoming very low. Jobbers state they have great difficulty in securing deliveries from the mills, who, in some cases, are booked many months ahead and are unable to take orders for immediate delivery. This may be on account of the mills having their own labor troubles as well as the tie-up of raw materials and coal, etc., on the United States railroads.

Hat and Coat Hooks Have Been Revised Upwards

Toronto

HAT AND COAT HOOKS have been marked up to higher levels, and the japanned of the James Smart make are now quoted at number 4, $4.25; number 7, $4.90; number 10, $5.80 per gross. while the coppered number 160 are quoted at $4.70 per gross, the number 165 at $11 per gross. Other hat and coat hooks manufactured by this firm that have advanced are as follows:

Hat and Coat Hooks, per dozen—	
No. 170	$0.80
No. 270	1.20
Hall Hooks, per dozen—	
No. 201	$1.00
No. 301	1.20
No. 321	0.83
No. 221	0.68
No. 401	1.45
No. 421	1.10
Hotel or School House Hooks, per gross—	
No. 20	$19.40
No. 16	7.55
No. 17	5.65
No. 18	7.80
Wardrobe Hooks, per gross—	
No. 108	$8.15
Harness Hooks, per dozen, Japanned—	
No. 25	$1.12
No. 25½	2.35
No. 76	1.95
No. 77	2.60
No. 27	6.60

Vaughan Posthole Augers Have New Quotations

Toronto

POST HOLE AUGERS. — New and higher prices have been made on Vaughan post hole augers. The six inch is quoted at $16.25 per doz. The 7 inch, $18.50 per doz.; 8 inch, $20.50 per doz.; 9 inch, $22.50 per doz., and 10 inch, $24.50 per doz.

Iron and Steel Bars Firm; Hold Unchanged

Toronto.

IRON AND STEEL BARS.—Jobbers state they have fair stocks of steel bars, notwithstanding the fact that the mills have been having difficulty in securing coal and other commodities owing to the tie-up of freight on the United States railroads. This, however, they state, applies more to the common kinds as some state they have difficulty in securing special iron or steel and in some cases shapes.

The present demand is fairly heavy and considerable volume is moving out. It is believed that now that navigation is opened up that this will stimulate business on this commodity. The present quotations are firm, although no change in price has been made this week. and the quotations are as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	.. .

Local Stocks of Sheets and Plates Very Low

Toronto.

SHEETS AND PLATES.—Local jobbers and manufacturers state that they are very much disappointed with the situation that has developed in sheets and plates of nearly all kinds, and not a few state they were just beginning to get back on their feet, as it were, after the steel strike of last Fall and some state they were gradually catching up with their orders as well as securing some warehouse stocks.

The recent tie-up on the United States railroads, however, has changed this situation and it is believed that very few jobbers or manufacturers have stocks of any account to sell.

Some state there has been nothing started from the mills for almost two weeks. This being the case they state the mills would have their premises congested with enormous tonnages of steel, which would be so mixed up that when transportation does move again, it may

be some time before these are straightened out, in fact he went so far as to state that if all disruptions and tie-ups would immediately cease it would take until about July before stocks would come to hand with even the same volume as before the tie-up mentioned.

The following prices are quoted here merely as a guide and it is believed that many are charging premiums on these prices and that present business to a certain extent on this commodity is subject to premiums on account of the very heavy demand and the light stocks on hand:

BLACK SHEETS—

14 gauge	$8 95
16 gauge	9 05
18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
29 gauge	9 75
3-16 inch plate	....
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—

	Premier		Apollo	
10¾ oz.	$12 00	$11.50	$12 00	$12 25
U. S. 28	11 45	10 95	11 45	11 85
U. S. 26	11 15	10 65	11 15	11 55
22 and 24	11 00	10 50	11 00	11 40
16	10 70	10 20	10 70	11 25
16	10 70	10 20	10 70	11 10
12 and 14	10 55	10 05	10 55	10 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Weaker Tendencies Shown For Old Materials

Toronto

SCRAP AND WASTE MATERIAL.—The quiet buying period which affected the markets the last week or so is still in effect and dealers say the present market is practically dead, and while some state they are unable to diagnose the situation, others have it that the situation is entirely due to the present condition prevailing at many of the mills owing to the tie-up of the railroads which is said to be greatly hindering production in all lines. Iron and steel continue to be very scarce and although there are not many inquiries, it is stated that very little old iron and steel are coming forward. Many are at a loss to understand the reason for this, although some state that owing to the higher prices being charged for nearly all commodities whose basic metal is iron or steel that present holders are loath to discard an old article in view of replacing it with a newer and more costly one. The following are the present quotations:

WASTE MATERIAL

No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½
Heavy copper	0 17
No. 1 machinery cast	38 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

Lead Waste Pipe Solder, Etc., Shows Weakness

Toronto.

LEAD AND ZINC PRODUCTS.—Although the present demand is a heavy one and large volumes are going out the price tendency of nearly all products of lead and zinc is somewhat weaker, and although no lower prices have been made this week it would not surprise many in the trade if lower prices would soon be announced unless the present situation changes.

This is attributed to the present situation of pig lead which, in some instances, has been affected by the lower quotations on the English market. Manufacturers state that pig lead is coming in better quantities and the scarcity which was noted for some time apparently has been overcome to such an extent that manufacturers are at least able to fill their orders, it is believed. The following quotations are being quoted at present:

Lead pipe, list, per lb.	0 17½
Lead waste pipe, list, per lb.	0 18½
Do., over 8 inches, list, per lb.	0 19½
Above subject to discount of 10%.	
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lbs.	0 14
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 45¾
Solder, strictly, lb.	0 40½
Solder, commercial, lb.	0 38
Solder, guaranteed, lb.	0 43¾
Solder, wiping, lb.	0 37¼
Zinc sheets, per lb.	0 19

Boiler Tube Prices Firm; Fair Demand Offering

Toronto.

BOILER TUBES.—Notwithstanding the fact that the boiler tube season is a little off, jobbers state they are very well satisfied with the present business being offered, which they state speaks very well for the coming busy season, and some rumors are current that owing to the scarcity of skelp boiler tubes may be scarce this Fall.

Considerable business is still being done on barges, it is stated, and many boats and barges of nearly all kinds have been refitted with tubes this year, which may have been responsible for considerable part of the heavy demand.

It is the belief of some that the mills manufacturing skelp will find a great difficulty in supplying or filling their present booked orders on account of the many disruptions and tie-ups they have had to contend with, and prices are very firm and very few seem to be looking for lower prices for some time to come.

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	30 00	.....
1½ inch	31 50	.....
1¾ inch	33 00	30 00
2 inch	32 00	29 00
2¼ inch	37 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3¼ inch	70 00	49 00
3½ inch	70 00	39 00
4 inch	96 00	63 00

Orders For Corrugated Sheets Heavy; No Stock

Toronto.

CORRUGATED SHEETS.—If possible, the situation on sheets is worse with little or no immediate relief looked for, is the way one manufacturer expressed himself to HARDWARE AND METAL regarding the corrugated sheets situation.

Manufacturers generally state that their hopes were on the verge of being at least partly realized and stocks were gradually being replenished when the latest set-back developed in the way of a freight embargo, which has set manufacturers and manufactured commodities back almost farther than during the previous steel strike which occurred last Fall, it is stated. Some manufacturers state the present tie-up has a worse effect than the previous strike owing to the fact that effects from the previous strike are still being felt and in many cases some have not been able to overcome that situation, and the present tie-up coming on top of the former one has been the cause of great difficulties and inconvenience, and one manufacturer stated that it was his belief that if the strikes and disturbances, etc., were all called off immediately that it would be July before the material would commence to arrive again as satisfactorily as previously.

The manufacturers state the demand for corrugated sheets is a very heavy one, but owing to the difficulty of securing raw material, they are only able to accept orders for limited quantities and in many cases not at all, and owing to the unsettled present conditions are unable to state when they will be able to make announcements for either present or future deliveries.

The present quotations, although firm, remain unchanged and are quoted as follows:

	Per 100 square feet	
Corrugated Sheets—	Gal'zd.	Painted
No. 28 gauge	9 25	7 75
No. 26 gauge	10 00	8 75
No. 24 gauge	15 00	11 00
No. 22 gauge	17 50	13 75
No. 20 gauge	21 00	17 50
No. 18 gauge	26 50	21 50

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equallized on Montreal.

An additional charge of 10% of the list price is added to cover exchange.

Discount, 7½%.

Lead Spelter and Tin Show Weaker Tendency

Toronto.

INGOT METALS.—A weaker tendency is noted on tin, lead and spelter this week with fair demand offering.

LEAD shows a downward tendency and a lower price has been made this week, the present quotation being 11c per pound.

ALUMINUM.—Little demand is shown for aluminum and prices remain unchanged, the present quotations being from 36 to 37 cents per pound.

COPPER.—The present price of copper shows little change, the demand being rather light, the quotations still remaining at 24 cents per pound.

ANTIMONY is very quiet, the market conditions on this metal are practically unchanged, and the stocks are considered rather light. The selling price continues to be quoted around 15 cents per pound.

TIN is weaker and a sagging movement is noted. The present quotation is 72 cents per pound.

SPELTER is also lower although there is a fair demand. The new price is 11 cents per pound.

LONDON MARKETS

LONDON, May 13—Higher quotations continue to be made on many hardware lines and this week shows little improvement in this respect. Some of the important hardware lines that have been marked up this week are: Polar electric fans, surface hinges, galvanized clothes lines, Mrs. Potts' iron handles, English brass garden syringes, Dominion shells and ammunition, silver flatware and Johnson's floor wax.

The wire nail situation is very tight and higher prices are daily expected. The scarcity of wire of all kinds is becoming more acute and is the cause for much concern. Linseed oil and turpentine are also very scarce and with little new stock coming in, warehouse stocks are gradually becoming depleted.

The freight embargo on the United States railroads continues to be one of the main causes for shortages of nearly all hardware commodities and the general opinion seems to be that the effects of the present tie-up will be more keenly felt at a later period.

The hardware trade here is excellent. Spring and summer lines are all selling good now. Prices are very firm and each day brings advances on some lines.

Shortage of goods is becoming more serious each week and it is expected to be still worse in the near future. Collections are good.

Polar Electric Fans Will Now Cost More

London, Ont.

ELECTRIC FANS.—New and higher prices have been made on electric fans of the Polar Club brand. This is said to be due to the higher cost of manufacture, which includes the raw material, labor and other factors; the new prices are quoted as follows:

6 inch, single fans	$7 50 each
6 inch, in dozen lots	7 00 each
9 inch, single fans	12 00 each
9 inch in dozen lots	11 75 each

Surface Hinges Have New Prices; $3.25 Doz. Pair

London, Ont.

SURFACE HINGES, in line with recent advances which have occurred in builders' hardware lines, surface hinges have been revised to higher levels and are now being quoted as follows: The numbers 440, 450 and 460 in either dull brass or antique copper finish are being quoted at $3.25 per doz. pair.

New Prices Made on Galv. Clothes Line Wire

London, Ont.

CLOTHES LINE WIRE.—In line with wire and wire commodities of nearly all kinds, clothes line wire has been marked up this week, and some of the new prices are as follows:

No. 19 or XX., in 50 ft. lengths, M. ft.	$6.25
No. 19, or XX., in 100 ft. lengths, M. ft.	$5.75
No. 18, or XXX., in 50 ft. lengths, M. ft.	$7.00
No. 18, or XXX., in 100 ft. lengths, M. ft.	$6.45

Mrs. Potts' Iron Handles Now Quoted at $1.50 Doz.

London, Ont.

IRON HANDLES.—Higher revised prices have been made on iron handles of the Mrs. Potts pattern japanned, the new quotation being $1.50 per doz.

English Brass Garden Syringes $28.75 Doz.

London, Ont.

BRASS GARDEN SYRINGES of English manufacture are beginning to arrive on this market, and jobbers state they have fair stocks to offer. The 1½ inch by 16 inch is being quoted at $28.75 per doz.

Wire Nail Prices May Be Revised Upwards

London, Ont.

NAILS.—The present demand for wire nails is a very heavy one and stocks, in many cases, are practically depleted with slight possibilities of immediate replenishments. The wire situation has shown no improvement of late and if anything has been getting worse. Manufacturers state they are booked far ahead with orders and are unable to accept orders for immediate delivery. The present quotation is $5.75 per keg base, although it is the belief of many that this price will not hold for any length of time in view of the fact that nails are so scarce and little new stock can be secured to replace the present, which is moving out very rapidly.

Cut nails have a big demand and no change is made in the price, which is still quoted at $7.50 base.

Dominion Shells and Ammunition Jumps 10%

London, Ont.

SHELLS AND CARTRIDGES of the Dominion make have been revised upwards, and the new advance will approximate 10 per cent. This new price revision is said to be the result of scarcity of materials, higher cost of labor and raw materials and other factors. The new discount is being quoted at 30 per cent. and 20 per cent. off the list; some of the most important grades and sizes are shown in the current quotation pages of this issue.

Silver Flat Ware Has Sharp Advance

London, Ont.

SILVER FLAT WARE. — HARDWARE AND METAL stated in last issue that silverware was very unsettled and stated that an advance was pending. This advance has now been made and it is approximately 20 per cent. higher than former prices. Some of the new higher quotations on some of the better known lines of Community Plate are as follows:

Tea Spoons, dozen	$ 6.38
Dessert Spoons, dozen	12.10
Table Spoons, dozen	12.76
Dessert Forks, dozen	12.10
Table Forks, dozen	12.76
Cold Meat Forks, dozen	22.68
Sugar Shells, dozen	13.32
Berry Spoons, dozen	32.40
Pickle Forks, dozen	15.12
Butter Knives, dozen	13.32

Wire of All Kinds Scarce; May Be a Famine

London, Ont.

FENCE WIRE.—Wire of nearly all kinds is proving to be a very scarce commodity at the present time and jobbers state that any stocks they have on hand are moving out very rapidly, but owing to the position the mills are in at the present time they state they are unable to place orders for immediate delivery. This being the case, they are anxious for the future, especially the very near future, as there is an intimation that a great scarcity will prevail in nearly all kinds of wire, including fence wire. Some of the quotations that are going at present are barbed wire, $6.40 per hundred lbs.; the number 9 soft galvanized wire is $5.85 per hundred lbs.; number 11 O. & A., $5.97 per hundred lbs.; number 12 O. & A., $6.05 per hundred lbs.

Linseed Oil Situation Not Improved

London, Ont.

LINSEED OIL.—Continued shortage of flax seed is causing many hardships in the linseed oil market, and while crushers state they have considerable seed in transit they are forced to run their plants at a low rate of production

or, as in some cases, close down altogether, because the seed is not reaching its destination on account of the tie-up on the U. S. railroads.

In some cases, English oil has been coming on the market but few are expecting that sufficient quantities will come to affect the price or the present situation. One crusher stated that in his opinion the tie-up did not seem to be nearly over and there seems to be a feeling that it will be a long-dragged-out affair and he stated that if this was the case there would be a great famine in linseed oil, and coming at the season of the year when its use is most extensive it would cause a very serious situation.

However, it may be that seed will be secured from other sources which would keep the situation from tying up. The following are the quotations:

1 to 2 barrels	$2.87 gal.	$2.90
3 to 5 barrels	2.86 gal.	2.89
6 to 9 barrels	2.84 gal.	2.87

Less barrels, add 15 cents gal.

Embargo Increases Shortage on Turpentine

London, Ont.

TURPENTINE.—Local stocks of turpentine are said to be very low and the future prospects for new receipts are not very bright, it is stated. This is believed to be mainly due to the tie-up on the U. S. railroads, and jobbers and importers state that while they have considerable turpentine in transit that they have not received any supplies for a number of days and that their stocks are practically exhausted. Many are hoping that the embargo will soon be lifted and that commodities will start to move again freely. The continuation of the present tie-up, it is believed, would cause great distress in nearly all trades. The quotations that are going at present are as follows:

1 barrel lots	$3.80 imp. gal.
2 to 4 barrel lots	3.79 imp. gal.
5 gallon lots	3.95 imp. gal.

White Lead in Oil Prices Firm; Unchanged

London, Ont.

WHITE LEAD IN OIL continues to sell at very firm prices and a fair volume is moving. The pure in ton lots is now being quoted at $20.45 per hundred lbs. and in less than ton lots $20.80 per hundred, while the Elephant brand is quoted at $20.95 per hundred lbs. in ton lots and $21.30 per hundred lbs. for less than ton lots.

Poultry Netting Prices Firm; Stocks Light

London, Ont.

POULTRY NETTING. — Quotations on poultry netting continue to be very firm, although no change has recently been made in the price. Jobbers state their stocks are very low and they have great difficulty in securing supplies from the mill and any shipments that do come to hand are of a limited amount. This situation is said to be true in practically all cases where wire is concerned and many are anxious to know what the future will show for this commodity, as there is a feeling that a serious shortage may develop throughout nearly all wires of all kinds. The present quotations are: Canadian 2 inch mesh net list, 1 inch mesh add 5 per cent. to the list.

Rope Sales Increase; Prices Firm; Unchanged

London, Ont.

ROPE.—Quotations on rope continue very firm. Although no change has been made in the price, stocks are moving out very freely and the demand increases almost daily. Pure manila continues to sell at 35½ cents per lb. base, while the Beaver is quoted at 28 cents per lb. base; New Zealand hemp, 28 cents per lb. base, and sisal remains at 22½ cents per lb. base.

Big Demand For Garden and Various Harvest Tools

London, Ont.

GARDEN AND HARVEST TOOLS. —The warmer weather, which is daily becoming more seasonable, is the cause for heavy demand for spades, shovels, hoes and rakes, also harvest tools of some kinds. All in the trade seem to be very well satisfied with the volume that has been moving. In fact, it is the belief of some that sales to date, despite the cold weather which has prevailed, are the heaviest which have been made for some years back. The quotation on spades and shovels remains unchanged and is 35 per cent. off the list, while the garden and harvest tools continue to be quoted at 50 per cent. and 10 per cent. off the new list.

Screen Wire Cloth Prices Firm; Big Demand

London, Ont.

SCREEN WIRE CLOTH.—A heavy buying movement is at present prevailing and large quantities of black screen wire cloth are going out every day. The present quotation, although firm, remains unchanged and is quoted at $3.50 per hundred square feet.

Galvanized wire cloth is also in good demand and is selling at a firm quotation of $4.25 per hundred square feet.

Lawn Mower Prices Firm; Remain Unchanged

London, Ont.

LAWN MOWERS.—The demand continues to be a very heavy one and like many other commodities jobbers state there are indications of shortage which may not be easily overcome as the warmer weather advances and increases the consumer demand. The quotations remain the same. The regular grades are still being quoted at 25 per cent. discount off the list.

Johnson's Floor Wax Now Costs 70c Per Lb.

London, Ont.

FLOOR WAX of the Johnson make has been revised to higher prices and the new price is now being quoted at 70 cents per lb. net.

WINNIPEG MARKETS

WINNIPEG, May 13—Important hardware changes have again been made this week and show close similarity to the previous weeks' changes, in that they involve the manufactured product rather than the basic material. Chief among the lines affected will be found: Sash and awning cord, churns, wood tubs, cotton twine, cotton rope, Stevens' rifles, heaters, fire backs, packing, golf clubs, and lamp wick.

Sash and Awning Cords Again Revised Higher

Winnipeg.

SASH AND AWNING CORD.—New prices again appear for sash cord and effect this line to the extent of a 6 cent per lb. increase. The line has been somewhat of an active nature in the past, advances occurring periodically in connection with the same, a condition that, if repeated to any further extent, will place this class of goods at an exceptionally high figure. Scarcity of raw material, it is said, is the main cause for the new increase. The new prices, although appearing firm at present, will have to rely solely on the actions of the primary market for stability. The latest quotations show:

Sask Cords—In hanks, size 3-16 in., $1.10; 7-32 in., $1.09; ¼ in., $1.08; 9-32 in., $1.08 per lb. In coils, size ¼ in., $1.08; 5-16 in., $1.08; ⅜ in., $1.08.

Awning Cord—White, size, ⅛ in., $5.45; 5-32 in., $20.70 per dozen. Drab, size ⅛ in., $6.35; 5-32 in., $24.75 per dozen.

Dazey Churn Prices Are Revised Upwards

Winnipeg.

DAZEY CHURNS.—Among the week's changes will be found new prices covering dazey churns and advancing this line an approximate 18 per cent. The new increase should evince little surprise when the continually cost of raw material used for the manufacture of same is considered. To-day's price are quoted as follows:

Dazy Churns—Capacity, gals., 3, $5.50; 4, $6.85; 6, $8.50; 10, $14.40 each. Glass, capacity, pints, 3, $15.50; 5, $19.25; 7, $24.25; 9, $31 per dozen. Extra glass jars, capacity, pints, 3, $3.75; 5, $6.60; 7, $9.60; 9, $11 per doen.

Higher Prices Are Named on Wooden Wash Tubs

Winnipeg.

WOODEN WASH TUBS.—Following recent changes on many important lines of woodenware, wash tubs are now affected and show an advance of 11 per cent. on previous lists. This new in-

crease cannot be considered heavy on reviewing the lumber situation generally, which remains practically unchanged, with little possibility of better conditions prevailing, it is said. The new prices show:

Wooden Tubs—Size diam. ins., 20½, $18.70; 22½, $23.10; 24½, $24.75; 26½, $29.15 per dozen. Pails—No. 2, $5.45. Stable, $18.50 per dozen.

Cotton Twine Prices Are Revised Upwards

Winnipeg.

COTTON TWINE.—Among the lines to be affected as a result of the adverse conditions of the cotton market will be found cotton twine.

Cotton Twine—In cones, 3-ply, 95c per lb.; 4-ply, $1. In balls, 3-ply, $1; 4-ply, $1.02 per lb.
Bag Twine—$1.25 per lb.; bonding twine, 56c per lb.

Cotton Rope Also Shows Increase

Winnipeg.

COTTON ROPE, in conjunction with twine, is also influenced by the market changes and advances a further 4 cent. per lb. Little need be said regarding this, as the cause is well known and makes further comment unnecessary. The latest prices are listed as follows:

Cotton Rope—Size in., 3-16, 87 cents; ¼ and larger, 86 cents per lb. Clothes' lines, cotton, length ft. 48, $4.80; 60, $6 per dozen.

Stevens' Rifles Advanced An Approximate 3%

Winnipeg.

STEVEN'S RIFLES.—Slight advance occurs, effecting certain models of Steven's rifles, and as a result an average 3 per cent. is added to previous lists.

Steven's Rifles—Nos. 26 x 22, $7.30; 26 x 32, $7.30; 12 x 22, $9.25; 12 x 25, $9.25; 12 x 25, $9.25; 12 x 32, $9.25; 17 x 22, $11.20; 17 x 25, $11.20; 17 x 32, $11.20; 44 x 22, $20.50; 44 x 25, $20.50; 44 x 32, $20.50 each.

Perfection Heaters Are Quoted at Higher Prices

Winnipeg.

PERFECTION COAL OIL HEATERS shows an advance of approximately 30 per cent. on old lists, a rather high increase, although one that is to some extent expected on considering the past stability effected by this line, and the present soaring prices of raw material that is confronting manufacturers.

Perfection Heaters—Nos. 523, $7; 530, $7.70; 630, $9.80. Wicks and carriers for same, $6.40.

Cotton Packing Also Has Advanced 5c Lb.

Winnipeg.

CANDLE WICK.—Higher price has been named on cotton candle wick packing to the extent of a 5 cent. per lb., increase which now brings this line to an even figure of $1 per lb. The present increase, it is said, is chiefly attributable to the advanced cost of raw material.

Fire Backs Are Now Quoted at $15.60 Per Doz.

Winnipeg.

DIAMOND FIRE BACKS are affected in the changes of the week and are now quoted at $15.60 per dozen, making a clear showing of 25 per cent. advance on previous prices.

Golf Club Prices Have Been Revised Upwards

Winnipeg.

GOLF CLUBS.—New prices appear this week on the Kernal Brand golf clubs and show slight advance on previous prices as a result. The following are affected and are now quoted at:

Golf Clubs—Cleeks, mid-irons, mashies, putters, rublicks, driving irons, $3.75 each. Drivers and brassies, $4.25 each.

Lunkenheimer Valves Have Advanced 5%

Winnipeg.

VALUES of the Lunkenheimer makes are also on the list of commodities having higher quotations and an advance of 5 per cent. has been made.

Lamp Wick Prices Have Advanced a Further 10%

Winnipeg.

LAMP WICK.—Another line to be influenced as a result of the general advance in lines pertaining to cotton is lamp wick, and is accordingly advanced 10 per cent. on previous prices. As previously mentioned, the scarcity and advanced cost of the raw material is chiefly responsible for the new change. Today's prices are quoted at:

Lamp Wick—Cut and rolls, Nos. 0, $1; A, $1.25; B, $1.85; D, $2.85. Rayo wick, $1.45; Rayo junior, $1. Circular, size width, 2½ inch, $8.90; 4¼ inch, $30. The above prices quoted are, per gross cut, and per roll for rolls.

Prices on Brushes 5% Higher; Situation Firm

Winnipeg.

BRUSHES.—A further advance of 5 per cent. has been made on brushes of various kinds and the situation is still very unsettled. This is said to be due to the ever increasing shortage of bristles.

Pyrex Ware Prices Have Been Marked Up 5%

Winnipeg.

PYREX WARE has also come up for higher price revision and an advance of 5 per cent. has been made.

Nickel-plated Copper Wares Advance 10%

Winnipeg.

COPPER WARE.—An advance of approximately 10 per cent. has been put through on some lines of copper ware and copper tea and coffee pots, also copper tea kettles will now cost more. This price is said to be a very firm one, and stocks are generally considered to be very light.

Building Paper Prices Have Advanced 10%

Winnipeg.

BUILDING PAPER.—Higher prices have been made on various kinds of building paper, the new quotations being about 10 per cent. higher than formerly.

PITTSBURGH MARKETS

PITTSBURG, May 13. — Pig iron production in April, curtailed by the rail strike, was at the rate of about 33,650,000 gross tons a year, or at 75 per cent. of capacity, if capacity be estimated at 45,000,000 tons a year, and that seems to be a fair estimate, though possibly it may be found to be a trifle low, if favorable manufacturing conditions, like those obtaining before the war, ever return. The March rate had been 90 per cent. of capacity, and as the rail strike did not apply to the entire month of April it is evident that when the strike was at its worst the rate of pig iron production was more than one-sixth off from the March rate. Had it not been for the strike production would probably have increased, since all the trends were in that direction. The production of steel was probably affected by the rail strike in about the same manner as was the production of pig iron. The April steel ingot report of the American Iron and Steel Institute should appear in a few days and will permit of an exact comparison being made.

Production of pig iron and steel has continued to grow, although at a rather slow rate. Among producers there is a disposition to complain that reports as to the rail strike waning are altogether too favorable, that the strike is still very bad, but on the other hand one can observe also that the producing trade has a disposition to magnify the effects of the strike upon production, by not making sufficient allowance, in the general average, for the plants that are working practically full. Thus the South and East are scarcely affected at all, and some of the plants on the lake front are doing quite well, almost normal. The Youngstown district, the one most affected, seems to be producing at more than half capacity, while the immediate Pittsburgh district is probably doing better than 80 per cent.

Steel consumers are affected not only by not receiving steel, but also by not receiving coal and other necessities. In Detroit, for instance, the lack of coal is greater than the lack of steel, and factory operations in that district are now probably below 50 per cent. of normal. On the whole it would seem that the consumption of steel is curtailed more than the production.

Boat Season Brings Big Demand for Finishes

Technicalities in Application of Boat Finishes Oftentimes Give the Customer Difficulty—Dealer Can Impart Sound Advice if He Has Knowledge of Best Water-Resisting Ingredients—Experiments Prove Enamels Best Fitted for Use on Surfaces Exposed to Water

"MAKING a seasonable and timely appeal is half the battle in arousing enthusiasm for painting," was the recent statement of a hardware dealer to HARDWARE AND METAL. Just at this time of year this factor is a highly important one and there are a number of phases of it which are well worth considering.

With the approach of warmer weather those interested in boating are getting out their motorboats, sailboats, rowboats, canoes, etc., for their spring overhaul. In the sale of paint for any purpose the dealer requires to have considerable information as to best methods of application, etc., but this point is perhaps more important in connection with boat finishes than any other, for durability is here required to a greater degree and the average boat owner is very susceptible to any suggestions which will make for the better appearance and seaworthiness of his craft. Therefore to sell boat finishes the dealer requires to have considerable insight into the exact requirements of the surface exposed to the water, as well as the technical ability of the finish to meet such needs.

It has been found in connection with the finishing of speed boats that the use of an inefficient finish resulted in allowing moisture to be absorbed into the wood, thereby adding considerably to its weight. The paint and varnish manufacturers have therefore taken particular care to provide suitable finishes for this use.

Conditioning the Wood

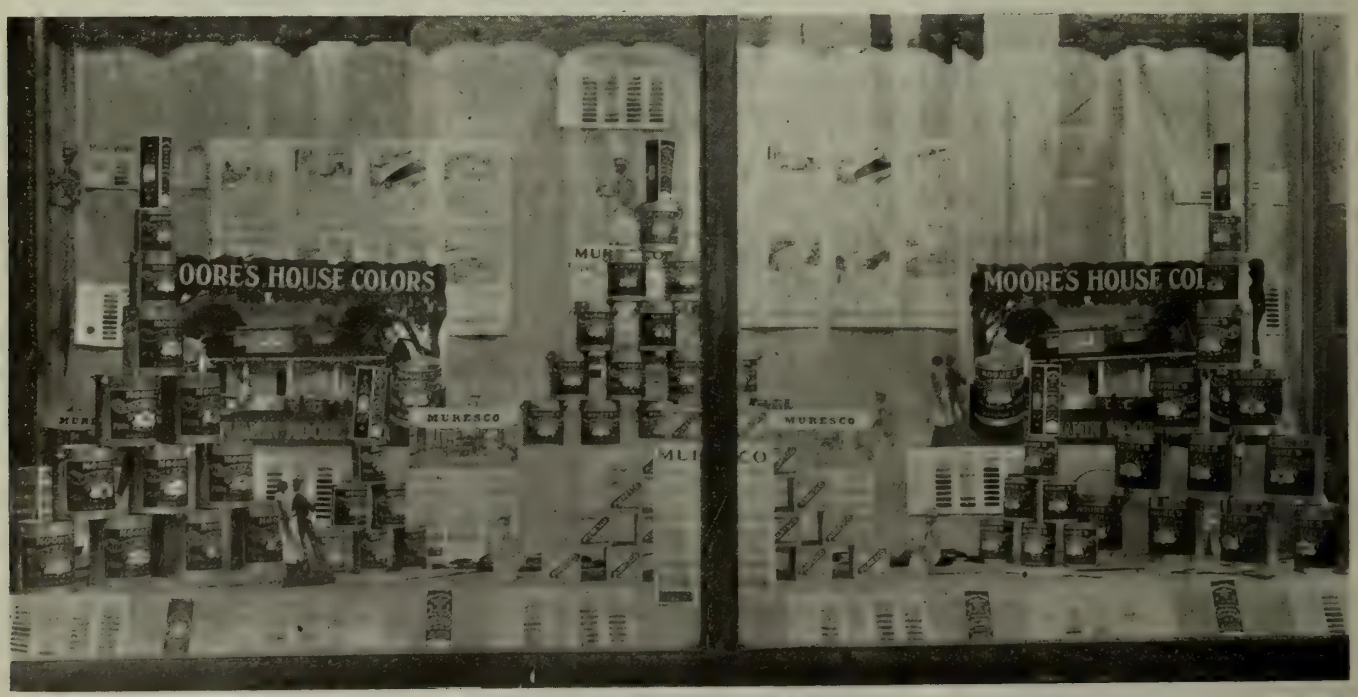
The investigation instituted by manufacturers brought forth the fact that wood is a cellular substance and that when the fibre of which it is composed becomes saturated with moisture, water is then admitted in liquid form, which in turn is held by the cellular cavities of the wood. On being submitted to drying, the wood is again restored to its original air-dry form, which contains approximately 11 to 15 per cent. of moisture. Samples of wood conditioned to this state were coated with the various finishes including raw linseed oil, boiled linseed oil, spar varnishes, enamels, shellacs and oil and varnish graphite mixtures.

These samples were enclosed in a specially constructed cabinet at a temperature of 100 degrees F. with a relative humidity of 95 per cent. for seven days. It was found that the panels coated with raw and boiled linseed oil absorbed the largest percentage of moisture, the one with raw oil absorbing a greater quantity than that coated with boiled oil. The samples coated with spar varnish absorbed the next highest amount. Shellac was net, while enamel had the lowest percentage. The panels were again thoroughly dried and then submerged in water for seven days. The gain in water absorption by each class of panel was in the same relative extent as moisture. The panels were again allowed to dry for seven days and on re-weighing to determine the amount of water retained it was found that boiled oil retained a higher percentage of water absorbed than raw oil. Enamels were next, then shellac, spar varnish and enamels with the highest pigment content retained the least.

No Film is Waterproof

From these tests it is evident that no film is absolutely waterproof and that neither raw nor boiled linseed oils are suitable for finishing boats. Therefore it is necessary to select and sell the class of material that permits the least quantities to pass the film and will permit them to pass out most completely when submitted to the drying process. In this respect enamels with the highest pigment appear to have the preference. As a result of these experiments it has been

(Continued on page 64)



A seasonable and well arranged window display of paints and finishes, by Bent and Cohoon, Ltd., hardware merchants, New Glasgow, Nova Scotia. Features of the arrangement which make it effective are the use of dealer helps as provided by the manufacturer, and the fact that the display is not overcrowded. There is not more in the window than the eye can take in at a glance, yet on closer examination there are paint cards and literature dealing with methods of application to secure best results.

The Brush Department

Economy to Use High-Grade Brushes

Emphatic Points in Paint Campaigns Can Also be Linked Up With Brush Sales — Dealer Increases Sales by Handling Only High-Grade Brushes

MUCH publicity is being given the fact that it is better economy to use the best grade of paint even though the cost be greater than the cheaper grades. It is also being pointed out that the increased value of buildings justifies more paint protection. While these matters pertain directly to the paint business, yet their effect also extends to the brush trade, and the dealer can use some arguments along those lines to good advantage.

If there is a tendency on the part of the customer to respond to appeals to use only high grade paints it will not be difficult to impress upon that customer the inadvisability of using a cheap brush for its application. Good paint is worthy of a good brush. The appeal for the saving of valuable property by the adequate application of paint, can be linked up effectively with both departments, thus doubling the effect. Naturally a purchaser of paint must have a brush to apply it, but pressing home the arguments outlined will help to indicate that it is very much in the interests of better painting to purchase a new brush rather than take a chance on one used last season which might not have been taken care of in the meantime.

One hardware dealer in Western Ontario finds that he sells more brushes by selling a better grade, and, as he says, by "letting the public know that I handle only brushes that can be depended upon."

Whereas he formerly carried only medium-priced and very cheap brushes this dealer now carries only really high-grade varieties and the very cheapest. The latter are kept for use by those desiring to paint stove pipes or similar work where a good brush is not required. The balance of his stock consists of only high-grade brushes.

"People do not mind paying a few cents more for a brush if they know that they are not going to have any trouble with it," said this dealer to HARDWARE AND METAL. "When I handled the medium-priced brushes people would come back and tell me that the bristles came out and stuck in the paint. This meant an unsatisfactory job and a trial for their temper. The brushes I now stock will give satisfaction and I am not afraid to talk about them and guarantee them. I am now selling more brushes than ever and there are no returns of unsatisfactory stock. My customers tell others and I am making sales to people who have been sent in by these satisfied customers."

A good variety and complete stock of each line are big factors in this dealer's trade. He finds that the sugtion offered by a good display of brushes in a prominent location is also valuable in making sales. He finds that customers like a good variety of brushes to look over and ask questions about the different grades. He emphasizes the question of quality and tells them frankly that he is charging them a little more but is giving them an article that will work smoothly and give best satisfaction.

Care is taken in this store to see that the stock of brushes bears no marks of having been in the store for any length of time. The brushes are kept clean and fresh, and this is an important factor in selling to either men or women. Window displays are an important part in the sale of brushes in this store, a complete window being devoted to this line at certain regular periods.

Underlying Idea of "Save the Surface"

Trade Felt Home Market Was Not Expanding Rapidly Enough—Less Than One-Third of Necessary Painting Being Done

THE address of Mr. George Henderson, president of Brandram-Henderson, Ltd., and president of the Canadian Paint, Oil and Varnish Association, before the recent "Save the Surface" convention in Montreal, was as follows:

"On behalf of the 'Save the Surface' campaign committee, and on behalf of the subscribers, and, may I say, on behalf of all those of the public who are interested in conserving property by means of saving the surface, I welcome you to this the first Canadian convention of the International 'Save the Surface' campaign.

"It is not sufficient for us to merely express pleasure and satisfaction at having present with us this afternoon, so many of the travelling representatives of the subscribers, so many dealers in protective coatings, so many representatives of the press, and so many painters themselves.

"I believe that it is the occasion for the expression of great thankfulness on our part because, unless we utterly fail this afternoon to put over our message, we shall place you all in a position to accomplish greater success in the work that each and every one of you is associated with.

"Now, we do not expect to fail, and consequently, as one on the eve of success, and of a success by no means entirely selfish in character but in the general good, we feel a certain exaltation of mind.

"In these brief introductory remarks it would not be well to dwell too minutely or in too much detail with any particular phase of this big subject, but I should like to address some consideration to what I may term 'The Why and Wherefore of the Save the Surface Campaign.'

"For years past many paint and varnish manufacturers, jobbers, dealers and painters, both in Canada and the United States, have felt that in spite of the vigorous sales promotion work of individual firms that the great home market was not expanding as rapidly as it should, in the interest of the trade and in the interest of the public.

"It is a fact that the industry was in a healthy condition, even prosperous, and that the output was steadily advancing year by year, but the condition of the country's homes and buildings proved that possibilities had been merely scratched.

"It was evident to those who made a careful study of statistics which correctly reflected actual conditions, that less than one-third of the necessary painting and varnishing was being undertaken, and it was realized that if the two-thirds left undone would be undertaken by drawing public attention to the necessity for it, that the advantage derived would not be only enormous to the paint trade in particular, but to the nation at large.

"This tendency not to paint had been increasing rather than diminishing, several causes for which have been advanced:

"1. The war, which impregnated the people of the Dominion with an idea of economy which became in its interpretation a mere policy of penny wise and pound foolish.

"2. The undue emphasis which was being laid on the purely decorative characteristics of paint and varnish.

"3. The increased cost of paint and varnish occasioned by the increased cost of raw materials and of labor. This caused people not so much to decide not to paint as to indefinitely postpone painting, which really amounted to the same thing.

"Clearly, there never was a greater justification for a co-operative educational advertising campaign, and significantly enough, the need of this campaign was realized at practically the same time on both sides of the International line, and there sprang into existence a crystallized determination in Canada and the United States to educate the public to the idea that to neglect the surfaces of property was a false economy—a robbing of Peter to pay Paul; in fact, a cutting off of the nose to spite the face.

"Might I here point out that the International 'Save the Surface' campaign is dual in character, because, while on both sides of the boundary we use the same slogan 'Save the Surface and You Save All,' and employ in a measure the same arguments and even occasionally similar illustrations, we have our separate organizations at Montreal and Philadelphia, respectively, where National considerations are never forgotten and where you can be quite sure the Canadian identity is as carefully safeguarded as the identity of the United States.

"I am very pleased to be in a position to refer to the presence here this afternoon of two members of the American Committee in the persons of Mr. Harn and Mr. Cousens, who have promised to tell you something of what has been accomplished in the United States with the "Save the Surface" idea.

"When I spoke to the Master House Painters and Decorators Association of Canada, in Hamilton, last July, during the first year of the campaign, I felt it my duty to particularly point out that it must never be forgotten that this 'Save the Surface' campaign is conducted on behalf of the trade generally—as a booster for business it is true—but still more as a conservation programme, and that it never has in mind the development of sales of any particular brand or kind of paint or varnish, but

THE BOECKH Trade-Mark

MEANS much to the dealer. It represents the endorsement of the Boeckh Company, Ltd. It is their assurance to dealers and consumers that the product bearing it is up to the high standards and traditions that have been maintained since the establishment of the business in 1856. It is the mark of the Boeckh Company's confidence and pride in their goods and a promise to dealers and consumers. The consumer has learned by satisfactory experience that this trade-mark assures more than satisfactory performance of the product in actual service; consequently, the man who sells Boeckh's Brushes finds his old customers greater purchasers than ever, and new customers, favorably impressed by the experience of their friends and neighbors, coming to him to purchase Boeckh's Brushes under the friendly protection of this famous trade-mark. They remember the dealer favorably who sells them Boeckh's Brushes.

UNDERLYING IDEA OF "SAVE THE SURFACE"

(Continued from page 62.)

I believe to-day there is little necessity for me to insist on this characteristic as it has been so carefully safeguarded as to be by this time well recognized throughout both countries.

"The campaign is in its second year. The intention is to conduct it for a minimum of five years. Advertising, no matter whether educational and co-operative, or merely familiarizing and proprietary, must of necessity be cumulative.

"Public apathy takes a repetition of blows to break down and we believe that the evidence we have during this second year of results being so much greater than during 1919 proves that by the time the campaign is well along in its course, its value will be recognized on all hands.

"It is proposed that this meeting shall be but the first of a series of similar meetings to be held throughout the country. The next one will probably be held in Toronto, and having that in mind we have not asked subscribers to go to the expense of bringing their Middle and Western Ontario representatives to Montreal.

"We would not be surprised if it will be an evident advantage to spend a whole day at our next convention.

"I do not wish to conclude my remarks without referring to a difficulty that possibly exists in making it easy for the salesmen of the paint and varnish houses, for the paint dealer and for the painter to link up his own activities with the activities of the 'Save the Surface' campaign in such a manner as to produce the most satisfactory results for himself.

"Any one of these individuals is apt to feel that the committee is doing probably some good, that no doubt a certain number of people will be influenced by the "Save the Surface" advertising, and that the conservation of property by means of paint and varnishing will be increased, but they are very apt to regard it as general rather than particular, and be willing to await developments rather than to strain every effort to develop particular instances themselves.

"This condition, natural and forgiveable as it is, is one of the chief occasions for the projection of this series of conventions. It will be the purpose of the speakers this afternoon to show you how you can, as it were—cash in, link up and crystallize the situation to your own advantage and to the advantage of those with whom you are associated."

BOAT SEASON BRINGS DEMAND

(Continued from page 60)

suggested that four coats of enamel to boat construction will bring the best results.

For those desiring to take extra care and trouble the following process is suggested for the finishing of a boat. Coat the wood with a good spar varnish and then apply aluminum leaf over all. Over the leaf apply a coat of spar varnish or enamel. This method is said to give the highest degree of moisture and water resistance. In the case of boats which have been painted from season to season it is advisable to have all the old coatings removed and the hull scraped and then left for several days to dry, after which an enamel coating can be built up as suggested.

Having definite knowledge with which to impart expert advice to the customer, is one of the biggest factors in the successful selling of any line of paints or varnishes, and particularly finishes the application of which is as technical as those for boats and other work submerged in water.

How Hardwaremen Advertise Paints---No. 8

AN attractive layout with the judicious use of bold face type in upper and lower case make a forceful announcement of the ad. reproduced herewith as written by Owen & Birmingham, Campbellford, Ont.

The word paints appears twice on the same line to catch the attention, an exclamation mark being placed after the second word. This is followed by the statement "I know the best paint to use" as coming from the Little Paint Man as illustrated. Plenty of white space is left so that the introduction stands out clearly. Then the body of the advertisement comes, which reads as follows: "For the man who is about to paint his home or other buildings there is the choice of three materials: Cheap mixed paint; Hand-mixed lead and oil; Good prepared paint.

"There is so much controversy about which is the best to use that it is hard for anyone not a paint expert to arrive at a decision. Here it is in a nutshell."

The announcement then goes on to indicate the weak points of the cheap mixed and hand-mixed lead and oil variety. A number of important points are made in the data given in this ad. and it is by giving such information that the reader's interest is secured.

Paints, Paints!

I know the best paint to use

Says the Little Paint Man.

For the man who is about to paint his home or other buildings there is the choice of three materials:

Cheap Mixed Paint Hand-mixed Lead and Oil
Good Prepared Paint, such as SWP

There is so much controversy about which is the best to use that it is hard for anyone not a paint expert to arrive at a decision. Here it is in a nutshell.

Cheap mixed paint is a poor buy—it's cheap, it's shoddy, it won't wear or give satisfaction. So it isn't worth considering.

Hand-mixed lead and oil is good as far as it goes, but it is impossible for anyone with a paddle and bucket and working by rule of thumb to make as good a paint as that which is worked out on a strictly scientific formula and mixed and ground by powerful machinery.

Good prepared paint, such as Sherwin-Williams Paint (SWP), will give the best of results. It is made of Pure Lead, Pure Zinc, Pure Linseed Oil and the necessary coloring pigments and driers, all combined according to exact scientific formula, the result of over 40 years' experience in paint making, and mixed and ground by powerful machinery designed especially for the purpose. The result is a paint that covers most surface and wears longest.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 13.—Great difficulty is being faced with regard to supplies of flaxseed, and the embargoes placed against movement of freight from United States points are causing much anxiety. Seed shipments from the West are light, and HARDWARE AND METAL understands that there is not much seed available there. Besides, heavy supplies are awaiting trans shipment from New York to Canadian crushers. There is an active demand and jobbers and crushers have many orders on file for filling which cannot now be executed. It may be some time still before there is a wide relief.

Turpentine is scarcer than ever. As a matter of fact there are no quotations available from the jobbers, who are, in many instances, requiring every barrel of turpentine they can obtain.

Putty and lead in oil are steady and both active. Various cold water paints are firming and advances may soon be made. Mixed paints and specialties are selling very freely. Varnish sales are reported brisk, and the undertone is firm. If any change is made in varnish, which is not improbable, it will be in the way of an increase.

Linseed Oil Will Continue to be Scarce

Montreal.

LINSEED OIL.—Crushers and jobbers alike are very much disturbed over the tie-up of traffic which has caused various carriage companies to place embargoes against shipments. This has worked great hardship on the flaxseed crushers. With hundreds of thousands of dollars' worth of flaxseed en route to this market, but with embargoes emplaced against moving them, the local market is quite bare of oil, that is, in a large way. Only single barrel lots are being quoted on, and these at unchanged prices of $2.70 to $2.80 per gallon, raw basis. Little seed from the Canadian West is said to have come along, and as a matter of fact several crushers report that there is little to be had from that source.

Practically Off the Market Is Turpentine

Montreal.

TURPENTINE.—There has been practically no stock of turpentine on the local market for some time, and each day seems to bring a more acute situation. The tendencies are naturally very firm under this shortage. With railway transportation very much involved, and embargoes placed against the movement of these goods it is improbable that there will be, for some time, extended relief. Jobbers have been unable to take care of orders for more than limited quantities, and prices are withdrawn for the time being.

Turpentine—	Imp. Gal.
Single barrels	....
Small lots	....
(Packages extra.)	

Putty Material Hard to Get; Glass Moving

Montreal.

GLASS AND PUTTY.—Prices on putty have been steadily maintained and there is a good sale for the same. Whiting is very high in price and hard to obtain.

GLASS.—Some arrivals from Belgium are reported, and there is a steadily heavy demand, with the undertone firm, but with no changes made.

Much Selling Still of White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have been maintained on white lead in oil without change, but there is likely to be a maintenance of the basis, providing that present difficulties continue with regard to containers, etc. The sheet steel situation is acute; prices are likely to remain high on containers, and linseed oil prices, too, are remaining abnormally high. Five ton lots are selling at $19.50 per 100 lbs., standard grade, ton lots at $20, and smaller quantities $20.35. Much active buying is still reported and the trade is heavier, in some respects, than for some time at this season of the year.

Much Business For Paints and Specialties

Montreal.

PAINTS, SPECIALTIES.—All paint makers report the same thing these days, in one respect, and that is that business is very active. It is just a matter of getting orders filled, and they are so frequent and the volume so great as to tax the abilities of the manufacturers to handle them.

Raw materials are not easily obtained. As a consequence of this, and owing to their high cost, revisions on some lines are probable. Cold water paints, for instance, are very firm, and owing to the scarcity and increased cost of the binders used in them, together with whiting scarcity and high cost, advances may come at any time.

TORONTO

THE movement of all paint and paint commodities has been greatly stimulated in the past few days, and all in the trade are enjoying a heavy turnover. Linseed oil is still very scarce and local stocks are very light. Little seed is coming and no lower prices are looked for till the situation shows some relief. Turpentine is also scarce and local jobbers and importers have practically no stocks to offer.

The whiting situation has shown no improvement and putty prices may be advanced if larger quantities do not come forward more freely. This is also true of cold water paints, and difficulty is experienced in securing sufficient quantities.

Prices on all lines are firm although no price changes have been made this week. Collections are very satisfactory, and with the prospects of large building operations many are looking forward to a heavy turnover.

Prepared Paints Have Heavy Demand; Firm

Toronto.

READY PREPARED PAINTS.—The prices on this commodity are steadily firm and raw materials are gradually getting much scarcer, and although no higher prices are looked for immediately many are wondering what the future will show, especially if the turpentine and linseed oil situation is not relieved. Manufacturers state that they are very well satisfied with the present business that is being offered and that they are shipping large quantities. Notwithstanding the cold weatner which has prevailed more or less during the last two or three weeks, sorting orders have been coming in very satisfactorily. The present quotations are as per current quotation pages.

White Lead in Oil Prices Firm; Remain Unchanged

Toronto.

WHITE LEAD IN OIL continues to show a fair demand although the season has been rather backward for the

past week or so. However, corroders believe that this situation will soon be overcome by several bright days of warm weather. The quotation on pure white lead is $23.05, while the various proprietary brands are being quoted at $20.35 per hundred pounds in ton lots; les than ton lots are 35c per hundred pound higher than these quotations.

Window Glass Firm; Stocks Still Light

Toronto.

GLASS.—There continues to be a considerable scarcity of glass, although jobbers state they are able to handle any business that is being offered at present, and while business is very heavy for this season of the year compared with past years it is their opinion that present offerings are very light to what will be expected during the latter part of the summer months, when builders and house owners, etc., are anxious to get their window openings filled in before the fall and cold weather come in. However, it may be that the situation will have had some relief by that time and many are hoping for good business providing they can get the stock to sell. The price on window glass is as per current page.

Cold Water Paint, Putty, Etc., Scarce; No Whiting

Toronto.

COLD WATER PAINTS.—The great scarcity of whiting, which has prevailed for a considerable time, has not yet been relieved and manufacturers state if anything the situation is becoming worse. This has a serious effect on cold water paints, and other commodities depending on whiting for their manufacture. Some have it that there is considerable Belgian and other grades of whiting on the market, but state that they are lacking certain qualities that the English whitings possess and which are essential for the manufacture of this commodity. The present prices are as per current quotation pages.

PUTTY.—The putty situation is practically unchanged and the above conditions also apply to this commodity, which has a tendency to make the present quotations very firm, although prices have been unchanged and are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure Putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Turpentine Stocks Nearly Exhausted; None Coming

Toronto.

TURPENTINE.—Very little relief has been shown on the turpentine situation and jobbers and importers report very light stocks on hand and in many cases it is believed that some have no turpentine to sell and those that have stocks are selling only in small quantities in order to make their present supplies hold out until the arrival of the new crop.

The present scarcity is solely attributed to the tie-up of the American railroads, and importers state that they have considerable turpentine in transit but it has been tied up with the recent embargo which is prevailing on the United States railroads. It is the opinion of some that this strike is in no way settled yet and some would not be surprised if it were to hang on indefinitely. This being the case jobbers state there will be a famine in turpentine unless some relief comes from other sources, which they state seems improbable at the present time.

No one seems to have barrel quantities to sell, and any that have supplies are selling in lots of from 5 to 10 gallons at prices ranging from $4 to $4.25 per gallon.

Turpentine—	Per imp. gal.	
1 barrel lots	....	....
2 to 4 barrel lots	....	....
5 gal. lots	....	4 25

Linseed Oil Sppulies Light; Prices Firm

Toronto.

LINSEED OIL.—Practically no improvement has been shown in the linseed oil situation and stocks are gradually becoming depleted. In some cases crusher have been forced to close down or work on part time for the want of seed, and while they state they have bought and paid for many cars of flax seed, which is in transit, they claim they are unable to get delivery on account of the embargo which is prevailing on the United States railroads.

It was expected that the Canadian market would reveal some Canadian flax seed, but this does not seem to have been the case, and the Canadian market shows very little home grown seed, it is stated.

Some report that English oil has been coming on the market and that they have been able to obtain small shipments. It is believed, however, that the English crushers will be unable to send enough of their product to this market to relieve the situation or even affect the price, as the demand is so keen and supplies so slow it is believed. The present quotations are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
	Boiled	
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.

Fix Prices of Natural Gas in Ontario

Toronto, Ont.—In order to encourage production and exploration in the natural gas fields, as well as to promote conservation of the supply, the Ontario Government proposes to give authority to the Natural Gas Commissioner to fix prices, "notwithstanding the terms of any special Act or letters patent, agreement, franchise bargain or other instrument as between the producer, transmitter or distributor and the consumer," where it is found that such action is necessary for conserving the supply, prolonging the service to the consumer and furthering the search for and development of new sources of natural gas supply.

The Minister expressed the opinion that a more uniform price for natural gas would tend to conservation. It would also be an important influence in encouraging development and discovery since the Government proposed in making provision for price increases to exact as a condition that a specified amount should be spent on exploration, etc.

To Regulate German Production of Iron and Steel

The "Iron Parliament," which is to regulate the whole of Germany's production, sale and foreign trade in iron and steel, has now been organized with headquarters at Dusseldorf. It will be organized into two groups—one for pig iron, ferro-manganese and ferro-silicon, and the other for half-finished goods, railway material, form and bar iron, rolling mill products, plates and tubes. The "Iron Parliament" will consist of seventy representatives of producers, traders and consumers. In each of these groups employers and employed will be equally represented.

Dougall Varnish Lists

The Dougall Varnish Co., Ltd., Montreal, have prepared several price lists and booklets dealing with varnishes of their manufacture. "Dealers' Descriptive List" is the title of one, giving, as the name implies, information relative to many of their products. Another, "Dougall Motor Car and Carriage Varnishes," describes finishes of this nature. In addition, list prices are given on a separate folder. Any of these may be obtained by readers of HARDWARE AND METAL by addressing the above-named company, Manufacturers' Street, Montreal, Que.

Roumania Orders Canadian Paints, Varnishes and Brushes

Ottawa.—Included in the orders placed by Roumania under the twenty-five million dollar credit extended by Canada, are orders for paints, varnishes and brushes from Canada valued at $222,506.

Write Glidden

Write for the Glidden proposition.

Do it now while there is still time to lay your plans for the spring campaign —while there is still time to get the jump on the other fellow with a quality line and a complete line.

Remember there will be no obligation but you will have an opportunity to study a truly worth while offer that will not only give you dependable painting products, but products that are known in every section of the Dominion.

The latest addition to the Glidden line is Glidden Endurance Paint. Surely you will wish to get full details of this new product.

So write to-day.

"61" Dealers Get the Big Ones!

WHOPPERS! — and they *don't* get away! On the contrary, sales come thick and fast. There's no nerve-racking, profit-sacrificing angling for business with "61" Floor Varnish. It is simply a case of selling a quality product to meet a demand created and sustained by high-grade national advertising.

This advertising — begun twelve years ago — has built up a reputation for "61" as *the dependable* heelproof, marproof, waterproof floor varnish.

People have been finishing their floors with "61" for over thirty years. They know how it will "stand up." These lustrous, semi-transparent colors stain and varnish in one operation. They are smooth, clean and clear, and stand out in a class by themselves! "61" Floor Varnish *moves fast* because it is *known* as *the* all 'round, high-grade household varnish.

Effective dealer helps tie up live dealers' stores to the national advertising and assure steady sales and satisfactory profits.

Write today for the details of the very attractive Dealer Proposition.

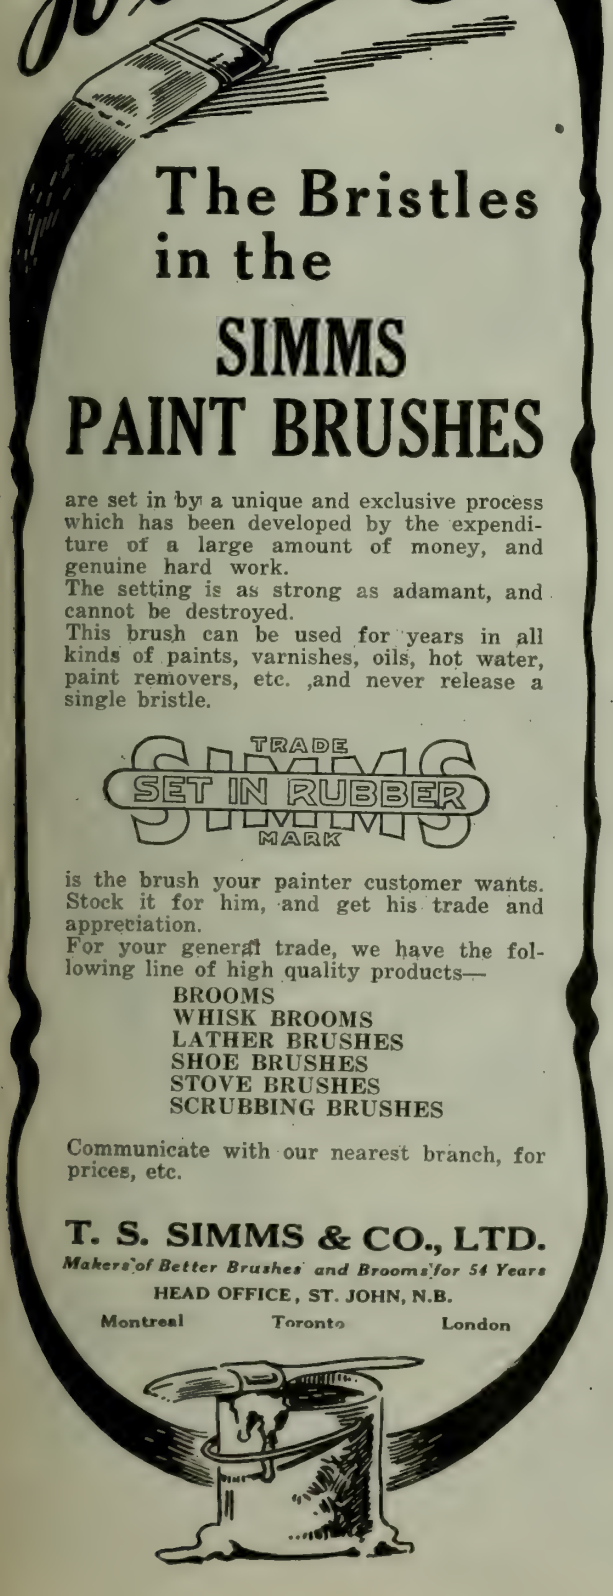
Defies Destruction



The Bristles in the SIMMS PAINT BRUSHES

are set in by a unique and exclusive process which has been developed by the expenditure of a large amount of money, and genuine hard work.
The setting is as strong as adamant, and cannot be destroyed.
This brush can be used for years in all kinds of paints, varnishes, oils, hot water, paint removers, etc. ,and never release a single bristle.

TRADE SIMMS SET IN RUBBER MARK

is the brush your painter customer wants. Stock it for him, and get his trade and appreciation.
For your general trade, we have the following line of high quality products—

BROOMS
WHISK BROOMS
LATHER BRUSHES
SHOE BRUSHES
STOVE BRUSHES
SCRUBBING BRUSHES

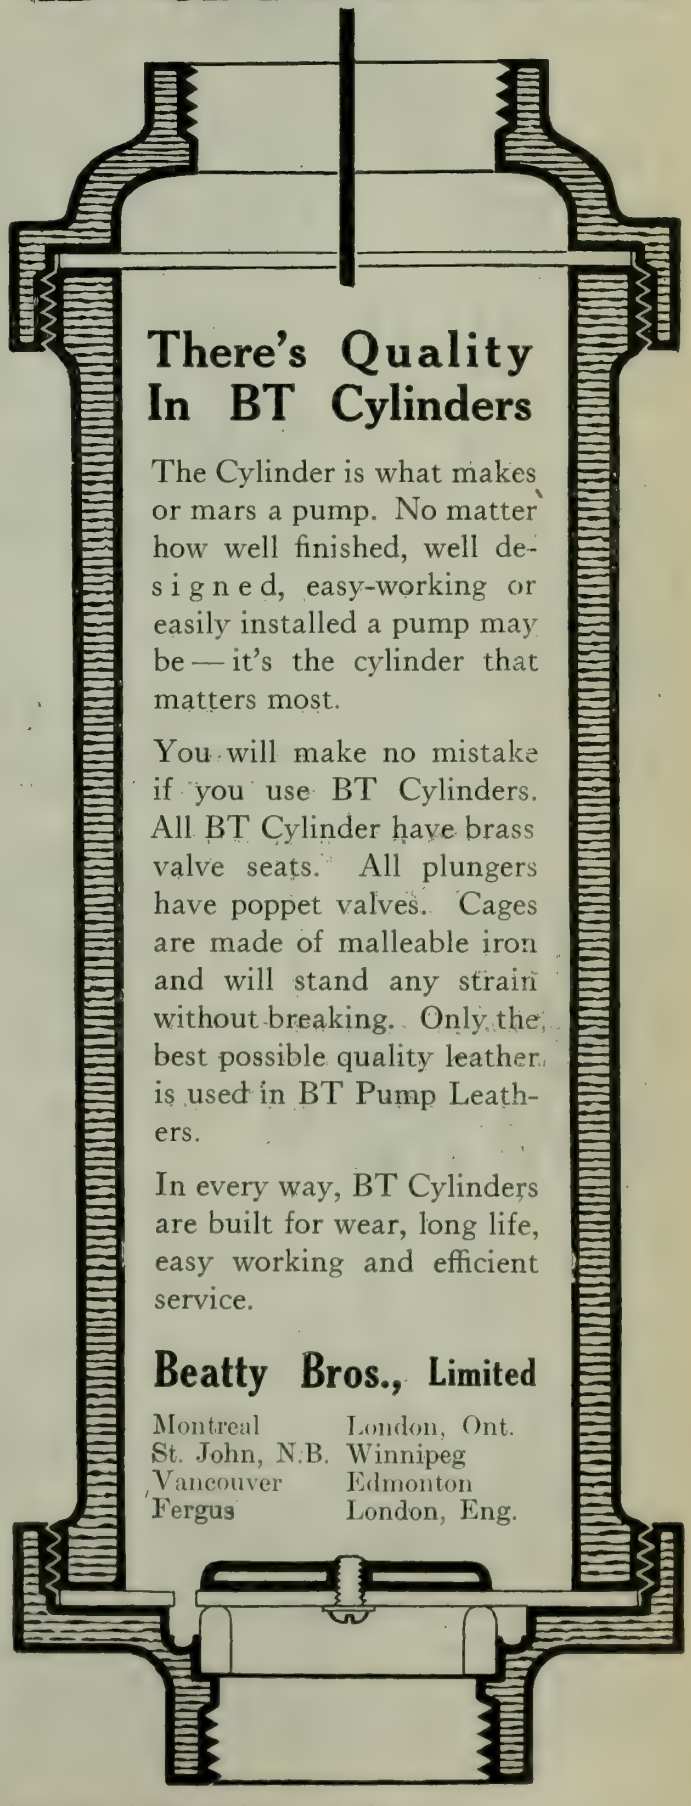
Beatty Bros. Limited Bulletin



There's Quality In BT Cylinders

The Cylinder is what makes or mars a pump. No matter how well finished, well designed, easy-working or easily installed a pump may be — it's the cylinder that matters most.

You will make no mistake if you use BT Cylinders. All BT Cylinder have brass valve seats. All plungers have poppet valves. Cages are made of malleable iron and will stand any strain without breaking. Only the best possible quality leather is used in BT Pump Leathers.

In every way, BT Cylinders are built for wear, long life, easy working and efficient service.

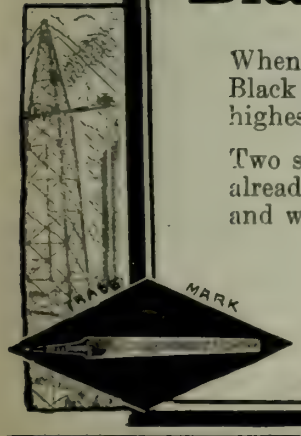
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

"The World is Painting Buy Early"

Stephens'

REGISTERED TRADE MARK

Every indication points to the imperative necessity of early buying. Reports from domestic sources and abroad show the certainty of extensive painting throughout the Dominion and the world.

The great revival of building and the completion of vast plans interrupted by the war are but a part of the forces now acting to create a remarkable season for paints and varnishes. Order early.

Ask about a Stephens' Agency
It's a paying proposition.

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

ASHDOWN'S
Sporting Goods
Summer Catalogue

The summer number of our No. 19 Sporting Goods Catalogue is ready for distribution. We carry the most complete line of summer sporting goods in Canada. We can supply equipment for all Canadian sports, and can furnish the hardwareman with many striking and profitable lines in reliable Sporting Goods. All over Canada dealers have increased their business with Ashdown Sporting Goods.

The price list accompanying this catalog is approximately correct at the date of issue, but owing to the constant fluctuation of market prices it is subject to change without notice. Only such changes in prices and lists will be made during the season as are absolutely necessary, and we assure you that we will give you the advantage of a decline as quickly as a change in advance. We expect to issue corrected lists monthly during the season.

"DULUTH"

Sectional Hardware Store Equipment

Display Doors
Sectional Removable Panel

The display doors used in Duluth Cabinets are not ordinary doors, hung with ordinary hinges, to ordinary open shelving—they are far more than that. They are constructed so carefully and well, and are so substantially hung, that when the samples are all in place on the green felt covered panels in the rear, the doors will not sag or bind. When one considers the number of times each day in the year these display doors are opened and shut, one can quickly see how important it is that they be properly made. This is only one of the many features of Duluth Sectional Hardware Store Equipment that is carefully and thoroughly planned and constructed. May we tell you more about our splendid line and what it can do for you in sales and profits?

Reliability Is The True Test Of Linseed Oil

When a man grows up with a business he becomes an expert in his line. We have men in our employ who have grown up with the LIVINGSTON BUSINESS, men who have studied our interests for the past 50 years. They are part of the organization.

This is one of the secrets which is responsible for the high and uniform quality standard of

Livingston Brand

The entire organization is at your service when you specify our brand.

Protect your 1920 business by using the oil which you know to be right.

The outward marks of this "Quality" oil are the

"BLUE BARRELS

Pearcy's Prepared Paints

This is the season for general overhauling of the home; the Spring housecleaning and the subsequent repairs, and painting and varnishing to put the home in order for a new season.

For forty years Pearcy's Prepared Paints have proved themselves to the dealer to be good, dependable business-builders and thousands of consumers were long ago convinced of their lasting, covering and protective qualities and prefer them for all their needs.

Pearcy's Prepared Paints have won this enviable position through purity, uniformity and tested and proved reliability in use. No reasonable test of brushing, spreading, covering or exposure to weather is too severe for these worthwhile paints.

If you have never sold Pearcy's Prepared Paints, we suggest that you have our salesman call and demonstrate to you the advantages in handling this line.

Sanderson Pearcy & Company, Limited

272 Van Horne Street (Corner Dufferin Street) Toronto, Ontario

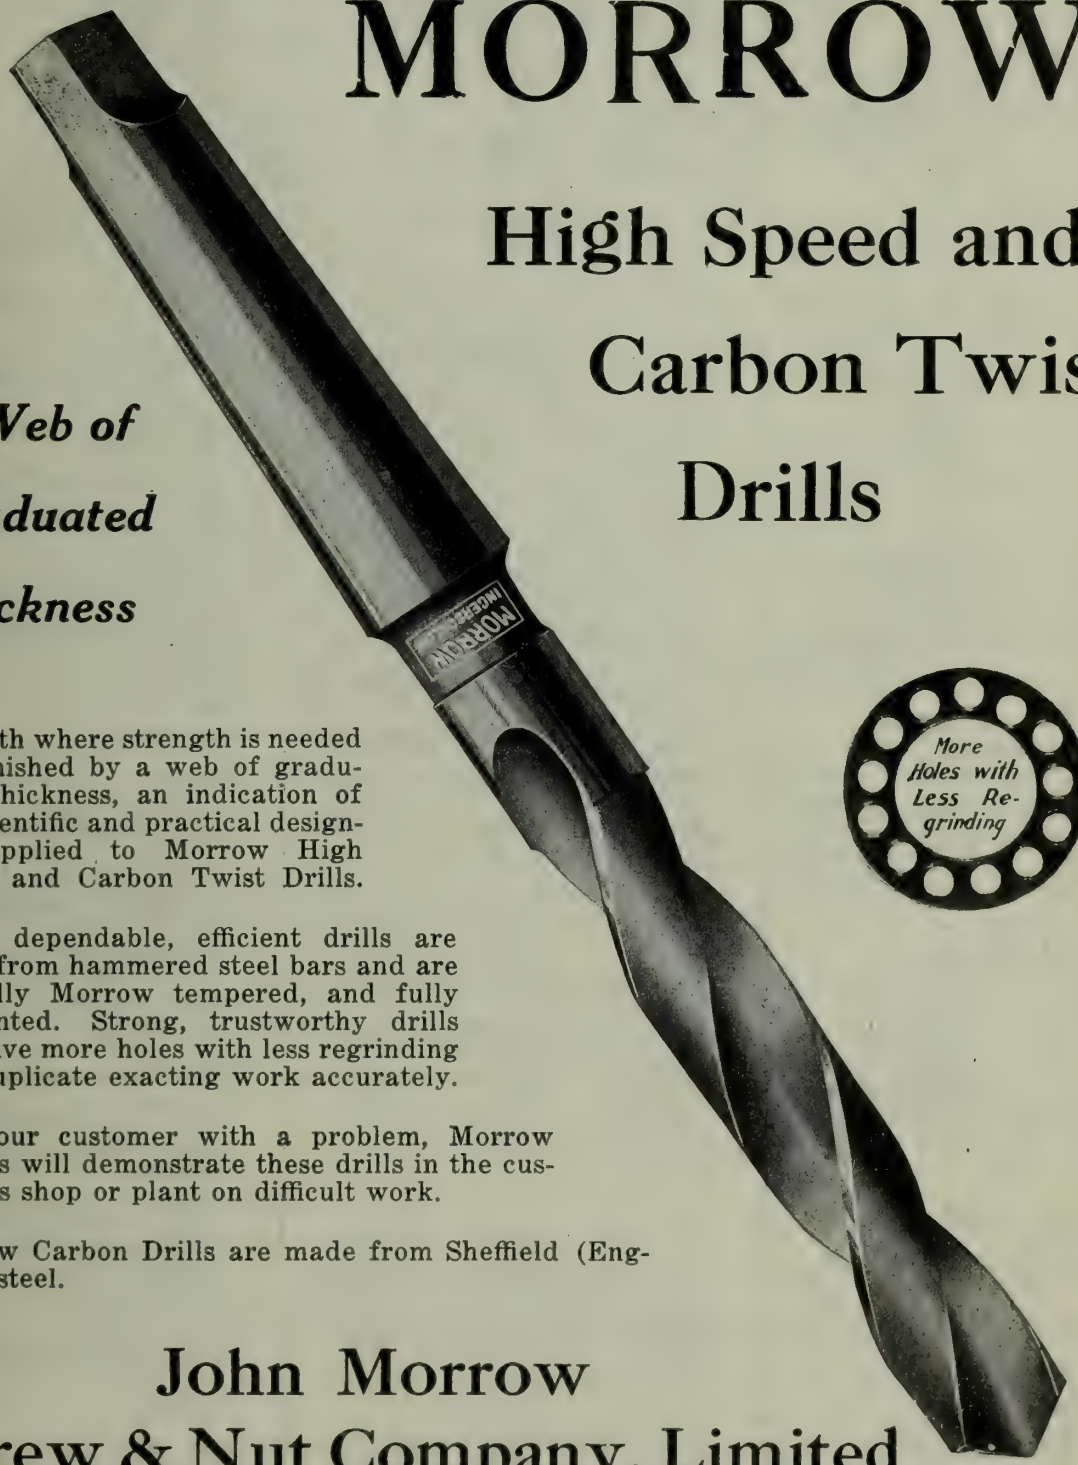
MORROW

High Speed and Carbon Twist Drills



A Web of Graduated Thickness

More Holes with Less Re-grinding

Strength where strength is needed is furnished by a web of graduated thickness, an indication of the scientific and practical designing applied to Morrow High Speed and Carbon Twist Drills.

These dependable, efficient drills are made from hammered steel bars and are specially Morrow tempered, and fully warranted. Strong, trustworthy drills that give more holes with less regrinding and duplicate exacting work accurately.

For your customer with a problem, Morrow experts will demonstrate these drills in the customer's shop or plant on difficult work.

Morrow Carbon Drills are made from Sheffield (England) steel.

John Morrow Screw & Nut Company, Limited

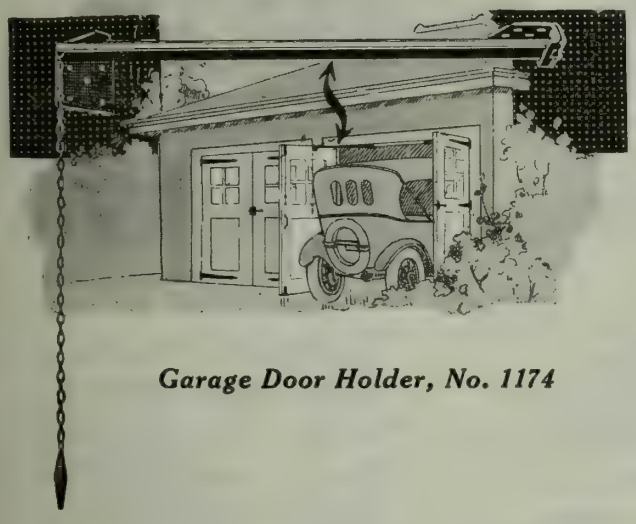
To better know
THE STANLEY WORKS PRODUCTS



Garage Door Holder, No. 1174

It's "Harvest Time" for Garage Hardware Dealers. Sales and profits come easiest when your customers needs are greatest. At present, motor car owners represent the logical group on which your "selling attack" should be centered. Everywhere they are building new garages or repairing old ones. Let them know you carry

STANLEY WORKS Garage Hardware

For they appreciate the full measure of STANLEY quality and will gladly welcome your suggestions regarding proper garage equipment.

Catalog R63 illustrates and describes the most popular sellers in STANLEY Garage Hardware. Write for a copy to-day.

Barrett Money Makers

How's Your Stock?

Every building owner, every manufacturer, every farmer in your community is a live prospect for every one of these well known Barrett Products. They are business-builders because they are satisfaction-producers. That's why they bear the Barrett name! Don't overlook the opportunity they provide to increase your sales, your profits and the good will of your customers.

EVERLASTIC "RUBBER" ROOFING

The standard ready roll-roofing of Canada. Made of high-grade water-proofing materials. Used on thousands of farm and factory buildings throughout the Dominion. Is low in price — easy to lay — wonderfully durable. You couldn't carry a better brand.

Three weights—light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement with each roll.

EVERLASTIC LIQUID ROOFING CEMENT

Nothing can compare with it for saving and restoring old felt and "rubber" roofs. Comes ready for use. Spreads easily, dries quickly. Forms a smooth, waterproof, weatherproof surface that stops the small leaks, strengthens the weak spots and adds years of service to the roof.

Packages of all sizes, from 1-pint cans to 40-gallon barrels.

ELASTIGUM PLASTIC PATCHING CEMENT

The waterproof cement that *sticks* and *stays*—regardless of weather or temperature. Just the thing for patching holes in roofs, lining gutters and flashings, and stopping leaks in wood, metal or masonry. Known as "The Plastic Cement of a Thousand Uses."

Put up ready for use in 1-lb. tins (cases of 24); 5-lb. cans (cases of 12); 25-lb. and 100-lb. packages, ½-barrels (about 300 lbs.) and barrels.

EVERJET ELASTIC CARBON PAINT

The most popular and most effective protective paint on the market. Impervious to moisture, alkalies and acids. Will not peel, scale or crack. Prevents rust and corrosion on machinery, farm implements, smoke stacks and all metal surfaces subjected to severe exposure.

Put up in 1-gallon lithographed cans (cases of 12); 5 and 10-gal. cans, ½-barrels (about 20 gallons) and barrels.

Saves Fuel,

Time and

Annoyance.

Cooks Better

Royal Fireless Cooker

The great variety of selling points in this exceptionally efficient cooker appeals convincingly to the customer —to the housekeeper especially.

It cooks food better than any other means of cooking, preserving all the qualities otherwise wasted through evaporation; it adds to health by saving labor and providing better food; it saves time for other occupations—sewing, reading and recreation. Show your customer that it pays its cost quickly in fuel saved.

Dealers find it extremely profitable and a source of many sales. Delighted customers "boost" your sales.

Also equipped with electric element for attachment to lamp socket. See our steam cooker—cooks a whole meal in separate compartments, for stove or electric attachment.

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

SIMONDS

The hand saw that means satisfied customers. Carried by first-class hardware stores in every civilized land. They cleave their way to profits for dealer and satisfaction to purchaser.

OUR DOME DAMPER HAS ALL OTHERS BEATEN EVERY WAY

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

Frost King

Unequalled Endurance

The superior quality of Hoyt Metals has resulted in sales amounting to $10,000,000 worth annually. Truly a remarkable record which might be credited to the high anti-friction quality, unequalled endurance, and the cool running characteristic of this metal.

Hoyt Metal Company

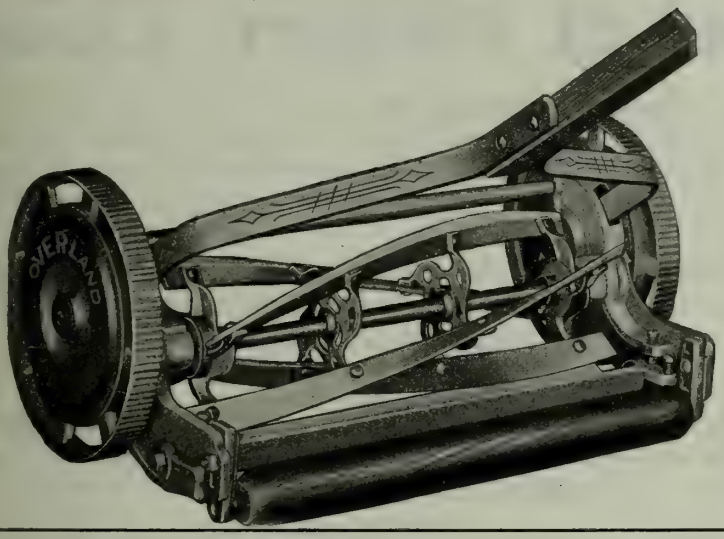
Five Mowers

With Selling Points

That Make Sales



Because they are carefully tested and inspected before shipment. Attractively painted and finished. Made from perfect castings from our own foundry and accurately machined to perfect fit assuring perfect fit of replacement parts. Wheels provided with reinforced raised rim protecting gears from dirt, grit, etc.

Knives of special process crucible steel specially ground to perfect cylinders on the same bearings on which they cut grass. Special three point catch pinions. Either ball or split brass bush bearings, easily adjusted; and a solid steel tree guard.

The Eureka Planter Co.
Limited

Woodstock, Ontario

"A PROFITABLE SUCCESS"

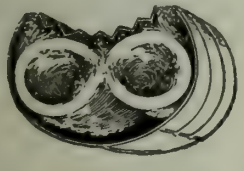
DEALERS handling the 1900 Washer line have found that the privilege of "Filling Washday With Pleasure" is —for them—a pleasant as well as a profitable occupation.

The 1900 Cataract Electric Washer has proven itself **the ideal washing machine** for accomplishing this result—by virtue of several special features.

First the figure 8 movement, that washes clothes cleaner and faster than ordinary washing machines.

Then the swinging, reversible wringer, which saves steps, by swinging from washer to rinse water, then to the bluing water and finally the clothes basket, without shifting the washer an inch.

The fact that there are no parts in the tub to rub against the clothes. No heavy cylinders to lift out and clean after the wash is finished, is another strong selling point.

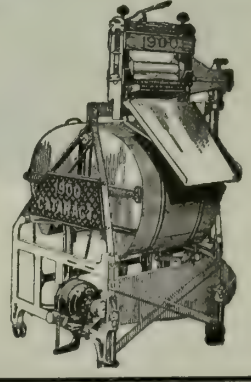


The hot, soapy water swirls through the clothes in a figure 8 movement four times as often as the ordinary washer!

In short, it means that all the housewife needs to do is connect the plug to the electric light and pull back the lever. Off goes the washer and does the work without watching, bother, or fuss.

Extensive advertising is only one of many ways in which we co-operate with the dealer to make the representation of this **perfect washer** "A Profitable Success!"

Write to-day, and investigate our famous line of Washing Machines.



The Nineteen Hundred Washer Co.

JACOBS CHUCKS

Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most-profitable line. There is no reason why you, too, shouldn't get your share of this business.

Jacobs Chucks never fail to make good with the drill user. That's because their speed, accuracy and grip result in greater efficiency, convenience, ease of handling and economy in drilling operations.

Selling Jacobs Chucks means selling better drilling. And that's what the drill user is willing to pay for at any time.

Will Heat Water Faster With Less Gas

STACK HEATER

The Stack Hot Water Heater will heat water in one minute, and with less gas. These are the strong points which make easy selling for the Stack Heater.

When your customers see how the water passes into the numerous small pipes exposed to the hot gas flame, they understand. It requires no technical knowledge to see that the water will heat faster in the numerous small pipes than in one large coil.

Send for Stack Heater Display Card.

Teaching Boys to Buy Good Tools

MANUAL training courses in our schools are teaching boys and young men how to do good work with tools.

These boys, as a result, are coming to appreciate good tools more than ever. They make up a class of tool-buyers that it is distinctly worth while to cultivate.

We are telling these young amateur carpenters and wood-workers about the quality of Disston Saws and Tools.

To do this, we are using the magazines to which they look for information on mechanical subjects—"Popular Mechanics," "Popular Science Monthly," "Scientific American," and "Industrial Arts," etc.

We send the Disston message to more than three-quarters of a million readers of magazines of this kind. The exact number of subscribers is 781,067.

These boys constitute by no means a small market for sales of quality saws and tools.

Telling this market the story of Disston Saws and Tools is another instance of our thorough cultivation of all classes of buyers to increase public demand for high-grade saws and tools.

Next month we will tell you how we reach another class of tool-buyers—the "handy man around the house."

Disston Saws and Tools are constantly advertised in magazines and agricultural publications with a total circulation of 8,497,003 copies each issue.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

37 St. Antoine Street
Montreal

INCOMPARABLE
REGISTERED
TRADE MARK.

Buyers of Fishing Tackle!

In recent years you must have noticed a marked tendency on the part of **Anglers** to demand finer—less clumsy—better quality tackle. In other words, anglers are becoming real **Sportsmen,** instead of just fishermen and prefer to rely more on their own skill than on coarse, cheap tackle, large hooks and hand lines.

Buyers: Be prepared. The demand for higher grade, more sportsmanlike tackle is surely growing rapidly.

We manufacture all grades, but we much prefer to make and sell the **best**—the most sport-productive and cheapest in the end—**the Incomparable Brand.**

Mail orders and correspondence solicited. Goods sold to the trade only.

4 Good Reasons --READ 'EM

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

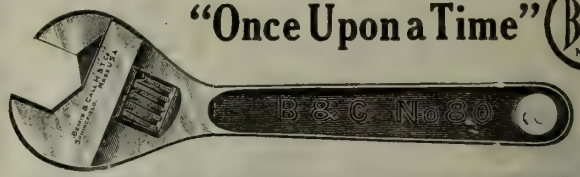
"Once Upon a Time"



An automobile broke down in front of a Hardware Store. While the lightning flashed and the water gurgled along the curb, the owner slogged around in his wet boots and found he had no tools with him. The Hardware Man sold him a wrench, in a few minutes a screw driver and another style of wrench. And then, gently and tactfully—for the car-owner was miserable—he pointed a moral about preparedness; and he sold that auto driver about fifty dollars' worth of tools. HE HAD THE RIGHT TOOLS.
Are you prepared? Have you got a line, like Bemis & Call, that you could stand and watch him use with confidence that he would buy more?

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way. Our leaflet explains it fully.

FAIRBANKS-MORSE

A National Institution of Mechanical Service

IN Canada, as in every country in the world, there are names which, through years of service, have warranted national confidence and good-will. In the Canadian world of mechanical and engineering efficiency there is one name which enjoys the distinction of leadership. Its prestige carries through the entire coast-to-coast chain of sales offices and warehouses into every city, town, and hamlet.

Fairbanks-Morse products mark the farmer, the manufacturer, the artisan, and all users as careful and practical buyers of mechanical goods. The Fairbanks-Morse 100% quality seal is the buying guide for the consumer—the guarantee of satisfaction.

The Canadian Fairbanks-Morse general catalogue is a reference of what is standard in design and practice in mechanical goods. This book lists the largest variety of scales, valves, steam goods, oil engines, pumps, electrical machinery, machine tools, woodworking machinery, transmission appliances, railway contractor's and machine shop supplies ever published in Canada in one book. Your copy will be sent on request.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

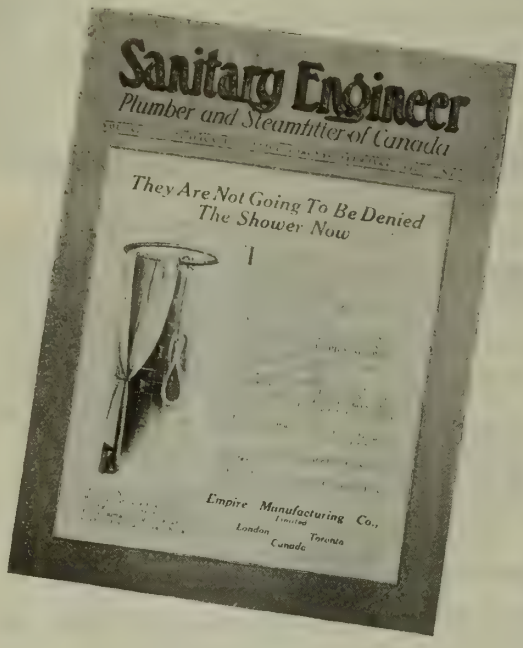
Do You Conduct A Plumbing And Heating Department?



The livest, up-to-date sanitary plumbing and heating engineers in Canada are subscribers to SANITARY ENGINEER, **Plumber and Steamfitter of Canada.** This live, breezy paper coming out twice monthly with a large volume of practical and interesting information for its readers is available at the cost of $1.00 per year, or less than 5c per issue. For the small sum of $1.00 you receive 26 issues filled with interesting editorial information and bright, newsy advertising pages giving news and information regarding new goods and the latest developments in plumbing and heating goods.

If you conduct a plumbing and heating department and you are not yet a subscriber to SANITARY ENGINEER, you are overlooking one of the best investments you could possibly make.

Read This Interesting List

Read the following, giving a brief summary of editorial information in the April 1 issue:

"PLUMBING REPAIRS WILL BE CASH." A story telling how 10 Brantford plumbing firms have placed their businesses on a cash basis.

"RIGHT ON THE JOB—GET BUSINESS." An illustrated story telling how Brousseau and Frere, Quebec, Que., have built up a big business on a small beginning. Their methods are described in this issue.

"SASKATCHEWAN CONVENTION REPORT." A detailed report of the convention of the Saskatchewan Society of Sanitary and Heating Engineers held at Saskatoon.

"CONTRACTS AND CREDITS." An address delivered by Neal Beaton, of Beaton & Brady, Saskatoon, before the Saskatchewan Convention.

"SEWAGE DISPOSAL FOR SMALL COMMUNITIES." Fourth article of a splendid series of articles by B. T. Ellis for which SANITARY ENGINEER has the exclusive publication rights for Canada.

"VENTILATION AND EXHAUST SYSTEMS." An address delivered by C. W. Keniston at a recent convention held in Milwaukee.

"TEST YOURSELF WITH THESE QUESTIONS." A test which you can apply to yourself. It consists of 65 questions and will enable you to check up the results of your personal effort and also of your business.

"RUMOR OF A TAX ON SALES IN CANADA." Details regarding the proposed turnover tax and how it will work out.

"MONTREAL CRAFT SEES ENCOURAGEMENT." A page of interesting information regarding the activities of the Montreal organization.

"THOUGHTS." By Napolean Hill—a page of inspirational reading matter.

"BUILDING ACTIVE DURING FEBRUARY." Complete Details regarding the building permits issued in Eastern and Western Canada cities.

"EDITORIAL." Success and Profiteering—Under Production and Over Production—Increasing Sales—Turnover Tax—Causes of Inflation—Are You Insured?

"NEWS FROM HERE AND THERE." A bright breezy page giving news gathered from various sources.

"MARKET CONDITIONS AND TENDENCIES." Two pages of bright accurate market information giving actual prices quoted on goods used by the plumbing and heating trade.

The above is a partial list of the editorial contents of the April 1 issue.

The April 15th issue contained, among other features, a complete report of the Ontario Society of Domestic Sanitary and Heating Engineers' Convention, held at Toronto.

Pin $1.00 to the coupon below, mail it to the address given below, and you will immediately start receiving twice monthly a paper that is easily worth more than the subscription for any one single issue. SANITARY ENGINEER is one of the sixteen papers published by the MacLean Publishing Company. It has been published twice monthly since 1907. Most good plumbing and heating engineers are now subscribers. If you are one of the few not subscribing, **ACT NOW.**

"We Sell Imperial Polarine"

That's the sign motorists look for when they need lubricating oil.

Over 62 per cent. of Canadian motorists use Imperial Polarine exclusively.

Handle Imperial Polarine and you are assured of a steady trade and a turnover of hundreds of dollars' worth of Imperial Polarine each year.

Your store becomes the motorist's headquarters for lubricating oil—you make a minimum profit of 33 1/3 per cent. on every sale—and incidentally get much additional business as well because motorists who call for Imperial Polarine are liberal buyers of many other things.

You are entitled to share in the benefits that all Imperial Polarine dealers derive through the great demand for this high-grade lubricant—a demand that is being steadily increased by our extensive advertising and by the superior qualities of Imperial Polarine itself.

For better business carry all grades and sizes. Imperial Polarine, Imperial Polarine Heavy, Imperial Polarine A. In ½ gallon, gallon and 4 gallon lithographed sealed cans, 12½ gallon steel kegs, half-barrels and barrels. Also Imperial Polarine transmission and differential oils and greases.

IMPERIAL

Polarine

MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.

IMPERIAL POLARINE
(Light Medium Body)
IMPERIAL POLARINE HEAVY
(Medium Heavy Body)
IMPERIAL POLARINE A
(Extra Heavy Body)

One of these grades is specially recommended for the correct lubrication of any car or truck in your community.

See the Imperial Polarine Chart of Recommendations—display it prominently and sell by this chart.

For Efficient
Automobile transmission and differential lubrication sell

The Super-Test

¶ BEFORE you were asked to buy or try Dunlop Cord Tires, they must undergo a test such as you would never give them.

¶ Tires, just like your garagemen and dealers now sell are put on our own test cars, and away speed the drivers.

—A Test that is kept up day and night.

—A Test that takes in some of the worst roads in the country and the generality of bumps, bad turns, and all the sudden stops that go with them.

—A Test that specifies the number of miles which must be made by the drivers each day and night.

¶ The results of this crucial test, naturally, have an important bearing on our manufacturing policy.

¶ Tested-in-Advance Service aptly applies to *Dunlop Cord Tires—"Traction," "Ribbed."* Can you ask for a greater guarantee than the story the road tells—a story which in the case of Dunlop Cord Tires proves that our manufacturing methods are not only Right but *Dead Right?*

If interested, tear out this page and keep with letters to be answered.

"—saves two-thirds of my Tire Expense"

"Once a week I go over my tires—and seal the little holes and cuts that ruin tires by permitting dirt, oil and water to reach and rot fabric. With the SHALER Vul-Kit I 'vulcanize' these holes with tough, new rubber that makes a lasting job of it. It takes only a few minutes—but keeps my tires good as new—prevents tire trouble—*doubles* my mileage—and actually saves ⅔ of my tire expense."

Sell the SHALER VUL-KIT

It's easy to sell. Motorists are looking for a tire-saver like this. Their word-of-mouth endorsement of the SHALER to their friends gives you a chain of sales. The repair material they buy of you to use with this vulcanizer gives you "repeat" profits that come to you regularly—without effort. You make a good profit selling the Vul-Kit itself and big, steady "repeat sale" profits.

SHALER Vulcanizers are advertised regularly throughout the year. Motorists are now reading the large, dominant advertisements in the leading national and motorist publications. Every car-owner needs a SHALER Vul-Kit—sell it to him and make these big steady profits for your self.

Order From Your Jobber Now—Write Us for Catalog

of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use

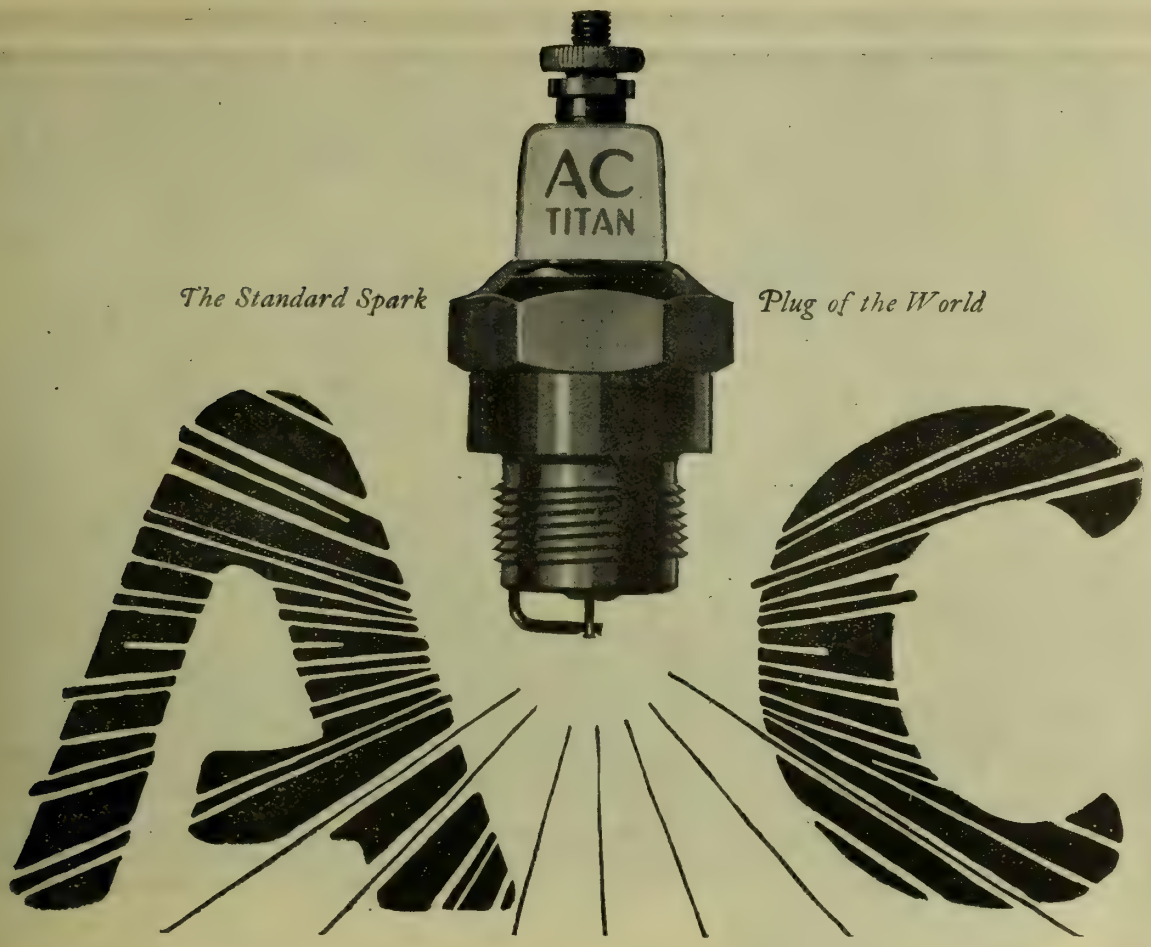
The Standard Spark Plug of the World



EIGHT AC Spark Plugs fired the engine of the Peerless that broke the stock car record for the arduous run between San Francisco and Los Angeles.

Eight AC Spark Plugs functioned perfectly during nine hours and twenty minutes of punishing road speed, desert fighting and mountain climbing

Eight AC Spark Plugs played a vital part in the shattering of a record that has withstood repeated challenges for five years.

What these eight AC Spark Plugs did in the engine of the time-defying Peerless, eight other AC Spark Plugs, or eighty, or eight hundred, or eight thousand will do.

They will prove unfailingly dependable no matter in what make of car they are used or what service is demanded of them.

That's why it pays to sell AC Spark Plugs as well as to use them.

Spark plug dealers, like spark plug buyers, can't go wrong with AC's.

A Few of the Seventy-Two Bumpers Manufactured by Concrete Bumper Co.

Harvest of Sales

A Necessity—Not a Fad

The above illustration shows a few of our seventy-two bumpers. Automotive accessory dealers everywhere are having a real harvest of sales and a big increase in business. A prospect "sold" on our Concrete Bumpers is your customer for all time.

Concrete bumpers are a real necessity —not a passing fad.

Our Concrete Bumpers are a reliable, dependable accessory, and fill a much felt want with automobile owners.

Our line consists of our celebrated Concrete Filled Rod Bumper and Spring Steel Rod Bumpers. Channel, Hexagon Channel and Diamond Rod Bumpers in all sizes are available.

Special bumpers for Overland Little Four and Chevrolet 490 are now ready for delivery, and they are beauties!

Cord or Fabric.

The Sales Compelling Force Behind PARTRIDGE TIRES

Partridge advertising blankets Canada. From coast to coast, the motorists of this country are being persistently told the story of Partridge achievements.

The large dailies, small city dailies, motor magazines, trade journals, farm papers and magazines of general circulation carry the convincing records of Partridge superiority, and all persons who buy tires are being persuaded to try Partridge.

Partridge tires are easily sold—chiefly because they are such good tires, and secondly because the demand has been created and is sustained by live, sales-compelling advertising.

We back up our tires, and we back up our dealers. Write us for hangers, posters and other advertising matter—and take advantage of our newspaper and magazine publicity by displaying Partridge Tires in your windows.

Cable Address: "Beckley." Codes: A.B.C. 5th Edition and Western Union

East or West the North Star is the biggest battery value.

Dependability

The user of North Star batteries knows that he can expect maximum service under all conditions. Heat, cold or humidity cannot affect the strength of the battery—the full power must be delivered in actual spark.

The value of dependability cannot be estimated. Delays, big or little, cost money. Serious loss can be occasioned by unreliable batteries. The North Star cells end delay losses and are a guarantee of continuous operation for engines, tractors, automobiles, telephones, bells, etc.

Made singly and in multiples (perfectly protected and conveniently arranged with handle). The user gets better service and the seller bigger returns and larger turnover from the North Star.

Let us quote you prices.

London, Eng. New York Chicago

M&S

The Plug with the Hotter Spark

The ball point of the "M&S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high-grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

No.	Models
500	½" Standard
501	⅞" Standard
502	⅞" Long
503	⅞" Long with Chevrolet Terminal
506	½" Long
504	Regular Porcelain
505	Chevrolet Porcelain

Dealers—The "M&S" plug is standard equipment on the new Overland "4". Ask your jobber for them.

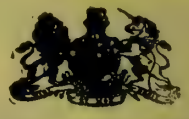
AGENCIES WANTED

ENGLISH FIRM WITH AGENTS ALL OVER Britain desires representation or sole selling agency for good Canadian house. Any good line for Hardware, Ironmongery, Fancies, etc. Exceptional opportunity for distribution. Highest References. Box 87, MacLean, 88 Fleet St., London, E.C. 4.

Important To Manufacturers

Correspondence is solicited from progressive manufacturers of hardware, automobile and electrical goods desiring responsible representation in Western Canada. An efficient selling organization and connection with the jobbing trade from Winnipeg to the coast is at your service. If you are selling the jobbing trade only and are not represented in this field, write us now and we will call on you and talk over the proposition. Reply to Box 650, Hardware and Metal, Toronto.

PLEASE MENTION THIS PAPER WHEN WRITING ADVERTISERS.



SALE OF STEEL BRIDGE

SEALED TENDERS, addressed to the undersigned and endorsed "Tender for the purchase of Traffic Bridge Metal," will be received at this office until 12 o'clock noon, Monday, May 31, 1920, for the purchase of dismantled Through Bridge span, at Victoria Island Shipyard, Ottawa, Ontario.

The party whose tender is accepted must make payment before shipping the material, which is to be removed within 30 days from notification by Department.

Any further information may be obtained on application to the undersigned.

Each tender to be accompanied by an accepted cheque on a chartered bank, equal to 10 per cent. of amount of tender, payable to the order of the Minister of Public Works, which will be forfeited if the party tendering decline to carry out his bid. War Loan Bonds of the Dominion will be accepted as security, or war bonds and cheques if required to make up an odd amount.

The Department does not bind itself to accept the highest or any tender.

By Order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, May 10, 1920.

Enter Your Protest To-Day

Retail merchants are prepared to meet fair competition from mail order houses.

They object strenuously, however, to mail order houses receiving special privileges.

The Retail Merchants' Association claim the Government has been carrying at a loss the catalogues of mail order houses, and that this deficit has been made up by general taxation of which the retail merchant pays a large share.

The retail merchant is now faced with a further tax in the way of increased subscription price to his trade newspaper and any other Canadian national periodicals he may wish to purchase.

The Government announced a few days ago that it intended to bring in a bill increasing rate postage on all newspapers and magazines of general circulation 300% commencing the first of the year and 500% commencing the second year.

Undoubtedly the Government needs increased revenue, but why not secure this revenue by—

1. Making mail order houses pay the full cost of carrying their catalogues.

2. Eliminating privilege of registering parcels sent by parcel post as has been done in United States. We showed a few weeks ago how department stores were registering all parcels, thus clogging the mails, delaying delivery of newspapers and causing a loss which had to be borne by the taxpayer. The Government now proposes to increase registration fee to 10 cents, but as this gives parcel post packages express service, the rate is still much too low.

3. The Canadian National Newspapers and Periodicals' Association, to which HARDWARE AND METAL belongs, have suggested five abuses of second-class postal privileges which could be eliminated and which would save the Government considerable amount of money. Resolution of Hon. Martin Burrell proposes a drastic increase in postal rates on second-class matter of 300% the first year and 500% the second year.

A similar increase in first-class mail would increase cost of minimum rate for letters from 3 cents to 12 cents in 1921 and 18 cents in 1922.

The reason given for this increase is that the railroads have been awarded a higher rate for carrying mail matter. This increase, however, is less than 100%.

Salaries of postal officials have been increased, but much less than 100%.

A low postal rate was granted on second-class matter to encourage establishment of Canadian newspapers and periodicals. Is it fair when publishers have invested large sums of money to suddenly reverse the policy and make a drastic increase in rates which will ruin many worthy publications and cripple the service given by the majority which survive? We do not believe the Government are impressed with the valuable work done by such specialized papers as HARDWARE AND METAL. If they appreciated that these papers were tending to make merchants and clerks more efficient, they would see that they were of equal value to the work done by technical schools, merchandising course at colleges, etc.

Sign attached coupon and mail to us to-day. Also we would appreciate it very much if you would wire Postmaster-General and your Member of Parliament at Ottawa, urging that not more than 100% increase in postal rates on trade newspapers and magazines be made at this time. Send copy of telegram and letters to us.

Editor, HARDWARE AND METAL,
Toronto, Canada.

I am opposed to increase in postal rates on trade newspapers and magazines of more than 100%.

Order Now
For the Housecleaning Paint Sales

By ordering now you definitely save the profits on the sales lost by waiting for the salesmen. Don't delay—order now. It is a most important season for the hardwareman, and more so this year than usual, with the many plans for more building.

Women are becoming more and more customers of the hardware store. Commercial experts state that women purchase — or influence the purchase of — 80% of all goods sold. Certainly women are being educated to the importance of painting and varnishing, and our consumer advertising convinces thousands of women of the real advantages in "O. P. W." Paints and Varnishes.

They'll be among your customers at housecleaning time.

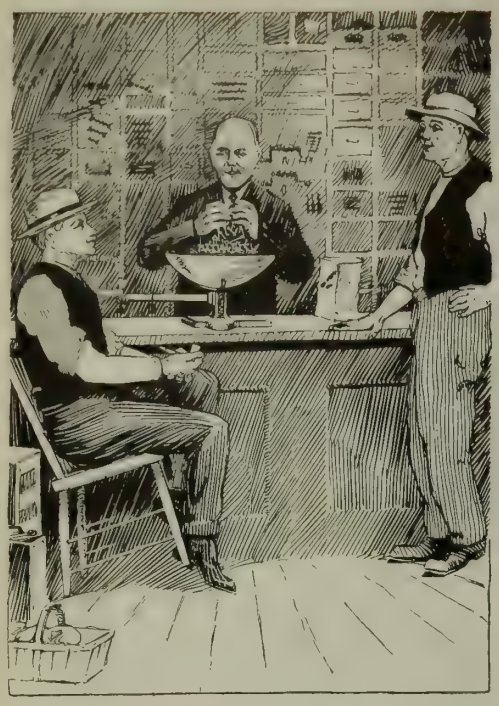
MIXING CONVERSATION AND DOWN WEIGHTS



will help wonderfully if you're

GREASING THE SKIDS TO THE ASSIGNEE

CONVERSATION, which establishes the warm human contact, vitalizes your business. When only weather, crops or politics are involved, even mistakes are not costly, but

FULL WEIGHT AND OVER

has neither heart nor conscience and is always deadly —just how deadly, dealers themselves are seldom aware.

Suddenly and with startling force the lesson has been brought home to several of Canada's large hardware firms within recent weeks—a lesson of lost profits and the silent, inexorable toll taken by inefficient, out-of-date equipment.

THE DAYTON HARDWARE SCALE

THE NEW MEMBER OF THE DAYTON FAMILY IS WITHOUT A SENSE OF HUMOR ---OTHERWISE IT MIGHT BE EXCUSED FOR ENJOYING A QUIET CHUCKLE OVER THE STORIES IT MIGHT TELL. LISTEN:

"Last Week," writes a Dayton representative, "I left a new Dayton Hardware Scale in one of Toronto's large stores. After a thorough demonstration of the value of time and the computing principles of the scale, I explained in some detail the difference one ounce makes in careful weighing. Returning two days later, I found one clerk who had a man's sized job on his hands. He was opening dozens of packages which had been weighed on the old platform scales used for years. The packages ranged from one to four—and in some cases, SIX—ounces overweight."

"A clerk in the paint section was weighing a pound of putty at 30 cents a pound. I placed it on the Dayton. Result: The firm saved two cents."

"A moment later another clerk was weighing on the old platform device an ounce of aniline dye at 25 cents an ounce. The Dayton computed it for him, and this is what it told: Real value 42 cents—or 17 cents overweight on 25 cents worth of dye."

"The proprietor called me into his office. He said: 'I don't want one of your machines. I want two'."

THIS IS ONLY ONE ILLUSTRATION OF THE WARM WELCOME THE NEW DAYTON—THE LAST WORD IN SCALE PERFECTION—IS RECEIVING FROM THE TRADE THROUGHOUT CANADA.

HERE COMES

One of the Best Sellers You Ever Welcomed to Your Store

THINGS just have to be dyed. The things women hold dear; blouses, waists, stockings, lingerie, the children's things and the household articles—all require a change of color. And so they are either sent to a dyeing establishment or done at home the best way possible with such dye compositions as have been available. Those dyes involved much trouble—and they made a messy unsatisfactory job.

Along comes Aladdin to completely solve the problem. Wonderful results may be obtained by its use—and with amazing ease. Obtainable in 15 lovely shades—also in three dark colors, black, brown and navy blue. Aladdin is a quality product—it does not crumble or deteriorate in any way—it may be used to the last thin wafer.

Stock up right away. Have the goods on hand **before** your customers begin to ask for them. Order the revolving Display Stand, containing one gross assorted. (Stand free with one and a half gross assortment). Send us your order, mentioning Jobber through whom you wish your order filled. In a few days you will receive from him your first lot of ALADDIN.

Place the ALADDIN Revolving Stand on your Counter—you will not have long to wait for the Results.

WHEN CHICAGO RECEIVED ONE MAIL A WEEK

IT is very difficult for the present-day visitor to Chicago to realize that within the lifetime of many of our citizens the second city in this hemisphere was but a cluster of buildings in the wilderness, receiving but one mail a week, brought by a post rider from distant settlements.

It was in 1834, ten years after the Plymouth Cordage Company began to send out to the world the rope which has played so important a part in the opening up of the great West, that Chicago was afforded the luxury of a weekly mail. From that time until now the increasing frequency and the increasing volume of the Chicago mails have been greatly aided by Plymouth Rope.

Plymouth played a large part in the construction and maintenance of the railway systems, and now that mail is being delivered by the air route, Plymouth is playing an even greater part in the construction and equipment of the mail ships of the air.

A Message to the Trade

You will be interested in the statement by our President, Mr. W. L. Wright, on the preceding page announcing the purchase of the entire capital stock of the J. Stevens Arms Co. from the New England Westinghouse Co. No radical changes in policy or personnel are contemplated.

The success which the two Companies have met individually in the past is, we are sure, sufficient guarantee of the ability and efficiency of the respective organizations at Utica and Chicopee Falls to serve you in the very highest degree both in product and service.

As heretofore, correspondence and orders for our Savage products are to be addressed to Utica, N. Y. and correspondence and orders for our Stevens products are to be addressed to the J. Stevens Arms Company, Chicopee Falls, Mass.

We are proud to rely, as in the past, upon the full co-operation of our established distributors and now, with our greatly augmented line, we trust that this relationship will become the most important one in the small-arms field.

Cordially yours,

A. F. Hebard

When the P. A. gets a Hurry Call

THE Purchasing Agent has a thousand jobs—and one of them is to buy taps and dies for his factory when the foreman or superintendent wants them.

When he phones you an order for screw-cutting tools he means business. He wants speedy deliveries, attention and intelligence.

Hardware merchants who are not getting tap and die business from purchasing agents in big manufacturing plants near them, are losing it usually for two reasons:

—either they are not keeping a complete stock of required articles.

—or they do not know how to explain the suitability of GTD goods for the customers needs.

We will equip any live hardware or mill-supply dealer with information which will enable him to fill his stock for local needs and to understand the uses of our goods.

Our folder "The Acorn Die" is the first of a series of selling helps of this character.

Get your name on our list to receive this book, our pocket catalog No. 40. and other books as they appear. Use the coupon.

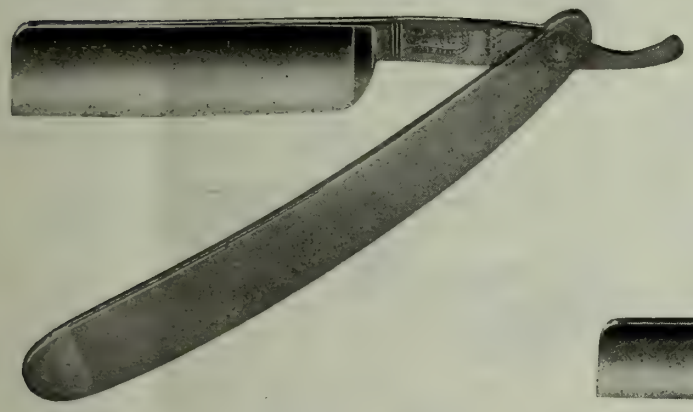
Genco

REG. U.S. PAT. OFF

RAZORS

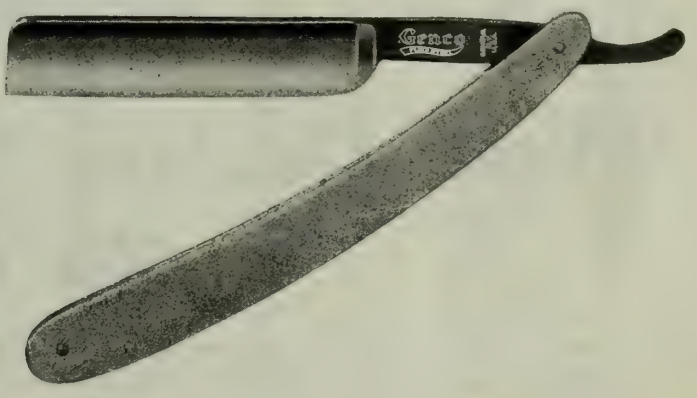
TWO GENCO FAVORITES



GOLD STEEL

Ground full concave, blade finely polished, back and tang heavily **Gold Plated.** Transparent amber handle.

The beautiful combination of blade with gold plated back and tang, and transparent amber handle produces a handsome razor in the Gold Seal.



FLUID STEEL

Ground full concave, blade finely polished, back and tang finished dark **Gun Metal** by our anti-rust process. Handle imitation ivory.

Contrast between an ivory-white handle and dark gun metal back and tang makes the Fluid Steel unusually attractive.

When your customer buys a razor that shaves him smoothly and comfortably again and again—one with an edge that can be tuned up for each shave by a few strokes on a good strop—he is thoroughly pleased with his purchase.

GENCO Razors are guaranteed to please men in just that way. Your men customers are familiar with the guarantee:

"Genco Razors must make Good or we will"

They see it continually in Genco advertising appearing in the Saturday Evening Post and a list of other national publications.

Add to this guarantee of quality the splendid appearance of the Genco Gold Seal and Genco Fluid Steel styles and you will know just why so many of these two popular Genco Razors are being sold.

Most Jobbers Carry Genco Razors in Stock. If yours do not, write us.

Story for Week Dated May 22, 1920. **Being No. 6 in the Series**

Unrolling a Ribbon of Eddy Matchwood

YOU could hardly imagine anything less like a ribbon than a handful of matches, and yet at one stage in their manufacture some varieties of E. B. Eddy Company matches look just like a big, broad, biscuit-colored ribbon.

Match splints made by what is known as the veneer process come first from the log in the form of ribbon. The "ribbon" of matchwood is simply unwound from the log. It looks as easy as unrolling a bandage, but there is big horse-power behind that little unrolling process.

A neatly-cut poplar log drops into a close-fitting recess in a very simple-looking machine. There is a metallic click as the jaws of the machine close on the wood. Then, at the touch of a lever, the log, held in a vice-like grip, begins to revolve.

Far more swiftly than you could peel an apple the ribbon of matchwood unwinds, and is gathered up in great loops by boys who stand by the machine.

It seems impossible that solid wood should be so swiftly transformed into wide, flexible strips in such lengths. The boys pull them off the machines, pile them together, one above the other, and send them through another machine which, with a few swift blows, chops the ribbon of wood into myriads of match splints. Each ribbon of veneer is the exact thickness of an Eddy match.

The blows of the chopper cut the matches out in tiny square splints.

Match sticks made by the veneer process which unwinds the matchwood like ribbon, are square in section. There is another process which turns out match splints almost round in section. That is the continuous process, which will be described next week on this page.

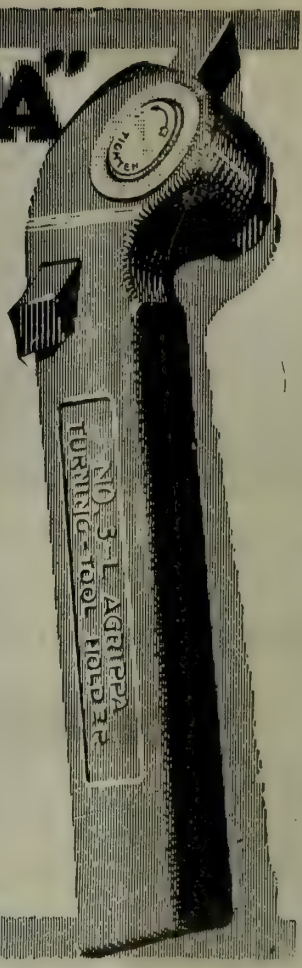
WILLIAMS' "AGRIPPA" TOOL HOLDERS



ENTHUSIASM is the lubricant that overcomes friction in production—the use of good tools promotes and encourages Enthusiasm. In this period of insistent demand for the products of manufacture, the importance of anything that tends to increase the output of man or machine, is strongly emphasized.

Williams' Drop-Forged Machinists' Tools are sturdy and dependable—they have made good in quality and in efficiency for nearly half a century. Their reputation is thoroughly established. Ambitious operators welcome an opportunity to use them for "Better tools make better workmen."

Suggest that your customers make an inspection of their equipment *now*. It may indicate where they could obtain increased production, or improved quality, or both, through the lubricant of Enthusiasm, stimulated by the use of Williams' Superior Drop-Forged Machinists' Tools.

Our new Machinists' Tools Book will be sent on request

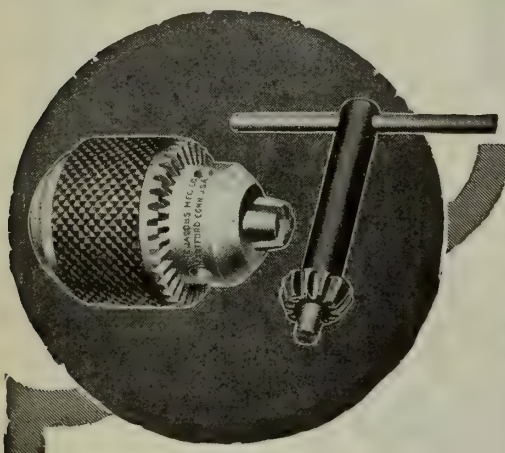
JACOBS CHUCKS



Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line. There is no reason why you, too, shouldn't get your share of this business.

Jacobs Chucks never fail to make good with the drill user. That's because their speed, accuracy and grip result in greater efficiency, convenience, ease of handling and economy in drilling operations.

Selling Jacobs Chucks means selling better drilling. And that's what the drill user is willing to pay for at any time.

An Important Announcement to the Wholesale Hardware Trade of Canada

The demand for munitions during the war caused the expansion of many Canadian factories to proportions which in ordinary times would appear gigantic. Such a gigantic plant was that located at Montmagny, 35 miles below the city of Quebec, on the main line of the Canadian National Railways, and known as the National Farming Machinery Co., Ltd.

This plant, to-day, one of the most modernly equipped plants in Canada, has been transformed from a war to a peace basis, and it is now producing the implements of peace, instead of the implements of war.

Before the war, the Montmagny plant produced saw mill, wood working and road making machinery which made it famous in Eastern Canada, but, confronted with the problem of utilizing its modern equipment and keeping its large staff occupied, it is now producing, in addition to the old lines, agricultural implements and also *various hardware specialties,* which specialties will be marketed through the wholesale hardware trade.

The Montmagny plant is already in a position to make delivery of some lines. A catalog is now being prepared, and in the meantime, *Richardson & Bureau, of Montreal,* who have been appointed sole selling representatives for the National lines of hardware for Canada, are in a position to answer all enquiries.

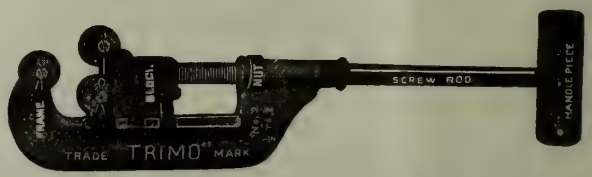
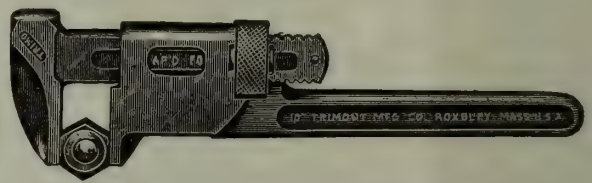
TRIMO



The Trimo Pipe Cutter can be converted into a one-wheel or three-wheel cutter by substituting wheels for rolls or rolls for wheels. When making changes care must be taken to replace cotter pins which must always be in place to give proper service.



The Trimo Monkey Wrench is built for strength, especially adapted for heavy work and railroad use.

STOPGLARE LENS

THE HEADLIGHT NON GLARE LAW will be in effect in a few weeks, not according to rumor but according to F. C. Biggs on May 4th, and will be equally as effective and binding as other legislations.

All motorists admit that glaring headlights are equally as dangerous as are reckless drivers—laws have been passed to prohibit these just as other laws are formed to deal with the murderer, thief, anarchist or drunkard.

Many Lens are manufactured—all aiming to meet the full requirements of the law. To dim your headlights in passing the other fellow is the essence of politeness but fraught with grave danger, as temporarily you are left with insufficient light to say nothing of the risk in taking ones hands from the steering gear to turn the switch on the dash-board or steering post as the case may be.

There are two types of Lens being manufactured. One a diffusing type and the other a concentrating type. The latter Lens is only effective when you have accurate focussing—this takes considerable time and requires regular attention owing to the fact that the vibration of the car will permit the Lens to slide from their position once set, or you are liable to bend your headlights back from bumping another car. It is only when driving on a level road and you have perfect focussing that these Lens meet the present legislation. If you are on a bumpy road or going up or down hill or even riding with the outside wheels near the curb your headlights will glare, not as the ordinary headlight but more intense as this type of Lens are of the prism type which magnifies the light and therefore intensifies the glare.

The diffusing type of Lens are an entirely different proposition, as under all conditions, whether your Lens are tilted, or you are riding on bad roads, up or down hill, there is no direct beam of light as all glare is entirely eliminated, and you have created what might be termed a real "milky way." You do away with all long forked lights and have a flood of light in front of your car which relieves the terrific eye strain of night driving. No focussing is necessary and you do not need to dim your headlights when passing the other fellow. The golden rule is imbedded absolutely in this particular type of Lens.

The Stopglare Lens are a diffusing type and retail at $2.50 per pair all sizes. This is a made in Hamilton product and odd Lens can be had in the event of your breaking an odd light. These Lens have passed all provincial laws which permits you to travel from east to west of Canada, and also comply with the New York State Law.

We have actual photographs of these Lens in operation and tests or demonstrations will be cheerfully given at any time.

Interesting proposition to the Accessory Dealer upon request. Send $1.50 for sample pair mentioning size required.

Imperial Polarine Assures Profit

Are you satisfying your customers with the right oil?

Cheap oils are an expense and reduce the efficiency of the motor. Motorists prefer to trade with dealers who can give them satisfaction in size, package and the correct grade of Imperial Polarine for their car. Be prepared to satisfy them with the right oil at a reasonable price and you will get their steady trade.

IMPERIAL Polarine MAKES A GOOD CAR BETTER

Makes a Good Car Better

Imperial Polarine costs the customer less because it gives more miles of efficient lubrication per gallon. It enjoys a country-wide reputation for highest quality and is extensively advertised in papers reaching practically every motorist. 33 1/3 per cent. is the minimum profit on every sale. Large regular sales mean larger profits. Increase your profits with Imperial Polarine.

Imperial Polarine is sold in three grades and six sizes for cylinder lubrication. Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A—in ½ gallon, gallon and 4-gallon sealed cans; also in 12½ gallon steel drums, half-barrels and barrels. There are special Imperial Polarine oils and greases for transmission and differential lubrication also. Carry the full line.

If you are not selling Imperial Polarine, write us at 56 Church Street, Toronto and secure our dealer proposition.

IMPERIAL Polarine MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.
IMPERIAL POLARINE

Creating Export Markets

A few months ago a British firm of importers, located in London, England, asked us for names of packers of condensed milk in Canada. We sent them a copy of "Canadian Grocer" which contained the announcement of the name of a prominent company. They write, December 17th, as follows:

"You will be interested to know that as a result of our asking you some time ago for information for packers of condensed milk and referring us to ——— people, we were able to place orders with that firm within a few months to the extent of £72,000."

—An instance of the splendid service MacLean business papers are giving in introducing Canadian business firms to world-wide markets. This double approach to business means much to all firms who are interested not only in home markets, but also in whatever foreign markets can be developed.

MacLean business papers give an added service by constantly adding to their readers the names of foreign concerns in all important world-wide markets where Canadian goods can and will be sold. Publicity in these media gives the same effective service in the development of foreign sales that it does in Canada. We could tell you of many other instances where business papers have developed splendid markets where none were thought to exist.

What an opportunity for scientific, intensive, wasteless and immensely productive advertising—and what amazing results are being reaped by those who know how to grasp it. Give us an opportunity to show you how MacLean business papers can develop foreign trade in addition to building up your Canadian business.

FLINT

Get your share of the profits in Flint Products

THE universal recognition of the better value in Flint Varnishes and Paints means much to dealers. Coupled with the co-operation we give, it means a future of continuous, satisfactory and profitable sales.

THE quality of Flint Varnishes was established many years ago and are to-day extensively used by the largest motor car manufacturers. Their beautiful and durable finish also meets the most exacting demands for exterior and interior decorating. Your shelves could not carry a more satisfactory line.

THE sales possibilities of Flexilite Mill White are practically unlimited. It is in wide demand as an interior finish for walls and ceilings, because it makes the most of existing light conditions in public buildings and factories and can be washed. Made in three finishes—Gloss—Semi-Flat and Flat.

FLINT products and Flint co-operation will be worth much to you. Write our nearest branch for proposition and price list.

Vol. XXXII. TORONTO, MAY 22, 1920 No. 21

Retailers Escape Turnover Tax; New Taxes on Some Hardware Lines; Manufacturers and Wholesalers Are to be Licensed

Budget Outlines Excise Taxes Ranging From 10 Per Cent. on Sporting and Traveling Goods—Firearms and Ammunition—Cameras — Pocket Knives — Toiletware — Gramophones and Records—Manufacturers, Importers and Jobbers to Pay 1 Per Cent. Turnover Tax

OTTAWA, ONT.—New tax legislation affecting many lines sold through the hardware trade are now in effect, as outlined in the budget, as presented by the Minister of Finance this week. The levying of one percent. tax on all sales of manufacturers, wholesalers or importers but not retailers, unless they are direct importers, excise tax running from 10 to 50 per cent. upon certain articles; increase of 5 per cent. in income taxation over $5,000; stamp taxes on promissory notes, bills of exchange and stock transfers and a license fee of $2 in every business man dealing in lines mentioned to carry on excise tax, are the chief points of interest to the trade. The only relief in sight is the wiping out of the 7½ extra war tax on all remaining lines and the increase in business profits exemption from 7 per cent. to 10 per cent.

Tax of 10 Per Cent. on Travelling and Sporting Goods

An excise tax of 10 per cent. is imposed on the total purchase price of the articles herein mentioned; trunks in excess of $40 each; valises, travelling bags, suit cases and fitted travelling cases of $25 each; ivory-handled cutlery, cut-glass ware; sporting goods such as tennis rackets, nets, racket covers and Presses, skates, snowshoes, skiis, toboggan, canoe paddles and cushions, polo mallets, baseball bats, gloves, protectors, shoes and uniforms, football helmets, harness and goals, basketball goals and uniforms, golf bags and clubs, lacrosse sticks, balls of all kinds, fishing rods and reels, billiard and pool tables, chess and checker boards and pieces, and all such articles commonly known as sporting goods, in excess of 50 cents.

This section also includes plated-ware not otherwise provided for, as adapted for household or office use, and which includes a wide range of household devices and utensils commonly sold in hardware stores.

A tax of twenty per cent. is levied on hunting and shooting garments and riding habits; hunting and bowie knives; gold and silver handled pocket knives and pencils; gold, silver, ebony and ivory toiletware; articles of silver not otherwise mentioned; silver or gold deposit ware; chandeliers except for churches, ash trays, humidors and smoking stands.

Tax Shall be Paid by Purchaser to Vendor at Time of Sale

These excise taxes are to be paid by the purchaser to the vendor at the time of sale for consumption or use, or on importation for consumption or use other than resale, in addition to the customs duties already imposed.

Tax on Firearms, Campers, Etc.

An excise tax of ten per cent. is levied on boats, yachts, canoes and motor boats unless used for trading or commercial purposes when refund will be allowed; cameras weighing not more than 100 pounds; firearms, shells or cartridges for use other than for militia purposes; pianos and organs except pipe organs, musical instruments. Passenger automobiles are to be taxed on the basis of fifteen per cent.

Tax Player Pianos, Phonographs

A tax of twenty per cent. on mechanical piano-players, gramophones, phonographs, talking machines, music boxes and records used in connection therewith or with any musical instrument.

A tax on playing cards for every fifty-four cards or fraction of fifty-four in each package; when selling at $25 or less per gross packages—twenty-five cents per pack; when selling in excess of $25 per gross packages—fifty cents per pack.

Dealer Must Pay License Fee

Every person selling or dealing in the articles upon which the above taxes are imposed may be required to take out an annual license therefor which will not exceed $2.00

Effective From May 19

The provisions as outlined are deemed to have been in effect from May 19th of this year and to have applied to all goods mentioned therein imported or taken out of the warehouse for consumption on and after that day, and to have also applied to goods previously imported for which no entry for consumption was made before then.

Turnover Tax of 1 Per Cent. on Manufacturers, Wholesalers and Importers, License Fees if Required

A tax of 1 per cent. in addition to the present excise and customs duties, is levied on sales by manufacturers, wholesalers, or on importations. The purchaser is to be furnished with a written invoice of any sale stating separately the amount of the tax when such tax is not

AMOUNT OF TAX SHOWN ON SALES TAGS

Each dealer selling goods which come under the new taxes will show the price of the goods on the invoice and also the amount of the tax whether it be ten, twenty or fifty per cent. Two copies of the invoice will be made out, the dealer keeping one, to be later handed over to the Inland Revenue Department which in turn collects the money as represented by the invoices.

Thus anyone buying a $50 article will get a bill reading "To (name of article) $50. To luxury tax 10 per cent. $5. Total $55."

included in the purchase price. This tax must not be included in the manufacturer's or wholesaler's cost on which profit is calculated. The tax is to be paid to the wholesaler or manufacturer by the purchaser and in turn remitted to the Government under a penalty provision not exceeding $500. Manufacturers, wholesalers and importers may also be required to take out an annual license fee of $5.00 with a penalty of $1,000 for not doing so.

Lines Exempted From Excise Tax

Many lines of foodstuffs, coal, artificial limbs, etc., are exempted from the excise tax. These also include grains and seeds in their natural state; cattle foods, etc. The exemption also applies to lines exported.

Stamp Tax on Promissory Notes, Etc.

A stamp tax of two cents is imposed on promissory notes, bills of exchange, of the value of one hundred dollars or less, and a tax of two cents additional is imposed on every one hundred dollars or fractional part thereof in excess of one hundred dollars.

New Income Taxation

Amendments to the Income War Tax Act provide that the taxes and surtaxes including tax upon corporations and joint stock companies shall each be increased 5 per cent. on incomes over five thousand dollars, such increases to apply to taxes leviable for the period of 1919. Each person so liable is required under the new legislation to forward to the Minister of Finance with each annual return of his income, an amount equal to at least one-fourth of the amount of the tax and surtax, and shall pay the balance if any, in not more than three bi-monthly instalments with interest at the rate of 6 per cent., together with interest at the same rate from the date prescribed for making the return, up to the time of payment of the instalment.

A provision for the payment of interest at 10 per cent. upon the total amount is made where a person makes a return of income less than the correct amount.

Amend Business Profits War Tax

Amendments to the Business Profits War Tax provide that the profits earned in any business during any accounting period ending in the year 1920 which do not exceed ten per cent. per annum upon the capital employed in such business, shall be exempt from the tax prescribed by the act. Upon any such profits exceeding ten per cent. and not exceeding fifteen per cent., there shall be paid a tax equal to twenty per cent. of such profits. Upon any such profits exceeding fifteen per cent. per annum, and not exceeding twenty per cent., there shall be paid a tax equal to thirty per cent. of such profits. Upon any such profits exceeding twenty per cent., and not exceeding thirty per cent., there shall be paid a tax equal to fifty per cent. of such profits. Upon any such profits exceeding thirty per cent. per annum there shall be paid a tax equal to sixty per cent. of such profits.

In the case of a business owned by an incorporated company, and with a capital of not less than twenty-five thousand dollars, and under fifty thousand dollars, employed in such business, there shall be paid a tax of twenty per cent of the amount by which the profits earned in such business during any accounting period ending in the year 1920 exceeded ten per cent. per annum.

In respect to any business liable to taxation under the act, having a capital of less than fifty thousand dollars, the rates of taxation set forth in section 3 of the act, chapter six of the Statutes of 1917, shall apply in respect of the 1917 and 1918 accounting period if twenty per cent. or more of such profits have been derived from the manufacture or dealing in munitions of war or materials or supplies of any kind for war purposes.

The period during which the said act is to be in operation is extended for one year.

Wipe Out 7½ Per Cent. War Tax

There is a notice of a resolution which, in legal phraseology, wipes out all the provisions in the acts of 1915 and 1919 which imposed a seven and a half per cent. extra war tax on all imported goods. Last year many necessaries were excepted. Now the whole tax is wiped out.

Another notice is of a motion to provide that the provisions of the foregoing resolutions shall be deemed to have come into operation on May 19, 1920, and to apply and to have applied to all goods mentioned, "imported or taken out of warehouse for consumption on and after that day, and to have also applied to such goods previously imported for which no entry for consumption was made before that day."

Important Views on Effect of New Taxes

Prominent Manufacturers of Sheet Steel Goods, Cordage, Tinware, Paints, etc., Express Their Opinions of Effect of New Tax Impositions From Dealers and Salesmen

MONTREAL.—In an interview with a prominent manufacturer regarding the effect of the budget on manufactured articles of sheet steel HARDWARE AND METAL was informed that, as is to be expected, the tax of one per cent. on manufactured goods will have to be paid by the consumer. The manufacturer's invoice price on a given article might be $10 to the jobber. The tax on this, of course, would be but ten cents. Then the jobber must add his profit to said cost. Added to this again, his price being, say $12, would be another 12 cents which the customer must pay. In the transaction, of course, the jobber would have to absorb, in a sense, the tax charge made by the manufacturer.

It was pointed out that the manufacturer, faced with serious enough problems in getting raw materials, labor, fuel, etc., will be in a unenviable position under the operation of the new arrangements. In the first place, steel plate carried a duty of 5 per cent. before the war. Then there was no tax on tinplate. The war tax came along, this being 7½ per cent. This made the duty on steel plates 12½ per cent., with the 5 per cent. import that had been operating previously, and the tinplate carried the regular war tax only of 7½ per cent. Now, with this removed, the old plan is agin operative.

Less Protection for Tinware Manufacturers

Where the Canadian manufacturer is likely to suffer is in the operation of only a 25 per cent. duty on manufactured tinwares. With the war tax removed, this has been reduced from 32½ per cent. to 25 per cent. This, to the layman, would seem to be ample. Ordinarily, other things being equal, it would perhaps be fair.

Canada, as a market for various wares, has great limitations as compared, for instance, with the United States. It is a case of catering to eight million people, whereas in the adjoining republic the market is 12 to 15 times greater. It means that the Canadian manufacturer has to produce a variety of lines to maintain his factory on full time. He must, in other words, produce a big variety of products, much more comprehensive than manufacturers turning out similar products in other countries where the market is large. As a consequence, his cost of production is such that he cannot operate his machines on as favorable a unit cost basis as the maker with wide market. And under the limitations of material to-day, with producers of steel plates handing out "dribblings" in some instances, the manufacturer with hundreds of employees cannot operate, naturally, to advantage. His overhead increases out of proportion.

What Lifting of War Tax Means

The opinion seems to be that prices ought to be reduced in view of the fact that the 7½ per cent. war tax has been discontinued. This, were conditions less confused than they are, would be an immediate or early relief, that is, prices would lower to this extent, or somewhat in any case. But the difficulties confronting the manufacturer to-day are numerous. He has had to pay increasing wages to his men, and all operating costs have been high, and many of them steadily mounting. His mills have, perhaps,

Tax Immediately Affects Prices

Hardware Wholesalers Revise Prices Simultaneously With Enforcement of New Taxes—Turnover Tax Will Not be Seriously Reflected Except Where Addition of Luxury Tax is Necessary

HARDWARE wholesalers in Toronto and elsewhere took steps to put the new taxation impositions into effect immediately on being advised of the requirements. There are of course many points which will have to be elucidated, but as they were required to make returns as from May 19 they were compelled to take steps according to their own interpretation of the requirements.

"We will add the 1 per cent. Turnover Tax on sales right away," said an official of one Toronto wholesale to HARDWARE AND METAL, stating that prices of a number of lines would be advanced immediately. He did not think, however, that the price advances would make a great deal of difference, except on such lines as are mentioned herewith as coming under the luxury tax imposition.

He explained that the luxury tax as imposed by the manufacturer to the jobber would be passed along without being duplicated as it was confined to dealings between the vendor and consumer only.

Mr. F. Moore, of Benjamin Moore & Company, Limited, Toronto, after a brief survey, thought that the legislation was radical and likely to affect all branches of trade considerably. He stated to HARDWARE AND METAL that while he had not had an opportunity of going fully into the details, that no doubt certain lines of retail trade would be affected seriously.

Sporting goods lines are largely affected by the excise duties, but sporting goods dealers do not look for any reduction in business, stating that the demand is such that the consumer will pay the extra rather than go without such lines. Such was the statement of Harold A. Wilson, of the H. A. Wilson Company, Toronto.

H. J. Love, of A. J. Spalding & Bros., sporting goods, Toronto, thought that there was little doubt that the tax would be added to the present cost of merchandise. "We have such a demand for sporting goods now that we are unable to meet it," he stated, "so that I do not expect any reduction of business. Recreation has become recognized as a necessity by nearly everyone."

F. I. Fox, Toronto manager of the Ford Motor Company, of Canada, also expects the public will pay the 5 per cent. extra tax levied on cars, imported and domestic. He pointed out that the removal of the 7½ war revenue tariff gave U.S. cars a little advantage. With this removed and the additional five per cent. added they gained 2½ per cent. He thought the readjustment of the business profits tax would encourage firms to build and go in for increased production.

Another Toronto retailer referred to the fact that in the United States they have a luxury tax and while at first there was some difficulty yet they appear to have now accepted it. He mentioned that there would be difficulties, such as that concerning returned goods which are exchanged for other goods at another price. A dealer in musical instruments states that 90 per cent. of the retail business in instruments is done on the deferred payment plan and that therefore it is the wage-earner and not the wealthy man who purchases most of the musical instruments. He thought it criminal to deny homes of this class, the influence of music.

"It will simply kill importation. Some musical instruments already pay a tariff of 52 per cent. and another tax of 20 per cent. will be disastrous to the music business," he said.

According to Mr. L. Langmuir, of M. L. Langmuir Mfg. Co., the luxury tax on trunks, bags, valises, etc., will fall heavily, affecting all cowhide bags and many of the wardrobe trunks.

"We made suggestions to the Government," said Mr. E. M. Trowern, secretary of the Dominion Board of the Retail Merchants' Association of Canada, "but they did not follow all of them in imposing the taxes on the reail trade." Mr. Trowern intimated that the Government had followed these suggestions in only some cases, although they had expressed the opinion of retailers from all sections of the Dominion.

A tax on sales, he felt, would be expensive to collect and would also be unfair. W. C. Miller, Toronto, secretary, predicted that this tax would have several effects, one of them being that the manufacturers would make every effort to evade it, and further, the manufacturers in this line would attempt to standardize.

Cheaper Goods False Economy

Mr. Trowern did not look for much turning to the cheaper lines of goods, because people had learned that it was false economy. He also wanted to know just what the Government called luxuries, and withheld comment on the Budget as a whole until the retailers' representative in Ottawa should arrive with a detailed report of the new tariff.

Should the Turnover Tax Fall on Retailers?

SEND US YOUR OPINION

Now that the Budget has been uncovered and it is noted that the 1 per cent. Turnover Tax is to be applied to the sales of manufacturers, importers and jobbers only, and not the retailer, there is a distinct tendency already noted to pass the Turnover Tax along to the retailer.

A prominent Toronto banker makes the statement that the Turnover Tax should fall not on the wholesalers but on the retailers, stating that it would then be spread over the greatest possible area. As against this, Thomas Findley, president of the Massey-Harris Company, states that prices are now so high that it is wiser to let the tax fall on the lower price of the manufacturer rather than that of the retailer.

"Generally speaking I should think the tax on turnover should fall on the retailer," states Sir John Willison.

Another well-known Toronto merchant cited a case where one man whose taxes last year amounted to $2,000 had a turnover of $2,000,000. On the basis of the 1 per cent. Turnover Tax, his bill this year would amount to $20,000. He thought the one per cent. tax should be placed on the last man to turn the goods over to the public, the retailer.

In order that the opinion of the retail trade may be voiced on this important subject, HARDWARE AND METAL wants a letter from as many hardware dealers as possible setting forth their views as to where the Turnover Tax should fall and why. Send yours in to-day. Address the Editor, HARDWARE AND METAL.

143 University Ave., Toronto.

IMPORTANT VIEWS OF EFFECT OF NEW TAXES

Continued from page 42

schedule, due to the scarcity of raw material. This condition applies to many lines, particularly to steel products.

"The 7½ per cent. will be easily taken up," said a cordage maker to HARDWARE AND METAL, "by the higher costs that have to be faced."

Then the present stoppage of traffic from the United States has served to work no little hardship on many manufacturers. Whatever the future may have in store it would seem that, for the present, there will be no reduction on manufactured products through the abolishing of the War Profits Tax.

New Proposals Should Have Honest Co-Operation

"The new taxation proposals are on trial in many respects so that it is not well to dogmatize upon them at this time," said W. T. Fallis, managing director The Sherwin-Williams Co., of Canada, Ltd., to HARDWARE AND METAL.

"With regard to the taxes on luxuries and the tax on sales. Time alone will tell whether they are to be successful or not. We have to remember that the Government is faced with the necessity of raising an immense amount of revenue and insofar as their intention is to balance the budget and discontinue the policy of raising heavy yearly loans, they are to be strongly commended.

"The burden of taxation is one that the people of Canada as a whole must bear in some form—the particular form being, it is hoped, the subject of careful study and investigation, and, when decided upon, receiving a fair and just trial.

"The new proposals, to bear fruit, should have the honest co-operation of all classes of the public, because only on this basis can accusations of discrimination and unfairness be avoided. Moreover, if any of the proposals in practice are revealed to work an undoubted injustice to any section of a community, no doubt the Government will be ready to make the necessary adjustments. They will also, it is hoped, be willing to make the machinery for making returns and collections under the proposals as simple as possible, so that business organizations will not be under the necessity of undertaking a great deal of work, at largely increased expense, in order to comply with the requirements of the Finance Department."

DELIVERY IS PART OF TAXABLE BARGAIN

OTTAWA.—R. W. Breadner, Canadian Commissioner of Taxation, has made several important rulings regarding the application of the new taxes. For one thing, he points out that delivery constitutes the consummation of a bargain. That is, if an article was ordered a couple of weeks ago, and was delivered only this morning, the buyer would be responsible for the entire tax on the same.

Moreover, Mr. Breadner stated that the one per cent. tax which wholesalers must add to their invoices must be paid by the retailer to whom the goods are sold and not be absorbed by the wholesaler. That is, every wholesaler must show on his invoice and also collect the full price of his goods and the one per cent. tax.

Look to Canada as Source of Supply

Rapid Recovery of British Industry—Require Many Raw and Manufactured Products From Canada at Present Time—European Countries Already Exporting Supplies

THAT Great Britain will recover rapidly, and that she is already considerably recovered from the inaction, industrially, which has characterized the situation there for a long while, is the conviction of H. P. Goodman, of H. L. Goodman & Son, importers and exporters, London, England. To HARDWARE AND METAL Mr. Goodman expressed some interesting views on the situation over there, views which hold interest for Canadian manufacturers and jobbers in that Canada is being looked to as a source of supply for many products that are greatly needed at the present time. Mr. Goodman arrived from Great Britain a few days ago and is in quest of raw and manufactured hardware lines, which will find a ready sale in the Old Country.

Early Action Important

It is very important, according to Mr. Goodman, that manufacturers having raw materials or manufactured products to sell, offer them promptly. European countries are rapidly recovering from the stress and destruction wrought by the war. Already such countries as Belgium and France, and also Germany, have been shipping supplies into Great Britain, and, while oftimes such quantities are quite limited, as related to the demand, it is patent that these countries are making a strong bid for business connections that they expect will become permanent. Herein, therefore, rests the necessity of the Canadian producer and manufacturer getting in on the ground floor, for it is now, while the British buyer is urgently in need of commodities, that he will be impressed with the advantages possessed in goods that he receives. Later, when there will be "enough and to spare," buyers will have satisfied themselves with the sources from which they have bought, and it will be more difficult to pull business. The next few months will, indeed, work big for the man who gets in now on the ground floor.

Of course it is quite as difficult for one manufacturer to get supplies as for another. World-wide conditions are unique in that shortages are evident and exist everywhere. But the very fact that some European countries are even depriving their own markets of manufactured goods in order that old connections abroad may be revived or maintained, speaks a lesson in itself.

Some Lines in Demand

Asked as to what classes of goods were wanted in Great Britain, Mr. Goodman stated that, among hardware lines, various wire products stand out prominently as essentials at this time. Barbed wire, plain and plain twist galvanized wire, hardware specialties, cutlery, tools, axes, picks, plow and other bolts, nuts, etc., are wanted in immense quantities, and if available now will command good prices and quick sale.

There has been a real change in the attitude of the consumer, and modern electrical appliances, washing machines, cream separators, and many other manufactured goods are so much needed that there is, and will be for some time, no difficulty in disposing of almost any extensive quantities that can be sent forward. Even steel tubes, pipe and plumbing goods would be welcomed, and it is not so much a matter of price just now, Mr. Goodman states, as of delivery. Competition will, in time, be keener than it now is, but with all production costs higher everywhere Canada has a good opportunity of selling any and all of these lines.

Building materials such as Portland cement are much needed and will sell freely.

Canadians Can Buy

Either through established connections already made, or through the appointment of agents, Canadian firms will be able to procure, within a reasonably short time, products in England and on the Continent. This exchange of goods will come rapidly, and Mr. Goodman states that he has been informed that all outbound shipping is able to return to the Old Country with full cargoes. This has been gratifying, of course, to the shipping interests, but it is interesting as well as gratifying to note that export tonnage keeps pace with that of import tonnage.

England has had no end of difficulty in the matter of production owing to labor difficulties. At the same time, Mr. Goodman asserts that Great Britain's recovery to a normal, or a nearer normal basis, will be very rapid, much more rapid than is anticipated in some circles.

Not Warned But Equally Liable Nevertheless

Recent Conviction of Hardware Dealer for Neglecting Stamp on Stock Remedy Brings Out Interesting Point—Inland Revenue Officials Admit Hardware Trade Not Personally Warned as Were Other Trades, But Are Equally Liable—Requirements of War Tax Stamp Act Outlined Herewith

MENTION was made in May 8 issue of HARDWARE AND METAL of the conviction of a hardware dealer by an officer of the Inland Revenue Department for neglecting to affix a war tax stamp to a package of Dr. Hess's Stock Foods. It was claimed that the goods had never been in the store before and that a returned soldier clerk was ignorant of the fact that the law applied to such an article. It was further stated that the officer of the law admitted he had warned the drug and feed merchants but had not called on the hardware stores. The hardware dealer in question described the Government's method as Bolshevistic and asked that influence be brought to bear to have some more gentle way adopted of warning innocent offenders.

On taking the matter up with officials of the Inland Revenue Department, HARDWARE AND METAL was advised that the law does not consider it necessary to give any further warning than the widespread publication of details of the Act at the time of its enforcement. Added to this, it was pointed out that details of convictions are appearing in the press frequently for non-compliance with the War Tax Stamp Act, and that any dealer who reads the papers cannot help but become acquainted with what is required.

On asking the official if a personal warning was given to any branch of the trade concerning the lines on which it was necessary to affix stamps, he stated that a personal warning was given to drug and feed merchants concerning stock foods, but admitted the hardware trade had not been personally warned because handling of stock remedies was not as general with the hardware merchants as with the others who were warned.

"Then the hardware trade was not given as good a warning and yet is held equally responsible with the other branches of the trade?" asked HARDWARE AND METAL. The answer was in the affirmative, the reason being given that full enough publicity was given the matter when the Act was enforced.

In order to protect other hardware dealers who are ignorant of the law in such matters, the Act, as it applies to such lines as might be sold in the hardware store, is reproduced as follows:

Stamp Duties on Articles in Bottles and Packages

14. In this section and in the remaining sections of this Part, unless the context otherwise requires,—

(i) "consumer" means a person who uses a proprietary or patent medicine, either in serving his own wants or in producing therefrom any other articles in value; and "selling to a consumer" includes selling by retail;

(ii) "package" includes carton, packet, box, pot, cask of wood or other material, or other first receptacle or covering;

(iii) "proprietary or patent medicine" includes pills, powders, tinctures, troches, or lozenges, syrups, cordials, bitters, anodynes, tonics, plasters, liniments, salves, ointments, pastes, drops, waters (except mineral waters in the natural state or carbonized), essences, oils, and all other medicinal preparations or compositions bottled or packed ready for sale in respect of which the person making or preparing the same has or claims to have any formula or secret or occult art for the making or preparing thereof, or has or claims to have any exclusive right or title to such making or preparing, or which are prepared or made under any letters patent or which are designated by a trade mark, or which if prepared in accordance with any formula published or unpublished are recommended to the public by the makers, vendors or proprietors thereof as remedies or specifics for any disease or affection whatsoever affecting the human or animal body, but does not include any medicinal preparation or composition recognized by the British or the United States pharmacopœia or the French codex as officinal.

15. Every person selling to a consumer any bottle or package containing a proprietary or patent medicine, shall, at or before the time of sale affix to every such bottle or package an adhesive stamp of the requisite value as mentioned in the Schedule to this Part.

2. Every importer of a proprietary or patent medicine, who is a consumer, shall, while such articles after importation into Canada are in the custody of the proper customs officers, affix an adhesive stamp to the bottles or packages containing such articles of the requisite value as mentioned in the Schedule to this Part.

3. Every manufacturer or producer of a proprietary or patent medicine, who is a consumer, shall, under regulations made by the Minister, before using any such article in producing therefrom any other article of value, affix an adhesive stamp of the requisite value as mentioned in the Schedule to this Part to the bottle or package containing such article.

4. The person selling, the importer, and the manufacturer or producer whose duty it is to affix a stamp under this section, shall at the time the stamp is affixed cancel the same by writing on or across the stamp initials or other marks of identification, together with the date of such writing, or otherwise cancel the stamp in accordance with regulations made by the Minister.

17. Every person required by this Part to affix an adhesive stamp to a bottle or package containing a proprietary or patent medicine, who fails or neglects to affix an adhesive stamp as required by this Part shall incur a penalty not less than fifty dollars and not exceeding two hundred and fifty dollars.

18. Every person required by this Part to cancel a stamp affixed to a bottle or package in the manner prescribed by or under the provisions of this Part who fails or neglects so to do shall incur a penalty not less than fifty dollars and not exceeding two hundred and fifty dollars.

(a) A proprietary or patent medicine, the retail price for each bottle or package thereof being twenty-five cents or less, one cent; more than twenty-five cents—for each twenty-five cents and in addition for any fractional part of twenty-five cents, one cent.

General Notes in Reference to Stamp Duty

The retail price referred to in the above schedule is the actual amount of money exchanged in the sale of the article.

Retailers are required by the Act to affix stamps themselves. They may or may not add the amount of the stamp to the price of their goods, as this becomes a business proposition as between themselves and their customers.

Samples of articles given away without charge are not subject to the war tax, but the person distributing same must assume full responsibility of proof as respects the delivery of the samples under these conditions.

Stamps attached to packages, when the case permits, must be affixed in such a manner as to prevent the package being opened without breaking the stamp.

Stamps to be used on bottles and packages other than the foregoing, must be affixed thereto in such a manner as to prevent their removal without being destroyed, and must also be cancelled by lines or marks drawn across them or impressed thereon, preferably with indelible ink, in order to render such stamps incapable of being used again; exception being made in the case of bottles, containers or receptacles which are refilled from time to time; in such case the stamp is to be cancelled by the initials of the vendor and the date on which the stamp is so affixed. Packages on which stamps have been used must be destroyed as soon as emptied.

Penalties will be divided between informers or officers and the Crown.

Patent Medicines

Medicated soaps when advertised as such, become patent medicines under Subsection 4 of Section 14.

Extracts intended solely for culinary purposes are exempt from the war tax.

The fact that certain drugs mentioned in the Pharmacopœia enter into the composition of patent medicines does not exempt the patent medicine and the price of the patent medicine, irrespective of the cost of the ingredients, fixes the amount of stamp duty.

Condition powders, veterinary liniments, medicated stock foods, cough drops, talcum powders, animal poisons, camphorated chalk, styptic pencils, headache powders and wafers, carbolic salves, liquid rennet, eyebrow pencils, grease paints, green soap, Antikamnia tablets, are subject to the war tax.

Animal foods, unless medicated and advertised as such, are not subject to the tax.

Disinfecting fluids and powders, if used as remedies or specifics for any disease or affection affecting the human body, are subject to the war tax.

General

If a preparation recognized by the British or American Pharmacopœias or the French Codex, is sold under a special trade mark, or as the product of some special individual or firm, same is subject to the tax.

The only exception to this rule is when the label of such preparation gives the name under which same is actually recognized by the Pharmacopœias or the Codex, and further, gives the information that it is prepared in accordance with the formula of same given in the Pharmacopœias or the Codex.

All preparations recognized by the British or American Pharmacopœias and French Codex, are exempt from the provisions of The Special War Revenue Act, 1915.

Hereafter is a list of some of these preparations:—

Benzine
Borax (purified)
Linseed Oil
Rosin
Tar
Turpentine (Canada)
Vaseline

The following is a list of some preparations which are also exempt from the provisions of the Act:—

Bird Seed
Hoof Oil,
Louse Killers
Petrolatum
Petroleum Jelly
Water Glass

This Act came into force on the 15th April, 1915.

Unfair and Unwise Proposal for Increase of 300 to 500% to Meet Increased Costs of Less Than 100%

A DRASTIC increase in postal rates, amounting to 300% the first year, and 500% the second year, is proposed in the resolution of Hon. Martin Burrell to increase postal rates on second-class matter from ¼ cent per lb. to 1 cent per lb. in 1921, and 1½ cents per lb. in 1922.

The reason given for this terrific increase of 300 to 500 per cent., is that the railroads have been awarded a higher rate for carrying mail matter. *This increase, however, is less than* 100%. Salaries of postal officials have been increased. *These increases have been less than* 100%.

The Government may need increased revenue, but why inflict a 300 *to* 500% *increase* on second-class matter, when increased costs of salaries and transportation are less than 100%?

A similar percentage increase in first-class mail would increase the cost of minimum rate for letters from 3 cents to 12 cents in 1921 and 18 cents in 1922.

When the Government reduced the rate of postage some 20 years ago on second-class matter from ½ cent per lb. to ¼ cent per lb., and at the same time reduced the letter rate from 3 cents to 2 cents, the result was not a deficit, but a surplus, and the first surplus the Post Office Department had shown for years. These reductions in rate of postage were accompanied by increases in salaries to postal officials, and also by regulations which eliminated much unnecessary waste.

A low postal rate was granted on second-class matter to encourage establishment of Canadian newspapers and periodicals. Is it fair when publishers have invested large sums of money to suddenly reverse the policy and make a drastic increase in rates which will ruin many worthy publications, and cripple the service given by the majority which survive?

Every dollar added to the price of a magazine narrows the circle of readers, and the men who would fail to subscribe are the ones who need information most.

This drastic increase would place a crippling tax on the periodical press, which, next to the schools themselves, is the greatest educational power in the country.

It would seriously retard our development in agriculture, in trade, in manufacturing, in medicine, science and en-

gineering by restricting the spread of information essential to development in these lines. This retardation would result in a tremendous annual loss to the country — a loss far greater than the revenue which the proponents of this measure (erroneously, we believe) expect.

The Canadian publishers of magazines, religious and educational papers, farm papers, trade and technical papers are already working under handicaps not experienced in other lines of business. They are subject to what is equivalent to "dumping" on the part of American publishers of magazines. The very large production by American magazine publishers takes care of the overhead expenses so that each can quite easily provide for an additional 5,000 or 10,000 copies for the Canadian market at relatively small additional expense. This extra run for the Canadian market is dumped into Canada by freight or express absolutely duty free.

The Canadian publisher must provide for his overhead with a much smaller circulation and is subject to additional expense amounting to over 40% represented by the Customs Tariff on equipment and supplies used in the production of his magazine.

Canadian National Magazines circulate to a total of approximately 5,000,000 copies annually. As against this we have a total circulation in Canada of American weekly and monthly magazines of approximately 20,000,000 copies annually. Would it not be in the public interest instead of further penalizing Canadian magazine publishers to provide even greater encouragement such as would tend to promote a much larger circulation of distinctively Canadian periodicals?

Seven years ago Canadian publishers asked for an investigation of cost of carrying various classes of mail matter, but this has not taken place. We believe such an investigation would bring out many ways in which economies could be effected.

The public has always been keenly interested in educational matters. We believe they would object strenuously to any further percentage of increase than is justified by increased expenses. In no case is this higher than 100%.

The work of magazines, business and religious papers should not be crippled to make up deficits in other departments. They should not be penalized to the extent of 300 to 500%. The increase in postal rates on Canadian publications should not be more than 100% at this time, and it would be obviously unfair and demoralizing to enforce the proposed increase of 300 to 500%.

EDITORIAL COMMENT

TAX PROVISIONS AFFECT HARDWARE LINES

NEW tax impositions, as outlined by the Minister of Finance in the budget presented this week and given in detail elsewhere in this issue, have a very important effect upon many lines in the hardware trade. Excise taxes ranging from ten per cent. upward, are applied to a number of lines valued higher than a stipulated amount. In addition a sales or turnover tax of 1 per cent. is levied on manufacturers, importers and wholesalers. The retailer does not come in under this unless he is a direct importer.

The new legislation is so far-reaching that it is difficult yet to comprehend the full effect of the new taxes. As against the new impositions there has been an increase in the exemption for business profits tax of from 7 per cent. to ten per cent., in addition to which the 7½ per cent. war tax has been wiped out on all remaining articles which it affected. Opinions expressed by trade authorities are very divergent. Some are of the opinion that the consumer will pay the price without objection, while others fear the legislation is so radical as to seriously affect some branches of retail trade. If so, this would be more likely in some other trades than the hardware, as the lines which form the basis of the hardware business are not classed as luxuries and therefore will not bear the heavy excise taxation. The Minister of Finance has pointed out that tariff investigation is already under way and that public sittings will be held throughout Canada after prorogation. The new taxes affect a great number of hardware lines. While at first glance the number of hardware lines affected appears small in comparison with other lines, the fact must not be overlooked that the hardware classifications include a wide and varied range of goods, on which higher prices may, of necessity, be expected almost immediately.

NOTES ON THE BUDGET

SIR JOHN WILLISON and a few others believe, according to daily paper reports, that the buck should be passed to the retailers and that the latter should assume the duty of collecting all the taxes in addition to the other multitudinous duties which the retailers are performing at the present time.

* * *

THOSE WHO are urging that the retailer should collect all the taxes, must not overlook the fact that retailers and their salesmen are the men who have to face an angry public and stand the brunt of all the complaints of the public regarding Government taxation.

* * *

IT IS ALWAYS much more easy to condemn and criticize Government tax proposals than to suggest constructive alternatives. It is yet too early to approve or condemn the proposals of the Finance Minister. A great deal of explaining will be necessary before his proposals are fully understod.

* * *

HARDWARE jobbers in readjusting prices on certain lines of ammunition find, after allowing for excise tax, sales tax and reduction of 7½ per cent. customs war duties, that the net result on American ammunition is a price advance of about 2½ per cent.

* * *

WHAT WILL happen in a case of this kind? A retailer buys an article from a wholesaler at say $10. He may also buy this same article direct from the manufacturer at the same price. In the purchase from the manufacturer the sales or turnover tax would apply once, while in case of the purchase of the same article from the wholesaler, the sale or turnover tax would apply twice. Unless the retailer is considered as an importer when he purchases direct from a manufacturer, would he not in this case escape the 1 per cent. sales tax applied by the wholesaler? If direct purchasing from the manufacturer means a saving of 1 per cent. on sales tax, this feature will be a boon to department stores and mail order houses.

* * *

THE MANUFACTURER evidently collects the excise tax, plus 1 per cent. sales tax. The wholesaler collects 1 per cent. sales tax and the retailer collects the luxury tax.

THE DEMAND for counter check books for retailers will reach unprecedented proportions as a result of the new taxes. A wide range of hardware lines will be affected, and on which sales records will have to be kept.

* * *

HUNDREDS of retailers in Canada style themselves as wholesale, or as wholesale and retail firms. The new tax proposals call for a clear-cut distinction in order that the sales tax may be applied. It is possible that a great many firms may decide that they have not been wholesalers after all, except in their imagination.

* * *

THE INEVITABLE result of the new taxes means an immediate increase in the price of nearly all hardware commodities and it would appear at present that even those lines not listed as luxuries will be increased from 2 to 3 per cent.

AN INTERESTING FEATURE OF TURNOVER TAX

THERE are a great many phases of the new taxation plans which will have to be elucidated before their real effect can be determined. One of the most interesting of these is the fact that the addition of the 1 per cent. Turnover Tax by both the manufacturer and the jobber will really mean a total addition of a tax equalling two and a fraction per cent. This is arrived at as result of the jobber assuming a 1 per cent. tax from the manufacturer which is included in his cost and then adding his own profit before imposing the 1 per cent. Turnover Tax which he must charge. The final percentage being partly levied against profits, makes the total tax over the two per cent., which it would be if based on actual costs.

MANUFACTURERS' DIFFICULTIES

THE difficulties that are now being faced by many Canadian manufacturers are perhaps the most trying with which they have ever been confronted. The scarcity of many lines of iron and steel products, together with freight and express embargoes, inability to secure electric power, strikes and other labor troubles, etc., have created a most trying situation.

Dozens of cases may be cited to show just how some of the manufacturers are up against problems at the present time. One manufacturer, employing moulders, whose rate of pay is exceedingly high, employs his moulders at present simply to break up scrap, in order to hold them and prevent them from going elsewhere. In the meantime his customers are clamoring for goods.

Another manufacturer who secures certain parts of his product from the United States, and who has been in the habit of getting these small parts in lots of two and three hundred pounds by express, is confronted with an embargo on both express and freight at the shipping point in United States, and he therefore has to depend upon small lots which are being shipped through to him by parcel post. The result is that large quantities of his product are being held up through certain small parts which are missing and which at the present time can only be secured in small quantities, owing to the paralyzation of shipping facilities in United States.

Still another manufacturer who also makes a line sold to the hardware trade is short certain special springs which are made in the State of New Jersey. This manufacturer has despatched a motor truck from a Western Ontario city to a point in New Jersey for the purpose of securing a truck load of these springs and bringing them back to Canada. Another manufacturer of washing machines has sent a motor truck down to the State of Ohio in order to secure a truck load of motors, and thus enable him to finish up large numbers of washing machines which are complete, with the exception of the motors.

Still another manufacturer who imports a certain kind of lumber from the United States finds it necessary to ship his lumber from a point west of Chicago down to the Southern States and then back again to Canada. This, he claims, is the only way in which he can get around certain freight embargoes which exist in parts of the United States at the present time. These are only a few of the many difficulties which are confronting manufacturers at the present time, but they serve to show how badly business has been demoralized by iron and steel strikes, railway strikes and other transportation troubles. Just so long as these conditions continue to exist, the hardware trade is going to be faced with uncertainty so far as supplies of many lines are concerned.

EVENTS IN THE TRADE

Business Changes

Conquest, Sask.—G. A. Langtry, hardware merchant of Tessier, Sask., has purchased the stock of the estate of Mitchell & Co. Mr. Langtry will remain at this point, leaving Ernest Garvie in charge at Tessier.

Toronto. — Clark Metals, Ltd., manufacturers, are moving to Durham, Ont.

Fire Loss

Tyvan, Sask.—P. G. Davies, hardware, suffered recent loss by fire.

Incorporations

The Ryan Anti-Glare Light Co., Ltd., has been incorporated with a capital of one million dollars and head office in Toronto to manufacture metal, wooden and glass articles, including lamps and articles for the production of heat, light and power.

Toronto Electric Supply Co., Ltd., has been incorporated with head office in Toronto to manufacture electrical supplies.

Toronto Castings, Ltd., is incorporated in Ontario, with head office in Toronto. The purpose is to carry on the business of iron founders, makers of tools, castings, machinists, etc., and dealers in iron, steel and other metals in its various stages.

Dunlop Tire & Rubber Company to Build

Authorization has been given by the Toronto City Architect's Department for the erection of a $15,000 brick factory at the corner of Queen St. and Booth Ave. for the Dunlop Tire and Rubber Company.

New Steel Mill

One of the largest recent developments in the steel industry of Central Canada is the construction of the structural steel mill by the Algoma Steel Corporation at a cost of approximately $7,000,000. This work has already been commenced in Sault Ste. Marie, and it will be completed within the next twelve months, according to the company's plans.

Clean-Up Week in Twin Cities

Fort William.—This week is Clean-Up week in this city, the campaign being conducted along the same lines as in previous years.

Port Arthur.—From May 17–22 was Clean-Up week in this city. The co-operation of the citizens was secured in improving the city's appearance. Local dealers in both cities took advantage of the situation to encourage the sale of seasonable lines.

Rolling Mills President Dead

Montreal.—Thomas Esmond Peck, president of the Peck Rolling Mills, Ltd., died in Montreal at the Royal Victoria Hospital after an illness of two weeks.

The late Mr. Peck was only forty-one years of age, and was born in Montreal. Educated in England and at McGill, from which latter institution he left to join the Peck Rolling Mills, assuming the management on the death of his father, the late James A. Peck. The late Mr. Peck was a member of the Mount Royal, St. James, Royal Montreal Golf Club, and the Canada Club. A wife and seven children survive him.

Louis McLain Co. to Build

A permit has been issued by the Toronto City Architect's Department to the Louis McLain Manufacturing Company for the erection of a five-storey brick factory and warehouse, to cost $70,000, on Dundas Street West.

Forty Years' Service is Honored

Montreal. — A pleasant surprise was given D. J. Lockhart, secretary-treasurer and second vice-president of Gurney Massey Co., Ltd., Montreal, on the completion of forty years' continuous service with the company at Montreal. The expression of the office and warehouse staffs took the form of a presentation to Mr. Lockhart of a silver meat dish, made on behalf of the staffs by W. L. Helliwell, the Montreal manager.

An interesting feature of the function was that of the presence of a number of fellow-employees who have served with the company 30, 20, 22, 27 and 21 years, respectively, these being J. Pettigrew, Albert Bruker, C. R. Black, A. W. Fairbairn and W. L. Helliwell.

Nearly a Million Dollars of Workingmen's Homes

London, Ont. — The London Housing Commission has loaned to the workers of this city for homes, since it took over its duties, the sum of $125,820. The commission has decided to ask for an additional loan of $400,000, making the total sum available for the providing of homes for workingmen $900,000. Loans from the $400,000 asked will run to home-seekers, between six and seven per cent. Loans made from the first sum secured $500,000 have been made to the people at five per cent. Work is being rushed on many houses, some of which will sell for as high as $5,000.

No Improvement in Nail Situation

Montreal.—If the difficulty in procuring necessary supplies of wire nails was manifest a month ago it is more manifest and more acute to-day than ever. As HARDWARE AND METAL has pointed out from time to time, the advance of the building season would doubtless bring forth a more active demand for nails, and this is just what has developed. With the mills unable to cope with the excessive demands of the trade it has been difficult to maintain stocks of adequate proportion. Particularly with the regular board sizes of standard wire nails has there been difficulty in securing requisite tonnage.

Opens Toronto Office for Jones & Shipman

T. E. Hewitt, representing Messrs. Jones & Shipman, Leicester, England, has within the past few weeks opened offices at 163 King Street East, Toronto. His principals are manufacturers of drills, engineering tools, drop-forged tool holders, etc., and being in position to make deliveries are endeavoring to link up with Canadian connections.

Mr. Hewitt left England nearly two months ago. He informed HARDWARE AND METAL that at that time the industry was recovering from the prolonged foundrymen's strike, and that prospects were good as far as the labor outlook was concerned. Speaking of manufacturing conditions in general, Mr. Hewitt state that raw materials were in fairly good supply and that the industry was very busy, many plants having their output booked up for a year in advance. For this reason it was difficult for a number of English manufacturers to attempt to compete for foreign trade unless they gave preference to export business in order to get their share of it.

Mitchell Half-Holiday

MITCHELL, Ont.—Local merchants are to have a half-holiday on Wednesday afternoon from May 19 to September 15.

Consolidation of Stanley Companies

The Stanley Works Buys the Stanley Rule & Level Co., New Britain, Conn.—Two Companies Have Grown Alongside Each Other for Seventy Years

IT was reported in the March 20 issue of HARDWARE AND METAL that the directors of The Stanley Works and the Stanley Rule & Level Company, New Britain, Conn., were submitting a proposition to their stockholders with a view to the purchase of the latter company by the former. Both concerns are well established organizations and the new development is therefore of interest. It is announced that the two businesses will be carried on under separate names as heretofore.

The Stanley Works was founded in 1843 by F. T. Stanley and incorporated as a joint stock company, under the present corporate name, in 1852. The Stanley Rule & Level Company was incorporated under that name in 1858, being a combination of the firms of Hall & Knapp and of A. Stanley & Co., which had been incorporated some years previous.

The present consolidation unites the manufacturing interests of the two Stanley Companies that have grown side by side for almost seventy years, each developing its separate line of products for the hardware trade. During that period there have been many common interests. During the earlier years, the same salesmen frequently represented both companies, and in some foreign fields such arrangements still exist.

The Stanley Works will now own and operate some twelve different plants and properties. In connection with these are operated open hearth steel works, hot and cool rolling mills, foundries, timber lands and saw mills for furnishing much of the raw material used. The principal factories for the production of the finished product, and the main offices of the Company, are in New Britain, Conn., but there are other factories located at Niles, Ohio; Newark, New Jersey; Bridgewater, Massachusetts; South Shaftesbury, Vermont; Bridgeport, Connecticut; Plantsville, Connecticut; in Canada, at Hamilton, Ontario and Roxton Pond, Quebec, and at Kobe, Japan.

U. S. Railways Again Controlled by Government

War-time regulations, governing the operation of all the railroads of the United States have again been put into effect.

The nation-wide car shortage, resulting in a threatening situation, even to the extent of transportation of food and fuel, has made centralization of railway management, under Government control, a vital and immediate necessity.

Under the new railway law, the Interstate Commerce Commission will put into effect the following extreme control measures made necessary by the car shortage and requested by the railroads themselves in a petition.

Priorities on shipment of necessities.

Export embargoes to conserve food and fuel.

Diversion of traffic wherever necessary.

Joint use of terminals and interchange of equipment.

No Daylight Saving in Brampton

BRAMPTON.—Daylight saving received a final knockout at the last meeting of the Town Council, when a petition with more than 700 names on it, including a large percentage of the merchants, was presented. A former petition favoring it had been submitted at the last Council meeting, and Mr. Davidson of the Pease Foundry was present to support it. In committee the Council passed the motion that daylight saving be not adopted.

N.H.A. Discusses Business Outlook

At the recent meeting in Atlantic City of the National Hardware Association of the United States, President R. H. Treman addressed the gathering on the Outlook for Business.

"The world to-day is facing the most difficult financial and economic situation in history. There is constant revolt against high prices, and yet prices continue to rise at the rate of 26% increase in commodity prices from April 1st, 1919, to April 1st, 1920. This is due fundamentally to there being too much credit and money and too few goods," said Mr. Treman.

"It is evident that this country cannot go on boosting wages and prices, curtailing production, attempting to enrich ourselves by non-productive speculation, without fostering further discontent and radicalism, as well as bringing on a crisis sooner or later."

Purchasing Agents to Go to Chicago

The Purchasing Agents' Association, of Toronto, held their regular monthly meeting at the King Edward Hotel, presided over by Mr. J. I. Nicholson. Mr. H. A. Harrington, fuel controller, spoke on the fuel situation.

Dominion Steel Corp. Output Increased

"The Canadian steel industry is reaping much benefit from increased British demand for rods, billets and wire products and from United States demand for wire nails and light rails," says the Daily Metal Reporter. "During January-March period, Dominion Steel Corporation produced 50,482 tons of pig iron, against 20,476 in October-December, 1919; 60,274 tons of ingots, against 34,761 and 10,029 tons of rods against 1,105."

Detachable Broom Handle

At first thought the broom handle seems inconsequential. Isolated and individually, it is. Multiply it by millions, which probably approximates the number of brooms sold yearly, and you have something quite different.

The detachable broom handle is a brand new idea. At the present time there is a factory in Vermont devoted exclusively to manufacturing brooms with this type of handle. The handle is of wood fitted into an oxywelded metal holder that clamps easily on to the brush of the broom. The metal part is light but very strong, being securely welded by the oxy-acetylene process, which not only makes it rigid but allows the entire piece to be neatly finished.

Fear Another Steel Strike on June 1

"With the railroad tie-up still an extremely serious drag on the iron and steel industry, there are reports in circulation that the American Federation of Labor organizers have decided to stop such activity as still exists by calling strikes at all of the iron and steel plants of the country. The steel trade has the report that the call will be made effective June 1," says the Daily Metal Reporter.

"It has been known that the union organizers have been very busy in all important iron and steel manufacturing centres, and there are reports that their efforts during the past few months have brought in large numbers of recruits in the Pittsburgh, Youngstown and Cleveland districts, in spite of the utter failure of the recent steel strike. Whether the unionization movement has gone far enough to result in a stoppage of operations at all the big plants whenever union leaders say the word is debatable. Developments will be watched with the greatest interest.

"In a recent talk at the Socialist convention, W. Z. Foster, who led the steel strike, is reported to have said that the union organizers were working to the end of calling out the coal miners, steel workers and railroad men all at the same time, when 'the time was ripe.' If that is to be the program, it appears doubtful if the call will come as soon as June 1."

Newsy Notes From Here and There

Moncton, N. B.—Building operations here, which have been virtually at a standstill for the last week or ten days, owing to the strike of the builders' trades, has again been resumed, a satisfactory working agreement having been reached.

* * *

Montreal.—Lewis Bros., Ltd., have secured two additional salesmen for Ontario territory. N. D. Grantley of Toronto, and Stanley Coon of Peterboro will both cover Ontario territory, giving exclusive atention to the sale of auto accessories. R. C. Lewis, sales manager T. S. Simms & Co., Ltd., St. John, N. B., was in Montreal this week.

* * *

Montreal.—George C. Fletcher, of the linseed oil department Sherwin-Williams Co., of Canada, Ltd., was in New York this week. O. Pepin, of the travelling staff of Starke-Seybold, Ltd., Montreal, has been confined to the house through pneumonia. Mr. Sargent of Canadian Hart Wheels, Limited, Hamilton, was in Montreal this week.

Bradford, Ont.—H. F. S. Gardner, merchant, Bradford, Ont., made a business trip to Toronto this week.

Toronto.—E. T. Dean, president of Stuart & Wood, Ltd., wholesale paints, etc., is visiting Buffalo, N. Y., and parts of Niagara Peninsula on a special business trip for his firm.

* * *

Winnipeg.—G. F. Stephens, of G. F. Stephens & Co., Ltd., paint and varnish makers, has returned to Winnipeg from a six months' visit to Victoria, B.C.

* * *

Toronto. — Adam Taylor, secretary-treasurer of Taylor, Forbes & Co., Ltd., Guelph, Ont., was in Toronto this week on business.

* * *

Toronto. — A. Kirkpatrick, hardware merchant of Lefroy, Ont., made a business trip to Toronto this week.

Stoves Active, But Material Scarce

No Promise of Better Raw Material Outlook—Those With Orders Placed Likely to Get More Stock Than Those Deferring Orders to Later Date

IN DISCUSSING the stove situation and the outlook, as it obtains at present, with W. L. Helliwell, Montreal manager of the Gurney-Massey Company, Ltd., HARDWARE AND METAL was informed that the demands have been good, the buying quite heavy, and the tendencies strong. "People have been buying the better grade of stoves and ranges," said Mr. Helliwell. "In fact the ranges selling at $100, and over, wholesale, have been the most active. It has been difficult to keep the higher grade stoves in stock."

The demand has been heavy, in certain districts, for gas stoves. These, as a matter of fact, cannot be made fast enough to meet the requirements of the trade, and difficulties of obtaining raw materials have hampered deliveries. This situation is the most difficult, in some respects, that the manufacturer has to face. It is very hard to know, for any length of time ahead, just what conditions may arise. There is not the slightest chance, in Mr. Helliwell's opinion, of prices being lower or of stocks being greatly augmented. It is those who have already covered themselves on stoves who will secure delivery.

Hardware Men in New Organization

Western Canada Colonization Association Formed to Enlarge Canadian Production and Expand Export Trade.

HAVING as its specific purpose the peopling of some twenty million acres of vacant land in the three Prairie provinces, with the ultimate object of greatly enlarging food production and expanding Canada's export trade, an organization comprising leading business and financial men in Eastern and Western Canada has been formed, and shortly will commence the raising of a fund of $1,500,000 to finance its operations.

The new body is known as "The Western Canada Colonization Association," and its intention is to erect an extensive organization, not only for the purpose of attracting a large immigration to the farm districts of the West, but also to see that these settlers are afforded every opportunity and assistance in establishing themselves after they arrive. It is planned to have representatives in every Western community to assist in carrying out the scheme.

Lighten Burden of Taxation

It is expected that the chief results will be that Canada's population will be vastly expanded with a consequent lightening of the per capita burden of taxation, that the development of this country's natural resources will be aided materially, and that there will be a notable expansion of the domestic market for Canadian manufacturers and an increase in the passenger and freight traffic on the Canadian National Railways, which eventually will convert

Continued on page 70

ASBESTOS PRODUCTION IN CANADA

Mr. Frank Merricks, in his presidential address before the Institution of Mining and Metallurgy in London, England, referring to the mineral resources of the British Empire, said that at present Canada is the chief asbestos-producing country of the world, and all that is needed to enable her to retain her premier position is a continuance of efforts directed towards cheapening the cost of recovering the asbestos by improved methods of mechanical concentration and an adequate supply of labor. A few years since a Royal Commission reported that with adequate labor and supplies of material, 150,000 tons of asbestos might be produced annually from the Canadian deposits. This figure was nearly reached in 1918, the output for that year being 141,462 tons. The centres of production of Canadian asbestos are all in the Eastern townships of Quebec Province—at Black Lake, Thetford, Robertsonville, Danville, and East Broughton. Although Canada is the largest asbestos producer in the world, she does not even yet manufacture all the asbestos goods required for her own market. Local asbestos manufacturing industries are, however, growing, and will soon be equal to supplying the whole of the Dominion's requirements.

AVERAGE CROP EXPECTED

London, Ont. — According to W. R. Yendell, a prominent local business man, who has just returned from the Canadian West, an average crop is expected by the farmers there this year. The season is a late one, but the farmers say the added moisture in the ground will more than make up for the time last in seeding. Money is not appreciably tight, Mr. Yendall says, and collections are good.

LEGGE STEPHENSON FUEL OIL BURNING SYSTEMS

Legge, Stephenson Fuel Oil Burning Systems, 123 Bay St., Toronto, have issued a very attractive and instructive circular on their fuel oil burner.

The circular describes the burner invented by W. H. Legge, and deals with method of burning oil, parts of the burner, the setting-up of the burners, carbonization, odors, water in the oil, cost of burner, the advantages of the housewife, and also covers crude oil as a fuel. The circular also shows a cut of the burner in operating, as well as another cut for illustration purposes. Readers of HARDWARE AND METAL may have a copy of this circular on request from the above-named firm.

Hardware Letter Box

One-Minute Washing Machine

J. H. Slater, Esq., Ridgetown, Ont.—Could you give us the name of the manufacturers of the One-Minute Washing Machine?

The One-Minute Mfg. Company, 74 Logan Ave., Toronto.—Ed.

Dustless Brush Agents

W. B. Ritchie & Son, Havelock, Ont.—Could you give us the names of the Canadian agents for the Milwaukee Dustless Brush?

The following are Canadian Agents: M. N. Dafoe, 29 Colborne St., Toronto, Ont.; Furnishers Limited, St. John, N. B.; Cameron & Fleming, Winnipeg, Man.—Ed.

Repairs for Fansteel Electric Iron

The Zavitz Hardware Company, Wallaceburg, Ont.—Could you tell us where to procure parts for the Fansteel Electric Irons?

Parts for the Fansteel Electric Iron may be procured from Phanstiehl Company, North Chicago, Ill.—Ed.

Little Hummer Bicycle

Henri Jalbert, Esq., Chicoutimi, Que.—Could you give us the name of the agent in Canada of the Little Hummer Bicycle?

T. B. Laycock, Son & Company, Indianapolis, Ind., informs us that there is no Canadian agent at present in Canada for the Little Hummer Bicycle.—Ed.

Pressed and Malleable D Tops

The Erie Basket Co., Leamington, Ont.—Could you give us names of manufacturers of pressed steel and malleable D tops for fork and shovel handles?

Pressed steel D tops can be procured from the Canadian Shovel and Tool Co., Ltd., Hamilton, Ont. The malleable tops could be procured from the Ontario Malleable Iron Co., Oshawa, Ont., and Messrs. Pratt and Letchworth Co., Brantford, Ont.—Ed.

Iron Pipe Stop Cocks

J. L. Demers Esq., Thedford Mines, Que.—Kindly advise where we could procure names of manufacturers of iron pipe stop cocks.

These can be procured from the following: H. Mueller Mfg. Co., Ltd., Sarnia, Ont.; James Morrison Brass Mfg. Co., Toronto, Ont; Galt Brass Company, Ltd., Galt, Ont.; Joseph Breeden & Co., Ltd., Birmingham, Eng.; Canadian Brass Co., Ltd., Galt, Ont; Canadian Wolverine Co., Ltd., Chatham, Ont.; C. A. Dunham Co., Ltd., Toronto; Empire Company, London and Toronto, Ont.; G. & W. G. Gummer, Ltd., Rotherdame, Eng.; Kerr Engine Co., Ltd., Walkerville, Ont.; United Brassfounders & Engineers, Ltd., Cornbrook, Manchester, England; Wallaceburg Brass & Iron Mfg. Co., Wallaceburg, Ont.—Ed.

Buckeye Incubator

Cochrane Hardware Co., Ltd., Copper Cliff, Ont.—Please advise us of the name of the manufacture of the Buckeye Incubator.

Their address is The Buckeye Incubator Company, Springfield, Ohio.—Ed.

Who Buys Hardware Stock?

Jos. Hodgins & Son, Lucan, Ont.—Kindly advise us as to the names of sales companies who buy and sell hardware stocks.

Following are the names of the sales companies: The T. K. Kelly Sales Company, Minneapolis, Minn.; The Flick Sales Company, Minneapolis, Minn.—Ed.

Fire Sprinkler Systems

H. H. Dryden, Truro, N. S.—Can you give me names of manufacturers of fire sprinkler systems?

The following are manufacturers of fire sprinkler systems: Automatic Sprinkler Co. of Canada, 212 C. P. R. Bldg., Toronto; Bennett Wright Co., 72 Queen St. E., Toronto; Canadian General Fire Extinguisher Co., Providence R. I.; The Garth Co., Craig St., Montreal, Que.; General Fire Equipment Co., Toronto; Grinnell Automatic Sprinkler Co., Ltd., Toronto; Purdy Mansell Limited, Toronto, Ont.; Rock Wood Sprinkler Co. of Canada, Limited, Montreal.—Ed.

Putz Promade Metal Polish

Cochrane Hardware, Limited, Copper Cliff, Ont.—Can you tell us who sells Putz Promade Metal Polish in Canada?

The following is a list of jobbers who sell Putz Promade Metal Polish in Canada: Rice Lewis & Sons, Limited, Toronto; H. S. Howland, Son Co., Toronto; J. H. Ashdown Hardware Co., Ltd., Winnipeg; Merrick-Anderson Co., Ltd., Winnipeg; Marshall-Wells Co., Ltd., Winnipeg; Wood-Vallance, Ltd., Winnipeg; Whites Limited, Collingwood, Ont.; Wood, Alexander and James, Hamilton, Ont.; Lewis Bros., Ltd., Montreal; Caverhill, Learmont & Co., Montreal; Frothingham & Workman, Montreal.—Ed.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

990. **Hardware.** — A Manchester correspondent desires to get into touch with Canadian manufacturers of hardware.

991. **Hardware and furniture.**—Glasgow firm is prepared to handle Canadian-made hardware and furniture.

992. **Hardware and hemp and jute products.**—Irish correspondent asks for names of Canadian manufacturers of hardware of every description, rope, twine, jute wrappers for bacon, etc., for which he states there is a large market in Ireland.

993. **White lead and red lead.** — Long-established Scotch firm want to get in touch with actual "corroders" of dry white lead, and also producers of genuine red lead.

995. **Matches.**—A firm in the English Midlands are desirous of hearing from Canadian manufacturers of matches who can fill orders.

996. **Porcelain insulators.**—A company in the North of England ask for the address of Canadian manufacturers of porcelain insulators for use in electrical gear.

999. **Liquid rosin.**—A Manchester firm are open to purchase in large quantities a by-product of sulphite paper mills known as liquid rosin, saponifiable matter as high as possible (about 96) and sulphur lowest possible; water (H.20) should not exceed 1 per cent. Sample should accompany c.i.f. Manchester or Liverpool prices.

Catalogues and Booklets

H. F. BAILEY & SON

"One in every three minutes" is the record for milking cows with the use of the Hinman Milker, as claimed by H. F. Bailey & Son, Galt, Ont., in a booklet just issued. Many clear-cut illustrations show the operation of the milker, indicating its effect upon the animal as compared with the process of the human hand. Complete data as to specifications are given. A number of letters are also reproduced by users of Hinman machines telling of their experiences.

WARREN TOOL AND FORGE CO.

The Warren Tool and Forge Company, Warren, Ohio, have issued Catalog No. 3, containing illustrations and complete data concerning each tool manufactured. In order to avoid confusion use is made of the standard of pounds, feet and inches, and transposition tables are provided for converting specifications into the metric system. The introductory page shows views of the various operations in the plant, this being followed by the index to contents. Forty pages are devoted to a full description of each tool with specifications and illustrations.

F. R. MURRAY CO., LTD.

The F. R. Murray Co., Limited, 365 Water St., Vancouver, B.C., have issued a very attractive and well-illustrated catalogue on the Viko aluminum ware. The first few pages are devoted to the demonstration of how the different utensils are made, and clearly describes and illustrates the theory of certain shapes, forms and other special construction of this ware.

The catalogue also contains a complete line of coffee percolators, coffee pots, tea pots, double boilers, combination tea kettles, also tea kettles, casseroles, sauce pans, preserving kettles, combination strainers, and cookers, bake dishes, double boilers, double roasters, omelet pans, frying pans, griddles, dish pans, bread pans, mixing bowls, drip pans, muffin pans, cake turner, milk skimmers, strainer ladles, coffee and tea balls, measuring spoons, graters, measuring cups, egg cups, and many other articles of household use. Readers of HARDWARE AND METAL may have a copy by writing to the above-named firm.

These two pages will give the B-H agent some idea of the extensive publicity we give to all the B-H products.

In every town where we have an agent there appear in the local newspaper, advertisements such as are suggested here.

All very attractively displayed and imprinted with the name and address of the B-H agent—all drawing attention to his store where B-H products can be obtained and where may also be found a suitable product for every requirement in which a brush is used.

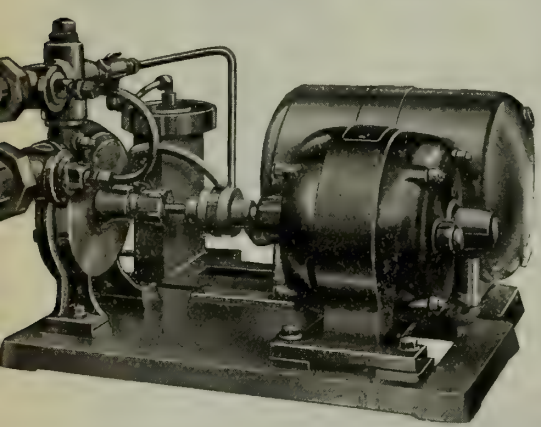
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

Tankless Water System

The Weston Pumps, Ltd., 707 George street, Toronto, announce they have the Canadian manufacturing and selling rights for a new water system, which will be known as the "Westco Tankless Water System," and which they state is a direct automatic pumping system, which does away with the necessity of a tank. One of the features claimed for the pump is the small number of parts. The manufacturers state their pump has only one moving part, which eliminates wear with the possible exception of two small bearings, which they state could be quickly replaced.

The manufacturers describe the system as follows: The entire eystem consists of an automatic electric control switch, a compression chamber, the necessary fittings and connections and the outfit as illustrated. It has one moving part, which is the impeller, or wheel containing a certain determined number of blades on each side of its outer rim.



TANKLESS WATER SYSTEM

Rotating at high velocity in a water channel, cast in the pump case, the water is drawn by powerful suction from the source of supply and discharged against pressure to the outlet.

Westco water systems can be run off from light plants, as well as regular central station current.

To install, pipe from pump to well, cistern, or other source of supply, and from pump direct to service line leading to plumbing. Then wire to the motor and your installation is complete. Open the faucet—the motor starts, and a full flow of fresh water is delivered under pressure. Capacity, 300 to 500 gallons an hour. Close faucet and pump stops.

The ¼ horsepower motor is sufficient for the usual fixtures—laundry, kitchen and bathroom—where the average use of water during any hour does not exceed 200 gallons. For sprinkling and other outside continuous or high pressure service, a ½ horsepower motor could be furnished, it is stated.

The Perfection Cooker Corp.

The Perfection Cooker Corp., 1420 Capitol Avenue, Omaha, Neb., are manufacturing a new kitchen utensil which, they state, operates on a new principle, the theory being that the steam, not being allowed to escape, would form a heavy pressure and the pressure would raise the temperature and shorten the time for cooking. This, the manufacturers claim their new cooker will do, and give their description of the new cooker as follows:

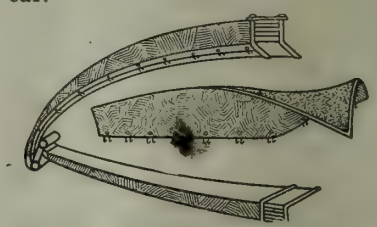
The cooker is in the form of a heavy aluminum kettle with a specially fitted cover which clamps on tightly to prevent the escape of steam, making it possible to attain a pressure of twenty pounds per square inch and in operation attains 276 degrees of heat.

They also state that with attachments, etc., several articles may be cooked at one time, and that owing to the construction not allowing the steam to escape that all the flavor and juices remain in the vessel rather than evaporating with the steam. The retaining of the moisture also eliminates the possibility of boiling over or boiling dry.

They also claim it needs little attention, cooks in less time, is more economical on fuel, saving all the steam distilled water and flavor, using such condensation over and over to enrich the food, and will not condense lime, alkali, or other minerals found in the water. Without spider frame and ball it cooks in the ordinary way. With grates inside and cover on it will steam cook the food as done by the regular steamer method. When closed steam tight with spider and ball, the makers say, it will cook many things in a shorter time that the older method.

Lubricating Spring Cover

The Woodworth Manufacturing Corporation, Niagara Falls, N. Y., are offering to the Canadian trade a new lubricating spring cover. The manufacturers claim that the new spring cover is made in two grades, genuine and imitation leather, and is fastened by means of small hooks, the cover being lined with heavy felt wicking capable of absorbing and retaining a sufficient quantity of oil to insure lubrication of the springs for a period of from one to two years without further oiling, the outer covering being impervious to oil and water. The cover when adjusted presents a neat appearance, having no projections which tend to detract from the appearance of the car.



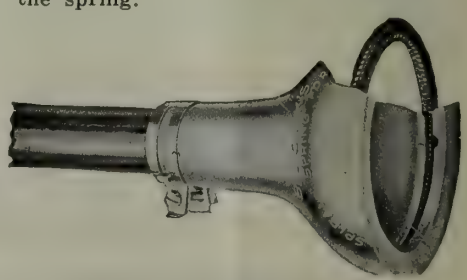
LUBRICATING SPRING COVER

They also state that the felt lining insures an even distribution of oil throughout the length of the springs, while the outer covering keeps out moisture, dust and dirt and keeps in the oil.

Another feature pointed out by the makers is that the accessory is made with the object of insuring the maximum amount of resilience in the springs so as to add to comfort of passengers as well as to increase the life of the tires and machinery.

Spiral Spring Force Cup

American Spring Force Cup Mfg. Co., 127 N. Dearborn St., Chicago, Ill., are offering to the trade their spiral spring force cup. In describing their new article the manufacturers say that it is made of a good grade of rubber and has a sherardized spring and clamp, making it rust-proof. It is furnished with a 36-inch mahogany wood handle which is recessed where the clamp fastens in order to hold the clamp fast to the handle. Another feature, the makers point out, is the spiral spring, which keeps the rubber in shape, and the manufacturers claim that even should the rubber deteriorate from being in stock for a long time that the spring will preserve the shape of the cup and maintain its efficiency. The ordinary four-inch force cup they state has a force of about 22 pounds, while the 4 inch spiral spring force cup has a force of about 58 pounds. The difference claimed is due to the reinforcement of the spring.



SPIRAL SPRING FORCE CUP

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

IN addition to important price changes which have been made this week, an important ruling has become effective in the way of a business Turnover Tax. This will have a vital bearing on all commodity prices and affects all phases of the hardware trade. The new legislation is so far-reaching that it is difficult as yet to comprehend the full effect of the new taxation and opinions expressed by the trade authorities are very divergent. The imposing of a luxury tax will also affect many hardware lines and whether it will have influence on reducing sales remains to be seen.

Solder and lead have declined in price several points this week. Spelter and tin are also lower. Quotations on other lines, however, are very firm and many higher prices have been made, some of which are, as follows: Lawn rakes, cotter pins, sleigh and team bells, screen doors and windows, wrenches, barrel bolts, brass wire, plow and clothes lines, jack screws, saws, iron handles, range boilers, sash weights, pump leathers, paste, lampblack, axle pulleys, oiled and annealed wire, curry combs, cistern pumps, post hole augers, chicken food, children's wagons and sleighs, lath hatchets, gasoline, egg beaters, cap and set screws, nuts, wire rope thimbles, steel belt lacing, nail pullers, sash weights, clothes pins, axes and fuel oil.

The freight embargo on the United States railroads continues to hamper industries and is the cause of many shortages. Jobbers state that in spite of these prevailing shortages the volume of business is very satisfactory and on some lines buyers are getting in their fall stock.

Money continues to circulate freely and collections are very satisfactory.

MONTREAL MARKETS

MONTREAL, May 20—Great interest has been manifest by the trade, generally, in the budget. This has occupied the attention of all classes of business men and it has been difficult to obtain expressions at this early date as to the effects on business likely to develop, and the influence of the new taxes on prices of various commodities. Naturally, it is a vital question of great moment, and it is expected that the citizens, generally, will accept the proposals with a feeling that debts must be liquidated, and in such ways, and by such means as are necessary. In the long run, of course, the consumer will have to shoulder the burden.

Price changes have been quite numerous again. The situation on wire products has developed into a more or less serious stage and raw material is particularly scarce. One jobber states that there will be no guarantee on nail "extras." Nails, too, are extremely scarce, as are other wire products. Baling wire is higher in price. Wire clothes lines are marked up again and wire egg beaters, too, are advanced. Cap and set screws, nuts, wire rope thimbles, steel belt lacing are all higher. Patent nail pullers are in the limelight this week with a new advance. Sash weights have been revised upward. Clothes pins are higher again. Wire lawn rakes and brush hooks join the advance list this week. Chopping and other axes are advanced one dollar per dozen. Curry comb discounts have been changed again, this being an advance. Fuel oil is higher in price. Steel sheets are almost unobtainable. Lead pipe, sheet lead and solders are lower in price.

Wire Products Acute; Some Higher Prices

Montreal.

WIRE.—Prices on various kinds of wire have been changing of late in jobbing circles, and the condition of the market is very unsettled. Not only so but jobbers decline to guarantee prices for any length of time as changes may come without notice from the producer. Cutlery wire is now selling as follows: No. 9, 100 lbs., $6.75; No. 10, $6.85; No. 11, $6.90; No. 12, $7; No. 13, $7.10; No. 13½, $7.15; No. 14, $7.30; No. 15, $7.45; No. 16, $7.60. Hay baling wire is selling as follows: No. 13, ar lot, per 100 lbs., $5.80; No. 14, $5.90; No. 15, $6. For less than car lot prices are as follows: No. 13, $5.90; No. 14, $6; No. 15, $6.10. Single loop bale ties are priced as follows: No. 12, $6.80 for 100 lbs.; No. 13, $6.90; No. 13½, $7; No. 14, $7.05; No. 15, $7.20; No. 16, $7.40. An extra of 15 cents per cwt. is now being charged for annealing. This is a new policy.

Clothes Lines of Wire Make Higher

Montreal.

WIRE CLOTHES LINES.—New high prices are effective for wire clothes lines in coils. The present jobbing prices are quoted: No. 18 by 50 feet, per dozen coil, $4.50; 100 feet, $8.25; 1,000 feet, $82.50. No. 19 by 50 feet, per dozen coils, $4.10; 100 feet, $7.20; 1,000 feet, $72.

Wire Egg Beaters Join With Advances

Montreal.

EGG-BEATERS. — An advance has been made for Dover egg-beaters. No. 2 are now selling at a price of $3 per doz.; No. 30, $5.40, and Dover patterns No. 60, $2.60 per dozen.

Higher Cap and Set Screws; Discounts Up

Montreal

CAP AND SET SCREWS.—New dis-

counts have been named on cap screws and these are selling now at 15 per cent. from the list. Set screws are selling at 20 per cent. from the list.

Iron Nut Costs Are Now Increased

Montreal.

NUTS.—Higher prices are effective for ordinary nuts, and the following discounts apply: Up to 1 inch, discount 15 per cent.; 1 inch to 1½ inch, 10 per cent.; 1½ to 2 inch, list plus 10 per cent.

Wire Rope Thimbles Advanced This Week

Montreal.

ROPE THIMBLES.—Higher prices are being charged for wire rope thimbles and the net prices for 100 are as follows: ¼ inch, $5.50; 5-16, $6.50; ⅜, $8; ½, $10; ⅝, $16; ¾, $18; ⅞, $25; 1 inch, $32.

Steel Belt Lacing Is Costing More

Montreal.

BELT LACING.—Through a change of price, "Star" belt lacing is now selling at $1.10 per 100 feet.

Patent Nail Pullers Reach Higher Levels

Montreal.

NAIL PULLERS.—"Sure Grit" nail pullers have reached a new high basis. The present selling price of these per dozen is $24.

Another New Price Makes Weights Higher

Montreal.

SASH WEIGHTS.—Higher prices are again effective for sash weights, although the last change was made only two or three weeks ago. Sectional are now selling on a basis of $6.50 per 100 lbs., and solid at $5.50.

Both Varieties Clothes Pins Costing More Now

Montreal.

CLOTHES PINS.—Higher prices are in effect for clothes pins of both common and patent manufacture. The common are quoted in 5-gross boxes at $2 a box, and the "spring" in boxes of 2 gross, $1.70 per box.

Wire Lawn Rakes, Brush Hooks Higher

Montreal.

RAKES AND HOOKS.—Advances are registered this week for wire lawn rakes. The new list is $29.50 per dozen on 20-tooth and $31.50 on 24-tooth. Discount to the trade is 50 per cent. and 10 per cent. Brush hooks are priced at $19 per dozen, net.

Axes Various Kinds Are Again Advanced

Montreal.

AXES.—An advance of $1 per dozen has been made on chopping axes. This applies to the various grades and makes of single bit pattern. Other advances for other axes will doubtless follow. Boys', hunters', ice and joiners' axes have been advanced to a similar extent. Tomahawks and sportsmen's axes are advanced in like manner.

Steel Curry-combs Are Again Advanced

Montreal.

CURRY-COMBS.—A discount of 30 per cent. from the list is now effective on curry-combs, this being the second or third change within a few weeks. The reason for the higher prices, naturally, is the condition of the steel market.

No Definite Change For Old Materials

Montreal.

OLD MATERIALS. — Markets and marketing conditions are much as they were last week. Buyers are ready to purchase quantities of old scrap from the country dealers and at fair prices. There is a tendency to softening prices on some commodities, and in general there is a demand of quite ample proportions from the large manufacturers.

Automobile tires	0 03½	0 04

Machinery, cast (ton)	40 00	42 00

Gasoline Sales Are Brisk; Fuel Oil Again Higher

Montreal.

GASOLINE AND OILS.—Prices have been firm but have remained unchanged on gasoline. The motor grade basis, per gallon, is 38 cents. An advance will not come as a complete surprise, however, for the crude oil situation is strong. As a matter of fact a new high basis has been reached, the present quotation, per 100 gallons, being $16.70, tank car delivery. Coal oil is based still at 27 cents per gallon for the ordinary grade. There is considerable movement of oils generally.

Stove Prices Uncertain; Ware Prices Unchanged

Montreal.

STOVES AND WARES.—Prices have been fully maintained on stoves and ranges. Much movement is reported of gas and electric ranges, and it has been impossible, really, to satisfy the demand. Prices are uncertain and there may be advances in the immediate future. Even with the war tax removed the difficulties of obtaining raw material, coupled with the prices asked for it, are many, and will operate, doubtless, to offset the reduction effected by the removal of this tax. The ware list is unchanged. At the same time it is altogether probable that there will be more and more difficulty in securing ample supplies of sheets and plates; this means that there will be no relief in prices, in fact advances are not unlikely. The situation is very strong under conditions of short supply.

Rope Sales Better; Changes Are Absent

Montreal.

ROPE AND CORDAGE.—Prices have been steadily maintained and there has been, for some time, a larger outturn of various products, particularly of rope. Manufacturers are better pleased with conditions than they were a while ago. While the abolishing of the war profits tax will be some relief the increased cost of raw materials and higher wages will operate, say the makers, to a maintenance of about the same, if not the same prices as are now effective. Pure manila rope is selling at 35½ cents per pound; Beaver and British manila at 28 cents, and sisal at 22½ cents per pound.

There Is Great Scarcity Standard Wire Nails

Montreal.

WIRE NAILS.—Prices have been very firm on standard wire nails, and the jobbers are almost without stock of regular sizes much of the time. Building activity has naturally been responsible for the absorption of a great tonnage at all points. The keg basis is still ruling at $5.85, with cut nails $6.35 per keg.

Iron and Steel Bars Are in Active Demand

Montreal.

IRON AND STEEL.—All that jobbers need these days is a steady flow of supplies from the mills, for demand is active and the stock sizes, in particular, of various iron and steel bars, are selling well. There has been a steady undertone but no price changes have been registered.

IRON AND STEEL

Iron finish machinery steel	...	$4 95
Norway iron	13 50	15 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Lead Pipe, Sheets and Solder Are Less

Montreal.

LEAD PRODUCTS.—In very definite accord with the forecast made in HARDWARE AND METAL last week, lead products have been reduced in price. Half a cent has been shaved from the lead pipe prices, while sheet lead is reduced one cent. Solder prices, too, have weakened, guaranteed now selling at 41 cents per pound, this being a reduction of one and a half cents. Wire solders are reduced similarly. Zinc sheets are less to the extent of one cent a pound, this being a result of the budget change.

Ingot List Erratic; Is Hard to Forecast

Montreal.

INGOT METALS.—Prices have been erratic on tin and copper. Tin, in London, has declined materially, and there seems to be no definite reason for the "off" condition that has characterized it for the past week or two. Copper, too, is somewhat unsettled.

TIN.—Local market has weakened under the influence of the London declines, which have been considerable. The basis this week is 65 cents.

COPPER.—While the New York market is steadier, London is weaker to the extent of eleven pounds. Local prices are shaded to 23½ to 24½ cents for electrolytic and casting respectively.

ANTIMONY.—The cancellation of the war tax of 7 per cent. will have the effect of making the price basis on this more favorable. Local quotations are 12½ and 13 cents for Chinese and English respectively.

ALUMINUM.—Still selling at 35 to 38 cents per pound as to quantity.

SPELTER.—At 11 cents per pound some business is being transacted.

LEAD.—This has been fluctuating somewhat and the market is a trifle lower with the basis quoted 10 cents.

TORONTO MARKETS

TORONTO, May 20—A new business Turnover Tax has become effective and jobbers, manufacturers, etc., are required to pay 1 per cent. tax on all goods purchased. A new luxury tax also has been imposed, which may have an important influence on future prices and sales.

It is interesting to note that lead, lead pipe and solder, etc., have dropped a few points. Tin and spelter have also declined. Screen door and window prices have been revised upwards. Other hardware lines that have advanced in price are: Cotter pins, lawn rakes, sleigh and team bells, agricultural wrenches, common barrel bolts, brass wire, plow lines, clothes lines, jack screws, saws, Mrs. Potts' iron handles, range boilers and corrugated iron.

The transportation embargo continues to hamper manufacturers and jobbers state they are running short of many lines which are tied up in transit.

A heavy demand continues for all hardware lines and seasonable goods are moving freely. Business is very brisk, considering the backward season. Money is circulating freely and collections continue to come in very satisfactorily.

Cotter Pins Will Now Cost the Dealer More

Toronto.

COTTER PINS.—Notwithstanding recent advances cotter pins have again been marked up and will now cost the dealer approximately 10 per cent. more.

New Revised Prices Made on Lawn Rakes

Toronto.

LAWN RAKES.—In line with many commodities whose manufacture requires wire, wire lawn rakes have been revised upwards. The 22 tooth now costs $13.20 per dozen, the 24 tooth $14.20 per dozen, while the 26 tooth has been marked up to $16.20 per dozen.

Sleigh and Team Bells Have New Quotations

Toronto.

BELLS.—Sleigh and team bells are also among the higher revised prices this week, having been advanced approximately 10 per cent. over former prices.

Screen Door Prices Have Been Revised Upwards

Toronto.

SCREEN DOORS.—Higher prices have been made on many kinds of screen doors this is said to be due to the scarcity and higher cost of lumber, etc. Although the labor question is not to be overlooked, many are wondering what the future will show in the way of prices on commodities manufactured from lumber, as supplies are said to becoming more scarce and harder to procure. The following are the new quotations on a few of the most prominent lines:

Screen Doors—No. 1, $23.40 per doz.; No. 2, $28.40; No. 8, $40.20; No. 21, $34.20.

Higher Quotations Made on Screen Windows

Toronto.

SCREEN WINDOWS have also been marked up to higher prices this week and in line with screen doors and other commodities manufactured from wood or wire, etc., are hard to procure. Jobbers state they have fair stocks at present but should the demand be extra heavy it may be that they will have rouble with replacements. The new quotations on some of the better known kinds are as follows:

Screen Windows.—No. 1, $4.25 per doz.; No. 2, $5.65; No. 3, $6.20; No. 4, $6.60; No. 5, $7.30; No. 6, $7.90; No. 7, $8.40; No. 8, $9.10; No. 9, $10; No. 10, $12.20; No. 12, $4.40; No. 12½, $4.95; No. 13, $4.80; No. 14, $5; No. 14½, $5.50; No. 15, $5.90; No. 16, $6.20.

Agricultural Wrenches Now Quoted 17% Off

Toronto.

WRENCHES again come up for revision. Higher revised prices have been made on agricultural and they are now being quoted at 17 per cent. off the list.

Common Barrel Bolts Will Now Cost More

Toronto.

BARREL BOLTS.—Many upward revisions have been made of late on nearly all lines of builders' hardware. This week shows advanced quotations on the common barrel bolts. The three-inch is now quoted at $1.55 per dozen; 4-inch $2.00 per dozen; 5-inch, $2.25 per dozen.

Many Kinds of Brass Wire Have Higher Quotations

Toronto.

BRASS WIRE of various kinds has

again been revised upwards. This affects nearly all gauges. The new advance will approximate 10 per cent.

Plow Lines Also Have New Higher Quotations

Toronto.

PLOW LINES.—New and higher prices have been made on hemp plow lines, the new price being quoted at $6.00 per dozen.

Manila Clothes Lines Now Cost $4.25 Doz.

Toronto.

CLOTHES LINES have again been revised upwards and the manila 50 foot is now being quoted at $4.25 per dozen.

Prices on Jack Screws Have Been Marked Up

Toronto.

JACK SCREWS.—In line with many other commodities whose basic metal is iron or steel, jack screws have been revised upwards and the new prices will approximate an advance of 10 per cent. over former quotations, and some of the better known sizes are now being quoted as follows:

Jack Screws—1¼x6, $3.90 each; 1½x8, $5.30; 1½x10, $6; 2x12, $9.40; 2x14, $10.30.

Various Saws Have Again Come Up For Revision

Toronto.

SAWS of nearly all makes and kinds have again been revised upwards. This new quotation is said to be due to the situation which has developed in steel of nearly all kinds, although labor, transportation and other factors are not to be overlooked.

Mrs. Potts' Iron Handles Are Revised Upwards

Toronto.

SAD IRON HANDLES.—Higher prices have again been made on Mrs. Potts' sad iron handles and the japanned are now quoted at $2.05 per dozen, and the polished $2.15 per dozen to the retail trade.

Range Boiler Prices Have Been Advanced

Toronto.

RANGE BOILERS.—Advanced prices are effective for range boilers. This is largely due to the shortage of plate, although the labor and coal situation is not to be overlooked. The present demand is very heavy and in some cases manufacturers state is bigger than the supply. The following are the new quotations:

Range Boilers—	Standard	Ex. Heavy
30-gallon	$15 00	$18 00
35-gallon	18 00	21 00
40-gallon	20 00	23 00
52-gallon	25 00	29 00
66-gallon	35 00	38 00
82-gallon	42 00	48 00
100-gallon	55 00	65 00
120-gallon	70 00	80 00

Decline Made on Lead Products, Solder, Etc.

Toronto.

LEAD AND ZINC PRODUCTS.—The sagging tendency which was reported in last week's issue of HARDWARE AND METAL has developed further weakness and a decline of half a cent has been made on lead pipe, lead waste pipe and lead sheets in rolls. Solder has also developed a weakness and lower revisions have been made averaging from 2 to 3c per lb. on solder of the different kinds.

This is attributed to the present situation of pig lead, which in some instances has been affected by lower quotations on the English market, and while jobbers and manufacturers believe that the present quotation will hold steady they state there is no certainty about the situation as the basic metals have been of such a fluctuating nature during the past several weeks, gaining a few points one day and losing the next. The present demand continues to be fairly heavy and good volumes are going out daily.

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 44
Solder, strictly, lb.	0 38½
Solder, commercial, lb.	0 36½
Solder, guaranteed, lb.	0 44
Solder, wiping, lb.	0 36
Zinc sheets, per lb.	0 19

TURNOVER TAX.—An important ruling has become effective in the way of a business Turnover Tax. This should have a vital bearing on all commodity prices and effect all phases of the hardware trade. It is difficult to comprehend the full effect of the new taxation as the new legislation is so far reaching and opinions expressed by the trade authorities are very divergent.

The imposing of a luxury tax will also affect many hardware lines. Especially is this true of sporting goods and kindred specialties and some are concerned the result on sales, etc., of these lines.

Some have it that the 1 per cent. business tax will actually figure out to be more than 1 per cent., as each firm handling an article may assume the amount of tax they were required to pay and add it to their cost.

Boiler Tube Prices Firm; Remain Unchanged

Toronto.

BOILER TUBES.—The demand for boiler tubes continues to be fair. Although the present season is a little off considerable are still going into barges and other kinds of boats as well as other sources.

Jobbers state that they have fair stocks on hand at present but are wondering what developments will take place before the heavy rush commences during the later part of the summer months, as it is believed that skelp is very hard to procure and is the means of holding manufacturers back in the production of boiler tubes. The present prices, although firm, remain unchanged and are quoted as follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	$28 00	.....
1¼ inch	30 00	.....
1½ inch	31 50	.....
1¾ inch	33 00	30 00
2 inch	32 00	29 00
2¼ inch	37 00	32 00
2½ inch	46 00	36 00
3 inch	54 00	45 75
3½ inch	70 00	49 00
3½ inch	70 00	39 00
4 inch	96 00	63 00

Corrugated Sheet Prices Have Been Advanced

Toronto.

CORRUGATED SHEETS.—A slight advance has been made on corrugated sheets this week, which is said to be the result of the great shortage of flat sheets which is at the present time prevailing, and manufacturers state that although the mills were behind on their deliveries for the second half of 1920 that sufficient sheets would have come to hand at least to fill the most urgent requirements and state that the mills have again been hampered by the recent embargo on United States freight transportation, both through the difficulty of securing coal, as well as raw materials.

Although the present demand is still said to be greater than the supply, some state that it has lately fallen off to some extent, which they attribute to the scarcity of other commodities, which is hindering operations on many building projects to such an extent that it would not be possible to use the materials in some cases were they to be had. The following are the present quotations:

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge		
No. 26 gauge		
No. 24 gauge		
No. 22 gauge		
No. 20 gauge		
No. 18 gauge		

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

An additional charge of 10% of the list price is added to cover exchange.

Discount, 7½%.

Sheet and Plate Stocks Nearly Exhausted

Toronto.

SHEETS AND PLATES.—The situa-

tion on this commodity instead of improving is said to be gradually growing worse and jobbers and manufacturers state that if shipments do not come to hand more readily and in larger quantity that there is every possibility of a famine.

The freight embargo on the United States railroads is still prevalent and is causing great inconvenience and shortages on all commodities. This is causing great dissatisfaction among nearly all who have to concern themselves with shipping of merchandise, and while it is true that the embargo has been lifted in some places it is also true that it has become effective in others, which has a tendency to keep the situation at a deadlock.

One large jobber stated to HARDWARE AND METAL that he had a number of cars of sheets in transit, but had no idea as to their present whereabouts or when he would receive them, and thus should the embargo be lifted it is his belief that the quantity in transit would materially help the present situation, although he pointed out that owing to so much congestion around the main shipping points on the different railroads that it may be sometimes before congestion is straightened out.

The following prices are quoted here merely as a guide as it is believed that very few could supply a full list of sizes, and owing to the present scarcity it is necessary in many cases to pay premiums over these quotations, as jobbers often find it necessary to go into the local market in order to secure the urgently needed stocks to fill their orders.

BLACK SHEETS—	
10 gauge	9 00
12 gauge	9 05
14 gauge	9 10
16 gauge	9 35
18-20 gauge	9 40
22-24 gauge	9 45
26 gauge	9 50
28 gauge	9 50
GALVANIZED SHEETS—	
U.S. Standard—	
10¾ gauge	12 50
28 gauge	12 10
26 gauge	10 75
22 and 24 gauge	11 55
20 gauge	11 55
18 gauge	11 55
16 gauge	10 25
English Standard—	
28 gauge	12 50
26 gauge	12 25
24 gauge	11 65
22 gauge	11 30
18 and 20 gauge	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Bars Show No Change

Toronto

IRON AND STEEL BARS.—Business continues to be brisk for nearly all kinds of iron and steel bars, although it is the belief of jobbers that the demand has to some extent slackened down. This they state may be due to the shortage of sheets and other commodities which are often used in conjunction with bars for the different building and other operations.

It is interesting to note that small angles are in great demand for exports to the United States, and while it is remembered that these originally come from this source, at least to a large extent it will no doubt show the shortage which is being caused by the tie-up of the U. S. railroads. This is practically true of many other commodities, which in some cases are shipped to border towns and transported from there to their destination by motor trucks.

Although it is believed the mills are not taking orders for immediate delivery jobbers state they have fair stocks of bars on hand, and although the present price is very firm there has recently been no change. The following are the present quotations:

Common bar steel, 3-16 and light	6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	...
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75

NAIL EXTRAS.—An advance has been made on the extras of packing wire nails or brads. The 25 pound and 50 pound boxes are subject to an extra of $1 per 100 pounds, the 10-pound boxes $1.50 per 100 pounds.

An additional extra is also being charged for coating or blueing, the new price being 35 cents per 100 pounds in place of a former 25 cents. The additional for miscellaneous list on nails or brads has been revised upwards to 2 cents per pound in place of a former 1 cent per pound.

Waste Materials Have Downward Tendency

Toronto.

SCRAP AND WASTE MATERIAL.—Prices on waste materials of nearly all kinds show a little change, although the present tendency is downward in nearly all cases. Especially is this true of the red and yellow metals, which show a very noted sagging downward tendency. Iron and steel metals, however, are still very strong, although indications point to lower prices in the near future.

The present market shows a very quiet buying period and the demand is practically dead. It is hard to say just what the situation will develop, as it is believed the embargo on the United States railroads has been responsible for the present situation, and whether the starting up of the freight movement will again stimulate the demand for these materials remains to be seen. Stove scraps and No. 1 cast iron appear to be the only metals on the list that show any strength and dealers state they are very scarce and many are offering premiums for even small lots. The following are the present quotations:

WASTE MATERIAL	
No. 2 busheling	13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06½
Heavy copper	0 17
No. 1 machinery cast	38 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 03
Heavy lead pipe	0 05¾
Tea lead	0 11

Tin Has Dropped 5c; Spelter Also Weaker

Toronto

INGOT METALS.—The whole situation throughout the list of ingot metals is more or less panicky and most metals are very erratic. Tin, however, is the feature of this market, having dropped 5c per lb. Spelter also has a lower price, having dropped ¼ of a cent. While the other ingots show no change, a weak, sagging tendency is noted.

TIN.—The sagging tendency mentioned in last week's issue has developed into a drop in the price of tin and the new quotation is now 67 cents per lb., being 5 cents per pound lower than formerly.

SPELTER is also lower this week with a fair demand offering. The new price is quoted at 10 3-4 cents per lb.

LEAD.—The tendency on lead is for downward prices and while the present price remains unchanged decided weakness is noted. The present quotation remains at 11c per lb.

ALUMINUM is showing little active demand, the price remaining unchanged and the quotation still being 26 to 37c per lb.

ANTIMONY remains quiet and is showing a weaker tendency. Stocks are rather light, although the selling price remains unchanged and is quoted at 15c per lb.

COPPER.—No change in price has been made in copper, although a sagging tendency is noted. 24 cents per lb. continues to be the present quotation.

LONDON MARKETS

LONDON, May 20—Advances in many important hardware lines continue to be made. Sash weights have again been marked up this week, pump leathers, Stickfast paste, lampblack and Common-sense axle pulleys have also been revised upwards. Sporting goods are becoming scarce. The extras on coating and blueing wire nails, also packing charges on some quantities, have been advanced. Children's hand sleighs and wagons, oiled and annealed wire, cistern pumps, chicken food, wrenches, post hole augers and curry combs all have new higher quotations.

A new Turnover Tax has been imposed on all hardware commodities and a luxury tax has also been imposed, which may influence prices and sales, etc., in the near future.

Merchants continue to enjoy good trade and all the stores are busy. In spite of the many shortages the volume of business is very satisfactory. Prices are very firm and on some lines buyers are getting in their fall stocks. Collections are very satisfactory and money still seems to be circulating freely.

Sash Weights Again Have Higher Revised Prices

London, Ont.

SASH WEIGHTS. — Notwithstanding the higher prices which have been made on sash weights further advances have again been made. This is said to be due to the necessity of the manufacturer putting in a better grade iron than is customary on account of the general shortage of raw materials, etc. The present quotations are: 3 lb. and larger, solid, $4.95 per hundred pounds; the sectional 1 lb., $5.60 per hundred, while the ½ lb. sectional is $6.20 per hundred lbs.

Valve and Cup Pump Leathers Advance

London, Ont.

PUMP LEATHERS.—New and higher prices have been made on pump leathers of nearly all kinds, including valve or plunger leathers and cup leathers, etc The following are the present quotations:

Valve or Plunger Leathers—No. 1, $1.15 doz.; No. 2, $1.45; No. 3, $1.75.

Cup Leathers—1 inch, 75c doz.; 1¼ inch, 80c; 1½ inch, 90c; No. 0x2 in., $1.25; No. 1x2½ in., $1.60; 2x3 in., $2.10; 3x3½ in., $2.60; 4x4 in., $3.25.

Stickfast Paste Also Has Higher Revision

London, Ont.

STICKFAST PASTE. — New and higher prices have been made on Stickfast paste, the 1-lb. package now being quoted at $2.10 per dozen packages, while the 2-lb. packages are quoted at $4 per dozen packages.

Various Sprayers Show Very Brisk Movement

London, Ont.

SPRAYERS.—A very good demand has been going for sprayers of all kinds as many have been treating their trees, shrubs, etc. The tin well "Eureka" is now being quoted at $6 per dozen, the glass jar "Eureka" $9 per dozen. The compressed air galvanized "Eureka," $7 each, while the compressed air, brass, is being quoted at $9.50 each.

Eagle Brand Lamp Black Has Been Marked Higher

London, Ont.

LAMP BLACK.—An advance of about 10 per cent. has been made on Eagle Brand lamp black. This is said to be due to the higher cost of labor and other factors. The new quotations are as follows:

Lamp Black—¼-lb. pkgs., 40c lb.; ½-lb. pkgs., 33c.; 1-lb. pkgs., 27c.

Galv. and Black Wire Cloth Have Brisk Demand

London, Ont.

WIRE CLOTH of various kinds is having a very good season so far, and the demand has been a heavy one, it is stated. The black painted continues to sell at $3.60 per hundred square feet, while the galvanized is still selling for $4.25 per hundred feet.

Commonsense Axle Pulleys Now 65c Doz.

London, Ont.

AXLE PULLEYS.—The "Commonsense" cast axle pulleys have again been revised upwards, and this line of pulleys will now cost the dealer 65 cents per dozen.

Garden and Harvest Tools Selling Well

London, Ont.

GARDEN AND HARVEST TOOLS of nearly all kinds have been enjoying a very heavy demand, and the warmer weather which has prevailed the last few days has steadily stimulated the already heavy demand. The merchants generally express themselves very well satisfied with the general business being offered, and all in the trade are looking forward to a satisfactory season.

Sporting Goods Hard to Procure; Good Demand

London, Ont.

SPORTING GOODS.—With the favorable warm weather the past few days the demand for nearly all seasonable lines of sporting goods has been very heavy. Especially is this true of baseball goods. Stocks are very light on nearly all lines of baseball supplies, and the replacements are very hard to procure from the manufacturers, it is stated.

Corn Planters Have Heavy Seasonable Demand

London, Ont.

CORN PLANTERS. — Among other seasonable lines that have a very heavy sale are corn planters, and the King of the Field is now being quoted at $14.50 per dozen, while the Eureka is $15 per dozen.

Hose Nozzles Have Big Demand

London, Ont.

HOSE NOZZLES.—With the approach of the gardening season and trimming of lawns, etc., hose nozzles and reels, etc., are enjoying very brisk sales, and the demand continues to be a very heavy one, Some of the prices that are current at present on some of these lines are as follows:

Hose Nozzles—Mystic, $8 doz.; Canadian Gem, $8.60 doz.

Hose Reels.—All wood, $1.75 each; McKinnon, No. 10, $1.80 each, No. 20, $2.65 each.

Poultry Netting Scarce; Price Firm; Unchanged

London, Ont.

POULTRY NETTING continues to have a big demand and a very satisfactory volume is moving. Jobbers state that their supplies are very scarce. Especially is this true of one-inch mesh, and many seem uncertain as to whether they will be able to secure additional supplies when their present holdings are exhausted. The Canadian two-inch mesh is quoted at net list, while the one-inch mesh is quoted at list plus 5 per cent.

Wire Nails, Brads, Etc., Have New Extras

London, Ont.

EXTRAS FOR WIRE NAILS.—An advance has been made on the extras of packing wire nails or brads. The 25 and 50 pound boxes all take an extra of $1 per hundred pounds in place of a former 20 cents per hundred pounds. An additional extra is now being charged for the coating or blueing of nails, and the new price is 35 cents per hundred pounds in place of a former 25 cents. The additional for miscellaneous list on nails and brads has been revised upwards to 2 cents per pound for 1-lb. papers in place of 1 cent per pound.

Prices on Hand Sleighs Have Advanced 15%

London, Ont.

HAND SLEIGHS.—An advance of about 15 per cent. has been made on hand sleighs for fall booking, which comes in the way of a new list with a discount of 35 per cent.

Coaster Wagons Higher; New Discount 30% Off

London, Ont.

COASTER WAGONS.—New and higher prices have also been made on auto wheel coaster wagons. A new list has been made subject to a discount of 35 per cent. This latest price revision is said to be due to the situation which has developed in wood, and manufacturers state they are daily having more difficulty procuring sufficient lumber for their purposes even at the higher prices charged. The following table shows the new list as well as the net prices figured at the 35 per cent. discount from this list:

	List Per Doz.	Fig. Net at 35% off
No. 00	$62 00	$40 30
No. 01	116 00	75 40
No. 1	133 00	86 45
No. 2	145 00	94 25
No. 3	160 00	104 00
No. 4	182 00	118 30

Chicken Food Has Again Been Advanced

London, Ont.

CHICKEN FOOD of the Royal Purple brand will now cost more money, the 100-lb. bags being revised upwards in price and are now being quoted at $5.60 per hundred pounds.

Crescent Wrenches Have Been Marked Up

London, Ont.

WRENCHES of nearly all kinds have been more or less unsettled and have gradually been climbing upwards. This week records an advance in the price of Crescent, which is as follows:

Wrenches 6 in., $8.60 doz.; 8 in., $10.55; 10 in., $13.20.

Iwan Post Hole Augers Have Higher Quotations

London, Ont.

POST HOLE AUGERS of the "Iwan" make have been revised to new higher prices this week, the increase approximating 10 per cent. The following are some of the new quotations:

Post Hole Diggers—8 in., $33 doz.; 9 in., $35; 10 in., $38.

Cistern Pumps Again Come Up For Revision

London, Ont.

CISTERN PUMPS.—The shortage of iron and steel is not without its effects on the manufactured article, and cistern pumps are one of the many lines involved, and, needless to say, have higher prices. The new quotations are as follows:

Cistern Pumps—Open Spout, No. 1, $3 each; No. 2, $3.35 each; No. 3, $3.65 each. Closed Spouts—No. 1, $3.25 each; No. 2, $3.55 each; No. 3, $3.95 each.

Curry Comb Discount Has Been Changed to 30% Off

London, Ont.

CURRY COMBS are among the many advances reported this week and have been revised upwards by lowering of the discount, which is now being quoted at 30 per cent. off the list.

Wire Nails Scarce; Price Firm; Unchanged

London, Ont.

NAILS.—Both wire and cut have a big demand at the present time, although warehouse stocks are very light and supplies generally are limited. Jobbers state that very few mills are accepting for immediate delivery and they are wondering where they will be able to obtain sufficient stocks to meet the heavy demand. The price, although very firm, continues unchanged, the wire being quoted at $5.75 per keg base, while the cut is still being quoted at $7.50 per keg base.

O. and W. Comes Up For a Stiff Advance

London, Ont.

OILED AND ANNEALED WIRE.—A stiff advance has been made in oiled and annealed wire, and the new prices are 50 cents higher. The demand for wire of nearly all kinds continues to be very heavy, and warehouse stocks are practically becoming depleted. Little improvement has been shown in the wire situation and many are concerned for the future as little immediate relief is looked for from the mills at present, and with freight embargo, coal famine, raw material famine and other disturbing factors, prospects look anything but bright. The net price on No. 11 O. & A. wire is $6.37 per hundred pounds, while the No. 12 has been advanced to $6.45 per hundred pounds, the new base being $6 per hundred pounds.

FENCE WIRE—As mentioned in previous issues of HARD WARE AND METAL, fence wire has been very scarce and hard to procure. This situation, it is stated, has not been improved and some have it that it is worse if anything. Jobbers state the mills are unable to accept their orders for immediate delivery and prospects do not seem very bright for securing sufficient supplies for the present season. The Number 9 plain galvanized wire is now quoted at $5.85 per hundred pounds; barb wire $6.40 per hundred pounds, while oiled and annealed wire has a new base of $6.00 per hundred pounds.

Water Paints Scarce; Whiting Not Coming

London, Ont.

WATER PAINT.—The demand for water paint has been a very heavy one this season, it is stated, and many inquiries are still coming in. In many cases where this commodity depends on whiting for its manufacture production has been retarded, and some report a scarcity. However, it is believed that a fair volume has already been turned over this year, notwithstanding the hardships in procuring the goods to sell. Alabastine is now quoted in 5-lb. packages at 48 cents each; 2½-lb. packages at 25¼ cents each.

Linseed Oil Scarce; Little Seed Coming

London, Ont.

LINSEED OIL.—The demand for linseed oil is a heavy one, which may be on account of the ever-increasing shortage. Crushers state they are procuring little seed as a result of the embargo on the United States railroads, and this may be the reason that the local markets are so bare. Although there is some English oil appearing on the market it is believed that the quantity is not sufficient to cause any change in the present quotations, which are as follows:

Linseed Oil—	Per. gal.	
1 to 2 barrels	$2 87	$2 90
3 to 5 barrels	2 86	2 89
6 to 9 barrels	2 84	2 87

Less bbls. add 15c gal.

Shortage of Turpentine Shows No Relief

London, Ont.

TURPENTINE.—The shortage of turpentine is becoming worse, it is stated, and jobbers say they are practically cleaned out. The embargo continues to affect the transportation of freight throughout the United States, and the new crop in the South is not coming to this market, it is stated. The present quotation is as follows:

Turpentine—		Per gal.
1 barrel lots	....	$3 80
2 to 4 barrels	....	3 79
5 gals.	....	3 95

White Lead in Oil Firm; Little Change Expected

London, Ont.

WHITE LEAD IN OIL.—The demand for white lead is a heavy one; prices have been maintained without a recent change, and, according to present indications, no further changes are looked for. It is true that the market on pig lead has weakened to some extent, but when labor and other materials, as well as several other factors are considered, crushers state that this will have little effect, at least for the present, on the quotations now current, which are as follows: Pure in ton lots, $20.45 per hundred pounds; less than ton lots, $20.80 per hundred pounds. Elephant, $20.95 per hundred pounds in ton lots; $21.30 per hundred pounds in less than ton lots.

Whiting Scarcity Firms Putty Market

London, Ont.

PUTTY.—The situation on putty is gradually tightening, and the present market is a very firm one. This is said to be entirely due to the situation, which has developed in whiting, and manufac-

turers state they are unable to procure sufficient quantities of English whiting for the purpose of their maanufacture. The present quotations on putty are as follows:

Putty	Per 100 lbs.
Standard, 100-lb. drums	8 30
Do., 25-lb. drums	8 55
Pure, 100-lb. drums	10 80
Do., 25-lb. drums	11 05

Window Glass Scarce; Situation Unchanged

London, Ont.

GLASS.—The present situation on both window and plate glass has shown little improvement, and while it is believed there is sufficient glass on hand for present requirements many are wondering what will be the situation in the fall of the year when the big demand starts and builders and house owners are anxious to have the window openings filled in. According to reports from glass factories importers state that the end of the first operating period will be June 3, and that they see no prospects for filling all orders on their books, and state that some will have to be carried into the next period, which should start in August. The quotations remain unchanged, the single and double diamond glass selling for 15 per cent. off the list, while the cut lights are being quoted at 40 per cent. off the list.

Paris Green Has Good Demand; Price Firm

London, Ont.

PARIS GREEN is having a very good sale and many are treating the shrubs and trees, etc. The present quotations on Paris green are as follows:

Paris Green—	Per lb.
½-lb. pkgs.	0 58
1 lb. pkgs	0 56
25-lb. drums	0 54
50-lb. drums	0 53
100-lb. drums	0 53
250-lb. kegs	0 52½
600-lb. barrels	0 52

WINNIPEG MARKETS

WINNIPEG, May 20—Many advances have again been made on hardware prices. Among the important changing lines for the week are to be found: Wrenches, ice tools, cow chains, building paper, hay bale ties, copper and nickel-plated ware, gasoline torches, Pyrex ware, blacksmiths' tools, axe wedges, paint and varnish brushes, Community plate and washing machines. Commodities having metal for the basic material again come to the fore and assume the major part of the week's activities. Price changes, with one exception, are an advance on old lists, the one exception to the usual and general trend of other changes being Pyrex ware, which, contrary to the general trend of the markets, shows a moderate decrease in price.

Crescent Wrenches Have New Higher Quotations

Winnipeg.

CRESCENT MODEL WRENCHES.—New prices are named on Crescent wrenches, advancing this line an approximate 10% on previous prices, a condition brought about, it is said, by the present high cost of raw material together with advanced manufacturing costs. The latest prices are quoted as follows: Wrenches, Crescent model, 6" $9.00; 8" $11.00; 10" $13.75 per dozen.

New Revision Places Ice Tools 10% Higher

Winnipeg.

ICE TOOLS.—The week's activities affect ice tools on a general scale and accordingly advance these lines an approximate 10% on previous prices. The new prices appear firm and no further change is looked for at present, it is believed. A few of the lines are listed below:

Ice Tools—Plows, $118.25; splitting forks, $11.65; tongs, $41.50; bar chisels, $9.20; splitting chisels, $7.60; calking bars, $7; ice axes, $47; floor levelers, $14.30; separating chisels, $7.60; canal chisels, $7.40; starting chisels, $8; ice hooks, $31.85.

Cow Chains Now Have Higher Prices

Winnipeg.

CORD CHAINS are now at higher prices, the new advance showing a further additional 10% on previous lists. Chains, like many other lines pertaining to metal, appear to be scarce as a result of the inability to secure sufficient quantities of raw material, it is said. Advanced raw material prices are another factor responsible for the new increase, it is stated. To-day's prices quote:

Cow Chains—Electric weld, sizes 0000, $5.28; 000, $4.20; 00, $3.84; 0, $3.48.

Corrected Prices Appear on Building Paper

Winnipeg.

BUILDING PAPER prices are again revised and as a result show a moderate advance on old lists to the extent of an approximate 9%. The existing acute shortage of wood pulp necessary for the manufacture of this commodity is said to be the chief cause of the new increase. The new prices are quoted as follows:

Building paper, plain sheathing, Surprise or Sunrise, $1.25; Cyclone, $1.40; tarred sheathing, Cyclone or Anchor, $1.53 per roll.

Hay Bale Tie Prices Have Again Been Marked Up

Winnipeg.

HAY BALE TIES.—Advanced prices have been named on hay bale ties, which show a clear increase of 25c per 100 lbs. on previous prices. The wire situation as a whole remains practically unchanged, general shortage existing. The present prices now quote this line at:

Hay Bale Ties—Ft. William, $7.25; Winnipeg, $7.75 per 100 lbs.

New Prices on Nickel Plated Copper Ware

Winnipeg.

N. P. COPPERWARE.—As reported in last issue of HARDWARE AND METAL higher prices have been made on this commodity. Some of the new quotations are as follows:

Copper and N.P. Ware—Tea Pots and Coffee Pots, capacity, pints, 3, $22.25; 4, $24.25; 5, $26.25; 6, $28.25 per dozen. Tea Kettles, sizes, inches, 5⅞ x 6, $24.80; 6 x 7½, $27.20; 7 x 8½, $34.32; 8 x 9½, $36.32; 9 x 10½, $38, flat bottoms; 8 x 9½, $36.32; 9 x 10½, $38, pit bottoms, per dozen.

Gasoline Torches, Fire Pots Again Advance 6½%

Winnipeg.

GASOLINE TORCHES AND FIRE POTS.—Clayton and Lambert's fire pots and gasoline torches again advanced and add to previous lists a further 6½%. New prices are now quoted at:

Fire Pots.—Nos. 20, $13.30; 5, $19.85; 72, $19.85.

Torches.—Nos. 31, $12.16; 37, $10.88; 32, $12.80; 48, $14.72; 47, $14.08.

Repairs for same are now 25% of lists as shown in Clayton and Lambert's catalogue No. 0.

Revision Lowers Prices on Some Lines Pyrex Ware

Winnipeg.

PYREX WARE.—Further changes again appear on Pyrex ware and appreciably lower prices on all styles. The new revision shows an approximate 7% decrease on a general scale, and although not of a very heavy character, comes a pleasant surprise in this age of repeatedly advancing markets. Some of the new quotations are:

Pyrex Ware—Casseroles, $25.20; pie plates, $12.60; pudding pans, $12.60; pie dishes (individual), $3.35; cake dishes, $10.10; bread pans, $21.00; utility dishes, $21.00; gift sets, $6.30; assortments, $35.00 per set.

The above prices quoted are for large sizes.

Prices on Blacksmiths' Tools Marked Upwards

Winnipeg.

BLACKSMITHS' TOOLS.—Certain

lines coming under classification of blacksmiths' tools have advanced an approximate 25% on previous lists. Raw material shortage and the advanced cost of same is said to be the chief cause of this latest increase. The following are involved and are quoted at:

Tuyere Irons—Square, $2.40; single duck's nest, $1.60; double duck's nest, $1.90; Norton's, $5 each.

Swage Blocks, 14¾c lb.; Mandrels, 17c per lb.

Revised Prices Named on Neverslip Axe Wedges

Winnipeg.

AXE WEDGES are also affected by the changes of the week's markets, and are in consequence advanced 20% on previous prices. The new price shows this line to be now listed at the following price:

Axe Wedges.—Neverslip, $36 per doz.

Revise Rubberset Paint and Varnish Brush Lists

Winnipeg.

PAINT AND VARNISH BRUSHES.—Following recent changes in connection with paint and varnish brushes, the Rubberset line of this class of goods again appears for revision of prices of an upward trend. The new increase affects the whole line of brushes of this make, and shows an approximate 25% on previous prices. A few of the lines are listed below:

Paint Brushes Nos. 20 x 2½ in., $3.80; 3 in., $4.40; 3½ in., $5.70; 4 in., $7.60; 5 in., $12.60; 46 x 3 in., $13.60; 3½ in., $2.20; 4 in., $30 per doz.

Varnish Brushes.—Nos. 100 x 1 in., $2.20; 1½ in., $3; 2 in., $4; 2½ in., $5; 3 in., $5.30; 182X x 1½ in., $4.10; 2 in., $6.10; 2½ in., $8.50; 3 in., $14 per doz.

As HARDWARE AND METAL goes to press it is learned that an advance of 10 per cent. has been made on paper bags, while Nicholson files and Underhill lath hatchets, have had an upward revision of 5 per cent. Gasoline is now quoted at 43 cents per gallon. Coal oil, 30 cents. Raw oil has declined 28 cents and is now quoted at $2.75 per gallon. Roofing pitch and Dominion cartridges have also been revised upwards.

Community Plate Sharply Advances

Winnipeg.

COMMUNITY PLATE.—New prices are named on Community plate and show an average all-round advance of 25%. The change is general and involves all styles and sizes of spoons, knives and forks, etc. The whole line is embraced and includes the Adam, Patrician, Sheraton, and Exeter designs. Advancing prices of raw materials and greatly advanced manufacturing costs are named as the chief causes for this latest advance.

Higher Prices Are Named on Washing Machines

Winnipeg.

WASHING MACHINES.—The week's changes affect several well-known makes of washing machines and advance same an approximate 10% as a result. The lumber situation is said to be the chief cause for the new change, raw material being both scarce and high priced. The new listings show:

Washing Machines—Dowswell, $9.38; New Century, $15; New Idea, $16.50 each.

PITTSBURGH MARKETS

PITTSBURGH, May 20.—The rail strike has affected the iron and steel industry in a complicated manner. The strike itself has been waning, though very slowly, partly by the return of strikers and partly by the advent of new men, some of them volunteers, on temporary service. The full effect of this is not felt by the iron and steel industry for the reason that empty cars have been growing scarcer. From the beginning of the strike the effort has naturally been to load cars. The coal mines, coke works and steel mills gathered up all the cars they possibly could secure, many of them not being furnished by the railroads in the regular manner, but being simply gathered up by a plant sending out its own locomotives and picking up cars where they could be found. Main line tracks were idle in some cases, on account of the strike, and it was possible to do altogether unusual things in the matter of gathering up cars. Once the cars were loaded, however, they frequently did not get far. Some are still on plant sidings, while others have gone to railroad sidings and still others have gone to classification yards. It was said early in the strike that the railroad managements would make a particular point to avoid congesting their yards, but whatever the theory or intention the actual result has been different. Many yards are badly congested. Even in the case of the solid trainload movement, which has been employed so much, the solid trainload is merely one going out. There are few solid trainloads of empties being moved back. Of course there is no system or order. A trainload of coke from the Connellsville region is accompanied by a representative of the blast furnace, and the "personally conducted" train gets through, not infrequently by the distribution of bribes to the men working on the railroads, but similar efforts are not made to get the trainload of empties back.

The result of all this is an increasing scarcity of cars, which militates against freer shipments being made even though the avenues through which shipment could be made have been clearing.

The effect of these trends has been felt in some of the markets, most noticeably in the case of Connellsville coke. When the rail strike started, there were plenty of coke ovens and men, and a fair number of cars, while there were very few directions in which coke could be shipped. The market for spot furnace coke had been $11 to $12, and it weakened to $10.50 or possibly $10, as there were more sellers than there were buyers to whom shipments could be gotten through. Then the rails got more open, whereby more buyers could bid for coke, while the supply of cars decreased if it changed at all. The pressure turned to the other side. Coke became firm at $12, then within a few days got up to $13.50 minimum, next day to $14 and a day later to $15. Seeing no end to the advance some furnacemen withdrew from the market, preferring to bank rather than pay such fancy prices, as even $12 in its time had been considered a fancy price, and the market at this writing is about $15. It may be mentioned that foundry coke did not move similarly. Some brokers got as high as $14, but several old-line producers refused to go above $12, considering this the highest price that could possibly be regarded as fair, but they have been able to sell, and only in a limited way at that, to regular customers.

Steel Production

The monthly report of the American Iron and Steel Institute shows that in April the 30 companies that contribute to the monthly report made 2,638,305 gross tons of steel ingots, against 3,299,049 tons in March. These 30 companies produced 84.03 per cent. of the total output in 1918, and computing from this, and allowing for the number of working days the rate of steel ingot production by the whole industry in April is seen to have been about 37,550,000 gross tons per annum, against a rate of about 45,200,000 tons per annum in March, the March rate having been the highest attained since October, 1918. The decrease from March to April in the rate was one-sixth, precisely the same rate of decrease as was shown in pig iron, referred to in this report of a week ago. As the strike only began April 1 at Chicago, and did not affect Ohio and Western Pennsylvania points until Monday, April 12, while later in the month conditions in the Chicago district improved, the curtailment in production when the strike was at its worst was more than one-sixth from the March rate. It is doubtful whether production at the present time is greater than the average rate of April.

Shipments Poor

By this time, however, the trade has become much more interested in shipments or rather in receipts, than in production. Much more pig iron and steel is being made than is being shipped and much more is being shipped than is reaching destinations. Consumers are hard hit, not only by steel shortage, but also by shortage of coal and other necessities.

Dealer Guides Consumer's Purchases of Paint

Dealers Can Encourage Purchase of Trade-Marked Brands Because They Guarantee Consumer Against Inferior Merchandise —How One Dealer "Fills Up" His Clerks on His Knowledge of Paints

Written for HARDWARE AND METAL by FREDERICK A. FARRAR

HOW do you know so much about standard trade-mark goods?

How were you so well acquainted with them even before you carried them in your paint department?

Largely, because you saw them advertised, wasn't it? Because you were familiar with these trade names through magazine advertising, and when the paint salesman called upon you, you had a pretty good acquaintance with the material before he commenced to talk shop.

It is exactly the same way with the consumer. He knows a lot about it even before he comes into your store.

When you buy advertised merchandise you buy a guarantee of quality. In the old days when a lot of things were sold in bulk without any particular means of identification, when there was really no way for the consumer to tell who the manufacturer was, this latter party was free to use materials which were inferior, and make his goods in an indifferent way without materially injuring his business, because the goods were unidentified, and even should the purchase prove unsatisfactory, the customer had no real way of knowing whose goods they were or how to avoid them.

Later, there came a keener competition among manufacturers, which was on the basis of price, and this at a sacrifice of quality, but now with advertising and with trade market merchandise as the means of identification, all this old plan has changed.

The very first consideration now is quality, price comes second. To-day, if the first item proves unsatisfactory, a consumer doesn't want it at any price, and certainly when he is once "stung" he will not come back again. The manufacturer will thus have destroyed the market for his product, and no real business man is going to do this. He will never sacrifice quality in a single can or package. The trade mark he puts behind it and the trade mark he stamps it with guarantees the consumer against inferior merchandise, and these are good strong talking points when you are selling paints, varnishes, enamels, stains, etc.

"Filling Up" the Clerk

In a thriving Western town, a certain dealer, who has recently boasted of his paint department told me the other day, that he always makes a practice of "filling up" his clerks on the many good things he knows about paint.

He was once a practical painter himself and understands what good materials should accomplish, and in passing on all these points to his clerks he is making them more intelligent salesmen.

When he puts in a stock of goods he opens up one of the cans and calls the paint clerks around him, tells them what goes into good paint and what the proportions of the component parts should be. He lets them brush it out on a panel to show its easy working and spreading qualities, brushes out a coat over a black surface to show its hiding power, and then he lets it dry to call attention to the high gloss or to the velvety, flat finish, whichever the case may be.

He tells them all about the sanitary and preserving qualities of the paint, how it increases value and prevents deterioration, mentions the prosperous look it gives to any building, and how it raises the standard of the owner in that particular community.

There is nothing that he knows that he overlooks in passing on to these clerks, and the result is that when they start to sell the consumer, they know exactly what they are talking about. They sell intelligently, and therefore, the goods "stay sold."

Using the Top of the Show Case

There are some dealers who believe the tops of counters or showcases should be kept clear, that all things should be put away, but on the basis that goods well displayed are half sold, experience has shown that many small articles sell more readily when displayed on top of the cases and counters.

MOORE'S LINE

A PAINT VARNISH AND ENAMEL FOR EVERY PURPOSE

"Save the surface and you save all" *Paint & Varnish*

The constant and ever-increasing demand for IMPERVO PORCH and DECK PAINT is the Best Proof we have of its Good Qualities.

IMPERVO PORCH and DECK is not an ordinary Floor Paint and must not be classed with such. It is made on Moore's House Color Base with Spar Varnish added to make it tough and durable.

IMPERVO PORCH and DECK PAINT is made especially for Porches, Verandah Floors and Steps and dries perfectly hard with a High Gloss. It produces a Hard-wearing Surface that satisfactorily resists the wear and tear and continual scrubbing to which such floors are subjected.

EVERY CAN IS FULL OF QUALITY AND CUSTOMER-SATISFACTION

MOORE'S PRODUCTS are sold on the most modern and up-to-date business methods. There are no expensive and ineffective advertising frills attached to our proposition. This insures the consumer getting a FULL DOLLAR'S WORTH for every dollar expended. It also insures the Merchant BIGGER PROFITS.

What other line can boast of such SPECIALTIES:—

MOORE'S HOUSE COLORS—A Pure Linseed Oil Paint.
MURESCO —The Best Wall Finish.
SANI-FLAT —A Superior Flat Wall Paint.
TILE-LIKE —A Varnish and Stain Combined.
MOORAMEL —A Perfect White Enamel.

Give us an opportunity to show you a REAL AGENCY PROPOSITION which will bring you BIGGER PROFITS.

Decide to Organize Cities of Ontario

"Save the Surface" Convention in Toronto Decide on Plan to Stir Up Enthusiasm in Ontario—Some Criticisms of the Campaign

THAT a great amount of paint now being used despite high prices is largely a result of the campaign now being waged in the interests of "Save the Surface," was the statement of A. T. Black, general manager of the Martin-Senour Company, Ltd., who reviewed the work of the committee before the convention held in the King Edward Hotel, Toronto. Mr. Black pointed out that the campaign had been criticized as an offshoot of the one being carried on in the United States, but explained that one of the underlying ideas in adopting the same slogan was to take advantage of the advertising being done on the campaign in U. S. papers having some circulation in Canada. He indicated that the endorsation of the Government Conservation Commission had been secured and that matters were shaping up so that within the next few years every color card and piece of literature issued by a paint manufacturer would bear the slogan.

Geo. Henderson, president of the Canadian Paint, Oil and Varnish Association and chairman of the "Save the Surface" committee, called for an open discussion of the plan being followed. Hereupon, Mr. McMartin (Lowe Bros.) remarked that some hardware dealers objected to the listing of names of master painters along with the "Save the Surface" advertising in local newspapers when they could not get the same privilege.

In reply, Mr. Henderson pointed out that in one case (Hamilton) where the Master Painters' Association asked to be allowed to place their ads. on the same page, the request seemed reasonable, particularly in view of the fact that they were subscribers to the campaign. He pointed out that it was more difficult to deal with cases of individuals. Mr. Black added that the committee had requested newspapers handling local dealer advertisements to keep such advertising separate from the campaign advertising.

Another delegate suggested that paint was being given precedence in the advertising, as compared with varnish. Mr. Henderson pointed out that there was no such intention and that despite the fact that there were many more paintable surfaces than varnishable surfaces, publicity was being given each in comparative equality.

Replying to another enquiry, Mr. Henderson pointed out that approximately one-third of the advertising space was being devoted to farm building trade.

The statement was made that some dealers in the United States were so enthusiastic over the campaign that they were adopting the name "Save the Surface Department" for the paint section of their business.

To the end of creating new business and not trying to take existing business from one firm to another, a plan was adopted providing for a meeting of salesmen representing all the paint and varnish manufacturers in each of a number of Ontario cities, for the purpose of arousing local interest by bringing the local dealers together and arranging for co-operation in advertising, etc. The cities decided upon in which a start will be made are as follows: Windsor, Brantford, Peterboro, Oshawa, Kingston, Sarnia, Galt, Guelph, Kitchener, Stratford.

SLUMP IN JAPAN'S PAINT EXPORT BUSINESS

Advices from Japan dealing with the manufacture of paint for export trade are as follows:

The export of Japanese paint is at present dull on the whole. During the second half of last year orders from foreign countries were small in number, and, as might be expected, there prevailed a slump in this line of Japanese trade. There were, however, many inquiries from India, which is one of the largest customers, although they were not necessarily followed by actual orders. The Japanese exporter, and possibly manufacturer, too, for that matter, took this as a sign of the accumulation of stocks in that country and has since been patiently waiting for the reappearance of a demand. Unfortunately for them, however, their expectation so far fails to turn out happily, resulting in the present slump in exports as already mentioned. It is believed in this country that this is due to the invasion of the Indian market by British manufacturers, who did practically all the business in this line before the war. It is feared that this is the beginning of the end for the Japanese export trade in paint.

Moncton, N. B.—Structural steel has been received by the Sumner Company, Ltd., hardware, for their additions which will be started at once.

THE BUSINESS OUTLOOK

Writing of the Business Outlook, THE FINANCIAL POST of recent date said:

"There has been no time since the outbreak of the war in the Summer of 1914 that the business outlook has been more uncertain or more puzzling than it is to-day, although, of course, the apprehension regarding national safety has been removed. The situation is absolutely unprecedented. The upward movement of prices was in the first place the result of demand for commodities to be destroyed and reduced man-power to produce them and it was accompanied by financial inflation by practically all important world nations. It has been continued since the signing of the armistice by a demand for luxuries and comforts, encouraged by relief felt at the end of the war and sustained by accumulated savings, while production has declined under the general relaxation and temporary impotency of the usual incentives. The peace celebration, in fact, has taken on the semblance to a protracted spree, but there are indications that the effects of the armistice joy draught are wearing off and that the public ear is becoming less attentive to the jazz of pleasure and extravagance.

"Some time ago, prior to the recent definite action, the banks sounded a note of warning when they advised their customers to curtail their borrowings as far as possible, so as to be prepared for developments that might otherwise find them in an awkward position. Conservative wholesale houses have been giving similar advice to the trade in suggesting that stocks be kept low and collections checked up. That these warnings and the conditions which justify them are not unappreciated is indicated by the reports that in the commercial community there is now a tendency to reduce stocks to a minimum. This can only be interpreted to indicate that business is sensing a situation in which further advances are not confidently expected.

"Altogether there does not appear to be any need for serious apprehension if conditions are faced in a serious way. There is not that over-production which has always accompanied great financial panics in the past. For this reason it would seem that if there is a period of depression as an accompaniment of the process of deflation it will be short-lived because of the needs at home and abroad for food-stuffs and clothing and other necessities of life."

A. Ramsay & Son Company

All Canadian Paint and Varnish Makers Since 1842

Experience, prestige and reputation count heavily in the volume of sales and turnover, as well as in the quality of the product.

It is but reasonable that in such a period of time improvements would be discovered in methods of production; in the product itself; and more advantageous distribution and co-operation with the merchant handling Ramsay Paints and Varnishes effected.

Ramsay advertising has multiplied the number of consumers who know its merit so that they are ripened into a receptive mood for Ramsay products.

You cannot have too many advantages in your favor—handle Ramsay's.

HARDWARE MEN IN NEW ORGANIZATION

Continued from page 52

these transcontinental lines into self-supporting enterprises. The land to be settled, it is stated, all lies within twenty miles of existing railways, and is exclusive of those owned by the Government, the Hudson's Bay Company and the transportation companies.

At a joint meeting held last month it was decided to appeal to the financial corporations of the country for the necessary funds with which to carry out the plans of the association. Already a start has been made in raising the million and a half needed, a number of Western men subscribing $5,000 to $10,000 each as founding members. Between them they have raised a total of $250,000. The campaign to raise the remainder will start on May 28th.

In making its appeal to the financial bodies of the Eastern part of the Dominion, the association points out that the futures of the East and West are interdependent. Attention is called also to the fact that an enterprise such as this will do much to bring the two parts of Canada into closer accord on many questions now in dispute.

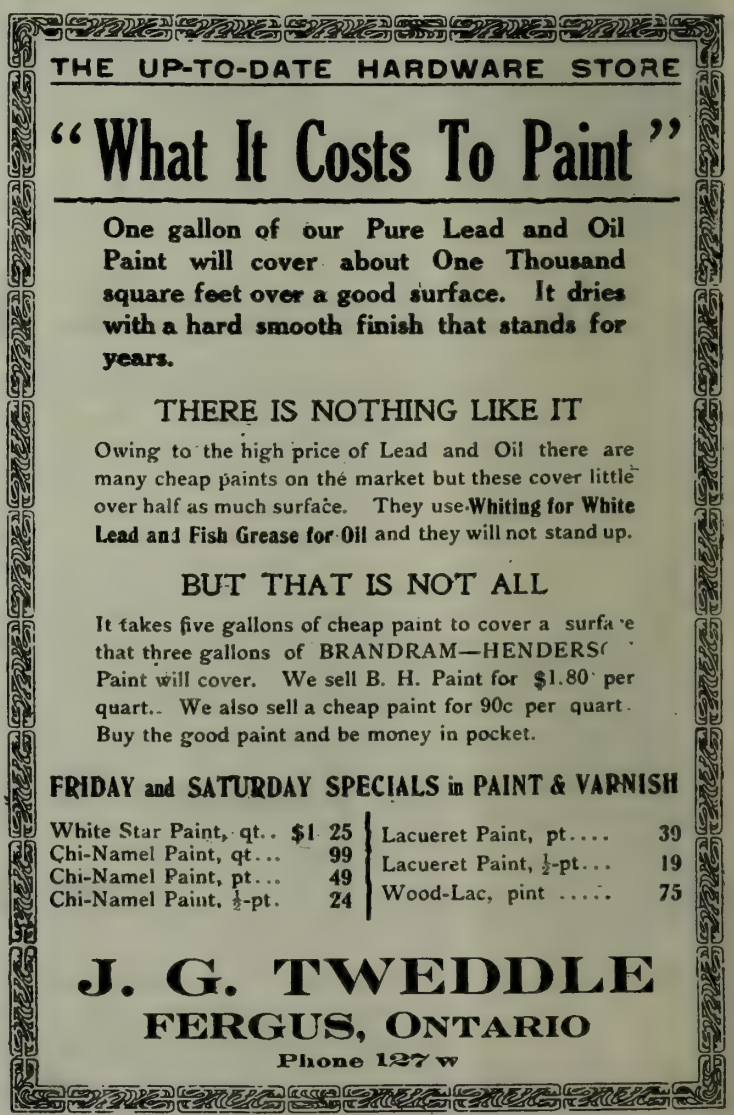
As an initial step in perfecting the organization, a committee composed of James Ramsay, M.P.P., Edmonton; Brig.-Gen. McDonald, C.M.G., D.S.O., Calgary; Maj. F. J. James, Winnipeg; A. E. McKenzie, Brandon, and Mayor M. A. Brown, Medicine Hat, was delegated to interview prominent men in the Eastern Provinces. As a result of the efforts of this committee, the following have become contributing founders: Lord Shaughnessy, Sir Vincent Meredith, James A. Carruthers, Charles R. Hosmer, Sir Herbert Holt, Sir Chas. Gordon, Brig.-Gen. F. S. Meighen, Huntley R. Drummond, Col. W. Grant Morden, R. B. Angus, Sir H. Montagu, Allan, Sir John Eaton, Sir Joseph Flavelle and Sir Edmund Osler.

The Westerners who became contributing founders are: James Ramsay, Edmonton; P. Burns, Calgary; James H. Ashdown, Winnipeg; Sir Augustus Nanton, Winnipeg; George Merrick, Winnipeg; George Lang, Calgary; Dr. F. W. Gershaw, Medicine Hat; J. K. McInnis, Regina; W. D. Craig, Regina; J. F. Cairns, Saskatoon; F. R. McMillan, Saskatoon; E. McKenzie, Brandon, and Jerry Robinson, Winnipeg.

How Hardwaremen Advertise Paints---No. 9

IN these days of high costs, and with some sentiment prevailing that it costs too much to paint, the introduction to this advertisement "What It Costs to Paint" secures attention. It then gives some information for the householder to think over when it states "One gallon of our Pure Lead and Oil Paint will cover about one thousand square feet over a good surface." The house owner can size up approximately how much paint he will require and once his interest has thus been aroused he is half sold.

It will be noticed that bold black face type in upper and lower case is used in the headline. The following paragraph is also in black face, giving it prominence. The subheads follow in good order and retain the reader's attention. Under the heading "THERE IS NOTHING LIKE IT," It points out that there are many cheap paints on the market, but that they do not cover as much surface, and that it takes five gallons of cheap paint to cover a surface that three gallons of good quality paint will cover. Prices for both qualities are quoted, and a final appeal is given for customers to "buy good paint." The ad. is by J. G. Tweddle, Fergus, Ont.



The Luxeberry Painter Says:

"A Smiling Finish Makes a Laughing Household. This is just another way of saying that an attractively finished interior is a big factor in promoting domestic happiness. From this standpoint Berry Brothers' Finishes are joy-makers; I always use them."

The "Berry" label is a sales-maker. Even the smallest buyers know and trust it.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 20.—Linseed oil has scored a decline. Crushers have received a little seed, but as yet the situation is difficult and it is almost impossible to move supplies from the South. Railway transportation is woefully congested, and it may be some weeks before there is extensive relief. Some expect that there may be a gradual easing of prices but that there will be no quick declines, or rather that what are made will be very gradual. Orders in hand are so numerous that they will readily absorb heavy stocks of seed. Added costs of handling the seed are such as to increase the crushers' costs 4 to 6 cents per gallon.

Turpentine is very scarce. Not a single jobber appears to have any for sale, and none is expected to arrive in the immediate future, excepting small quantities.

Putty and glass are moving actively on unchanged basis. White lead in oil, paints and specialties are all active. Sheliac, in one quarter, is reported to be somewhat freer in supply, but this may be only temporary. Trade is brisk.

No Relief as Yet on Turpentine

Montreal.

TURPENTINE.—Prices on turpentine are not only nominal, there are really no quotations available. The congestion in the States is making matters worse than they have been and this means that for the time being there can be no release of necessary gallonage of turps. Altogether it is an unpromising outlook for the jobber as well as for the manufacturer and the retailer.

Turpentine—	Imp. Gal.
Single barrels	....
Small lots	....
(Packages extra.)	

Lower Prices Are Quoted on Linseed Oil

Montreal.

LINSEED OIL.—Prices are reduced to $2.60 to $2.62½ on linseed oil this week. The lower prices are, of course, induced by improvement in the situation. At the same time crushers are not looking for a tobogganing of the price basis, and for these reasons seed arrivals are still light and cars cannot be moved freely from the South. Congestion at New York and other points is acute. HARDWARE AND METAL was informed by a Canadian crusher this week that in the Chicago freight yards alone 100,000 cars are tied up, it being almost impossible to move them. Then again, the congestion at terminals is so great that manufacturers have been compelled to arrange their own terminal storage. It has been a case of going to New York, in some cases, and seeking accommodation for cargoes that lay in the harbor there, unloading them into warehouses that had, on the spur of the moment, to be engaged. "This has added fully 6 cents a gallon to our cost for oil," said a prominent crusher to HARDWARE AND METAL. There will be improvement in time, but some do not anticipate that this time will come very quickly.

Raw—	Imp. Gal.
1 to 2 barrels	2 60
3 to 4 barrels	....
Boiled—	
1 to 2 barrels	2 62½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Putty Sales Good; Still Glass Activity

Montreal.

PUTTY.—Season considered there has been a steady outgo of putty, and jobbers have been supplying a reasonably fair demand. The basis has remained unchanged. Naturally, with whiting supplies still limited there has been no improvement in the undertone, the same remaining very firm.

GLASS.—There has been no change in the situation to speak of. Demand still is heavy and there is some shortage still of large plates. It is not expected that prices will, at this time, advance. Some Belgian glass has been received by the trade.

PUTTY—	5 ton	1 ton	Less than ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead in Oil Is Held Unchanged

Montreal.

WHITE LEAD IN OIL.—Prices have remained steady and unaltered on white lead in oil. While the season is advanced there is still quite a considerable activity and jobbers are forwarding considerable quantities to the trade. Five-ton lots are selling at $19.50 per 100 lbs.; ton lots at $20, and smaller quantities than tons, $20.35. This is for standard grade.

Paints and Specialties Are Active and Firm

Montreal.

PAINTS, SPECIALTIES.—Prices have held firmly on prepared paints and specialties. The undertone is continuing quite firm, due to the market conditions surrounding most raw materials. Manufacturers have experienced one of the heaviest seasons on record, and with better weather conditions there is bound to be good repeat business from the retail and jobbing trade.

TORONTO

TORONTO, May 20.—The warmer weather of the past few days has been the means of greatly stimulating paint and paint commodity sales. The turpentine and linseed oil situation has shown no relief and the market is almost bare; especially is this true of turpentine. The increasing shortage of whiting is also causing considerable inconvenience and many are wondering if sufficient putty will come forward for fall requirements. The new turnover tax which has been imposed on all commodities will also apply to paints, etc. Business is very brisk and all in the trade are enjoying a good turnover. Collections are very satisfactory.

Corroders May Not Cope With Demand For Lead

Toronto.

WHITE LEAD IN OIL.—A fair demand continues for white lead in oil and jobbers state that every day shows an increased demand. Some have it that there may be a shortage in white lead as the demand on the corroder in many cases is greater than his output, it is stated. The present prices are firm and no changes have been made recently. The present quotations are as per current rent quotation pages.

Prepared Paints Firm; Have Active Demand

Toronto.

READY PREPARED PAINT.—That warm weather that has prevailed the past few days is said to have greatly stimulated paint sales, and all in the trade report a good business. The firm prices on this commodity continue to hold unchanged, notwithstanding the scarcity of many of the ingredients and the advancing cost of the same. Turpentine and linseed oil are

Jap-a-lac Prestige

Not alone because it was the original "Household Finish," but because true quality has been maintained. From the time the first package was sold, Jap-a-lac has held first place in its field.

Through all these years Jap-a-lac has gained prestige. It has found new ways of serving its users and has lengthened its term of usefulness. It is now standard in paint and hardware stores throughout the Dominion.

This prestige is an asset to every Jap-a-lac Dealer. It is "good will" that expresses itself by sure and steady profits in the cash drawer. If you are not now carrying Jap-a-lac let us tell you more about the opportunities it represents.

Remember, too, that the Glidden line has now been completed by the addition of house paint—Glidden Endurance Paint—and that the Glidden proposition is one with which every dealer should be familiar.

very scarce and the markets are said to be practically bare. This, however, is attributed solely to transportation difficulties and may soon be remedied. The quotations are as per the quotation paint page.

Freight Embargo Delays Shipments of Glass

Toronto.

GLASS.—There continues to be a great scarcity of glass, although jobbers state that some of the factories in the United States have been forced to close down for the rest of this period on account of the shortage of coal, caused by the embargo on the railroads there, although one jobber stated that the May shipments will surpass April, provided delivery may be obtained from the railroads. The price remains firm although no change has recently been made. The single and double diamond continues to sell at 15 per cent. discount from the list, while the cut lights are being quoted at a discount of 40 per cent. off the list.

PLATE GLASS is said to be even more scarce than the window sheets and many are finding difficulty in securing sufficient glass to fill their orders.

Whiting Shortage Firms Cold Water Paint; Putty

Toronto.

COLD WATER PAINTS.—The scarcity of whiting continues to effect nearly all lines of cold water paints, and the situation is said to be coming more acute and every day there is a tightening up on supplies of this commodity, it is stated. This has been a serious setback to manufacturers of cold water paints, it is stated, and many are wondering if sufficient will come to hand to prevent a serious shortage on cold water paints and other commodities depending on whiting for their manufacture.

PUTTY.—The above is practically true of putty, and supplies may be limited if larger quantities of whiting are not more available. The above condition has a strong tendency to make the price of putty much firmer and although prices are unchanged an advance would not be surprising to many of the better informed. The following are the present quotations:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$6 85	$7 10	$7 45
Do., in 100 lb. irons	7 70	7 95	8 30
Do., 25-lb. irons	7 95	8 20	8 55
Do., 12½-lb. irons	8 20	8 45	8 80
Bladder, in barrels	8 60	8 85	9 20

Pure putty, $2.50 cwt. advance.

Ottawa prices are 25c; Hamilton, 35c; Brantford, 40c; London, Windsor, Port Arthur and Fort William, 45c per 100 lbs. over Montreal quotations.

Embargo Causes Great Shortage of Turpentine

Toronto.

TURPENTINE.—The local markets are said to be almost bare of turpentine and all are practically living from hand to mouth, it is stated. This is said to be solely due to the embargo which has been put on the railroads in the United States and jobbers and importers say they have considerable turpentine bought and paid for, which is now in transit, but they are unable to tell where it is and when they will receive it, and it is the opinion of some that the congestion may be so great that considerable delay will be experience even after the embargo is lifted, on account of such a complete blocking up of nearly all railroads.

No one seems to have barrel quantities of any kind to sell, and any supplies that may come to hand are said to be selling in from 5 to 10 gallon lots, the price ranging from $4 to $5 per gallon.

Turpentine—	Per imp. gal.	
1 barrel lots	....	....
2 to 4 barrel lots	....	....
5 gal. lots	4 25	5 06

Stocks of Linseed Oil Getting Low; Little Seed

Toronto.

LINSEED OIL.—The situation is worse if anything, was the opinion of one crusher. Very little linseed oil is available, it is believed. Little improvement has been shown in the linseed oil situation and stocks are becoming very slim, it is stated. Jobbers and crushers say they are living from hand to mouth and seem unable to secure sufficient seed to crush. The Canadian market does not seem to have revealed the amount of flax seed that might have been expected and on account of the embargo which has been prevailing on the United States railroads, crushers state they are unable to import any seed and while it is true they state that they have bought and paid for a considerable quantity of seed that this stock is now in transit and they are at a loss to know where it is or when they will receive it.

English oil is said to be appearing on the market, but any quotations that have come to hand so far have been so small that jobbers are of the opinion that it will have little or no effect on the situation, either as to price or as to the supply. The present present prices are as follows:

Linseed Oil—		Raw
1 to 2 barrels, gal.	2 87	2 95
3 to 5 barrels, gal.	2 86	....
10 barrels and over, gal.	2 84	....
		Boiled
1 to 2 barrels, gal.	2 90	2 98
3 to 5 barrels, gal.	2 89	....
10 barrels and over, gal.	2 87	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal higher than single barrel price.

PITTSBURGH MARKETS

Continued from page 65

Pittsburgh district coal, which was ranging from $4.00 to $4.50 per net ton at mine before the rail strike, has sold in the last few days at $7.00, and it may of course go still higher, as there are few cars and many anxious bidders.

The consumption of steel is certainly reduced very materially, although the precise amount cannot be estimated. Meanwhile steel is accumulating in mill warehouses and yards, and en route, the same being true of pig iron. These accumulations will doubtless have an effect upon the markets when the rail strike is ended, or rather when there is a free movement again, for ending the rail strike instantly would not entirely restore the movement of material, because there is so much congestion of loaded cars, and shipments with any freedom would not be possible until the loaded cars were delivered and unloaded and the empties gotten back.

Market Lethargic

The whole market is lethargic. Consumers have no occasion to buy prompt deliveries, for as a rule the delivery on a new purchase would be no better than delivery on an old purchase. As to forward deliveries, there is no interest.

In pig iron, the quotable market is strong, and in foundry pig there is a quotable advance of $1 a ton, to $44, valley, Bessemer remaining at $42.50, and basic at $43, but the foundry iron market is made simply by small prompt lots. What pig iron would bring for second half delivery, if forced on the market, can only be conjectured.

As to steel prices, the prices for the earliest deliveries are declining, as the mills making such deliveries had little tonnage on books and must force sales. Mills booked for from two to four months, and having lower prices, though still say $10 to $20 a ton above the Steel Corporation or Industrial Board prices, have not reduced prices, but do not need to at this time. The Steel Corporation continues its prices. The corporation's unfilled obligations at the end of April amounted to 10,359,747 tons, showing 467,672 tons increase during April, against increases of 389,994 tons in March and 216,640 tons during February. Actual bookings in April, however, were lighter, as the greater increase in unfilled obligations in that month was due to decreased shipments, April shipments amounting to about 60 per cent. of capacity, against shipments in March at about 96 per cent. Bookings may be estimated at 124 per cent. of capacity in March and 94 per cent. of capacity in April. When the bookings of the low seller decreased it may readily be concluded that the bookings of the higher sellers, the independents, decreased still more.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

WE CREATE THE DEMAND
ARE YOU MEETING IT?

The lines manufactured by CANADIAN POLISHES, Limited, are being NATIONALLY advertised. There is a big demand being created from coast to coast.

Are you getting your share of this profitable business?

RE-NU-ALL AUTO TOP DRESSING

A dressing prepared especially for auto tops of all kinds. Softens and preserves. Waterproofs. Leaves a rich, enamel, lasting finish.

KLEANALL AUTO BODY POLISH

Imports a bright and lasting finish to Auto bodies. Removes grease and dirt. Makes car look like new.

IDEAL SILVER CREAM

There is a big demand for this cream. It is giving satisfaction to users. Works quicker and polish lasts longer. Not injurious. Does not stick in chased parts.

STOCK THEM—DISPLAY THEM

These lines are in demand at this time of the year. Stock them and display them prominently. They are repeaters and make satisfied customers.

Ask your jobber. Write for catalog, in colors, showing the complete line.

When paint dries flat in spots—

You have seen a paint job which when dry showed flat finished spots and have no doubt wondered what caused it.

One reason is the oil used in the manufacture of the paint.

The oil, if linseed oil, has been made with the idea of getting every vestige of oil possible from the flax seed, even at the expense of the quality of the finished product.

There is a point in pressing the seed where the oil which is extended is a mucilageous substance. This in oil is most detrimental to the quality and causes the flat spots in a paint job.

Livingston Brand Oil never contains this matter. This is one of the reasons for Livingston Brand quality.

NOTE—This mucilageous matter left in oil cake meal enhances its value as a fattener. That's why Livingston Brand Oil Cake Meal is always highest quality.

The Kind Your Grandfather Used

Saves Slitting

Paper and Cloth

Save Time and Material

Carbalox Convenient Rolls hold a leading place in cutting ability. This wonderfully hard mineral is extensively used for Polished Bearings and Boxes in Metals, Aluminum, Brass, Copper and Steel Work.

It aids in reducing cost of production. The workman with a convenient roll at hand need waste neither time nor material in his efforts to produce the best results.

Casement Fastener

There will be a decided increase in the building trade this Spring. New houses will need new fixtures, for "built in" cupboards, bookcases and all similar door and window sets. Casement fasteners will fill all these requirements.

We manufacture Furniture Trimmings of all kinds, Sash Locks, Sash Lifts, Casement Fasteners, Door Pulls, Hat Hooks, Transom Catches, Key Plates, Flush Bolts, Sash, Push and Pull Plates, House Numbers, Door Knockers, Casement Adjuster, etc.

The Stratford Brass Co., Limited

Beatty Bros. Limited Bulletin

The photo above shows Mr. J. M. Thompson, the manager of Beatty Bros. Limited branch in Winnipeg.

The people of Winnipeg have shown very great appreciation of the Time Saver Washer and the same is true of the entire West.

Mr. Thompson managed our first Western Branch when it was established in Brandon and later took charge when it was moved to Winnipeg. In length of service Mr. Thompson is one of the oldest members of Beatty Bros.' staff, and is well known and liked throughout the West.

The Finish Sells It

Your customers may not know much about washing machines. The mechanical details are not what attract them in the first place.

The first thing the customer notices is the finish of the washer. That catches the attention first and it is important to have it attractive.

The BT Time Saver Electric Washer and Wringer is not only a great time and labor-saver. It could be those things and still not impress your customers by its appearance. But, as well as doing beautiful work and giving splendid service—**It looks attractive.**

The cypress lumber is the best we can get. The finish is sprayed on the machine and only the highest grade materials are used. Metal parts are finished in grey and gold. The trade mark is in yellow and red and the tub is highly finished in the natural colors of the wood.

Your customer must be **attracted** before they can be **interested.** They cannot fail to be attracted by the beautiful finish on the Time Saver. The finish makes it easy to sell.

TINKER TOM'S TALKS.

No. 260

The "Outlaw Strike"

is the latest aggravation. Railroad men in the mill district striking and throwing business into a complete state of suspension.

For this reason there's nothing doing at our plant — hundreds of tons at mill ready to ship—over two hundred tons in transit since early April (all paid for in the highly respectable inflated U.S. funds) but not a sheet here.

Our bunch all willing and anxious to work — most of the strikers working in auto plants.

CAN YOU BEAT IT?

TINKER TOM.

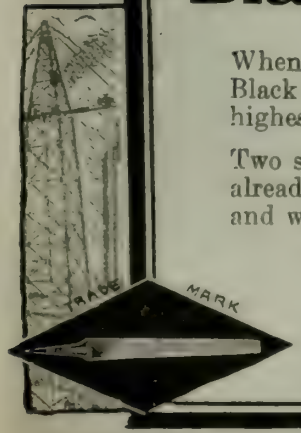
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works
G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

For Every Room

SILKSTONE

REGISTERED TRADE MARK

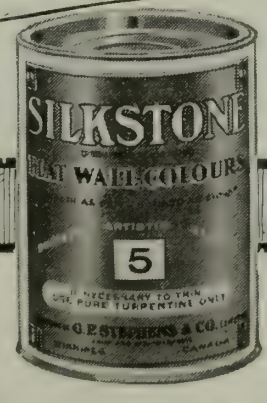
Flat Wall Colours

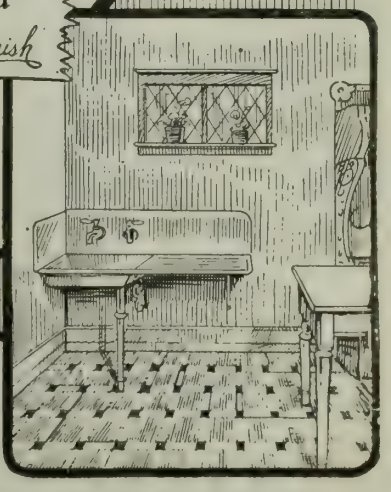
—beautiful, artistic colours that are suitable for every room in the house. Silkstone is not affected by steam or moisture and on account of its perfect uniformity, may be matched at any time. The twenty-five shades offer you an unlimited range of decorative schemes.

Nearest *Stephens'* agent will be glad to estimate quantity and cost for you. Ask him for Color Card.

G. F. Stephens & Co., Limited
Paint and Varnish Makers
WINNIPEG CALGARY EDMONTON

"Save the surface and you save all" *Paint & Varnish*





The demand for Stephens Paints is daily increasing through the influence of advertisements such as the one herewith, which are appearing in the leading Farm Journals, including—Winnipeg Grain Growers' Guide; Farmers' Advocate; Nor'-West Farmer; Weekly Free Press; Weekly Telegram; Western Home Monthly; Calgary Farm & Ranch Review; Montreal Family Herald & Weekly Star.

An unusual opportunity is presented to dealers to increase their paint sales and gain the goodwill of their customers, by keeping a full stock of Stephens Paints, and having them well displayed, in their store.

If interested, tear out this page and keep with letters to be answered.

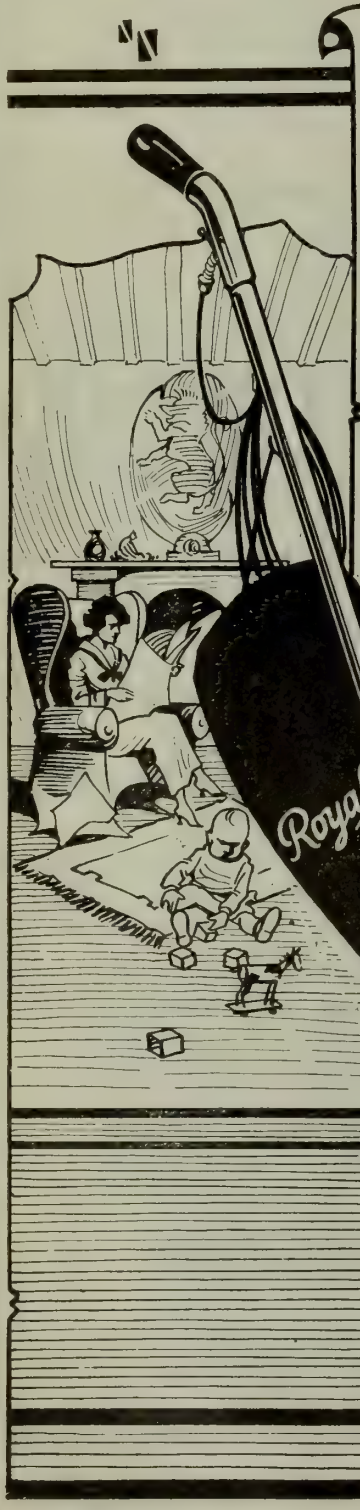
Merchants' Hardware Specialties, Limited

Calgary

Let the Royal Prove its Merit in *Your* Store



THE real test of an electric cleaner is how well and easily it will do the work in the home. Will it get all the deeply imbedded dirt in the rug as well as lint, hair, threads and litter on the surface? Will it clean under the beds, close to the base-boards and in the out-of-the-way places?

Will it remove germ-laden dust and dirt lodged in draperies, upholstery, mattresses, walls, ceilings, closets, stairways and other un-get-at-able places?

Is it light in weight, easy to operate, economical and thorough?

To thousands of women the Royal has proven a household blessing because it satisfactorily answers all of these questions.

Just a touch of the handy switch on the handle, and the powerful, cleansing air stream is ready to save hours of heart-breaking, back-straining household drudgery.

Let us send a Royal to your store and let you try it yourself. A few minutes trial will convince you that it is the one vacuum cleaner for you to sell. There's a good profit too.

Morrow

High Speed and Carbon Twist Drills

Show Direct Profits

To the Dealer and the User

Because Morrow Drills actually drill more holes with less regrinding, effecting a direct saving on all drilling operations in the shop or plant. Such features impress the tool buyer and make him your permanent customer.

More than this, Morrow Drills provide a graduated thickness of the web giving strength where strength is needed to resist torsion. Morrow Drills cut faster, require less power.

Carbon Drills from Sheffield (England), Steel.

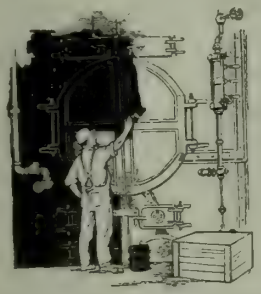
Barrett Roofings, Cements Industrial Paints etc.

ANY Product bearing the name of "Barrett" is first of all a quality article. It is also a fast seller because it insures customer satisfaction. The products described below are the result of long years of manufacturing experience and each of them is the best product on the market for its particular use.

Our advertising in the leading publications and newspapers is telling your trade that the Barrett trademark is always a sure pledge of dependability.



Everjet Elastic Carbon Paint

This high quality, moderately priced, protective carbon paint has the same base as the famous Barrett Specification Pitch. It is positively proof against weather, steam vapors, acids and alkalies. It can be used on either metal or wood and wears stubbornly under the most severe conditions.

Although Everjet Paint has been on the market less than ten years it is used extensively by railroads and large industrial concerns all over the Dominion.

It is particularly recommended for exposed metal surfaces such as machinery, farm implements, tin roofs, smokestacks, etc., as it gives perfect protection against rust—the greatest destroyer of metal.

Easy to apply and comes ready for use in the following sized containers: Barrels (about 40 gals.); ½ Barrels; 5 and 10-gal. cans and 1-gal. cans, Lithographed (cases of one dozen).

There is a big field for Everjet Paint in every community. You can recommend it to your customers with the utmost confidence.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market. Low in price—high in quality—long in service—easy to lay—thoroughly waterproof. Comes in three weights, light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 square feet. Nails and cement packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out felt and "Rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing at very small cost.

Put up in all sized packages from 1-pint cans to barrels of 40-gallons.

Elastigum Plastic Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Elastic Cement of a Thousand Uses."

Unequalled for patching holes in roofs, repairing flashings and gutters, stuffing cornices, etc., etc.

Comes ready for use in 1-lb. tins (24 to the case); 5-lb. cans (12 to the case); 25-lb. packages; 1-lb. packages; ½ barrels of about 300 lbs., and barrels of about 600 lbs.

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

An inexpensive and effective destroyer of flies, lice and vermin on livestock and poultry. Its use means healthier horses, fatter hogs and increased production of milk and eggs.

Creonoid is a sure and fast seller in every progressive farming community.

Comes in 1-gallon cans (12 to the case); 5 and 10-gallon cans; ½-barrels and barrels.

TRADE
PENBERTHY
MARK.

COMPODISK

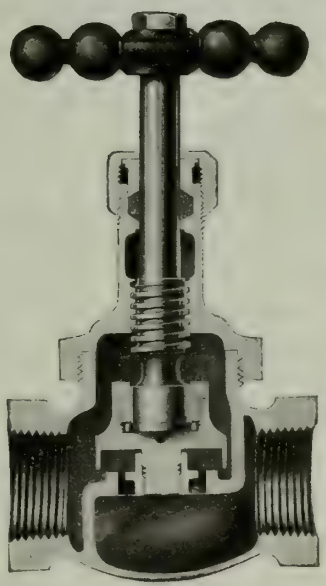

Fig. 550-S

Do You Sell Valves?

Every hardware merchant and plumber who sells brass valves should **"Compare Prices"** before buying.

A Better Valve for Less Money

Penberthy Valves are recognized as the highest grade valve on the market, but they are not the most expensive. They are stocked by leading wholesale houses throughout the country and are used in many of the largest manufacturing plants.

Be sure this name is on the valve you buy

MANUFACTURED BY

PENBERTHY INJECTOR CO., LIMITED
WINDSOR CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

A Gas Engine Oil (for gasoline engines).

Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machine Oil (for general use.)

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

Manufacturer's agent in Wellington, New Zealand, with large connection in Australia and New Zealand, is in a position to handle additional lines of Canadian manufacturers on a commission basis. Particularly interested in automobile accessories, sporting goods, and general hardware specialties. Apply to Geo. R. Irons, 23 Central Terrace, Wellington, New Zealand.

OR-ib-O

Round Coal Chute

This shows a wall in section so that our Round Coal Chute can be seen as it appears in place. The door of this serviceable coal chute is also made with a flange which fits over the rim of the frame, making it both wind and water proof. It is fitted with our self-locking device.

With walls under 12" thick, use No. 1 or No. 4. Over 12", No. 2 or No. 5.

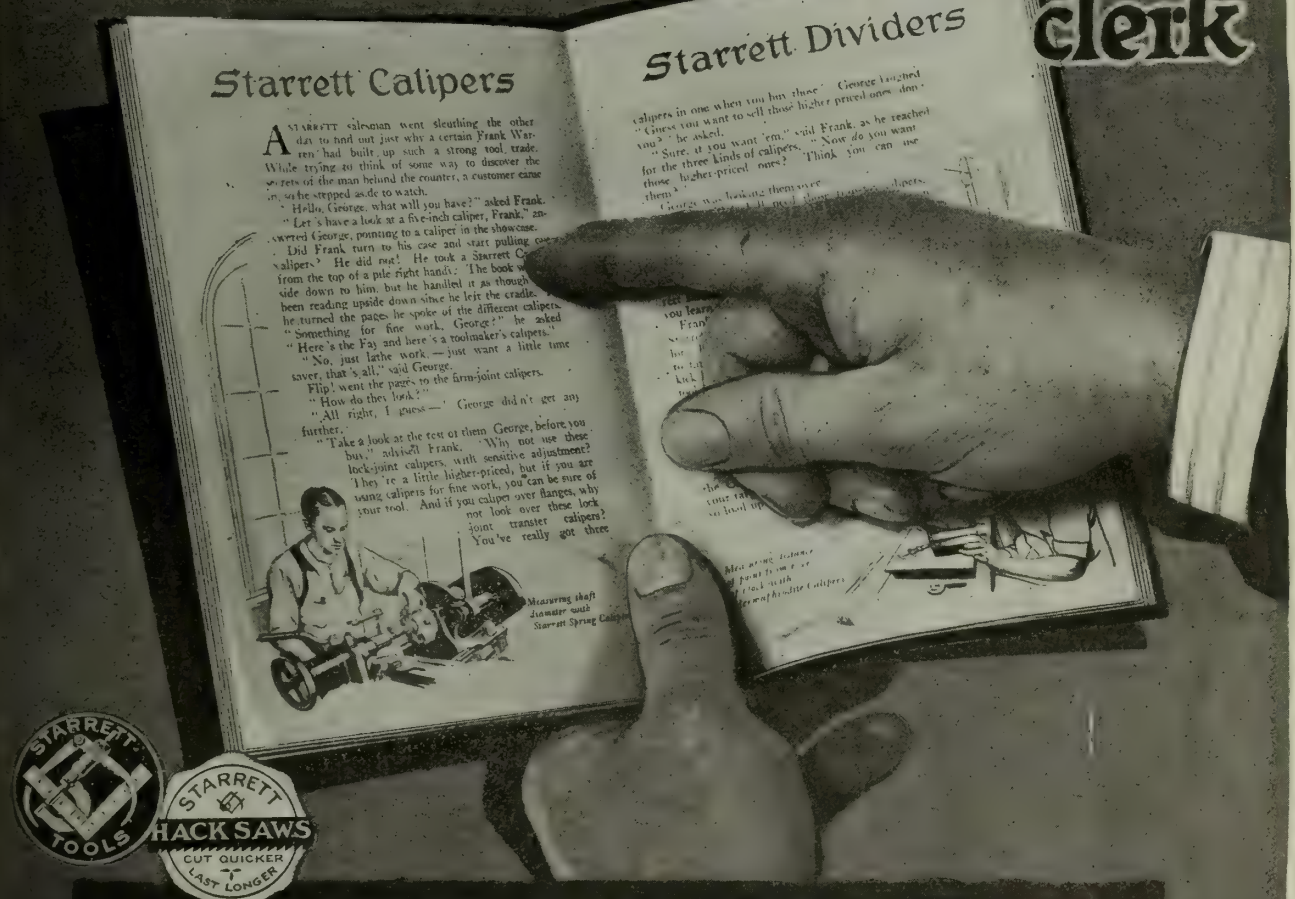
For You—
the hardware dealer and his clerk



STARRETT TOOLS

STARRETT HACK SAWS CUT QUICKER LAST LONGER

THE TOOLS MECHANICS BUY

Is the title of a booklet that will help hardware men sell Starrett Tools.

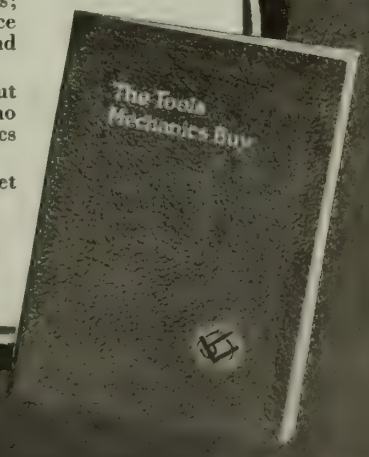
"Give me a surface gage," says the machinist. If he knows exactly the gage he wants—all right. But—

There are five kinds of Starrett surface gages. Take, for instance, No. 57 and No. 257. They look alike. Both are excellent tools. But if that mechanic needs a surface gage as a locomotive guide liner No. 57 will be almost useless to him. It's up to you to find him the right gage.

Talking points on Starrett Micrometers; the fine points of Vernier Calipers; Height and Depth Gages and Test Indicators; points about Starrett Surface Gages, Rules, Tapes, Gages and Starrett Transits and Levels; all these and more are covered in this book.

"The Tools Mechanics Buy" is a readable little book; full of pointers about building trade through Starrett tools by assuring satisfaction to the men who buy them. No matter how well you know your stock, "The Tools Mechanics Buy" will interest you.

Ask us today for as many copies as you have clerks—and don't forget to get one for yourself. Sent free upon request.



THE L. S. STARRETT CO.

The World's Greatest Toolmakers—Mfrs. of Hack Saws Unexcelled

GOODELL-PRATT

1500 GOOD TOOLS

The Finish Helps To Make Sales Easier

Goodell-Pratt, the Toolsmiths, are constantly commended by dealers for their policy of putting an extra high-grade finish on each tool of the more than 2000 different tools this Company produce.

This really superior and uniformly distinctive finish gives Goodell-Pratt tools more definite character and greater attractiveness for the window and counter. It guarantees beyond any doubt the endurance of these tools in use. It adds much to the mechanic's pride of possession. It certainly increases their sale among house owners and men who drive their own cars.

Last, but not least, it firmly identifies the entire Goodell-Pratt tool line and the Toolsmith Store where that line is carried.

Goodell-Pratt tools are finished in trim red and black wherever an iron surface will take the paint; the steel is beautifully polished in contrast; and the full quality of the wood and grain in handles and similar parts is always brought out.

Even when customers don't look for Goodell-Pratt tools, they always look at them with admiring interest.

Goodell-Pratt Company

TRADE YALE MARK

Behind YALE Padlocks

and every other "Yale" product—Yale Night Latches, Door Closers and Builders' Hardware is the modern Yale plant at St. Catharines, Ontario.

Up-to-the-minute manufacturing methods, sound designing and construction practice, and the rigid Yale inspection system, make certain that every Yale product is fit for the purpose for which it is intended.

The trade-mark "YALE" on the product is our guarantee that it is.
"The trade-mark 'YALE' helps make the sale."

Canadian Yale & Towne, Ltd., St. Catharines, Ont.

'HEIRLOOM' PLATE

Artistic merit as well as character and harmony of design are exemplified in 'Heirloom' Plate.

While 'Heirloom' Plate designs are noted for their remarkable beauty, this exceptional silverware has the added advantage of enduring qualities obtained by an extra heavy plating of silver.

The beauty of design and finish in 'Heirloom' Plate are the result of the handiwork of skilled craftsmen—men who have had long training in fashioning nothing but the best in silverware.

You sell 'Heirloom' Plate with the positive assurance that you are selling the best---selling made-in-Canada productions that will give lasting satisfaction to your customers and increased prestage for yourself.

Here Is a Line That Is Growing In Demand

There has always been a need for a tough Kraft paper coated with asphalt to make it waterproof and durable. Therefore, when we put this paper on the market under the name

Climax Sheathing Paper

there was a demand waiting for it.

Climax is the ideal paper for damp-proofing, wind-proofing and insulating purposes. Architects and contractors recognize it as unexcelled for use between footing and foundation of buildings; between foundation and wall; underneath floors in houses; on walls before lath and plaster are put on.

Climax makes a building dry. It makes it cooler in summer and warmer in winter. It saves coal. With the large number of uses of Climax Sheathing Paper—and its exceptional quality considering its low cost—there is splendid opportunity for hardware dealers to build up a large trade for it in their localities. Our consumer advertising will assist them to increase their sales.

Have you had Samples and Prices

Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.
